Upon his retiring from the Gas-Light Company in 1849, Mr. Daggett devoted himself to the management of the Sectional Dock Company without intermission until he died, May 10, 1874, and his life was devoid of incidents beyond those pertaining to active business pursuits. He was successful in his commercial enterprises until the latter portion of his life, and accumulated a large fortune, much of which was invested in real estate. Two or three years before he died he engaged in a saw-mill enterprise in East St. Louis, but owing to his advanced age was unable to give the matter personal attention. Reverses followed, and before his death his large competence was entirely swept away.

Mr. Daggett was connected with the Masonic fraternity from its establishment in Missouri, and was initiated in Missouri Lodge, No. 12, in 1818, the lodge then working under the jurisdiction of the Grand Lodge of Tennessee. In April, 1821, he was one of the delegates to the convention which formed the Grand Lodge of Missouri, and was the last surviving member of that body. He filled every office in the lodge, from Junior Deacon in the West to Worshipful Master in the East, was two years Deputy Grand Master, two years Grand Secretary, and seven years Grand Treasurer of the Grand Lodge, and was treasurer of five distinct lodges at the time of his death.

All through his long, busy, and useful life Capt. Daggett was noted for those qualities of head and heart which gain the esteem of men. He was particularly distinguished for his firmness of character and strict integrity. He was gifted with quick perception, sound judgment, and comprehensive views, which, added to a presence personally imposing, made up a character that strongly impressed itself upon all who were brought within the sphere of his influence. His heart ever beat with generous and noble impulses, and his hand was always open to the appeals of the less fortunate. He left a wife, who is still living, several daughters, and numerous grandchildren and great-grandchildren, all of whom received signal proofs of his large-heartedness, and sacredly cherish his memory as that of a kind husband, an indulgent father, and a careful protector.

The enlargement of the boundaries of the city by the act of Feb. 15, 1841, rendered necessary the organization and establishment of the "Engineer Department," under the supervision of the city engineer. The ordinance of the 16th of February, 1842, intrusted to this department the duties of "surveying, planning, contracting for, superintending, and constructing all public works." The department was composed of "the city engineer, a street commissioner, and superintendent of the water-works." The "Mound Market" and "West Market" houses were provided for by ordinances and erected, and the office of city counselor was created. The inspection of flour was established and regulated by ordinance of March 30, 1842; and in consequence of the crowded situation of the streets around the Centre Market during market hours, and of the inconvenience occasioned thereby to drays, carts, wagons, and carriages, a stand was created by ordinance for the sale of hay, fodder, straw, grain, fish, melons, etc., brought to the city by wagons, and the place of sale was located at the landing and wharf east of Front Street and south of Market Street, and it was placed in charge of the clerk of the market. The "broker" was declared by ordinance to be any person or persons or body corporate or politic dealing in gold or silver coin, bank-notes, treasury warrants, bills of exchange, bank-checks, promissory notes, or other evidence of debt, and a tax by license of one-fourth of one per cent. on the capital employed was levied by ordinance. The work of further improving the harbor was prosecuted with an appropriation of three thousand dollars for making a breakwater on Kerr's Island. The offices of lumber-master and of inspector of beef and pork were created during this year.

The City Council, by ordinance of Feb. 9, 1843, resolved that whereas the commerce of the Ohio, Missouri, and Mississippi Rivers and the great Northern lakes was of vital importance to the United States, "and as, it is believed by many, a greater number of persons are employed in said commerce

than are engaged in the entire foreign and coasting trade of the country, and as these persons are exposed to many causes of disaster and disease from which navigation on the ocean is exempt, and as those engaged in the prosecution of foreign ocean commerce have been provided with the means of medical attention and recovery from the diseases and accidents incident to their employment in the trade and commerce of the country, and inasmuch as it is believed to be impossible for the State governments to unite in establishing and supporting a system of marine hospitals," a competent number of marine hospitals ought to be established and endowed on the Mississippi and its tributaries and on the great lakes, for the benefit of sick and disabled boatmen. After the plan adopted by the act of Congress of 1837 had been approved, a memorial was adopted requesting the senators and representatives from Missouri in Congress to obtain as soon as practicable a sufficient appropriation to carry out the views of the City Council. For the purpose of enlarging the existing water-works, the Legislature of Missouri was petitioned to allow the levying of special taxes. An ordinance for taking a census of free white males was passed, and the city was divided into five wards, the boundaries of which were defined by ordinance. All existing ordinances providing for the assessment and collection of the revenue and taxes of the city were collected and reduced into one by ordinance No. 1132, passed March 11, 1843.

By the act approved Feb. 8, 1843, "to reduce the law incorporating the city of St. Louis and the several acts amendatory thereto into one act," the corporate style was changed to that of "the city of St. Louis," the powers and duties of the "City Council" defined, the scope of the legislative power laid down, executive and ministerial offices described, elections provided for, and the regulations for the opening and improvement of streets and miscellaneous provisions clearly set forth.[1] The *Republican* of February 1st noted the first indication of an effort on the part of a portion of the people of the county to effect a division or separation of the county from the city. The agitation was continued until August, 1844, when a vote was had to determine the question of a division of the county, or a separation of the city from the county, so as to give each a distinct organization. It was decided in the negative. The following streets were defined by ordinance in 1843: Olive, Lucas, Locust, Orange, Morgan, Gay, Franklin Avenue, Wash, Carr, Biddle, Ashley, O'Fallon, Bates, Davis, Smith, Mason, Florida, Columbia, Mullanphy, Howard, East Mound, West Mound, East Brooklyn, West Brooklyn, Le Baume, Hempstead, Webster, Chambers, Madison, Jefferson, First, Second, Lewis, North Second, Collins, Sixth, Eighth, Ninth, Tenth, Eleventh, North Twelfth, South Twelfth, North Thirteenth, South Thirteenth, North Fourteenth, South Fourteenth, North Fifteenth, South Fifteenth, North Sixteenth, South Sixteenth, North Seventeenth, South Seventeenth, North Eighteenth, Walnut, Clark Avenue, Spruce, Poplar, Cerré, Randolph, Austin, Gratiot, Chouteau Avenue, Papin, Soulard, Morrison Avenue, Centre, Scott, Paul, Provenchere, Boone, Stoddard Avenue, Laveille, Morton, St. Ange, Dillon, Grattan, Second Carondelet Avenue, Tagon Avenue, Carondelet Avenue, Barry, Miller, Marion, Carroll, Soulard, Lafayette, Emmet, Calhoun, Gravois, Lesperance, Picotte, Trudeau, North Trudeau, South Trudeau, Duchouquette, Lami, Barton, Victor, Sidney, Anna, McGirk, Louisa, Lynch, Lane, Bent, Saugrain, Arsenal, South Seventh, Fulton, Decatur, Buel, Menard, Rosatti, Hamtramck, Russell, Closey, Linn, Delhaw, Jackson, Congress, Columbus, De Kalb, Kosciusko, Easton, Front, eastern line of Front, and the wharf.

The office of harbor-master was created by ordinance No. 1215, Aug. 4, 1843, and the office of street inspectors, whose duty it was made to superintend the cleaning of streets, alleys, avenues, market-places, and public squares, was also created. The health department, as provided for by ordinance No. 1239, Sept. 2, 1843, was made to consist of the health officer and one member of the board of aldermen from each ward. Street inspectors were placed under the orders of the board, and particular supervision of the health of the city, the cleanliness of streets and highways, lots, yards, buildings and inclosures, and the smallpox and other hospitals was given to the board. The health officer was appointed every six months, and selected alternately by the mayor from the professors of the Medical Department of Kemper College and that of the St. Louis University. St. Louis cemetery was located by ordinance in blocks Nos. 48 and 53.

The "great flood" of 1844 was an event fraught with so much loss and destruction of property that the City Council set up a "monument, made of a single block of limestone," within the line of the curb-stone of Front Street, in front of the centre of the town hall, and caused a line to be distinctly cut showing the highest point attained by the water during the rise of that year, and lettered with the record of height attained by the water in 1785, 1823, and 1828.

At the municipal election of this year (1844) Ber-

[1] Joseph A. Wherry, for many years register of the city, died on the 13th of February, 1843.

nard Pratte was elected mayor. The canvass, in a great measure, turned upon the provisions of the charter as to tax receipts of voters, and which party was responsible for the provisions that required the payment of taxes as a condition precedent to voting. By the original act of incorporation of the city, passed in 1822, no man could be a voter at a city election unless he had paid a city tax. Persons owning real estate in the city, but residing out of the city, if citizens of the State, were entitled to vote. No person could be elected mayor or a member of the Council (which then consisted of the board of aldermen alone) unless he owned real estate. This charter was submitted to the vote of the citizens for their acceptance or rejection, and they accepted it.

In commenting upon this charter during the canvass, the *Republican* of March 30, 1844, said, "This charter, continued, with few unimportant changes, until 1835, when it was revised by Mr. Hugh O'Neil, then the chief pillar of Locofocoism in St. Louis, and a senator from this district. Mr. O'Neil revised the charter during the session of 1835–36, retaining the provision that no person should vote who had not paid a city tax, and giving to non-residents owning real estate in the city the right to vote, and providing that no man should be elected mayor or to the board of aldermen unless he owned real estate in the city."

The sharp practices of politicians of that day are illustrated by the charges that were made during the canvass.

"After the passage of the charter in 1835," we are told, "frauds were attempted to be practiced upon the charter by persons who looked upon the offices created by it as stepping-stones to power. For example, Mr. J. B. Bowlin, now a member in Congress, attempted to qualify himself for the office of mayor by virtue of a conveyance from some person of seven by fourteen feet of ground in the lower part of the city, which ground had been purchased in under the loan office sale, the judgment set aside, and the title afterwards found to be in another. Bowlin gave a mortgage, with the condition that he personally was not to be held responsible for the purchase money. The ground conveyed was situated in the rear of a lot, and without approach to it from any quarter. As the judge declined before the election, he re-conveyed the property. . . .

"Another provision of the charter was that every person paying a city tax was entitled to vote at the city election. Under this provision many expedients were resorted to. The Locos charged that the election of the spring of 1838 was carried by the 'dog-tax,' and that men who never owned a dog on the day of the election went and paid a dog-tax, and thereby qualified themselves to vote; nay, that clubs were formed to get out these dog-tax certificates. Again, persons who bought water from the city claimed under their water license the right to vote at elections. All these things produced some excitement and much confusion on the approach . . and during every city election."

The election was a very animated one. Long before the polls opened in the morning, at an early hour, men of both parties were on the alert, and one correspondent says he "never knew Whigs to work more earnestly, more faithfully, or more unitedly than they did on this occasion." As a consequence they elected every regularly nominated Whig, except three members of the City Council. Bernard Pratte, their candidate for mayor, received the very decided majority of three hundred and sixty-two. The majority the previous year had been one hundred and fourteen in favor of the Democrats, being a gain within twelve months of four hundred and seventy-six out of a total of four thousand one hundred and fifty-four votes cast for the two mayoralty candidates. The official returns of the election were (names of Whig candidates in *Italics*):[1]

In honor of the victory the presidents of the Clay Clubs in St. Louis issued an address "to the Whigs of Missouri," appealing to them to raise the standard of "Henry Clay and Protection to American Industry," and redeem Missouri. The address was signed by John H. Ferguson, president First Ward Clay

[1] When Senator Benton offered his vote at the Fourth Ward poll at the November election it was challenged by a Whig upon the ground that, notwithstanding he was a United States senator, he was not a citizen of the State. He was sworn, and upon his statement that he considered St. Louis his place of residence he was permitted to vote. It was rather singular to see the representative of a State compelled to swear whether he was a resident of the State or not.

Club; Thornton Grimsley, president Second Ward Clay Club; James H. Lucas, president Third Ward Clay Club; P. G. Camden, president Fourth Ward Clay Club; A. Carr, president Fifth Ward Clay Club; and Nathaniel Childs, Sr., president Sixth Ward Clay Club.

In April of this year (1844) Judge Carr placed in the hands of the mayor, to be laid before the Council, an offer to present to the city a square of ground three hundred by two hundred and sixty feet, bounded south by Wash Street and north by Carr Street, one-half east of Sixteenth Street, so that this street should run up to and pass around the square. He proposed to give the square to the city upon the following conditions, and desired the right as long as he lived to improve it, under the direction of the Council, by planting rare trees and plants, or in any other manner: "1st. The square to be inclosed, leveled, and graded. 2d. To remain forever as a public square, without the power to convert it to any other uses or purposes, and to revert back should these conditions be violated. 3d. The right to be reserved to Judge Carr to place a plain limestone column or pillar in the centre of the square, with an inscription commemorative of the gift. 4th. Judge Carr to be exempted from the payment of his taxes, amounting to about five hundred dollars, for the present year."

Notwithstanding the contract made with the Gas-Light Company in 1840, the city was not lighted with gas in 1845, and resolutions were passed by the City Council looking to the protection of the city in the reorganization of the Gas-Light Company as authorized by the act of Assembly. However, the city agreed to release the Gas-Light Company from the penalty of forfeiture upon its submitting another contract for lighting the city. Bernard Pratte was re-elected mayor in 1845.

By the act approved March 26, 1845, the city was authorized to borrow one hundred thousand dollars, to be expended for the improvement of the harbor, and by resolution the City Council directed the judges of elections, at the next election, to open polls for ascertaining the expression of the people's wish as to exercising the power conferred by the act. Bernard Pratte, after filling the mayoralty from 1844 to 1846, was succeeded at the municipal election in the latter year by Peter G. Camden, the Know-Nothing candidate, by a majority of three hundred and fifty votes. The same party carried both branches of the City Council.

Bernard Pratte was a member of one of the oldest and most honorable families of Missouri, and was born in St. Louis, Dec. 17, 1803. His father, Gen. Bernard Pratte, and his father's mother were both born in Ste. Genevieve, and his grandmother and her mother were born in St. Louis. His father was a respectable merchant, and filled various positions of trust and responsibility. From his education, his integrity, and the confidence reposed in him by the people, Gen. Pratte was an acquisition to Missouri, and was appointed one of its Territorial judges, a post which he held with entire satisfaction and filled with ability. He was patriotic in his feelings, and when war was declared in 1812 he commanded an expedition to Fort Madison, and served his country until a permanent peace was established. His great weight of character and unimpeachable integrity had a wide reputation, and during the administration of Mr. Monroe he was appointed receiver of public moneys at St. Louis.

Bernard Pratte, the younger, was sent early to the schools of the city, where he was kept until he was fifteen years of age, and then sent to Georgetown, Ky., where he remained until he graduated at that institution.

In 1821, Bernard Pratte returned to St. Louis, and commenced his business career under the tutorship of his father. He spent many years of his life in trading between St. Louis and New Orleans, doing a very extensive and lucrative business. He was taken in partnership by his father, and the firm of Bernard Pratte & Co. had an enviable reputation in the commercial world. They were extensive dealers in fur, peltry, and Indian goods, and successful in all their operations.

Bernard Pratte was always of a venturesome nature, and anxious to occupy a prominent position in his business. As late as 1832 no steamboat had navigated the Missouri as far as the mouth of the Yellowstone. The whole of the Missouri River had been explored as far as its source, and adventurous spirits had for many years traded with barbarous tribes of Indians living contiguous to the Rocky Mountains, but the river was so filled with snags and stumps that it was deemed too perilous to risk a steamboat in a current so filled with dangerous obstacles. Bernard Pratte, in connection with Pierre Chouteau, in 1832 resolved to attempt the passage of the Missouri as far as the Yellowstone, and successfully accomplished his undertaking. This feat established an era in the navigation of the Missouri River, and since that time the whistle of the steam-engine has been a familiar sound in the wild regions occupied by the Crows and the Blackfeet.

In 1833 the copartnership existing between Bernard Pratte and his father was dissolved, and a new firm established entitled Mulligan & Pratte. The

new firm came into being under favorable auspices, and maintained a high reputation until it was dissolved by the withdrawal of Mr. Mulligan in 1840. Mr. Pratte still continued in business until a new partner was taken in, and a firm was established known as Pratte & Cabanné, which had an honorable and successful existence for six years, when Mr. Pratte, having amassed an independence, retired from business. Two years before he gave up his commercial pursuits he was elected mayor of the city, which office he held for two terms. He was a faithful public servant, and carried with him in office those working qualities which formed the basis of his success in business life. He was diligent in advancing the interest of the city, and during his term of office the city was lighted with gas, and the Levee, on which the commercial business of the city was conducted, was properly paved.

In 1838 he was solicited to become a candidate for the General Assembly, and was elected to that body. He was also president and director of the Bank of the State of Missouri, and his opinions on all financial questions received attention and respect.

Mr. Pratte was married in 1824 toMiss Louisa Chenie, daughter of Anthony Chenie, of St. Louis.[1]

[1] In the course of an interview with a newspaper representative in November, 1879, Gen. Pratte, who was then living near Jonesboro', Montgomery Co., gave an interesting account of his early experiences in St. Louis. He said that his father came to St. Louis in 1794, and bought the property on the corner of Market and Main Streets, which Gen. Pratte then owned. On being asked to what period in the past his first impressions of St. Louis went back, Gen. Pratte said that he had a good recollection of St. Louis in 1808–9. He stated that in 1815 his father sent him to school in the interior of Kentucky, and soon after James H. Lucas also came there to school, and they one day put their heads together and drew a plat of St. Louis, locating the streets, public and private buildings, and not only this, but the name of every resident of each dwelling. Northwest of Second Street there were a few houses at that early day. The general said he had seen corn grow where the Planters' House now stands. He had killed wild ducks in the adjoining ponds, and deer were killed within the present limits of the city, not farther out than the present Thirty-fourth Street. The houses were built of logs or stone.

He said it was his impression that the first brick house was built by Judge William C. Carr, on Main Street, and that there had been a mistake current in reference to this matter. He had been told that the late Mrs. Hunt was of the same opinion with himself. In 1812 or 1813 Manuel Lisa built a brick house on the corner of Main and Chestnut Streets.

At that early day there was but little intercourse between St. Louis and the Eastern States, and less was known about it in Kentucky and Tennessee. Upper Louisiana having become a member of the Union, it was believed by those ill informed that the inhabitants were a mixture of aborigines, French, and Spanish.

The great earthquake in the Mississippi valley towards the end of 1811, which had the central seat of its power at New Madrid, produced its effects in St. Louis, which were well remembered by Gen. Pratte. He remembered the first quake. It was in the night. There was heard a rumbling noise, as of hundreds of wagons on the street. Cattle bellowed and dogs barked. The citizens were alarmed and panic-stricken, and all rushed out of their houses into the street. The shocks would last several seconds.

Gen. Pratte had a distinct remembrance of many of the events of the war of 1812. He remembered when his father, Gen. Bernard Pratte, departed from St. Louis in command of the expedition to Fort Madison, and he remembered when he returned. The general government left St. Louis without any protection. Before his father started out on the expedition north, there was an attack meditated by the Indians on St. Louis in 1812, and the plan was only prevented by information received in time of the meditated attack from a man named Dixon, who was a well-known trader among the Indians. The Indians who planned the attack were the Sacs and Foxes and Winnebagoes. The city was patrolled, and every precaution taken to guard against the threatened danger. "One night," said the general, "I was sent out by my father to close the outside shutters of our house, and amid the dimness of the light I caught the glimpse of a large Indian standing on the porch. I ran back and notified my father. He ran out, and accosting the Indian, demanded the object of his visit at that unseasonable hour. He said he came to communicate to Governor Clark something of importance in relation to a meditated attack. He turned out to be a chief of the Sac nation named Quas-qua-ma, and proved to have come with a friendly intent."

In the year 1832, Gen. Pratte said, he was deputized by his company, Pratte, Chouteau & Co., to build a steamboat for the service of the fur trade, which had extended to the far West. He built the boat at Cincinnati, and took her up to Pittsburgh to have her engines approved. From Pittsburgh he took a keel-boat in tow, and with it was the first to ascend to the mouth of the Yellowstone. It was supposed that steamboats, owing to the snags, could not get up to that point. The steamer was named the "Assinaboine." The keel-boat was intended for and used in the navigation up the Yellowstone as far as Rosebud, near the place where over forty years subsequently the Custer massacre occurred. The keel-boat was loaded with goods at Fort Union, at the mouth of the Yellowstone, which were traded for furs with the Crows. Gen. Pratte went up on the "Assinaboine," wh' h was burned about three years afterwards on her way down the Missouri. The first trip was made up and back to St. Louis in fifty-two days. In going up the river there were many villages, and buffaloes were seen in countless numbers. In crossing the river they fairly blockaded the stream. . . .

In 1836 the mail was thirteen days in coming from New York to St. Louis. The general said he started on a mail-coach from Philadelphia, and without sleeping, day or night, was twelv' days in coming through to St. Louis.

Peter G. Camden, who succeeded Gen. Pratte as mayor of St. Louis, was born in Amherst County, Va., May 23, 1801. His father, William Camden, and his mother both died in his infancy, and he was adopted by his uncle and aunt. After going through the usual routine of other schools, at the age of twenty he was sent to Washington College, Va. After leaving college he began the study of the law, and became a pupil under the instruction of Chancellor Taylor, an eminent jurist of Cumberland

County. His legal education being completed, he emigrated to Missouri in 1827. At this time the trade carried on between St. Louis and Santa Fé was becoming well established, and Mr. Camden determined to remove to New Mexico. He made every preparation for the journey, when an illness which attacked him at Old Franklin caused him to forego the intended project. He then returned to Virginia, and settling up his affairs again started for the West, and became a resident of Lincoln County, Ky., where he had an uncle who resided in that portion of the State. He married his cousin, Miss Anna B. Camden, Feb. 16, 1830, and for the seven ensuing years practiced with success his profession in that State.

Mr. Camden had always been of the opinion that Missouri would become one of the most populous and wealthy States in the Union, and he had always determined again to emigrate to her soil directly she had become a little older and more thickly settled. In 1837 he put his design in execution, and came to St. Louis, accompanied by two brothers of his wife. Abandoning the profession of the law, he established with them a dry-goods house, and the firm was known as J. B. & M. Camden & Co. This continued till 1840, when Mr. Camden became sole owner of the establishment, which he carried on for three years, and then commenced the provision business. In December, 1858, he again made a change in his business relations, and became a general commission merchant.

In politics Mr. Camden was identified with the old American party, and as its candidate became mayor of the city in 1846. It was during his administration that the city issued its bonds for twenty-five thousand dollars, which was used in purchasing stones to raise a portion of the eastern bank of the Mississippi, which threatened to forsake its old bed and make for itself a new channel through the American Bottom. The mayor strongly advocated the measure. The harbor of St. Louis was also considerably improved during his term of office. His administration was popular, and order was maintained in the most efficient manner.

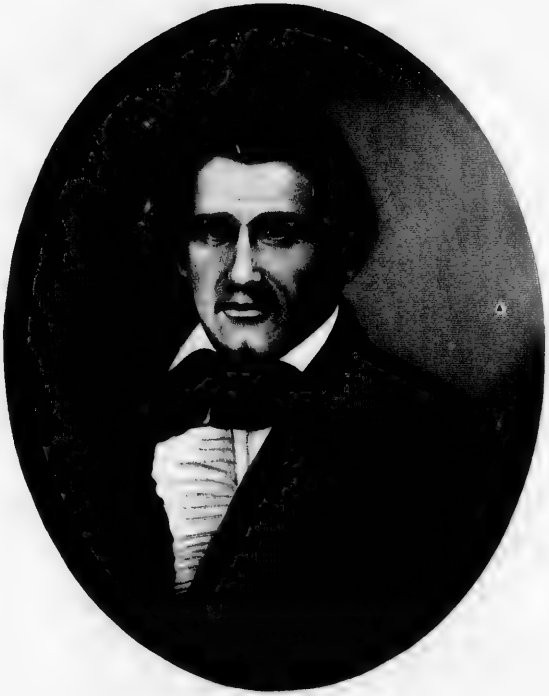
Mr. Camden was one of the first directors in the Marine Insurance Company after its reorganization, and for many years was a member of the Baptist Church.

In the fall of 1847 the city elections were carried by the Democrats, who elected Bryan Mullanphy mayor and the other city officers.

A meeting was held at the Planters' House on Saturday, June 26, 1847, for the purpose of selecting delegates to represent St. Louis in a commercial convention that was to be held in Chicago on July 5th, to take measures for the improvement of Western rivers and harbors. F. M. Haight was called to the chair, and A. B. Chambers made secretary. After some preliminary business had been transacted, the following gentlemen were selected as the St. Louis delegates to the convention:

Archibald Gamble, Henry M. Shreve, Andrew Christy, Kenneth Mackenzie, Trusten Polk, Thomas Allen, John O'Fallon, Isaac H. Sturgeon, Judson Allen, J. B. Brant, W. L. Williams, D. B. Morehouse, Edward Bates, E. R. Mason, N. J. Eaton, J. C. Swon, Wells Colton, A. B. Chambers, H. S. Geyer, Charles Keemle, J. S. Pease, E. W. Clark, A. H. Guild, N. E. Janney, G. Augustus Colton, James H. Allen, Luther Clark, George B. Mann, George B. Field, Adolph Paul, V. Staley, John J. Priest, James R. Sprigg, Wilson Primm, Reuben L. Anderson, J. C. Reynolds, William R. Simpson, J. M. Converse, Elijah Hayden, John McNeil, N. Aldrich, F. M. Haight, C. B. Lord, Samuel Treat, G. K. McGunnegle, J. E. Yeatman, Robert Wash, C. W. Shaumburg, James Clemens, Jr., Bernard Pratte, James H. Lucas, Robert Simpson, Lawrason Levering, Edward J. Gay, Dr. Richard F. Barret, George Collier, Samuel B. Churchill, J. B. Crockett, Joseph Throckmorton, Charles Mullikin, S. M. Bay, E. C. Angelrodt, John S. Watson, Thomas Baldwin, John Bredell, Milton Knox, Henry L. Coxe, John G. Powers, T. H. Warren, John Sigerson, J. S. Morrison, John H. Gay, Thomas Yeatman, Thomas Taylor, Dr. H. Lane, William Renshaw, L. V. Bogy, J. R. Barret.

Dr. Richard F. Barret, who figured prominently not only in the movement in behalf of public improvements in the West, but in various important enterprises which contributed largely to the development of St. Louis, was descended from an ancient and honorable family of French extraction which early settled in Wales. William Barret, together with Thomas, Earl of Lancaster (prince of the blood), and "about eighteen of the most notorious offenders," was condemned for the giant rebellion of the barons from the marches of Wales against Edward II. Shakespeare frequently quotes Barret's "Alvare." The Barrets were an old cavalier family, who emigrated to Virginia in the reign of Charles I., along with the Lees, their relatives; and Richard Barret, the grandfather, was a planter and minister of the Established Church, settled at the paternal plantation, Barret's Ford, near Petersburg.



William Barret, father of Dr. Richard F. Barret, born June 15, 1760, served as a captain of partisan rangers, now with Marion, now with "Light-Horse Harry" Lee's legion, through the North Carolina campaign; was at the battles of Guilford Court-House and Eutaw, was with the rear-guard of the American army in the famed retreat of Greene before Lord Cornwallis, and was at the surrender of Yorktown. On the march to Yorktown, it is said that, halting in Williamsburg, he came down early one morning to the old Raleigh Tavern, and, being feverish, lifted

town, it is said that, halting
e down early one morning
n, and, being feverish, lifted

barrel of water and drank out of the bung-hole. It is also related that his scouts were the first to bring intelligence of Tarleton's approach, thereby enabling the Legislature to escape from Charlottesville.

He married Dorothy Winston, own cousin to Patrick Henry's mother, and removed to Louisa County. The union was blessed with five children,—James Winston Barret, educated at William and Mary College, and subsequently a resident of Island Grove, Sangamon Co., Ill., where he filled offices of trust and emolument; William Dericott Barret, cashier of the Southern Bank of Kentucky at Greensburg, and a prosperous merchant of St. Louis; Mary Lee Barret, married to a distant relative of the same name, of Caddo Parish, La., and owner of the Galindo eleven-league claim on the Brazos, near Waco, McLernan Co., Texas; Nancy Barret, wife of Col. James Allen, of Greene Co., Ky., aide to Gen. Jackson at the battle of New Orleans; and Richard F. Barret, who was born in February, 1804, at the new home, near Greensburg, Green Co., Ky. Richard F. obtained the rudiments of classical knowledge from the Rev. William Howe, a learned Presbyterian divine. He pursued his studies with diligence and success, and was finally invited by Dr. Daniel Drake, of Cincinnati, Ohio, an eminent physician and surgeon, author of "The Principal Diseases of the Interior Valley of North America," to become his pupil, under his own eye and in his family. He obtained his diploma, spent some time in the hospitals of Philadelphia, traveled through the Eastern States, visited extensively in Virginia,—Louisa County, Richmond, Shirley, the Neck, Stratford, and Chantilly,—and was wont to speak with enthusiasm of the hospitality and hearty cheer with which he was greeted by relatives and friends, all calling him cousin, and some coming fifty miles to see him. Horse-races, fox-chases, merrymaking, and revels, lasting for a week, filled up the time.

He soon obtained a large and lucrative practice in his native Green County, Ky., where, in 1832, he married Maria, the daughter of Judge Richard A. Buckner, then congressman from the Green River district, and afterwards Professor of Law in the Law Department of the St. Louis University.

In 1833 he removed to his thousand-acre farm near old Berlin, Sangamon Co., Ill., he having previously entered and improved the same. He imported, bred, and raised fine stock,—horses, cattle, and hogs. Mr. Brown, one of the cattle kings of Illinois, now lives on the same farm. He bought largely of government lands in the military district between the Illinois and Mississippi Rivers in 1835, and in 1838 transferred his operations to the Black Hawk country, now Iowa, and at the head of a company, of which Riggs, the banker of Washington City, was one, invested eighty thousand dollars at the land sales of 1838–39 at Burlington and Dubuque.

He removed to Springfield, Ill., and became land commissioner and director in the State Bank, and interested in the then so-called internal improvements, Meridosia Railroad and Chicago and La Salle Canal; also lessee, with Col. Buckmaster, of the Alton penitentiary, and president of the Burlington, Iowa, Land Company.

In 1840, Dr. Barret, Dr. Joseph N. McDowell, and others organized the Medical Department of Kemper College, St. Louis, now Missouri Medical College, and Dr. Barret was made Professor of Materia Medica and Physiology. About the same time he became a member of the firm of Wm. Nisbet & Co., bankers.

He erected the Barret House, Burlington, Iowa, in 1844; and in conjunction with Col. O'Fallon, Judge Scates, and Governor Casey, built the first railroad in the State of Illinois that operated successfully, viz., the road extending from their coal banks at Caseyville to the Mississippi River. The Ohio and Mississippi Railroad now runs over this track.

He was intimately acquainted with the prominent business men and politicians of the day, among his personal friends being Clay, Benton, Logan, Douglas, Trumbull, Browning, Walker, and Grimes; but as a general thing he was averse to politics and mere politicians. Abraham Lincoln, a few years younger and born in an adjacent county, was his stanch and lifelong friend.

Dr. Barrett died after a short illness, May 16, 1860, at the Barret House, Burlington, Iowa, whither he had gone on business. His personal appearance was eminently noble and engaging,—a figure tall, graceful, and courtly, and a countenance of the Roman model. Though at times irascible, his disposition was usually gentle and amiable, and his home at Rock Springs was the centre of unostentatious hospitality. His pride of race and scholarly habits made him appear exclusive and aristocratic, but his impulses were ardent, and his manners polite and engaging.

The act of the General Assembly approved Jan. 6, 1847, drew a distinction between the collection of revenue in the "new limits" of the city that were added by act of Feb. 15, 1841, and that collected in the old city, and required the assessors' books to be so kept as to show how much revenue was derived from property in each division of the city. That law set apart one-fourth of the revenue each year collected within the "new limits" for the improvement of streets within said "new limits."

In 1848, Hon. J. M. Krum was elected mayor. John Marshall Krum was born March 10, 1810, near Hudson, N. Y. The name is German, and was formerly, and is now in North Germany, as well as in New York, spelled Krumm. His grandfather, Henry Krumm, was a native of Hamburg, and with his two brothers was a ship-owner, sailing ships from Bremen. The Krumm brothers came with their ships and families to America about the year 1760. The eldest settled at Old Point, Va., the second at Philadelphia, and the youngest (Henry) in New York, but later (about 1785) removed to Hillsdale, near Hudson, on the Hudson River, Columbia County, N. Y. From these brothers sprang the families whose names are variously spelled in different States, Krumm, Krum, Crume, Crum, Crumb, Crump, etc.

Judge Krum's father was a native of Hamburg, and came with his parents to America in 1760, as above stated. His mother was a lady named Trowbridge, a native of Leeds, England.

His parents were not wealthy, but were well to do, and young Krum enjoyed good educational advantages. He attended the district or public schools, then the Smith Academy at Albany, and later Fairfield Academy, New York, where he was fitted for college. He also acted as tutor at the academy in Latin and mathematics for about a year. In 1829 he entered Union College, but at the close of the first year an affection of the eyes compelled him to leave that institution, and he began the study of law. He did not return to college, but afterwards matriculated on examination.

In 1833, Mr. Krum was admitted to the bar, and in the fall of that year removed to St. Louis. In 1834 he was admitted to the bar by the Supreme Court of Missouri, but having property interests in Illinois, and becoming concerned in litigation in that State, he removed in 1835 to Alton, retaining, however, an office and his practice in St. Louis.

Alton had then about one thousand inhabitants, and there was but one other lawyer there. As was the custom in all the Western States in those days, Mr. Krum rode "the circuit," practicing in several different counties, and secured what would be regarded even now as a large and remunerative practice. He invested in real estate at Alton and other towns, and became in time quite a large land-owner. These investments resulted favorably.

In 1836 he was appointed by the Governor judge of probate for Madison County, and in 1837 Alton was incorporated as a city, and Mr. Krum was elected its first mayor.

During his mayoralty (in November, 1837) occurred the now historic "Alton riot," in which Elijah P. Lovejoy, an editor of anti-slavery proclivities, who had been mobbed in St. Louis for his abolition teachings, was shot and killed. The affair caused great excitement among the anti-slavery people, not only of this country but of Great Britain; and as it was not generally known that the young city of Alton had no organized police force (only one justice of the peace and one constable), the authorities were naturally denounced without stint for failing to suppress the outbreak and to prevent Lovejoy's murder. In this connection an interesting incident happened to Mayor Krum. In 1838 an immense anti-slavery meeting was held in New York, and Mr. Krum happened to be in the city, the guest of an anti-slavery leader, with whom he went to the gathering, where for about an hour he listened to all sorts of abuse of himself for failing to put down the mob. Finally his host, without consulting him, announced to the startled assembly that the *mayor of Alton* was present, and no doubt the meeting would like to hear him. Mayor Krum thereupon mounted a table in the centre of the vast building, and spoke to the excited audience for about an hour, giving an exact and minute account of the affair from beginning to end, and demonstrating the injustice of the denunciations everywhere heaped upon the mayor of Alton. He spoke so conclusively that the meeting unanimously passed a resolution completely exonerating the mayor and city authorities from all fault or blame in the premises.

In 1838 (while absent from the State, and without his knowledge) he was elected State senator from the district to which Madison County was attached (embracing several counties), but his business and other considerations obliged him to decline the office and the honor. While a pronounced and aggressive Democrat, he had no taste for political life, and felt anxious to shun the enticements and snares which lie in the path of every politician.

In October, 1839, Judge Krum married in Massachusetts a daughter of Chester Harding, the celebrated artist, and in the following year established his home in St. Louis, where he has since resided. Among the members of the St. Louis bar at that time were a number of lawyers who ranked with the ablest in America or England; but Mr. Krum was not discouraged at having to contend with such opponents. On the contrary, this competition proved a stimulus to greater effort, and he welcomed it as an advantage. He at once gained and held a full practice, especially in land cases, for the land litigation of Missouri (now somewhat historic) was then fast

reaching its culminating point. "It was a positive pleasure," Judge Krum says, "to meet as antagonists in the judicial forum such eminent lawyers as Geyer, Gamble, Spaulding, Bates, Lawless, Field, Leslie, and others scarcely less distinguished and then in full practice." As to Judge Krum's own success, the records may be permitted to testify, and they show that as a member of the St. Louis bar he has been engaged in a greater number of cases than any other lawyer who has ever practiced in St. Louis.

In 1843 he was appointed judge of the St. Louis Circuit Court, and held the office for about five years, at the expiration of which he resigned. In 1848 he was solicited to run for Congress, but declined. During the same year, however, he was persuaded by the Democrats to stand for the office of mayor, and was elected by over five hundred majority over Luther M. Kennett, one of the ablest and most popular citizens of St. Louis. In fact, he was the first Democrat ever elected to any office in St. Louis, the Whigs having from time immemorial ruled the city.

During his administration the harbor was improved by the building of the dyke across the east channel of the river from Bloody Island to east main shore, the special tax ("mill tax") for the support of public schools was first levied, and the sewer system was originated. Mayor Krum drew the bills for these great measures, and secured their passage by the General Assembly. His recommendations in a special message in regard to sewers have been followed ever since. During his administration, also, the bonded debt of the city was considerably reduced, and upon the results of his mayoralty Judge Krum looks back with the satisfaction which naturally springs from the consciousness of work well done and the approval of his fellow-citizens.

From the first he took an active part in organizing the public school system, and for ten consecutive years was a member of the board of education. In 1855 Washington University was organized, and he has been a director in it and a member of the educational committee from the beginning to the present time. Upon the organization of the St. Louis Law School, he served five years gratuitously as professor in different departments.

Notwithstanding his disinclination to hold office he has taken an active part in politics, and served as delegate to the Democratic National Conventions of 1844, 1852, 1856, and 1860. Upon the latter occasion he was chairman of the committee on credentials, and his report (which settled the character of that body) caused an excited debate, in which he participated, and its adoption by the convention was followed by the secession of most of the Southern delegates and the nomination of Mr. Breckenridge. He championed the cause of Mr. Douglas from the beginning, and during the campaign of 1860 made not less than one hundred speeches in Missouri, Illinois, and New York in support of Douglas as the national Democratic candidate.

When the war broke out, Judge Krum, in a speech at the court-house on the evening following the reception of the news from Fort Sumter, denounced secession as the work of the Democratic party, and formally withdrew from that organization. He then declared himself as an earnest supporter of the government. In 1862 he accepted the colonelcy of the Ninth Regiment Missouri Militia, jocularly known as the "Bloody Ninth," because for nearly two years it performed guard duty over the prisoners in St. Louis, which, as well as the State, was under martial law from 1861 to 1864. Since the war Judge Krum has acted with the Republican party in Missouri.

While on the bench Judge Krum published "Missouri Justice," a work received by the profession with great favor, and which is a valuable record of his industry and zeal as a lawyer.

Judge Krumm is a patient and untiring worker, and this is probably the secret of his having accomplished so much. He is blessed with good health, and during forty years has never had occasion to avail himself of the services of a physician. Enjoying the gift of a "sound mind in a sound body," he is still engaged in the quiet practice of his profession, and expects to be so employed for the remainder of his life, a life, it may be added, that has been as useful and as worthy of regard as it has been busy and unpretentious.

In his message to the Council in 1848, Mayor Krum called attention to the importance of improving streets in the "old limits," specifically designating the grading and macadamizing of South Third, Labadie, Hazel, Mulberry, Cerre, Poplar, Spruce, Gratiot, Market, Seventh, Wash, and Cherry Streets. This elicited an expression of opinion on the part of the physicians of St. Louis as follows:

"St. Louis, May 15, 1848.

"The undersigned, being requested to express their opinion as to the effects produced upon the public health by the dust which arises in such large quantities from the macadamized streets in St. Louis in dry weather and fills the atmosphere, beg leave to state,—

"First, That it is extremely deleterious to the eyes, producing inflammation of those organs.

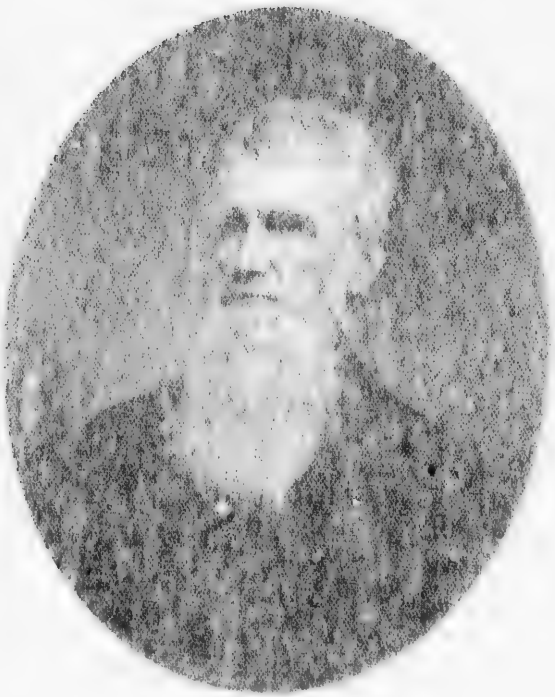
"Second, That, being inhaled into the air passages, it produces various diseases of those parts, such as chronic laryngitis, bronchitis, consumption, etc.

"R. P. Simmons, Thomas McMartin, James Sykes, A. B. Pope, M. Martin C. J. Carpenter, J. W. Hall, Charles W. Stevens, John Laughton, James Blake, John B. Johnson, Silas

Reed, J. H. Johnson, G. W. Phillips, Hardage Lane, John B. McDowell, Joseph N. McDowell, Reuben Knox, J. J. Clark, John Shore, W. S. White, T. J. White, B. F. Edwards, Stephen W. Adreon, M. L. Linton, M. M. Pallen, R. S. Holmes, J. McDowell, Jr., W. M. McPheeters, Edward B. Smith, William Vanzant, S. M. Jacobson, Robert P. Chase, F. Knox, Alexander Marshall, Robert M. Jennings, S. T. Watts, William A. McMurray, R. B. Ellis, J. S. Moore, M. E. Cook."

Comptroller D. H. Armstrong set down the total indebtedness of the city May 8, 1848, at $1,036,121.63, of which $206,950 paid interest at ten per centum, $35,500 interest at eight per centum, $79,000 interest at seven per centum, $672,860.79 interest at six per centum, $25,000 interest at five per centum, and $16,810.84 paid no interest. The estimated value of public property belonging to the city was $1,120,000. The municipal elections in 1849 resulted in the choice of James G. Barry for mayor by a vote of 3181 against 3038 cast for Mr. Foster.

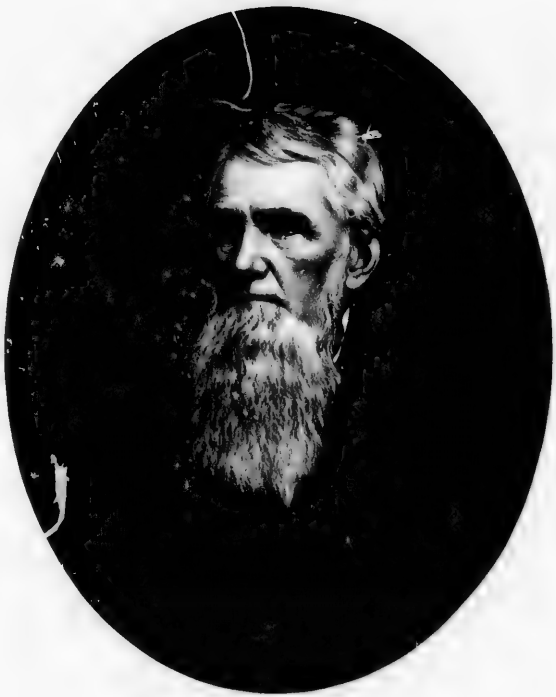
The condition of the streets in 1849 was such that a writer in one of the newspapers said, "All will concede that some change is necessary, and any change must be for the better. There is not a city in the United States expending the same amount of money for this purpose that is half so filthy as St. Louis, and we may safely say that there is not one in the world which could be cleaned with so little expense if a proper system was introduced."



Both fire and the cholera visited St. Louis in 1849, the damage caused by the former necessitating an ordinance "authorizing and allowing the owners of property in the burnt district to deposit on the Levee, under direction of the harbor-master, all the rubbish, stone, or bricks they may wish." The City Council in the same year passed an ordinance providing for the opening of Main Street, from Locust to Market Street, to the width of sixty feet, the cartway of the same to be thirty-two feet, and sidewalks on each side fourteen feet. Should it become necessary to take private property for that purpose, the mayor was authorized to appoint a committee and proceed as directed in the city charter.

Luther M. Kennett was elected mayor in 1850, and in his message, October 14th of that year, speaks particularly of the condition of the quarantine, "the only matter specially confided" to the superintendence of the mayor. The ordinance establishing the quarantine (No. 2417, April 29, 1850) located the same on Arsenal Island, which had been selected in 1849. On the 4th of May, 1850, the ordinance went into operation, and was strictly enforced until the 16th of August. Comfortable buildings were erected to accommodate five hundred persons, but more than that number were accommodated. The ordinance required all boats coming to or bound for the city of St. Louis, before landing, to touch at quarantine, and land all emigrants or others recently from shipboard, and all sick, diseased, or unclean persons, with their stores and baggage, provided the officers at quarantine so ordered. Under this regulation about two thousand five hundred persons were detained from three to five days, and one hundred and twenty who were sick a longer time. About eight hundred emigrants were paupers, and had to be supported by the city. During this administration the work on the dike at Bloody Island was finished, and the improvement of the wharf between Locust and Plum Streets was pushed forward rapidly. The mayor called the attention of the City Council to certain desired amendments of the charter, emphasizing the necessity for authority to "cure informalities in the action of the City Council in the disposition of the city common;" to take possession of the entire landing of the city, and cause the same to be condemned for public use; to borrow money to pay off arrears against the city; to complete Biddle Street sewer; to provide for finishing the buildings on Centre Market Square; to pay the excess over appropriation for water-works; to complete the harbor improvements; and to improve the parade-ground, and to purchase and beautify other grounds for public places. The aggregate amount required for these purposes added to the existing debt would make the latter about two million dollars. Comptroller George K. Budd showed in his report for this year that the total valuation of real estate owned by the city, excepting city commons and public wharf, was $753,913.81, and that the city commons covered an area of 519.19 acres, the value, with improvements, being $581,391. The bonded debt of the city was $1,192,992.57, the last of which falls due in 1895. Against this sum the assets when credited left a balance in favor of the city amounting to $517,385.55.

This favorable showing of the city's finances was perhaps owing to the excellent management of Comptroller Budd, who was in his day one of the best financial officers in the country.



George Knight Budd was born in Philadelphia, Feb. 12, 1802. He was the son of George Budd and Susanna Britton, a combination of two old and celebrated families of New Jersey and Pennsylvania, originally from England. In early life he was engaged in maritime pursuits as supercargo for Henry Pratt, of Philadelphia, a well-known merchant of that period, and visited the Mediterranean, South America and the British Indies. In the fall of 1835 he visited

the West with a view of selecting a locality for mercantile pursuits, and after seeing Cincinnati and Louisville came to St. Louis. His practical eye at once enabled him to see the future advantages offered by the latter city, and he decided to embark in business here. In the spring of 1836 he arrived with a stock of merchandise, bringing his family with him. He came to St. Louis in the same year with Wayman Crow, between whom and himself there existed a warm personal friendship. After two or three years he abandoned the mercantile business to engage in banking with Andrew Park, under the firm-name of Budd & Park, doing a successful business. Their office was located on Main Street close to where the State Savings Institution used to stand. Upon coming to St. Louis, Mr. Budd at once became interested in every measure which promised to promote the interests of the city, and exhibited so much spirit and enterprise that as early as 1846 he was elected to the Council from the Fifth Ward, with Reuben Knox, Peter G. Camden being mayor at that time. In recognition of his financial abilities he was elected comptroller under Mayor Kennett in 1850, but before his term had expired he resigned in order to take charge of the management and publication of the *St. Louis Intelligencer*, which to a great extent was started by the merchants of St. Louis that they might have the benefit and advice of Mr. Budd in financial and commercial matters. J. B. Crockett, who subsequently became one of the judges of the Supreme Court of California, was editor, and later the position was filled by E. A. Lewis, who afterwards became a Supreme Court judge in Missouri, and is now an honored member of the St. Louis Court of Appeals. Mr. Budd acted as publisher of the *Intelligencer* for three years, and when he retired in 1853 was presented with a magnificent silver pitcher, goblet, and tray, as a voluntary testimonial from the employés of the establishment. In 1852 he represented the Third Ward, together with John J. Anderson and Louis A. Labeaume. One result of his labors was the purchase of the first public square or park in the city. In securing the passage of an act for this purpose he incurred the abuse of a leading newspaper, which dubbed the piece of ground on Twelfth and Market Streets, now called Washington Park, as "the big gully, or Budd's folly," by which it was known for several years, and so great was the opposition to such an enterprise that it was many years before any steps were taken to improve it. From this germ, planted under such hostile influences, has grown the park system of St. Louis, which has graced the city with its numerous breathing-places of public resort. For years he had the agency of several large insurance companies, his office being under the old Monroe House. In 1847, when the office of the *Democrat* was on Locust Street, between Main and Second, he accepted the position of financial editor, and gave that paper its reputation on money affairs. On the breaking out of the war Mr. Budd was a stanch friend of the Union, and subsequently became financial agent for Jay Cooke & Co., selling their United States five-twenty bonds, and acting as their financial agent in purchasing other government securities.

Under the administration of Mayor Thomas, Mr. Budd was again elected comptroller, and while in that office saw the necessity for additional water-works, and was among the first to move for a board of water commissioners to build new works, and drafted the law creating the board. When the board was organized he was its first president, and during his administration the plan of the new water-works on Compton Hill and Bissell's Point was carried out to completion.

Mr. Budd was principally distinguished as a financier. The Boatmen's Savings-Bank was founded in part by him. He drafted its charter and served as director for many years. He organized the Real Estate Savings Institution, and was its first president, and continued to act in that capacity until his health failed him in 1874. During the last twelve years of his life Mr. Budd acted as financial agent for a number of Eastern capitalists, and through the monetary assistance which he controlled many of the largest structures in St. Louis were erected and many railroads and other enterprises were materially aided. It was estimated that he was instrumental in securing the investment of many millions of dollars in St. Louis, such was the confidence reposed in his judgment as a financier. The importance of this service will be understood when the fact is recalled that St. Louis at that period (in company with other border cities) was suffering from the privations of the war, had little money, and needed nothing so much as the stimulus of foreign capital to develop the resources of the place and aid in building it up.

Mr. Budd died on the 24th of September, 1875, full of years and rich in the respect of his fellow business men. His death was regarded as a severe loss to the business and manufacturing interests of the city which, in a residence of nearly half a century, his far-sightedness and clear-headed sagacity had done so much to develop and advance. He was mourned by the thousands who in his long and eventful career had made his acquaintance and had learned to respect him as the soul of honor and integrity, and it was

universally conceded that the city of his choice would carry the marks of his good citizenship through all its future progress.

Mr. Budd left a wife and five children,—Marcia D. Budd, Charles P. Budd, Helen W. Budd, Wayman Crow Budd, and Belle N. Budd, now Mrs. Capt. Robert B. Wade. Mr. Budd's wife was Miss Rebecca Neff Patterson, of Philadelphia, to whom he was married before he removed to St. Louis. Mr. Budd was a professing Christian, and on April 2, 1836, became a member of the First Presbyterian Church of St. Louis, and when he died was with one exception the oldest member of that organization. On the 9th of December, 1838, he was chosen an elder, and in that position gave the church forty years of continued work and changeless devotion, the greater part of the time as its treasurer and financial adviser. He was the trusted friend of the lamented Dr. Bullard, who was killed in the Gasconade bridge disaster, and Mr. Budd was so terribly injured in the same disaster that his life was despaired of for many months. He gave the church the best of his vigorous days and of his ripe intellect and judgment. In the days of its weakness he was its pillar of strength, in the days of its darkness he inspired others with hope and courage. When the present beautiful house of worship was built he was ready with his helping hand and wise counsel. He adorned his public profession of religion with an exemplary private life, and impressed his moral nature on all that he undertook. We cannot estimate the significance of such a life as it affects the church. It is a grand tribute to any man to say that he spent forty years of activity in church matters and died honored and regretted. Such a life could not be expected to spend itself in a single direction or to confine itself to one place of work and responsibility; therefore we find him impressing himself continually upon the community, as its trusted comptroller, invited into the city's councils, and promoting its interests with that far-sighted sagacity which distinguished him during his career. By his positive character, his fixed principles, his iron will, and his enthusiastic resolution he made his mark in life in every sphere in which he acted. By his death a home lost its head, a community lost a citizen much honored and respected, and a church lost its senior officer and one of its best friends.

The board of assessors, consisting of three competent persons to be appointed by the mayor each year, was created by ordinance No. 2385, March 29, 1850. The duty imposed upon the board was to examine and assess all property within the city subject to taxation at its cash value, and to arrange such assessments in blocks according to their numerical order on the city map. The board of aldermen was constituted a court of appeals, whose judgment was final in all matters of assessment. The engineer's department, embracing the city engineer, the street commissioner, the superintendent of water-works, and their assistants and deputies, was created by ordinance No. 2388, March 30, 1850. The fire department was created by ordinance approved July 8, 1850.

The county court in 1852 granted the petition of a large number of citizens to incorporate into a town, and with all the usual privileges, a district lying about one mile west of the city of St. Louis. Retaining the name of the parent city, it was called the "Second municipality of the city of St. Louis." The following were the boundary lines of the municipality:

Beginning with the intersection of the centre of Grand Avenue with the western boundary lines of the St. Louis common fields; thence west along the centre of Grand Avenue to the county road; thence north sixty degrees west along the centre of the county road to the centre of Lindell Avenue as projected on Leffingwell & Elliott's map of the city of St. Louis; thence south twenty-nine and a half degrees west along the centre of Lindell Avenue to the intersection of the same with the eastern boundary line on the sixteenth section continued north; thence south to the Manchester road; thence along the centre of the said road eastwardly to the western line of the St. Louis common field lots; thence along said line of lots to the place of beginning.

The second municipality was allowed to have its own police, its recorder's court, to levy taxes, etc., to the end of the list of corporation privileges. The county court appointed for the town trustees Messrs. David P. Hull, John Matthews, Jonathan Jones, William Glasgow, Jr., and John Van Marter. These gentlemen were to hold office until the following April, when an election was to be held.

The board of aldermen in 1851 passed the bill for the extension of Main Street and the wharf to the southern limits of the city, directing the mayor to receive the relinquishments of all persons who desired to surrender the ownership of the property to the city, and providing for the improvement of the street and the wharf.

At the same time the new lines of the wards of the city were established as follows:

"1st. The line between the First and Second Wards was Wood Street westwardly to Rutgers Street, to Fifth Street, and along Fifth Street to Hickory Street, to Seventh Street, along Seventh Street to Chouteau Avenue, and along Chouteau Avenue to the city limits.

"2d. The line between the Second and Third Wards was Walnut Street westwardly to Seventh; thence south to Clark Avenue, and out Clark Avenue to the city limits. There was no change in these lines from the former limits of the wards.

"3d. The line between the Third and Fourth Wards was Locust Street from the river to the western limits of the city.

"4th. The line between the Fourth and Fifth Wards was Cherry Street to Broadway, along Broadway to Morgan, westwardly with Morgan to Tenth, northwardly with Tenth to Franklin Avenue, and westwardly with Franklin Avenue to the city limits."

The election Nov. 21, 1851, to test the sense of the people on the proposition to raise a loan of one hundred thousand dollars by the city for the improvement of the harbor, resulted in favor of the proposed loan by a majority of five hundred and forty-six out of a total vote of seven hundred and forty-six. The proposition for the loan of twenty thousand dollars to improve the wharf between Locust and Cherry Streets was also carried.

"At the municipal election of April 7, 1851," said the *Republican*, "Luther M. Kennett was re-elected mayor of St. Louis against the combined influence of Abolitionism, Free-Soilism, Socialism, Red Republicanism, Communism, Infidelity, and all the isms combined. Even Bentonism, which descended from the high standing of a senator of thirty years' standing, and came down to mingle in our ward and municipal elections, could not prevent this result.

"We feel greatly gratified in this result, not only from the fact that it again secures to our city the administration of a man who is pre-eminently worthy of this trust, not more in the conduct of the affairs of the city than in his ability and manly repulsion of the unjustifiable assumptions of the Free-Soil party, but also for his noble and manly repulse of Col. Benton at the Sixth Ward yesterday. It will forever be recollected with gratitude and consideration by the Whigs of this city. To Col. Benton it is the severest rebuke ever administered to any public man.

"It is the first instance in this country where a distinguished senator has descended from his high position to mingle in the affairs of a municipal election. Well might the friends of the colonel exclaim, 'What a fall!'

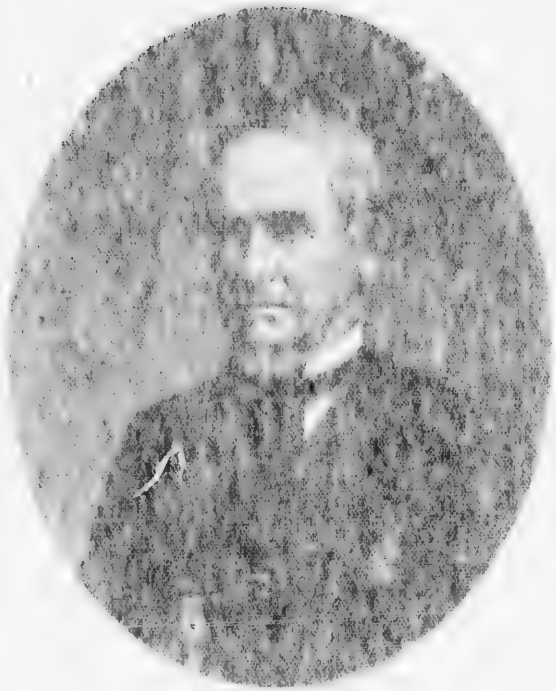
"We congratulate our citizens on this result in another aspect. It is a rebuke, we hope and trust a severe and lasting one, to those who would rear the hydra-headed factions of Socialism, Red Republicanism, Communism, Revolutionism, and Infidelity in our midst. We glory in it as a signal rebuke to those who would burn churches or sack convents to carry out their revolutionary purposes."

The effects of the fire of 1849, not yet entirely dissipated, had been supplemented in their influence on business prosperity by the flood of 1851, and by another visitation of the cholera. Mayor Kennett's annual message of October, 1851, however, after reviewing the consequences of these disasters, declared that the growth of the city had probably been more rapid than in any previous year, that the public improvements in progress had stimulated private enterprise to keep pace with them, and that the extension of the city in all directions was manifest, not only by the increased value of taxable property but by the character of the buildings erected in every direction, and which would do "credit to any city, either on this or the other side of the Atlantic." The principal builders and contractors in St. Louis at this time were Messrs. Brewster & Hart, and after the "big fire" in 1849 they built up nearly the whole of the burnt district. Oliver A. Hart, the most active member of the firm, was born in Norwich, Conn., Feb. 13, 1814. His father was a native of New Britain, Conn., and for some years was a watchmaker and silversmith at Boston, Mass. His mother, who is still living, was born in Newport, R. I. Young Hart received the advantages of a common-school education, and upon leaving school served an apprenticeship as carpenter with J. & W. Spalding, the leading carpenters and builders of Norwich. In 1835 he went to Mobile, Ala., where he engaged in business as a builder. In May, 1837, he removed to St. Louis, and was employed for a time with Phineas Bartlett as his draughtsman. He then formed a partnership with Augustus Brewster (now dead, but well and honorably remembered), under the name of Brewster & Hart. The firm flourished from 1840 to 1853, doing a large business as contractors and builders. Many monuments of their labor and skill, built on the site of the burnt district of 1849, still exist, and are yet regarded as among the most honest and substantial edifices of which the city can boast. Many more of the buildings erected by them have yielded to the march of improvement. About 1853 the firm of Brewster & Hart was dissolved, and Mr. Hart continued business as an architect. He built several churches, among them the Methodist Church at Pine and Fifth Streets, Dr. Brokes' church on Walnut Street, the Second Baptist Church on Sixth Street, and the Presbyterian Church, Fourteenth Street and Lucas Place. Of all these structures the latter only remains. In 1853, Mr. Hart retired from the practice of his profession as architect, and was elected president of the Western Mutual Fire and Marine Insurance Company, a position which he retained for nearly ten years. For twenty-five years he was a director in the old St. Louis Gas Company, and for twelve or fifteen years president of that corporation. He was prominently interested in the iron business, was once the largest stockholder in the Vulcan Works, and now owns one-fifth of the Jupiter Works. He is also a stockholder in the St. Louis Ore and Steel Company. Mr. Hart was one of the organizers of the Mechanics' Bank, and for many years a director; he was also one of the organizers of the Real Estate Savings Institution, of which he was a director up to

the time of his resignation. The institution was then doing a very prosperous business, but it closed under unfortunate circumstances.

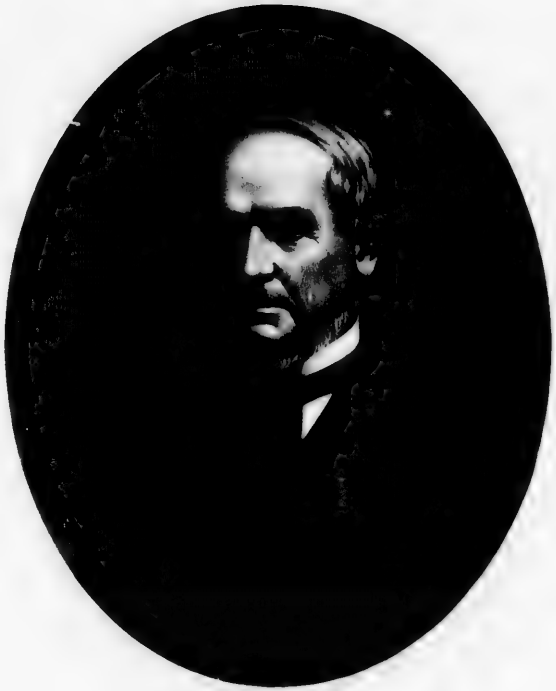
Mr. Hart was one of the oldest subscribers to the Pacific Railroad, was prominently connected with it as director throughout the civil war, and was as determined as any of the dauntless band of men who pushed that enterprise forward under such harassing circumstances, Missouri then being the theatre of war, and the road passing through a region exposed to raids from both armies. In common with his associates, among whom were George R. Taylor and Daniel R. Garrison, Mr. Hart contributed liberally of his means to the work, and before he left the company had the proud satisfaction of seeing the road finished into Kansas City. It is believed that neither Mr. Hart nor his colleagues realized anything from their investment in this enterprise, but they adhered to the project and battled for its completion chiefly because they comprehended how important a tributary it might become to the prosperity of St. Louis. He is also very largely interested in the gas-works at Kansas City, owning, in fact, one-third of those valuable works.

Of late years Mr. Hart has lived a retired life, devoting himself to the care of his large estates, for success has generally smiled upon him during his forty-five years' residence in St. Louis, and he has amassed a handsome competence. A modest and self-contained man, he is a good type of that patient and persistent class who have contributed so largely to the growth and prosperity of St. Louis, which, as a builder, he did so much to beautify, and whose interests he, as a railroad man and an iron manufacturer, assisted so greatly in fostering. His name will always be mentioned with respect whenever the achievements of the men of his generation are passed under review.



The enlargement and improvement of the water-works, the completion of the harbor, and the progress of the Pacific Railroad were the principal topics of public interest presented in the second message of Mayor Kennett. During the same year the city charter was amended by an act approved March 3, 1851.

In 1851 a list embracing the names of those citizens who owned property within the city limits exceeding twenty thousand dollars in value, was compiled from the assessment books of that year, and is as follows:[1]



Adams, R. & J.	$20,000
Allen, Thomas	374,600
Alexander, B. W.	75,000
Ames, Henry	24,900
Andrews, Thomas	30,400

New limits	4,790,021	53,988
Total	$5,152,013	$58,014

Mayor Kennett was elected to his third term in April, 1852. The *Republican*, in commenting upon his re-election, said,—

"To his own ease and comfort Mr. Kennett has made a great sacrifice in accepting this office for a third time. He came to city some thirty years ago a poor boy. By his own energy, industry, and honest qualification he has acquired a competency for himself and family, and, still more, a reputation and a name which all the malice and vituperation of personal and political hostility cannot successfully assail. He fortunately came into office just at the time when the services of a strong and clear mind and great energy of character were required. He has proved himself equal to the emergency, and we trust will be able in this year's administration to consummate the improvements of the city, or at least place them in such a situation as will insure their completion at an early day.

"The election of Mr. Kennett was further made important (and in this it probably had as deep a hold on the popular sentiment as in anything else) from the announcement of Col. Benton at the court-house on Saturday, the 6th ultimo, that this was the commencement of the campaign between him and the parties. In that speech, when the colonel descended from the dignity of a United States senator 'of thirty years' standing' to the city politician, he attempted to give to the canvass an importance which, we trust, it will continue to exercise in the future elections of the State. Through all these conflicting elements of discord Kennett, order, and city improvements have been most signally sustained. May it always be thus with our city."

The annual message, May 10, 1852, remarks that "the property absolutely owned by the corporation (the city of St. Louis) is valued by the assessor at $2,899,340," while the entire bonded debt was only $1,850,096. The property of citizens subject to tax-

ation was valued at $41,500,000, the population being estimated at one hundred thousand persons.

Mayor Kennett's administration ended in the spring of 1853, his successor being John How.

Luther M. Kennett was born at Falmouth, Pendleton Co., Ky., March 15, 1807. His father, Press Graves Kennett, was an influential citizen of Falmouth, holding for many years the office of clerk of Pendleton County and Circuit Court, and was likewise president of the Falmouth Branch of Commonwealth Bank. After receiving a good English education and some knowledge of Latin, Luther M. Kennett was sent to Georgetown, Ky., where he remained for two years under the instruction of the Rev. Barton W. Stone, a distinguished Baptist divine. He boarded in the family of that gentleman, and became a good Latin scholar, and was making a fair progress in Greek and French, when, his father meeting with reverses, he was taken from school at fifteen years of age, in order that he might earn his own livelihood. He obtained a situation as deputy clerk of the county court of his native place, where he remained for eighteen months with his uncle, Wm. C. Kennett, who then had charge of the clerk's office, and at the invitation of Gen. James Taylor, of Newport, who was clerk of Campbell County, he removed to that county and performed the duties of deputy clerk, devoting his leisure hours to the reading of law. In 1825 he came to St. Louis, resolved to prosecute the study of the law. To carry out this design it was necessary that he should make some business arrangement by which he could live while completing his studies; and not being able to effect this double object, he engaged in a store as clerk, and after a short time went to Farmington, St. Francis Co., and served in the same capacity. From Farmington he went to Selma, Jefferson Co., afterwards the residence of his brother, Col. F. Kennett, where he became acquainted with Capt. James M. White, a merchant of St. Louis, and nephew of Hon. Hugh Lawson White, of Tennessee, with whom he formed a copartnership, and with whom he continued fifteen years. This connection in business pursuits proved very fortunate to Mr. Kennett, and he amassed an ample fortune.

In 1832, Mr. Kennett was married to Miss Boyce, daughter of Col. John Boyce, of Farmington, Mo., who survived her marriage but three years, leaving a daughter, who became the wife of Benjamin Farrar; and in 1842, having returned to St. Louis from the mining region, he was elected alderman of the Fourth Ward, and served three years. He was re-elected in 1846, but soon resigned to make a tour of Europe.

Mr. Kennett had returned but a short time from his trip abroad when, in 1849, St. Louis was visited by the cholera. The citizens determined to establish a quarantine, and Mr. Kennett was one of the committee of twelve appointed to select the location and carry out the wishes of the people. On the very day of his appointment, in conjunction with his colleagues, he began to put the design in execution. That year he served as chairman of the committee which got up the Pacific Railroad Convention at St. Louis, and was vice-president of the company which was organized to commence the work. In the next year, 1850, being elected mayor of the city, he removed the first shovelful of earth, as a commencement of the great railroad which has become one of the main arteries of the Union.

As mayor Mr. Kennett was indefatigable in his exertions for the welfare of the city. He looked upon the health of the city as a blessing that could not be measured by dollars and cents, and strongly advocated a system of extensive sewerage, that St. Louis might be drained of its impurities. He was also one of the leading citizens in procuring the raising and widening of the wharf and the construction of the great Illinois dike.

In 1853 he was elected president of the Iron Mountain Railroad, and as vice-president of the Pacific Railroad delivered the address on opening the first division of thirty-seven miles for travel. He was a candidate for the Thirty-fourth Congress in 1854 against ex-Senator Benton, and was elected, proving himself an exemplary and efficient member. While a member of Congress, Mr. Kennett, being a member of the Committee on Commerce, contributed much to secure the appropriations made for the Mississippi rapids, and also to procure the right of way from the general government through the grounds of the arsenal and Jefferson Barracks for the Iron Mountain Railroad. Mr. Kennett resided at his fine country residence, Fair View, in St. Louis County, until 1867, when he sold that estate and again went to Europe, where he resided until his death in Paris, in April, 1873. He married his cousin, Miss Agnes A. Kennett, daughter of the late Dixon H. Kennett, in the spring of 1842, and by his second wife, who survived him, he left seven sons, the eldest a commander in the navy.

Col. Ferdinand Kennett, brother of Hon. Luther M. Kennett, died in May, 1861, at his residence at Selma, on the banks of the Mississippi, in Jefferson County. Col. Kennett was widely known as a generous, hospitable man, and his house was the resort of acquaintances from every quarter of the

country. When quite young he engaged in business in St. Louis, and was eminently successful. After accumulating a handsome fortune he retired to Jefferson County, still retaining a business connection in the Kennett shot-tower in St. Louis, and afterwards engaged as a partner in the "Granby Mining Company," in Newton County, Mo. Col. Kennett was a prominent member of the Democratic party, and represented St. Louis County in the Legislature for one term, and took a leading part in its proceedings. Afterwards he was elected president of the Bank of the State of Missouri, and made himself exceedingly popular in that capacity. When the Mexican war commenced he was among the first to volunteer, was elected major of the St. Louis Battalion, and continued in service until discharged.

At the municipal election in April, 1853, John How, the Democratic candidate, was elected mayor over Charles P. Chouteau by a very large majority. The extension of the city limits, the real matter at issue at this election, was defeated by a large majority. The earnestness of the people of St. Louis in pushing forward works of internal improvement designed to bring from the mines and granaries of the interior of the State the ores and other resources which had so long lain dormant for want of cheap transportation was exhibited in the majority given at the election held for the purpose of ascertaining the public wishes on that important subject. Mayor How, in his annual message, after reciting the progress made in the trade, commerce, and population of the city, called the attention of the City Council to the "concern and annoyance to the people of the city," caused by the system of macadamizing the streets, and urged its abandonment and the substitution therefor of the pavement as laid on the wharf and part of Market Street.

The entire debt of the city in 1854 was $3,250,296, of which $1,246,000 was invested in railroads, leaving $2,013,296 as the actual indebtedness for the improvement of the city and harbor. The revenues for 1853 amounted to $725,966.84, with a surplus over expenditures of $37,434.20. Hence Mayor How, in his message for 1854, said, "We may fairly and without fear of contradiction boldly assert that no city of the Union can rival us in the prosperity of our financial condition." The new reservoir for the waterworks was then being rapidly constructed, the police department was in excellent condition, the streets were being extended, and the railroads were pushing into new territories. The first business to which Mayor How called the attention of the City Council of October, 1854, was the compensation of claimants for damages done by the riots of August of that year. Having appointed a commission consisting of "Messrs. Foster, Knott, and Moore, all competent builders, to examine into and report the damage done," the mayor recommended the passage of an ordinance for the payment of these claims. The cause and description of this riot are fully set forth elsewhere. In this connection it is only necessary to refer to the action of the executive of the city, and that is best described in Mayor How's own language in his message. "Anxious as I am," wrote the mayor, "to erase from my memory all recollection of a time so discreditable to the fair fame of our city, I still cannot depart from this subject without briefly alluding to some of those whose assistance was so cheerfully given in sustaining the laws, and in particular to the military organizations under the command of Cols. Renick and Knapp. To these gentlemen, and to the members of their respective commands, I am deeply indebted. It became my unpleasant duty to order the Continentals, under Capt. Blackburn, and the Washington Guards, under Lieut. Deegan, to fire upon the mob, and the promptness with which they discharged their disagreeable task showed that they were fully alive to the duties and responsibilities of the citizen-soldier, and were fully determined to perform their duties at any hazard, and in this case five of these brave men, members of the Continentals, were wounded, some of them severely. I am also under many obligations to the companies of Capts. Pritchard, Morrow, English, Prosser, Byrne, Laibold, Allen, Stifel, and others for valuable and efficient aid rendered me in these the most anxious hours of my life. If the mob was not suppressed at once it was not for want of assistance from these gallant men, but owing to the continually changing scene of its operations, being hardly quelled at one point before disturbances would burst forth at another and more distant one, and not until a general meeting of the citizens authorized me to enroll a volunteer force of one thousand men under the command of Capt. N. J. Eaton was the public peace restored. This large force, a portion of which was mounted, was distributed in various parts of the riotous districts, and completely put an end to the existing disturbance. In alluding to them, I can only say that they were worthy of their gallant commander, whose cool judgment and promptness of action well qualified him as a valuable auxiliary in a time of doubt and danger." Mayor How also recommended the City Council to ask from the Legislature the passage of "a more vigorous riot act; the one we have now is a mere mockery. If the city is compelled to pay the damages done by a mob, she should have ample powers

to put down one." In compliance with the suggestion the act of March 5, 1855, was passed, "to prevent riots and breaches of the peace." At the session of the Legislature an act was passed "to provide for the reduction of the city debt of the city of St. Louis," by which was created the office of "fund commissioner to manage the sinking fund." By this act there was "created a sinking fund for the city of St. Louis, the proceeds of which shall be appropriated exclusively to the purchase of bonds issued by said city." The fund was made to consist of the sales of the city stores in block No. 7, also three-fourths of the net proceeds of the sales of the city commons in the year 1854, and of subsequent years, of sales of railroad stocks, and of the sum of ten thousand dollars out of the general revenues, to be deposited in said fund by the treasurer of the city on the first Monday in October of every year.

Washington King succeeded John How as mayor in 1855.

Mayor King was born in the city of New York on the 5th of October, 1815. His father, a native of England, emigrated early to this country, and being a well-informed man gave to his children all the advantages which the range of studies pursued in the common schools of New York afforded.

Washington King soon becoming an accomplished scholar turned his attention to teaching, and in a little time could boast of having the largest classical and English school in New York City. On Dec. 2, 1836, he married Miss Cynthia M. Kelsey, of Connecticut, by whom he had two children. Believing that the great Mississippi valley offered a wider field for the exertion of individual enterprise, he emigrated to St. Louis in 1844, and commenced mercantile and manufacturing pursuits, in which he became very successful, but in 1849 his business was interrupted by the fire of that year.

A little while after this disaster Mr. King went to Europe, where he remained several years, visiting the various countries, carefully noting the habits and customs of the people, and studying the languages and examining the policy of the different governments he visited. After spending two years and six months in travel, he returned to St. Louis in the spring of 1852, and in 1855 consented to become a candidate for the mayoralty, and was elected to that office.

When in office Mr. King, who always looked upon the law as obligatory upon all, and created for the general benefit, rigidly compelled the observance of legislative enactments, and was the first mayor who put in effectual force the prohibitory Sunday liquor law. So satisfactory was his term of office, that he was repeatedly solicited again to become the people's candidate, but always declined the honor. He was at the head of the Adams Express Company in St. Louis, and for many years was one of the leading business men of the city. He died on the 27th of August, 1861.

In his first message Mayor King called the attention of the City Council to the wisdom of further aiding the Ohio and Mississippi Railroad in uniting the city with the East. The city had already five hundred thousand dollars invested in the stock of the company, but two hundred and fifty thousand dollars more was needed to open the road from St. Louis to Vincennes. The subject of street-paving and the advisability of abandoning the macadamizing system were also urged upon the City Council by Mayor King.

"A memorial to the General Assembly of the State of Missouri" from "the people of the First, Second, and Third Wards of the city of St. Louis, also of the city of Carondelet, and of the district of land between St. Louis and Carondelet, and of the town of Lowell," was presented in this year protesting against the passage of the Hartnett bill for the extension of St. Louis. The memorial was signed by Cornelius Campbell, chairman, and the following committees:

Henry Pilkington, R. Dowling, John C. Degenhart, Henry C. Lynch, D. B. Hill, committee of First Ward; John F. Thornton, Alexander Kayser, J. S. Dougherty, Frederick Wagner, John D. Daggett, N. Nicholas de Menil, committee of Second Ward; Nathaniel Holmes, John J. Anderson, W. Risley, Fred. Ernst Baumgarten, B. W. Alexander, committee of Third Ward; William Taussig, chairman, William Milburn, F. Kellermann, Gottfried Schoenthaler, N. F. Constant, Dr. Fr. Hill, A. W. Webster, Delph. Carlin, C. Koemle, committee of Carondelet and South Commons; Joseph Kegel, John Lenhard, Xavier Gihr, John William Westermann, James McDonald, chairman, committee of Lowell.

John How was again elected mayor in 1856, over John B. Carson, who was the Know-Nothing candidate.[1]

In his message to the Council Mayor How called attention to the act of 1855, empowering the city to repave the streets, and to the condition of the Pacific, Iron Mountain, North Missouri, and Ohio and Mississippi Railroads. The "Sunday law" of 1854-55 had been enforced, but doubts arising as to its having

[1] Mr. Carson was born in Somerset, Pa., in May, 1813, and spent the early years of his life in Philadelphia, where he received a thorough business education. He removed to St. Louis in 1837, and was employed by the firms of J. Ben & William Smith and Collier, Pettus & Co. He then engaged in the commission business with Thomas P. Saunders, and subsequently in connection with his brother, established a dry-goods commission house on Main Street, which he conducted up to the time of his death, July 23, 1866.

been legally passed, it was re-enacted by the Legislature. The ordinance passed in accordance with the law, requiring all places of business to be closed on Sunday, seems to have caused considerable dissatisfaction and inconvenience. "If," said the mayor, "the Council determine that the law shall continue as it now stands, I would recommend that its operation should be made equal on all classes, alike against the newspaper publishers and venders, livery-stables, druggists, etc., and that we settle down in the observance of the old Connecticut Sabbath."

At the election for city officers in 1857 the "Emancipation ticket" triumphed.

"This result," says the *Republican* of April 10th, "has been brought about by a coalition of the black Republicans and that part of the Know-Nothings who, deserting their own flag, resolved to cast their fortunes with the Emancipationists, and who will hereafter be found acting with them. This has been done, moreover, as there is every reason to believe, in accordance with arrangements made at Jefferson City in February, by which so many of the Americans as could be transferred were to go over to the black Republicans, and they, in turn, were to vote for the American candidate for Governor in August next. As it has turned out, this has proved a most unequal bargain.

"Had the resolutions of the Legislature been suffered to stand just as they are on the statute-book this necessity might not have arisen, but a party has appeared in this city and State which declares that *agitation of the question shall never cease until Missouri is a free State.* This is the issue presented to the people of Missouri to be decided in August next, and that issue we, at least, are prepared to meet. In the city of St. Louis the Emancipation party is triumphant, and now we appeal to the State for a verdict, whether they are in favor of emancipation or not.

"This question cannot be dodged. Here is a party arrayed before us, . . down slavery in Missouri. It becomes, then, a question for the people to decide whether they will yield to the appeals of this party, and if so, how the great object is to be accomplished. The State of Missouri contains now more than one hundred thousand slaves, worth, at a moderate estimate, fifty millions of dollars."

John M. Wimer, the Emancipation candidate for mayor of St. Louis, nominated by an avowed Emancipation Convention, and supported mainly, if not entirely, upon that principle, was elected by about fifteen hundred majority.[1]

Although elected on an emancipation platform, Mayor Wimer gave no prominence to the issue during his administration, but confined himself to the ordinary duties of his office.

A proposition was submitted to the voters of St. Louis at the election April 6, 1857, for the issue of bonds to the amount of one hundred and thirty-seven thousand dollars, for the purpose of purchasing a lot of ground for the erection of a city hall. The lot proposed was block 489, situated between Chestnut and Market Streets, and Eleventh and Twelfth, and contained three hundred and fifteen feet on the northern and southern fronts. An ordinance, No. 3805, had passed the Council authorizing the purchase, but under the provisions of the city charter it had to be submitted to the qualified voters of the city at the next election for their approval, and consequently the measure could not be perfected until the action of the Council was ratified and the issue of bonds authorized by the popular vote.

That vote Mayor Wimer regarded "as an expression in favor of the location, but at the same time he doubted the policy of making that purchase when the city already owns a large block of ground only about one hundred feet farther west, and known as Washington Square." He, therefore, in view of the city's indebtedness, recommended the passage of an ordinance authorizing the erection of a city hall upon the northern front of Washington Square, and the repeal of ordinance No. 3805. At the election for municipal officers in 1858, Oliver D. Filley, the "Free-Soil" candidate, was elected mayor over George R. Taylor, the Democratic candidate. Mr. Taylor had been a member of the City Council in 1856 and 1857, and had displayed such capacity for the administration of municipal affairs that he was put forward in 1858 as the Democratic nominee for mayor. Owing, however, to the dissensions in his party growing out of the political questions of the day, he was defeated by Mr. Filley. In 1859 Mr. Taylor was again elected to the City Council, and was chosen president of that body.

Mr. Taylor was born in Alexandria, Va., Nov. 11, 1818, of English ancestry. His father was a merchant at that place, but dying when George was but six years old the education of the boy devolved upon his mother, who, intending him for the law, gave him the preparatory education suitable for that calling. Upon completing his education, George studied law two and a half years at Alexandria, and then attended a law school of high repute at Staunton, Va., under charge of Judge Thompson, an eminent jurist. He also studied law at the University of Virginia, Char-

[1] Capt. Patrick Deegan, a member of the board of aldermen, representing the Seventh Ward, died on Thursday, Jan. 15, 1857, after a short illness. He had been a resident of St. Louis for twenty years, and was highly esteemed by all who knew him. He was an Irishman by birth, but was a naturalized American, and his conduct through life was such as to reflect credit both upon his native land and his adopted country. He had held many responsible offices during his long residence in St. Louis, and always discharged his duties with fidelity. As a member of the board of aldermen, his efficiency marked him out as a probable recipient of higher honors. Capt. Deegan was a soldier as well as a citizen, and served in the Mexican war as a lieutenant of the Montgomery Guards.

lottesville, Va. In 1841 he returned to Alexandria, and was licensed to practice law.

Alexandria was too stagnant a town for his ambitious views, and he removed to St. Louis, arriving in June, 1841. The young attorney soon became known for his energy and public spirit, and rapidly made friends among the leading citizens of St. Louis, among them the Hon. Wilson Primm, with whom he formed a law partnership, which lasted until 1849. He was elected a member of the Common Council, and distinguished himself by the advocacy of liberal measures to beautify the city. After the great fire, which destroyed so much of the lower part of the city, he was the first to advocate the widening of Main Street, whose original dimensions were so inadequate to the magnitude of its business, and secured the adoption of the measure. He also urged the widening of the Levee by the purchase of the strip of land between the river and Commercial Street, but failed to secure the adoption of that project. The same liberal views found expression in other directions, and among the measures which he advocated, but in this instance also without success, was the erection of a city hall. Mr. Taylor was also conspicuously identified with the building interests of St. Louis, and made a permanent impression upon the architecture of the city. Hitherto the buildings had been deficient in height, but he introduced a change in this respect by erecting the first six-story building in St. Louis. At that time the city needed a first-class hotel, and many strenuous efforts for the erection of one had been made without result. Mr. Taylor, however, went forward and built, unsupported, the large and handsome Barnum's Hotel, at the corner of Second and Walnut Streets. Two years were occupied in the work of construction, and its cost was two hundred thousand dollars. He was also the leading spirit in the building of the old Merchants' Exchange, and so pleased were the stockholders with his services that they presented him with a beautiful set of silver at a cost of one thousand dollars. He was also president of the association which erected the old post-office at the corner of Second and Chestnut Streets.

The election of Mr. Taylor to the City Council in 1859 closed his political life, and thereafter he devoted himself to the affairs of the Pacific Railroad, of which he was president for ten years. When he assumed the position the road was completed only to Tipton, Mo., and he at once began the work of its extension, which was prosecuted during the war through a section that was the theatre of active military operations. Mr. Taylor was colonel of a regiment to protect the road, but took no other part in military operations. It was impossible to guard the property effectively, and when the road was nearly destroyed and its rolling-stock rendered worthless, it was chiefly through Mr. Taylor's exertions that loans were secured from the county and State to extend the tracks and repair the bridges and road-bed. It was also through his personal exertions, in connection with D. R. Garrison and others, that the State was finally induced to release its lien on the road and sell it to the company. The report of the committee which persuaded the Legislature to adopt this important measure was written by Mr. Taylor, and attracted great attention as a masterly document. The directors of the company voted the committee the princely sum of one hundred thousand dollars for their services in this connection.

Mr. Taylor was a firm believer in the future of St. Louis. Possessing several extensive tracts of land in the former outskirts of the city, he withheld much of it from sale, and lived to see his "addition" covered with dwellings and business houses, and increased fiftyfold in value. He also invested largely in centrally located property, and refused to sell, believing it to be the best investment that could be made. As a consequence of his forethought he was enabled to leave a princely fortune to each of his children, but he also left them a prouder inheritance, that of an unsullied name, and the reputation of being one of the most active and public-spirited citizens that St. Louis ever had.

Mr. Taylor was noted for his affable manners and gentlemanly deportment, and for his strict observance of the courtesies of life. He was proud of his Virginia blood and his English ancestry, and claimed relationship with the noble family of Marlborough, but was nevertheless a stanch democrat and a thorough American in principle.

In August, 1846, Mr. Taylor married Miss Therese L. Paul, daughter of Gabriel Paul, and granddaughter of Col. Auguste Chouteau, so well known in the annals of St. Louis. He died April 6, 1880, leaving five daughters and three sons. His wife had died several years previously.

The estimate of general revenue of the city presented by Mayor Filley in his first message of 1[illegible] showed a revenue of $859,885, and an expenditure of $1,038,000, with the further sum of $360,500 included. The "interest" item in the expenditure amounted to $363,000. This exhibit demanded, in the opinion of Mayor Filley, "retrenchment of every possible kind, . . . not only to curtail the current expenditures, but to arrest, as far as it is in our power, all improvements contemplated by ex[illegible]

ordinances, not immediately demanded by the urgent wants of the people." As a first step to this proposed retrenchment Mayor Filley recommended the remarkable and unusual step of "a reduction of one-half of the mayor's salary, and a corresponding reduction of your own compensation." The "merchant's tax" Mayor Filley regarded as "clearly defective," because under its operation the merchant was "only required to furnish a statement of the actual cash value of such (goods) as he may have on hand on the second Monday in April of each year," and not "the full amount of all goods received for sale during the year." City Engineer F. Hassendeubel's report presented the condition of the improvement of streets, their pavement and the material therefor, the public parks, the wharf, and the sewers.

Mayor Filley was re-elected at the municipal election of 1859. The act approved March 14, 1859, entitled "An Act amendatory of and supplemental to the several acts incorporating the city of St. Louis," provided in its second section that "the City Council shall consist of one board, called the board of Common Council, who shall possess all the power and exercise the functions of the board of aldermen and City Council as heretofore constituted." The board was made to consist of twenty members, "two to be elected in each ward," the members of the existing board of aldermen who held over under the existing charter to be members of the Common Council under this law, and to hold their offices for one year. On the first Monday in April, 1859, one alderman was to be elected for each ward for two years, and on the first Monday in April, 1860, and every year thereafter, each ward in the city was to elect one alderman for two years, so that one-half of the members of the Common Council should be elected in each year.

The Sunday law was submitted at the regular election in August, 1859, to a vote of the people on the question for or against the sale of intoxicating liquors on Sunday, with the following result:

The Sunday reform was energetically carried out by Mayor Filley, who issued an order on Saturday night following the election to the police to notify the proprietors of beer-houses and coffee-houses not to open their establishments on Sunday. Notice was accordingly served, and the establishments remained closed as ordered.

Notwithstanding the adoption of the law, the Common Council, on Aug. 9, 1859, passed an ordinance legalizing and directing the keeping open of drinking-houses on Sunday until nine o'clock in the morning, and after three o'clock in the afternoon of that day. The *Republican*, in noticing this, said, "We refer to the regular account of proceedings for the yeas and nays, by which it will be seen that ten members of the Council voted for and two against it. When it is considered that it is scarcely a week since the people of this city by a majority of two thousand votes declared their opposition to the very practice which this law seeks to justify and to carry out, the effrontery of the one-half of the Council may well be the subject of special wonder."

In view of the utter disregard of the vote of the people exhibited in this action on the part of the Common Council, there is more of ironical than real meaning in that portion of Mayor Filley's message in which he states that "the peculiar feature of our political system is in its representative principle, and this will be likely to endure and claim the willing obedience

[1] "The triumphant vote," says the *Republican*, commenting on the result, "by which the people of St. Louis declared their opposition to the sale of intoxicating liquors on Sunday is a matter of sincere congratulation to all our best citizens. It was not a party vote, it had nothing to do with party, but was the free declaration of men of all parties and nationalities against the excesses which have been superinduced by a special law of the Legislature, passed two years ago, in effect giving unlimited license, in the absence of a proper police, to these houses being kept open on Sunday.

"At the session of the Legislature in 1857 a law was passed to accommodate the two German representatives from this county with a hobby,—in the House as much in jest as earnest,—submitting this question to a vote of the people. The vote was ordered by the Council, but it was such a sugar-coated pill that nobody paid any attention to it, and the question was carried by the friends of the measure without serious opposition. Since then not only the beer gardens in the suburbs, to which men retire as a place of pleasure and relaxation on Sunday, but all the beer saloons and dance-houses and five or six theatres have been opened on Sunday and Sunday night on every prominent street in the city. This is the evil that is mainly complained of by our citizens."

of all so long as it is justly administered. It will be your duty to devise such amendments (to the election law) as will satisfy our citizens that their rights in this respect are in no danger, and that the result obtained at the ballot-box is the true exponent of those entitled to suffrage." Mayor Filley was re-elected at the municipal election of 1860.

The subject of paving the streets was still under consideration by the people and authorities of St. Louis.[1]

Mayor Filley called the attention of the Common Council, in his message of October, 1860, to the noble design of the Mullanphy bequest. Judge Bryan Mullanphy (deceased) had established a permanent charity under the following conditions: "One equal undivided third of all my property, real, personal, and mixed, I leave to the city of St. Louis, State of Missouri, in trust, to be and constitute a fund to furnish relief to all poor emigrants and travelers coming to St. Louis on their way, *bona fide*, to settle in the West." A careful estimate of the value of the property in 1860 showed that it amounted to five hundred thousand dollars, divided as follows:

Cash	$25,000
Real estate in St. Louis	220,000
Real estate in St. Louis common	50,000
Real estate in Carondelet	95,000
Real estate in Carondelet common	50,000
Real estate in St. Louis County	50,000
Real estate and stocks undivided	15,000

Mayor Filley recommended that the estate be managed by a board of commissioners, and that it be kept out of the field of sectarianism or party politics. At the next election Mayor Filley was succeeded by D. G. Taylor, having served the people most acceptably for three successive terms.

Oliver D. Filley belonged to a family which has long been prominently identified with the commercial, social, political, and religious interests of St. Louis, and himself contributed in no small degree to the prosperity of the community in which he lived so many years. The Filleys are of Welsh origin, and the first of the name who trod American soil was one of the little band of pilgrims who in 1620 landed from the "Mayflower" at Plymouth Rock. Thirteen years later a colony settled at Windsor, Conn., where a record is preserved which shows that William Filley was among the number. From this William Filley have sprung the numerous branches of the Filley family now so widely distributed over the Union.

Oliver D. Filley was born on May 23, 1806, in what is now the town of Bloomfield, Conn. He was one of six children, five sons and one daughter. His brothers, as well as himself, afterwards became leading and influential men in the communities in which they resided. Young Filley was early sent to school, and as soon as he had mastered the branches of a business education began to learn the tinner's trade in his father's shop, assisting him also in agricultural work. During this period he completed his education at an academy, and then began life for himself. He first visited Philadelphia, and subsequently Pittsburgh, where he worked at his trade for a short time. He then returned home, but immediately left for St. Louis in company with his brother, Marcus L. Filley. On arriving in St. Louis he procured work in the tin-shop of a Mr. Mansfield, whom he finally bought out about a year later. Under his management the little shop began to enlarge, and to make a figure in the locality where it stood, and its proprietor came to be regarded as an enterprising and energetic young business man. In 1834 his brother, Giles F. Filley, arrived in St. Louis, and entered the shop in order to learn the trade, after which the two brothers formed a partnership which continued several years. Out of this partnership grew the extensive stove-works conducted by Giles F. Filley. O. D. Filley continued in the hardware manufacture until 1873, when he retired. He was uniformly prosperous, and commanded success because of his strict attention to business and unimpeachable integrity. His trade extended to all important points up the Mississippi, Missouri, and Illinois Rivers, for St. Louis at that time commanded the commerce on those rivers and their tributaries, and he had a large acquaintance throughout all these regions. In St. Louis he was recognized as a leading business man, and his aid was regarded as an extremely desirable acquisition in the establishment of any new enterprise. He was a director in the Bank of the State of Missouri, and at a critical financial period resigned rather than sanction the receipt of Illinois money on deposits. He subscribed liberally to the Kansas Pacific Railway, and contributed

[1] The city engineer, Truman J. Homer, advertised for proposals to pave two squares on Olive Street, from Second to Fourth, and two squares on Third Street, from Pine to Locust. There were but two bids to pave with iron, one by William O. Shands, who proposed to do the work for fifty-one dollars per one hundred square feet, and the other by Otto Des Granges, who offered to do it for fifty-five dollars per square. The pavement of the former weighed one ton to the square, while that of the latter weighed one ton and a quarter. The latter kind was the same that was laid at the corner of Chestnut and Main Streets. As regards the practicability, the test was made under the patronage of Col. L. V. Bogy, by Messrs. Titus & Des Granges, on Main north of Chestnut Street, and found satisfactory. This pavement was put down in a bed of concrete under every possible disadvantage, at the beginning of winter, in wet weather, and yet it stood the rigor of two winters and two springs.

erously to the advancement of numerous individual enterprises. As a public-spirited man, he felt it his duty to assist every deserving project that appealed for his aid.

Mr. Filley was originally a hard-money Jackson Democrat, and was an intimate personal friend of Thomas H. Benton. It was a habit of the latter on his return from Washington, after landing from the steamer, to walk up to Mr. Filley's store on Main Street and exchange greetings with him before he went home.

In the political agitation of 1846–48 over the Wilmot Proviso, etc., Mr. Filley declared himself unqualifiedly in favor of free soil, and was prominent among the influential men who were even then discussing the question of emancipation in Missouri. In 1848 he supported Mr. Van Buren as the Free-Soil candidate for the Presidency. From 1856 he might be considered a leader in the Republican party, and did not hesitate to proclaim with Francis P. Blair and others that Missouri ought to be free.

In 1858, much against his wish, he was nominated as the Republican candidate for mayor, and after a hard struggle was elected by a decided majority. He served three years, and his administration was characterized by many important improvements, among which were the introduction of the fire alarm telegraph and the perfecting of the paid fire department system.

Upon the breaking out of the war Mr. Filley was at the head of the movement, with Francis P. Blair, James O. Broadhead, S. T. Glover, Hudson E. Bridge, and other patriotic citizens, for arousing and consolidating Union sentiment, and was allotted the chairmanship of the famed "Committee of Safety," his colleagues being James O. Broadhead, Samuel T. Glover, John How, and J. J. Witzig. This body was appointed to co-operate with the military in enforcing the authority of the national government, and the invaluable services which it performed in that direction have already been fully described in the chapter on the civil war. Mr. Filley from the first took a most active and energetic part in the work of the committee, and was untiring in his zeal and devotion to the cause. His course, however, while characterized by great vigor and determination, was marked by a considerate spirit towards his fellow-citizens who sympathized with the South, which exhibited clearly his natural generosity and warmth of heart. In this connection it is worthy of note that Mr. Filley earnestly opposed the military levies of money on Southern sympathizers, believing them to be oppressive and unjust.

His membership on this committee was his last prominent public service, but he was a deeply-interested witness of the great conflict of the civil war, and gave the Union cause the full benefit of his wise and energetic counsel. His personal example and firm, unwavering course undoubtedly contributed immensely to the solidifying of Union sentiment in St. Louis, and to strengthening the hands of the representatives of the government in Missouri.

Mr. Filley was married to Chloe Velina Brown, at his native town, Bloomfield, about the year 1835. He died Aug. 21, 1881, leaving seven children, viz.: Oliver B. Filley, Mrs. Ellen Richards, Mrs. Maria Jennette, wife of John D. Davis, Alice, the wife of Robert Moore, Marcus Filley, Jennie, wife of Isaac Morton, and John Dwight Filley. The first mentioned, Oliver B. Filley, has been for many years one of the proprietors of the well-known Fulton Iron-Works.

Oliver Dwight Filley was a man of marked individuality, and left an impression on the progress and development of St. Louis that will last as long as the city endures. He was a man of the strictest integrity in every relation of life, and was remarkable for the tenacity with which he adhered to what he thought to be right. Always at his desk when not employed upon some public service, he taught his generation the dignity of labor in the most practical and forcible manner. He was always proud of the fact that he had been a successful mechanic, and was never ashamed to be found working at his trade. No more appropriate inscription could be placed on his tomb than "He was an honest workman." He abhorred debt, which he declared to be wrong in principle, and never deferred the payment of an obligation that was due. He never sought office, but, prompted by a keen sense of his duties as a citizen, accepted its obligations when called upon to do so in the interest of the community, and discharged them with rare fidelity and skill. To sum up, Mr. Filley was an ardent patriot, a thoroughly upright man, a good citizen, a faithful public officer, and a true friend.

Daniel G. Taylor was elected mayor in April, 1861, over John How. The "Union Anti-Black Republican" ticket also elected all of its councilmen, except in the First and Second Wards. The official returns were as follows:

Ninth Ward.

Driscoll.....2023
Stolle..... 914 Majority.....1109

Tenth Ward.

Speers.....1358
White.....1273 Majority..... 85

The civil war, which affected the prosperity and happiness of every portion of the country, deprived Mayor Taylor of the power to congratulate the Common Council, after the usual form, upon the "increasing prosperity and continued happiness" of the city. Political excitement ran high, and much bitterness of feeling was engendered. Collisions, sometimes involving loss of life, were of frequent occurrence, and many incidents of a deplorable character added to the complications of the situation. In the midst of the prevailing excitement, with conflicting rumors and statements unsifted and undetermined, the position of the mayor was full of perplexity and embarrassment. It was, however, a source of no little self-congratulation to the mayor that the mass of the citizens of St. Louis remained loyal to the laws and cordially co-operated with the authorities in their efforts to maintain the high reputation of the city as the home of a peaceable and order-loving people. The commerce of St. Louis was suspended by the war, manufactories ceased to operate, with the exception of those engaged in the production of the materials of war; the steamboat interest was prostrated, real estate depreciated, rents diminished, and building ceased. Missouri was the theatre of war of the worst and most revolting character. Under these trying circumstances Mayor Taylor could only invoke a wise and beneficent Providence "to interpose and restore the blessings of peace, order, and good government."

Daniel G. Taylor was re-elected mayor in 18[illegible] and J. Gabriel Woerner [illegible] served as a member of the City Council in [illegible], was re-elected in [illegible] year and chosen the president of that body. Woerner was again re-elected in 186[illegible]. In the Council he was specially distinguished for great industry and for his thorough mastery of details. In 18[illegible]

and again in 1866 Mr. Woerner was elected State Senator, in which capacity he served on the Judiciary Committee, and was the author of many useful public measures. His Report on the Iron Mountain Railroad, as indicating the future railroad policy of the State, has a permanent value. In 1864, when the bitterness engendered by the war was at its height, he was the Democratic candidate for mayor, but was defeated by James S. Thomas. In 1870 his judicial career began with his election to the position of judge of probate by a majority over both opposing candidates. In 1876 he was re-elected to the same office by an increased majority over an unusually strong candidate, and after six years' further trial was elected, in 1882, a third time judge of probate by a majority of more than twenty-one thousand. This may be termed the climax of a long series of political triumphs.

J. Gabriel Woerner, at present judge of probate, has attained distinction as a politician, lawyer, and literary man. He was born in the village of Moehringen, kingdom of Würtemberg, April 28, 1826. His father, a carpenter by trade, emigrated to America in 1833, and lived in Philadelphia till 1837, when he removed to St. Louis. In these years young Woerner had attended school and acquired the rudiments of education, both in English and German. In 1841 he went to Springfield, Mo., then a small frontier town, where he was employed as clerk in a country store. Here he remained from his fifteenth to his eighteenth year, a time of life in which impressions are most vivid, and his experiences in Springfield, growing out of the country life in the West, have in no small degree influenced his opinions and character, as well as colored a portion of his writings. In 1844 he returned to St. Louis and began his more active life by learning the printer's trade. At the same time he became an ardent politician, attaching himself strongly to the party led by Thomas H. Benton, at that period the greatest intellectual force in the West. In 1848, during the revolution in Germany, he went abroad, desiring to participate in the struggle for freedom in the Fatherland. While in Europe he furnished newspaper correspondence in German for the *Tribune* of St. Louis and for the *New York Herald* in English. At the time his letters attracted a good deal of attention on account of their raciness of style and novelty of view. In 1850 he returned to St. Louis and participated in the Benton movement, which was then at its culminating point. He was at first appointed editor of the *Tribune*, but soon became its proprietor, and stoutly supported the emancipation views of the Germans. Editorial labor, however, was not congenial, and in 1852 he sold out his paper and his journalistic career was brought to a close.

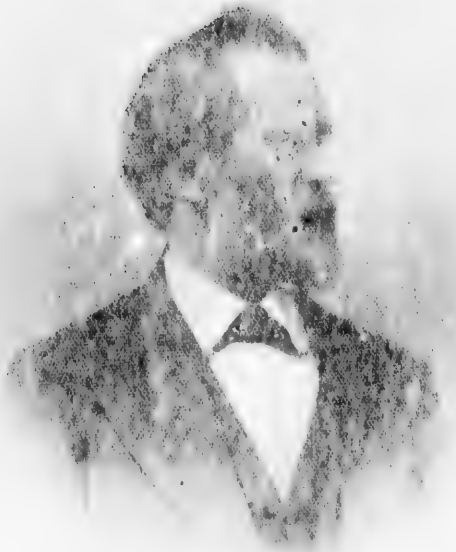
In the same year (1852) he began the study of the law, and his legal career proved to be altogether the most important occupation of his life. He filled a number of responsible positions in rapid succession. In 1853 he was appointed clerk of the recorder's court, and in 1854 was reappointed to the same office. In 1855 he was admitted to the bar, in 1856 he was clerk to the board of aldermen, in 1857 and again in 1858 he was elected city attorney, and also held the political offices we have heretofore mentioned.

The secret of Judge Woerner's success is found in the fact that he is a man of the people in the best sense of the word. Popular to an extraordinary degree in his manners, he supplements them with the most rigid integrity and an unquestioned capacity and fidelity in office. From the time of his admission to the bar in 1855 until his election to his judicial position he enjoyed an active and extensive practice. His decisions as judge have always commanded the highest respect, and have seldom been reversed by the superior courts. His legal opinions are eagerly sought by the profession, and he has become an authority upon the subject of probate law. He has contributed articles to the *Southern Law Review*, and occasionally to the newspapers upon important legal and municipal questions, and is understood to be writing an exhaustive work on probate law, which is intended to be the crowning gift of his life to his profession. Judge Woerner has the rare judicial qualities of fairness, quickness of comprehension, and an unconquerable patience. The chief characteristic of his methods is that he strikes the happy mean between a too rigid adherence to mere technicalities and a too lax observance of legal forms.

Such has been Judge Woerner's varied and interesting career, political, legislative, and judicial, but this sketch would be incomplete without some account of his literary work. With Judge Woerner literature has been a passion all his life. He began early by writing short essays, poems, tales, and translations, which were published in newspapers. In 1850 the novel "Die Sklavin" was first printed as a serial in the *German Tribune*, and afterwards published in book form, meeting with so rapid a sale that the edition was exhausted in two months. Other novels were printed in the newspapers, but not as books. In 1873, during moments of leisure from his judicial duties, he wrote a drama in German, also called "Die Sklavin, or the Female Slave," but quite different from the novel of the same name. This drama has been performed more than twenty times in the German theatres of St.

Louis, always to full houses, and has been produced in all the leading cities of the West. Neither the German original nor an English translation has ever been printed. Judge Woerner is also an excellent literary critic, and his reviews of literary publications never fail to attract attention.

Doubtless the leading intellectual influence of his life was derived from his connection with the Philosophical Society of St. Louis, of which he may be called one of the founders, having been present at its first meeting in 1865. The men with whom he there associated, particularly Dr. William T. Harris and Lieutenant-Governor Brokmyer, inspired him to study Hegel's writings, especially the "Philosophy of Right," which has entered deeply into his juristic attainments. Strong traces of these philosophical studies can be found in all his writings and in his legal decisions.



He writes English and German with equal facility, seeming to prefer German for his purely literary works, as the spontaneous flow of his mother-tongue. His German style has a peculiar flavor of its own,—an American flavor, it may be called, since it seems to have been begotten of the influences of this country working upon a deeply sympathetic German spirit. English he adopts for his legal discussions, not so much from necessity as from choice. Most of his literary works bear evidences of the great transition period from slavery to freedom through which he lived and in which he played a not unimportant part.

In Mayor Taylor's message to the Council he said that he considered it to be his duty to regard only the question of capability and honesty, without inquiring into or caring for the political views of appointees to office, and the Common Council, by confirming in all instances the appointments made by the mayor, gave to this policy its emphatic indorsement. Mayor Taylor made no recommendations favoring a change of policy or indicating any considerable improvements that it would be desirable to make. The failure on the part of the city to pay its obligations, he said, was caused by circumstances beyond the control of its authorities; but while recognizing these effects of the existing war, Mayor Taylor opposed deferring "payment a day longer than imperative necessity demands." Mayor Taylor was succeeded by Chauncey I. Filley in 1863.

Daniel G. Taylor was born in Cincinnati, Ohio, Nov. 15, 1819, and was of Scotch parentage, one of his parents being born in the Lowlands and the other in the Highlands of Scotland. His parents dying when he was quite young, he was left to his own resources to make his way in the world. He embarked in the steamboat business, entering it first as cabin-boy in Cincinnati, and gradually but surely working his way up, and winning the confidence of his employers. He was the bar-keeper on board the steamer "Oneida" when she was burned at the wharf in Cincinnati, and made a narrow escape. As it was he lost everything he had on board. Coming to St. Louis, he went up the Illinois River as clerk on the "Clermont," and about the year 1845 was in command of the same steamer. He made a trip up to the Yellowstone, an expedition of some risk and enterprise in those days, taking up a load of supplies for the American Fur Company, and returning with a load of furs. After proving his capacity as a commander, he left the river and went into a boat-store at Cincinnati. He afterwards closed out his store at Cincinnati, and returning to St. Louis purchased the boat- and furnishing-store of Wood & Shaw, on the corner of Market Street and the Levee, but in the great fire of 1849 was burned out, just as the papers completing the purchase were made out, and before he had effected an insurance on the property. Mr. Taylor then went into the steamboat agency business with Richard Hopkins, under the firm-name of Taylor & Hopkins, their location being on the Levee. He continued in that business about a year after the great fire, when he engaged in the liquor business with George Harrington, under the firm-name of Taylor & Harrington. During the time he was in that firm he was elected alderman from the Third Ward, and served as such two years, in 1854 and 1855. The firm of Taylor & Harrington was dissolved on the 1st of January, 1857, and Mr. Taylor continued the business under the style of Daniel G. Taylor & Co. On being elected mayor he sold out his interest to his nephew and partner, John G. Prather. At a special election in May, 1870, Mr. Taylor, as the Democratic candidate, was elected city treasurer. His opponent was Dwight Durkee, a gentleman who stood high, and who had been temporarily appointed by Mayor Cole to fill the office. It was the first defeat of the Republican party in St. Louis. In 1872, Mr. Taylor was re-elected, and the trust reposed in him was executed with entire satisfaction. Besides these municipal offices he held positions of trust in various corporations, and was president of the Boatmen's Insurance and Trust Company, and of the Real Estate Savings Institution. In addition to these positions he held directorships in various companies, and was often selected to settle estates involving large sums and requiring a clear head to master the intricate details. Among the large estates thus administered was that of Patrick

Rogers, of Cincinnati, and the affairs of the St. Louis Floating Dock Company.

Mr. Taylor gave more in private charities and assisted more young men in business than almost any other man of his means in the city. Actors and actresses, the wives of steamboat-men and pilots came to him for assistance when they got into trouble, and their appeal, if at all worthy, was never made in vain. Occurrences of calamity and disaster, involving human suffering and distress, awakened every sympathetic fibre of his heart, and he was ever ready to contribute of his means or go himself to assist the sufferer. During the flood of 1844 he was among the rescuing party who brought away the nuns, whose convent was nearly overwhelmed by the overflow. When the steamer "Stonewall" was burned funds were raised and boats sent down to recover the bodies, and Mr. Taylor had charge of the expedition.

A terrible domestic misfortune overtook Mr. Taylor in the burning of the steamer "G. H. Crosman," on the 4th of February, 1858, near New Madrid. Mr. Taylor saved one child, but the other, which was placed in charge of the watchman, was lost. His wife, although provided with a life-preserver, also perished, and her body was found fifty miles below the point where the steamer blew up. Mr. Taylor was also present in the memorable Gasconade disaster, and was quite seriously injured. He was a member of Polar Star Lodge of Masons, No. 79, and also of St. Louis Royal Arch Chapter, No. 8. Upon his death, which occurred Oct. 8, 1878, he left a wife and four children, the eldest girl being the daughter of his first wife. Mr. Taylor visited Europe a year or so after his first wife's death, and made a trip to California immediately after the Gasconade disaster in order to regain his health, which had been shattered by reason of injuries received on that occasion.

In private life Mr. Taylor was noted everywhere for the evenness of his disposition, his hatred for all sorts of wrong-dealing, his sympathy for those struggling honestly against adverse fate, his antipathy for shams of every description, and especially for his fidelity to his friends. He was one of the most useful citizens St. Louis ever had, and, while not what is called a statesman and less a politician, his habits and capacities fitted him peculiarly to serve the municipality. When called into the official service of the city, his valuable efforts in the establishment of the present fire department, and the admirable address he exhibited as mayor in the trying year of 1861 in saving the city government from being overthrown by the military power, deserve to be especially remembered.

Chauncey I. Filley was elected mayor in 1863. The practical evidence of reviving industry and trade was furnished in the message of Mayor Filley, wherein it was shown that the receipts from merchants' licenses for the last six months had been more than fifty per cent. greater than the collections for the entire previous year; the same indications of renewed prosperity were given in the increased taxes from real estate and other sources of revenue, which responded promptly to the new life and vigor thrown into all branches of trade by better times. The act "to establish a public park for the use of the inhabitants of the city of St. Louis," approved Feb. 5, 1864, created "the commissioners of the Central Park," and the first board under the act was composed of John H. Lightner, James B. Eads, Henry Shaw, and Wm. McPherson. In April, 1864, Mayor Filley resigned in consequence of ill health.

James S. Thomas was elected mayor for the unexpired term of Mayor Filley. In his message the new mayor called the attention of the Common Council to the fact that "before the 1st of July the city has to inform the Gas-Light Company if it intends to make the purchase of these works, which now amount to from one million to one million two hundred and fifty thousand dollars;" and that if it did, arrangements would have to be made for the payment of the same before the end of the year. The legislation in respect to gas-light in force at that time forbade any gas-light company in St. Louis from demanding an advance payment from customers for more than one and a half months' quantity of gas. It also required the mayor to appoint a gas inspector and a deputy; forbade averaging bills, and required bills for the actual amount of gas consumed; prohibited the imposition of a delinquent gas bill by a former tenant upon a new tenant; provided for the purchase of the works by the city of St. Louis, and authorized the issue of bonds, to be designated on their face "special gas-works bonds of the city of St. Louis;" provided a board of commissioners, if the works were purchased, to manage, control, operate, and extend the works; and also provided for the lease of the works by the city. In his message of October, 1864, Mayor Thomas announced that "the prospect which for so many years has been held out to our citizens of placing these works in the hands of the city is now about to be consummated; that the public interest will be better served and the wealth and credit of the city largely increased by their acquisition is very evident." The scheme failed "owing to the raid Sterling Price was just then making into Missouri; and, owing to the doubtful consequences which they supposed it entailed, it was found impossible to make

sale of them (the bonds) at fair prices." Thus the time passed in which the purchase could be made, and the whole matter was deferred by the law until Jan. 1, 1870. The privilege of purchasing the gas-works by the city of St. Louis was provided for in the charter of the Gas-Light Company in twenty-five years after Jan. 1, 1840. Mayor Thomas was re-elected in 1865 on the Republican or Radical ticket by a majority of over three thousand over Daniel T. Wright, the workingmen's candidate.

Fearing another outbreak of Asiatic cholera, Mayor Thomas made various recommendations of a sanitary character, especially for the prevention of fouling the streets and alleys with filth and slops, and against permitting cows and goats to run at large. The provisions of the law of March 14, 1859, authorizing the Council to appoint a gas inspector, never having been carried into effect, the Council, at the recommendation of the mayor, passed an ordinance, Dec. 19, 1865, providing for an inspector of gas. George P. Herthel being appointed Feb. 6, 1866, proceeded to examine into the causes of complaint, and reported that the gas furnished to consumers was of an inferior quality, the average quality being eleven and six-tenths candles, whereas the standard of law was thirteen candles. Upon this exhibit the mayor, on May 2, 1866, notified the St. Louis Gas-Light Company that a reduction of ten per cent. from the price of gas for the month of April, 1866, should be made, and in his message added, "As it is my intention to enforce the deduction to all consumers, I suppose the gas company, being a wealthy corporation, may see fit to take legal steps to enforce their exorbitant demands; but I have no hesitation in saying that the position assumed by the city will be sustained, and the public will feel that the proper corrective to the trickery so long indulged in without opposition by the possessors of this gigantic monopoly has been applied."

An ordinance approved by the mayor on the 18th of December, 1865, for the numbering of the houses fronting upon the public streets provided "that the odd numbers should apply to the north and west sides of the streets, and the even numbers to the south and east sides of the streets running in a northwardly and southwardly direction, the numbering to commence with No. 1 at Market Street, and to increase northwardly at the rate of one hundred numbers for each block, as nearly as the varying series of streets would admit of—Arsenal Street, Arrow Street, Chouteau Avenue, Market Street, Franklin Avenue, Cass Avenue, Spring Street, and Salisbury Street, and their continuations east and west, to be rectified lines of uniformity in numbering north and south. On all streets running in a westwardly direction the numbering to commence at the wharf, and increase, going westwardly, at the rate of one hundred numbers for each block, as nearly as the varying series of streets would admit of,—the wharf, Third Street, Ninth Street, Fourteenth Street, Jefferson Avenue, and Grand Avenue, and their continuations northwardly and southwardly, to be rectified lines in numbering westwardly,—the general rule to be that one hundred numbers should represent each block going westwardly from the wharf, and a like numbering for each block north and south of Market Street, one number to be allotted for every twenty feet of vacant ground."

At the time of the passage of the ordinance the city engineer was authorized to advertise in the usual manner for proposals, and to contract with the lowest and best bidder for the numbering of all the houses in the city, and the sum of two thousand dollars was appropriated for the payment thereof. Shortly after the passage of the above ordinance a new city directory was issued, based upon the old numbering of the houses, which directory was rendered practically useless on account of the changing of the numbers to correspond with the new method of numbering streets.

James S. Thomas was re-elected mayor in 1866.[1]

The division of the Common Council into two branches was authorized by the new charter of 1866. By this charter many ordinances were required to be passed or amended. Mayor Thomas, in his message of May 7, 1867, called the attention of the new Council to Article IV., Section 7, "to provide for regulating the sprinkling of the streets and public thoroughfares of the city," and to the necessity of additional legislation for the prohibition of cattle of every kind from running at large in the city; and for the prevention of the erection of wooden buildings within

[1] The *Republican*, in speaking of the elections in April, 1866, said, "We have on the general city ticket no less a majority than three thousand. We have handsomely elected Steger for street railroad commissioner and Cady for recorder. We have carried four out of the five aldermanic districts (two aldermen to each district), giving the Conservatives full control of the upper board of the City Council. We have elected fifteen out of the twenty members of the board of delegates. We have carried eight of the ten wards in the city, and lost the First by scarcely more than twenty votes. For school directors all the Conservative candidates are elected except in the Eighth Ward.

"At the election for and against the new Constitution, last June, the number of votes polled in the city was 14,550. Yesterday the total vote was fully one thousand less. This shows that the victory over which we now rejoice was gained in large measure by concessions from the Radical party, men disgusted with what Radicalism had done."

prescribed limits, and the stopping by effectual legislation of throwing stones and the use of slings by boys, "whereby many persons had been injured, as well as property destroyed."

Great trouble was beginning to grow out of the defective manner in which private sewers had been constructed, and to remedy existing evils, as well as to prevent serious consequences in the future, Mayor Thomas recommended the passage of a law requiring such "traps as would prevent the reflow of sewer-gas into the surrounding air." The establishment of "Tower Grove Park" having been authorized by an act of the Legislature, the issuing of bonds for that and other purposes was authorized. The cholera in 1866 had found the city in "a filthy condition," and on the 15th of August, 1866, Mayor Thomas appointed sanitary committees in each ward of the city, whose duty it was to inquire into the condition of infected neighborhoods, and to adopt such means for checking it as necessity seemed to demand. These committees immediately went to work, and with such effect that the mortality soon showed a marked decrease. The act of the General Assembly approved March 9, 1869, entitled "An Act for the preservation of the public health of the city of St. Louis," authorized the mayor to appoint a board of health. In compliance with this law the mayor selected Dr. John T. Hodgen, Dr. Jos. Heitzig, Dr. Ellsworth Smith, James Pease, and Constantine Maguire. The board organized on the 16th of March, 1869, and one of its first acts was to make an examination into the quality of the ice supplied by the dealers. An ordinance was in force prohibiting the sale of ice cut from ponds within the city limits, but there was nothing in the ordinance prohibiting dealers in ice from taking their ice from such ponds, and it was found impossible to identify the ice *sold* as that which was known to have been taken from the prohibited ponds. Henry C. Moore, messenger of the board of health, excited the ire of ice dealers by exposing the manner in which the ordinance had been evaded, and elicited such denunciations from them that Mayor Thomas felt called upon to assure the Council that Mr. Moore's report was correct.

Truman J. Homer, for many years city engineer of St. Louis, died on the 8th of October, 1867, and Mayor Thomas urged the Council to secure the valuable papers relating to the local affairs of the city which Mr. Homer had collected during the years he had served in the engineer department.

Huckstering in the markets had been a subject of much legislation in the City Council. In May, 1864, Mayor Thomas had called the attention of that body to the loss sustained by the city, and in consequence of this recommendation the Council had passed an ordinance (No. 5434) prohibiting huckstering in the markets, but subsequently, owing to the drain of the war upon the laboring population and the scarcity of produce caused thereby, the ordinance had been modified by No. 5621, admitting hucksters to the market. This last ordinance, though vetoed by the mayor, was passed over his veto. The connection between this subject and the cholera in 1866 was shown by Mayor Thomas in his message to the City Council in October, 1867. The records of the board of health demonstrated that in 1866, up to the 19th of October, there were three thousand five hundred and eighteen deaths from cholera, whereas up to the same date in 1867 there were only six hundred and ninety-six, with an increase of population of at least twenty thousand. The prohibition of the sale of vegetables and fruit by the board of health in 1867 Mayor Thomas regarded as the means by which the "partial immunity from cholera" was obtained in 1867, "for you will observe," he added, "that while only one hundred and eleven deaths from cholera occurred from the 23d of July to the 3d of September, the period of prohibition, four hundred and ninety-five have occurred since its repeal on the last-mentioned date up to the 19th of the present month" (October, 1867). "On the 2d of September no deaths from cholera were reported, and on the following day the board of health withdrew the prohibition. On the 11th of September, which would be as soon as the hucksters would have an opportunity to bring their produce to our markets, there were eight deaths,—one more than had occurred on any previous day in this year. On the 26th there were forty-three deaths, and on the 27th sixty, which was the largest number during the present year." In view of these facts the mayor again recommended the prohibition of huckstering, and by ordinance No. 7242 it was provided that "no grocer, huckster, or other person shall sell or offer for sale in any market or market-place any produce or other article purchased within the city limits during the market hours, and all farmers, gardeners, and producers are hereby authorized to sell it during the market hours in any market, subject to the provisions of this article."

The custom which in recent years had obtained of settling in the Legislature the affairs of St. Louis was called to the attention of the City Council by Mayor Thomas. "Things that are purely municipal in their character," he said, "such as the blockading of our narrow streets and thoroughfares, and the collection of our revenue, and other kindred local matters, the City Council, and not the General Assembly

of the State, should be the proper law-makers. Such matters are questions not for the Commonwealth, but for the corporation; and in whatever concerns the city alone, and does not involve principles of general application, the city, through its recognized organs, should be consulted before a final decision."

The general prostration of commercial and manufacturing interests which affected the country in 1867 did not spare St. Louis, but, in so far as the city authorities could influence the progress of the city, the prospect was that of a prosperous future. A tide of immigration unparalleled in the history of the country was pouring in, and its effects and influences were fruitful of good to the city. "At no distant day," wrote Mayor Thomas, "the iron horse, with its precious load of human freight, will start out from the Atlantic coast, whirling across the continent for three thousand miles, and across the bridge which is soon to span our mighty river at this point, stopping at St. Louis for wood and water, and then rapidly gliding on until the receding shriek of the locomotive will be heard within the snowy recesses of the Rocky Mountains, and on the slopes that overlook the city of San Francisco and the golden shores of the Pacific. Then will St. Louis be the centre of the American continent, and although New York may be the head, St. Louis will be the heart of the American nation."

During the several preceding terms of Mayor Thomas three great improvements were kept constantly in view by him. These were the extension of the city wharf from North and South Streets to the city limits, a supply of good and wholesome water, and the completion of the sewer system. He had obtained the necessary legislation for all of these improvements, and they were progressing rapidly towards completion. In addition to these purely local matters, the prospective early completion of the railroad system of St. Louis, as well as that of the great bridge, were a source of congratulation to the merchants and business men of the city, by whose efforts and energy these great works were undertaken and sustained.

Mayor Thomas was re-elected in 1868, and in his annual message he congratulated the citizens of St. Louis on "that great advancement and prosperity" which had crowned the efforts and endeavors of citizens and municipality to build up the trade and commerce of the city. The experience of five years in the mayoralty, he added, had shown that the powers with which the mayor was invested were too contracted for the responsible head of the whole city. The legal arrangements for the purchase of Tower Grove Park having been completed, and the sale of the bonds having realized three hundred and sixty thousand dollars, Messrs. Henry Shaw, Charles P. Chouteau, Adolphus Meier, and Judge William F. Ferguson were appointed commissioners, and entered upon the discharge of their duties.

Mayor Thomas again urged upon the City Council the adoption of measures for the purchase of the gas-works. The opportunity offered of securing these works in 1870, he pointed out, would not again occur until 1875.

The oppressive nature of the tax of three hundred dollars on non-resident traders, and the fact that it had become a "dead letter" and was not enforced, were called to the attention of the mayor by Dodd, Brown & Co., Henry Bell & Son, Hurt, Hellmers & Vorhies, John G. Allen & Son, Samuel C. Davis & Co., Crow, McCreery & Co., Smith, Vogel & Co., W. H. Benton & Co., A. Johnson & Co., and H. T. Simon & Gregory. These gentlemen recommended the reduction of the license to twenty dollars, and by ordinance No. 7865 the tax was made ten dollars.

Mayor Thomas' long administration closed in 1869, and Mr. Thomas died Sept. 26, 1874, aged seventy-two, having spent the best years of a long life in the service of St. Louis. He was born in Maryland, May 25, 1802, and came to St. Louis in his twenty-third year, landing at the foot of what is now Morgan Street on the 21st of January, 1825. He passed his first night in the city in the old stone building on the corner of Morgan and Main Streets, since known as the Missouri Hotel. On the 3d of January, 1826, he went into business on Main Street as banker and exchange broker, with a cash capital of two hundred and seventy dollars, and an Eastern credit of [illegible] thousand dollars. It was the first banking-house established in St. Louis, as up to that time the merchants of the city did what little banking and brokerage there was to be done. The population at this time was less than five thousand. He conducted the business individually until 1838, when he entered into partnership with the late L. A. Benoist in a more extensive banking business, under the firm-style of L. A. Benoist & Co. This partnership was dissolved in 1850, at which time Mr. Thomas retired to private life until the exciting scenes of the war again brought him into activity in public affairs. During the time that St. Louis was under martial law, he held several civil positions under military appointment, the principal of which was that of president of the board of assessment.

In April, 1864, he was elected mayor of St. Louis for the unexpired term of Hon. Chauncey I. Filley, who resigned on account of ill health. In 1865

was re-elected, again in 1866, again in 1867, and in 1868, making a period of nearly six years of official life,—the longest term of service of any mayor of St. Louis, with the exception of Dr. William Carr Lane.

During the war term, embracing the period from 1860 to 1867, almost all public work was suspended, and no improvements of any kind were attempted, except such as were imperatively necessary. Immediately upon his installation in office as mayor, in 1864, he inaugurated measures for the purchase of the gas-works; but as the city comptroller on going to New York was unable to negotiate city bonds at over sixty cents on the dollar in currency, the scheme was necessarily abandoned.

His next important official acts embraced a system of general improvement of the thoroughfares of the city, and consisted in part of a general sewer system for the preservation of the public health. This embraced the construction and extension of the great Mill Creek sewer, the Rocky Branch sewer, and the Arsenal Street sewer, with such other connecting sewers as were necessary to perfect a system of drainage. By the issue of bonds and the exercise of perseverance during his official career these great improvements were put well under way. He also advocated and urged the improvement and extension of the wharf north and south, and the improvement of the central wharf. Among the official acts for which St. Louis is more indebted to Mayor Thomas than to any other man is the supplying of the city with new water-works. To this end he devoted all his energies, and after persevering effort succeeded in getting a bill passed by the Legislature authorizing the issue of three and a half million dollars in gold-bearing bonds, and the appointment of a board of water commissioners to contract for and superintend the construction of works which should give the city an ample supply of pure and wholesome water. This great improvement, by the issue of a large sum of additional bonds, Mayor Thomas lived to see completed. He, together with Hon. John F. Thornton, was instrumental in having the munificent proposal of Henry Shaw accepted, in the donation of the ground for Tower Grove Park, and for the improvement of this beautiful place of resort. One of the last of Mayor Thomas' acts was to issue and sell, in accordance with the provision of an act of the General Assembly, bonds to the amount of three hundred and fifty thousand dollars, gold. These bonds, owing to the improvement of the city credit, were sold at $1.04. He was up to the time of his death a member of the Tower Grove Park Board of Commissioners. Although during his whole official term his great aim was the inauguration and completion of the above-mentioned improvements, he found time to attend to all minor city affairs with rare fidelity. Owing to the large amount of additional labor which he took upon himself in the discharge of his duty as mayor, and his untiring efforts to serve the people in every capacity called upon, he many times, even at the age of sixty-eight, labored from the dawn of day far into the night, and at times became prostrated by over-exertion, from which his intimate friends feared he would not recover. Upon retiring from office as mayor, he sought privacy and quiet at his residence on Park Avenue, but the troubles of a stormy career as mayor and over-exertion while in office weighed heavily upon him.

At the funeral of Judge Dent he was one of the pall-bearers, and by the breaking of the handle of the coffin he received an injury which he then thought and continued to think would shorten his life. When his last sickness came upon him he had a premonition of death, and in the presence of his assignee in bankruptcy made a very precise and lucid exposition in detail concerning important matters about his estate. He was a very exact man about all business matters, and his accounts and papers were all in the most orderly condition. He had a large insurance on his life, fifty-two thousand dollars of which was for his own benefit. Mr. Thomas was twice married. His first wife was a daughter of Curtis Skinner, of St. Louis, and sister to Mrs. Governor Polk. His second wife was Miss Susan H. Hackney, sister of Judge A. H. Hackney, at one time presiding judge of the county court, and also of the second wife of his partner, L. A. Benoist. He left a widow, a married daughter, Mrs. Fowler, of Baltimore, and two grandchildren.

Nathan Cole succeeded James S. Thomas as mayor in 1869. The improvement of the harbor was the chief subject discussed in the first message of Mayor Cole, and an appropriation of one hundred and fifty thousand dollars was made by the City Council for carrying on the work. The condition of the railroads and the nearness of their completion were fully set forth in the October message of Mayor Cole in 1869. The North Missouri Railroad opened this year a second connection with Kansas City, leaving but a very short gap to be filled to complete the connection with the State of Iowa, and the Missouri Pacific changed its gauge during the year, and was pushing rapidly for connection with the Union Pacific by way of Atchison and Fort Kearney.

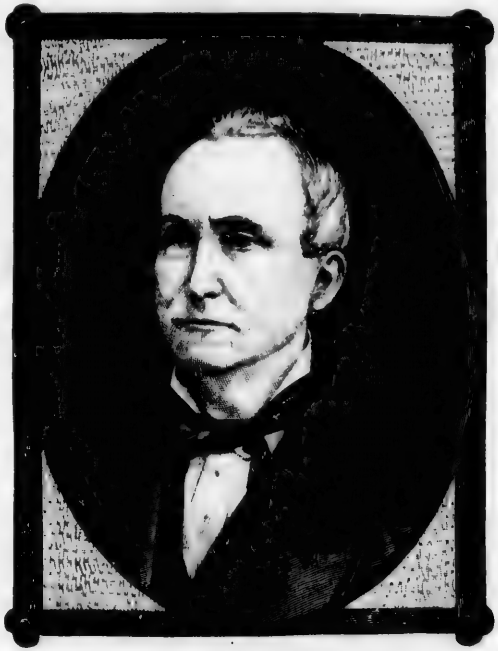
On the 26th of February preceding, the City Council had "*Resolved*, That the city of St. Louis will purchase the gas-works of the St. Louis Gas-Light Company, according to their privilege to do so, and

that the mayor be requested to notify the president and directors of the said company of their intention to purchase the same at the time prescribed by law and contract, to wit, on the 1st day of January, 1870." A copy of this resolution was served on the Gas-Light Company, and Mayor Cole reminded the Council that further legislation was necessary to enable him to appoint an appraiser, as well as to authorize the issue of city bonds with which to complete the purchase.

The continually increasing dissatisfaction of the citizens as to slaughter-houses in the city, as well as the earnest recommendation of the board of health for their immediate removal, was brought to the attention of the City Council by Mayor Cole. Ordinance No. 7340, adopted in accordance with his recommendations, provides that "no butcher or other person shall kill or slaughter any beeves, sheep, or other animal within the city unless the house, yard, pen, or place where such killing shall take place be provided with a tight plank floor, or be paved with brick or stone laid in cement; if paved with brick, then the earth below shall be sufficiently solid to prevent its becoming a receptacle of filth and offensive matter. The pavement in every case shall be made with a descent towards a gutter which shall pass through the same, and leading to a public, district, or private sewer, and no slaughtering shall be done in any slaughter-house not provided with a sewer connection, or with suitable tubs to be emptied daily."

Philip McCahill, auditor, estimated the receipts and expenditures of the city for the year 1869–70 as follows:

Revenue applicable for general purposes		$1,486,781.82
Estimated expenditures		1,444,271.16
Excess of revenue		$42,510.66
This would have been a gratifying exhibit but for the fact that there were outstanding bills to be paid during the year amounting to		$857,118.15
Bonds maturing		362,000.00
Balances due funds		839,339.94
Total		$2,058,458.09
Balance in treasury Oct. 11, 1869	$313,862.99	
Excess of revenue, as above	42,510.66	
		356,373.65
Total deficiency		$1,702,084.44



Thus "the condition of our finances," says the auditor's report, "is such as to require the most active and careful measures to protect the good faith and credit of the city; something more substantial than temporary alleviation by loans is requisite, as that, in the end, but increases the evil." The aggregate total of outstanding bonds was $12,335,000 principal, the interest upon which was $877,000; at the same time public property owned by the city was valued at $7,939,361.24.

The condition of public affairs at the end of Mayor Thomas' administration was such as to excite the gravest apprehensions. An investigating committee had reported a state of things in the departments of the city government involving alleged culpable negligence and violation of official obligation on the part of certain city officers.

The "act to revise the charter of the city of St. Louis and to extend the limits thereof," approved March 4, 1870, included the city of Carondelet with the city of St. Louis.

In this year Sylvester H. Laflin, now one of the leading merchants of St. Louis, was prevailed upon by a large number of prominent citizens of the Sixth Ward to allow the use of his name as a candidate for alderman. He was elected, and served with great acceptability. Mr. Laflin has been long and prominently known in St. Louis as the resident director of the Laflin & Rand Powder Company. He was born in Blandford, Mass., May 29, 1822. His father was Luther Laflin, and his mother's name before marriage was Almira Sylvester. When Sylvester was eleven years old his father moved to Saugerties, N. Y., and with his brother Matthew engaged in the manufacture of powder, of which they may almost be said to be the pioneers in America on anything like a large scale. At Saugerties the boy was sent to school for a while, but could hardly be restrained from starting out in business for himself, and at the age of about fourteen he entered a store at Hyde Park, on the Hudson, and remained there two years. He then returned home, and went to school another year; but at the age of nineteen, becoming restless again, he started out with his father's permission to seek his own fortune. The powder company with which his father was connected established a branch depot in St. Louis, and offered the young man an opportunity to commence business; but he was made to understand that he must "begin at the bottom and work up," and show by the business character he developed whether he was capable of managing so important an interest as it was hoped the St. Louis branch would become. He accepted the conditions, and in October, 1842, arrived in St. Louis, under a five years' agreement, the first year's salary being three hundred dollars, with a yearly increase of fifty dollars. He entered upon his business career with remarkable energy, and for eight years managed the humblest details of the agency. Ultimately he was intrusted with the charge of the entire business of the company at St. Louis. His energy increased with increasing responsibilities, and the

business became flourishing and profitable. It was a matter of pride with him to elevate it to a first-class standard, and he succeeded in extending the trade of the house into all the Western States and Territories. He was soon admitted to partnership in the firm of Luther and Matthew Laflin, and ultimately a stock company was formed under the name of the Laflin & Rand Powder Company, which now manages eight powder-mills in various parts of the country, several of them as large and complete, probably, as any in the world, and the aggregate making the company perhaps the largest powder manufacturing establishment in existence. Sylvester H. Laflin, who at the early age of twenty managed the entire business of the company at St. Louis, is now a director in this giant corporation and one of its largest stockholders.

Sylvester H. Laflin

Besides succeeding almost incredibly in building up a business for the powder company, Mr. Laflin has been connected with a number of public enterprises. His energy, enthusiasm, and shrewd, practical sense have been recognized by all classes, and his co-operation has been gladly welcomed as a guarantee of success where success depended upon those requisites. A list of his various business connections would fill much space. For many years he was a director of the old State Bank when its notes were preferable to gold, and is now a director in the St. Louis National Bank and the Covenant Mutual Life Insurance Company. He aided largely in building the first Lindell Hotel, and lost one hundred thousand dollars when it was destroyed by fire, was one of the most active directors of the Pilot Knob Iron Company, and was for years the associate of the late Hon. Thomas Allen in that and the Iron Mountain Railroad, until the sale of the latter to Jay Gould. He is now a prominent director of the Carbondale Coal and Coke Company and the St. Louis Coal Railroad Company, one of the largest enterprises of the kind ever engineered by St. Louis capitalists. Mr. Laflin has always taken great pride in the growth of St. Louis, and this list of his business connections shows that he is always ready to do his share in pushing forward projects intended to build up and benefit the city. In such historic enterprises as the building of the "great bridge" and the erection of the Chamber of Commerce he took the greatest interest.

The rapidity with which Mr. Laflin dispatches business is wonderful. While most other men are planning he is executing; when they have begun he has finished. This is the secret of his success, so marked beyond that of many who had immeasurably the advantage (apparently) of him in his start in life.

Mr. Laflin has seldom taken part in political affairs, yet occasionally at the request of his neighbors has accepted office, and, as we have seen, was chosen alderman from the Sixth Ward in 1870. His services to the city have been performed in other fields than those of legislation; few, indeed, have served her better. His genial manners and social qualities, his strict sense of honor, and his irrepressible energy, which are proverbial in the city, and scarcely less known throughout the West, have rendered him deservedly honored and popular.

In February, 1850, Mr. Laflin was married to Miss Anna W. Staats, daughter of Isaac W. Staats, of Albany, N. Y., by whom he has had eight children, five of whom are living. The eldest son, Addison H. Laflin, is in business with his father, and is a worthy son of such a sire. Mr. Laflin is eminently domestic in his nature, and finds his greatest delight in ministering to the happiness of his interesting family.

The municipal elections under the revised city charter were to be held on the first Tuesday in April, 1871; the mayor and all other elective and appointed officers were to hold their offices for the term of two years, and the mayor, comptroller, and treasurer were *ex officio* a board of fund commissioners to manage and control the sinking fund, which was made to consist of the funds which previous to the passage of the act made up the sinking fund, as hereinbefore set forth. Mr. Cole retired from the mayoralty in 1870, with an enviable record as an able and energetic official.

Nathan Cole was born in St. Louis, July 26, 1825, in a cottage which stood on the square bounded by Eighth, Ninth, Green, and Morgan Streets, and which resisted the march of improvement until about 1865, when it was demolished. His father, Nathan Cole, had emigrated from Ovid, N. Y., to St. Louis in 1821, to repair his fortune, which had been swept away in the commercial depression that followed the war of 1812. He brought to St. Louis his wife and six sons, and Nathan was the seventh. His mother, Sarah Scott, was descended from an old and highly-respected family which settled at an early day on the eastern shore of Connecticut.

During his residence in St. Louis the elder Cole made a heroic but generally unsuccessful struggle against adverse fortune, and the family experienced many vicissitudes. He was an enterprising man, and among his ventures was one that indicated great prescience, although it resulted disastrously. He foresaw that the situation of St. Louis must eventually make it the source of supply of salt meats for New Orleans and other cities, and was the first to embark in the business, but he was before his time and the attempt ended in failure. In 1837 he removed his family to Chester, Ill., and made a determined but fruitless stand against the financial ruin of that year. He died in 1840, leaving nothing to his children but the inheritance of an honorable name and a reputation for great energy of character and unsullied integrity.

In such a school of discipline young Cole grew up, and while the teaching was bitter, it no doubt contributed to strengthen his character to a degree attainable in no other way. He fell under the care of an elder brother, H. C. Cole, who decided that he should have a good education, and who therefore took him from the common school and placed him in Shurtleff College, at Upper Alton, Ill., where for two years he pursued his studies preparatory to a higher course. But young Cole, becoming distressed at the sacrifices others were making on his behalf, left the college, and in 1845 came to St. Louis and began the search for employment. He had neither money nor friends, and no acquaintances even. For some time he canvassed the city in actual privation, but eventually a position was offered him at ten dollars a month, and he gladly accepted it. He fell eagerly to work, determined by faithful service to win the good will of all with whom he was brought into contact, and in this he succeeded admirably. His salary was rapidly advanced, and so efficient and valuable had he become to his employers that in a comparatively brief period he was earning fifteen hundred dollars a year, no small compensation in those days for the services of an employé. It was then his privilege and pleasure to be able to repay the kindness of his elder brother, who was struggling with a load of responsibilities that would have crushed a less brave spirit, and Nathan Cole did not rest until he saw him firmly on his feet and taking that high position among commercial men which his energy and integrity fairly entitled him to.

On the 30th of January, 1851, Nathan Cole was married to Rebecca, daughter of A. W. Fagin, one of the most honorable and successful merchants and manufacturers of St. Louis. From this union has resulted a very large and interesting family.

In July, 1851, Mr. Cole was admitted as a junior partner in the house of W. L. Ewing & Co., wholesale grocers, and during the fourteen years of this connection he contributed his full share towards giving the house its reputation as one of high character and remarkable success. In the year 1864 this partnership was dissolved, when, in conjunction with the brother already mentioned, the house of "Cole Brothers, commission merchants," was established. From that day to this the firm has enjoyed a continuous success, amid all the vicissitudes of the war and the panic which followed it, and to-day it stands among the first in St. Louis in credit and reputation for fair and honorable dealing, and for the faithful discharge of all trusts confided to its care by its numerous patrons.

In 1869, Mr. Cole's fellow-citizens pressed him into the public service and (much against his personal inclination) elected him mayor of the city, to deal with certain evils that had been inflicted upon the people by "rings" in the municipal government. These abuses were of such magnitude that only a man of large business experience and of unsullied

Anna W. [illegible]

Yours Sincerely
Nathaniel

character could successfully deal with them. Mr. Cole thereupon withdrew from active participation in his business, and as mayor applied himself zealously to the work of reform. Crying wrongs were redressed, abuses and extravagance were corrected, the routine of city business was simplified and improved, the public debt was reduced, the credit of the city was largely enhanced, a new and improved city charter was adopted, and the whole administration, on account of its beneficence and integrity, will ever constitute a bright page in the political history of St. Louis. Mr. Cole peremptorily declined the renomination which the people of St. Louis seemed disposed to force upon him, and returned to the more congenial associations of private life, and to his old and active position in the house of Cole Brothers.

In 1876 he was summoned to a more important service, to represent his district in the Forty-fifth Congress, and in this case also against his will. He discharged the duties of the office, however, to the general satisfaction of his constituents. He went to Washington as a business man, and devoted himself specially to the commercial interests of St. Louis and the Mississippi valley. He was an ardent advocate of closer business relations with Mexico and South America, and delivered a speech on our commercial relations with Mexico, which was highly praised, and in Mexico was hailed as the commencement of a better era. It was widely reprinted in the Spanish language, and Mr. Cole had the pleasure of receiving copies of it elegantly printed and bound.

Mr. Cole has also held many minor offices and positions in the public service, always, however, unsought on his part. Among the institutions with which he has been prominently connected are the St. Louis National Bank and the Bank of Commerce. Among his fellow-merchants he is held in the highest esteem, and in 1876 their appreciation of his ability was shown in his election as president of the Merchants' Exchange.

In 1863, in connection with his father-in-law, A. W. Fagin, and other spirited gentlemen, he assisted in inaugurating a new and important enterprise, the elevator system of handling grain in bulk. In spite of much disparaging opposition the project was pushed forward, and the result was the erection of the splendid and capacious elevator at the foot of Biddle Street, now known as the St. Louis Grain Elevator. From this beginning grew the present fine elevator system of St. Louis, with a storage capacity of ten million bushels and a handling capacity of sixty million bushels a year, which has made St. Louis the grain exchange of the empire west of the Mississippi River.

Mr. Cole has ever been by education and conviction a religious man. He early identified himself with the Baptist Church, and has labored by personal effort and aided by liberal contributions to advance its interests in city and State, as well as those of the various missionary enterprises, domestic and foreign. While a stanch adherent of his denomination, he is liberal in his views, believing in religious freedom and liberty of conscience, and recognizing him as the best Christian who best follows the example of the Master in doing good to his fellow-men.

Joseph Brown was elected mayor in 1871, and on the 10th of April delivered his inaugural address before the City Council, in the course of which he styled himself "the representative of the liberated ballot-box." For the first time in the history of the State the ballot-box was within the reach of all classes. "For the ten years preceding, the ex-Confederate," he said, "was deprived of all access to the ballot-box, but liberally admitted to all the privileges of paying his taxes promptly; the negro had enjoyed the ballot-box from the first day he was liberated from the bondage of slavery, and used the privilege with all the prejudices which ignorance fostered and political partisanship encouraged." It was under these circumstances that Mayor Brown expressed the hope that as "the ballot-box in the hands of those whose prejudice is stronger than their judgment is more dangerous than the sword," sound judgment would in the future find expression in the ballot-box rather than in ignorant prejudice.

Mayor Brown's first annual message of June 2, 1871, stated that the bonded debt of the city was $12,379,500, with an interest charge of $748,270, and that the estimated value of all taxable property was $142,000,000, yielding at one and a half per cent. tax $2,130,000. The taxable property in the new limits was $4,000,000, and the revenue from all sources was $3,151,489.10. The total expenditures as estimated amounted to $3,133,665.66, leaving a balance for contingencies of $17,823.44. During the administration of Mayors Thomas and Cole the city did not pay for lighting the streets with gas for a period of more than four years. The claim of the Gas-Light Company amounted, April 1, 1871, to $402,868. Mayor Brown took immediate steps to procure a reduction in the price of gas to citizens, and succeeded in having it reduced from $4.50 per thousand feet to $3.50.

On the 26th of September, 1872, Governor McClurg removed Ferdinand Myer, William A. Hequemburg, and Julius Hunicke from the board of police commissioners, and appointed S. M. Randolph, William B. Baker, and William Moran. On November 1st, M. A. Rosenblatt was appointed in the place of Sam-

uel Bomer. Governor B. Gratz Brown reorganized the board as follows: W. F. Ferguson, vice-president, commission dated Feb. 13, 1871, for the unexpired term of S. M. Randolph; William Patrick, treasurer, commission dated Feb. 3, 1871, for the term of four years; Julius Hunicke, commission dated Feb. 15, 1871, for the term of four years; and O. B. Filley, commission dated February 17th, for the unexpired term of M. A. Rosenblatt. The mayor, Joseph Brown, was *ex officio* president of the board. Mr. Hunicke was appointed by the mayor a member of the board of health, as required by the law. The police force consisted of one chief, four captains, thirty sergeants, three hundred and four patrolmen, five detectives, and four turnkeys; total, three hundred and forty-eight.

At the regular November session of the City Council for 1872 the progress of the city was reported as satisfactory and encouraging in all the departments of commercial and manufacturing enterprise, in growth of population, etc. In the city finances the same prosperity was visible; the receipts amounted to $2,359,920.13, and the expenditures to $2,212,672.50, leaving a balance of $147,247.63. The total bonded debt amounted to $13,409,500. This financial exhibit the mayor considered "as healthy and satisfactory." He urged upon the City Council the necessity of early action in the matter of authorizing the issue of $500,000 in city bonds for the payment of property condemned for the approaches of the great bridge, the early completion of which would be retarded unless this matter was promptly disposed of. The utility and commercial necessity of this great work, he added, were so evident that no obstacle ought, in the opinion of the mayor, to be permitted to stand in the way of its completion. While the difficulties of building a bridge across the Mississippi at any point were very great, those that were presented immediately in front of St. Louis were "such as very few men dare to attempt to remove or overcome. But, fortunately," said Mayor Brown, "we have among us those who have the genius sufficient to plan, united with the energy and determination necessary to execute such a work, and they have thus far prosecuted it with success and unrelaxing zeal. It is but due and fitting that we should grant all the support possible to sustain and encourage them in their efforts to complete this gigantic enterprise, not merely on account of its great importance to St. Louis, but in view of the peculiar difficulties connected with its execution. The cost is probably much heavier than was originally estimated, owing to the fact that the means by which the river foundations were laid had to be sought for in a hitherto comparatively unexplored field of engineering science. This great difficulty in the work has been triumphantly overcome, the bridge advances to completion with every prospect of success, and I believe the names of those who conceived and who ventured their means in this great enterprise will forever stand honored and conspicuous in our history." In immediate connection with the great bridge was the "Union Depot," located at the "Chouteau Pond mill tract," and "any temporary inconvenience resulting from the building of the tunnel" to connect the two was, in the opinion of the mayor, "a matter of small consequence, and should create no public dissatisfaction."

The subject of street-paving was again brought by the mayor to the attention of the City Council in 1873, and the message stated that the streets were "in a very unsatisfactory condition." Experience and trial had shown that "when the plank superstructure of the Nicholson pavement is once broken," it was "impossible to put it in as good order as it was at first without entire reconstruction." During the preceding year opportunities had been offered to persons interested in pavements to put down samples of different kinds of street pavements. Samples of wood pavement, of porphyry and red granite, of asphalt and block limestone had accordingly been laid. The conclusion arrived at by the mayor was "that the new kind of wood pavement and limestone blocks are the only pavements at all suitable to our streets and within our reach in price." The regulation of the "social evil" came prominently forward at this time. The ordinance on the subject had aroused the religious sentiment of the people, and a memorial was submitted to the City Council asking its repeal. The so-called license or permit system of the ordinance met with serious objections from the religious mind and the legal countenance which it seemed to give to immorality was deemed repugnant to good morals as well as to religion. The mayor combatted the arguments of those who opposed the ordinance, and expressed himself as being confident that "when it can be put in full operation it will be found to be productive of practical good, and not evil; and therefore he recommended that it be not repealed, at least until a sufficient period has been allowed to test thoroughly its effectiveness."

The biennial election of 1873 resulted in the election of Mayor Brown.

The revised charter, which required the city to be "divided into not less than twelve wards," caused the creation of the Thirteenth Ward, which had representatives in the Council this year.

The outstanding bonded debt of the city had reached $14,086,500, Mayor Brown, while not

sidering this amount of indebtedness a very serious or discouraging burden, nevertheless urged that the most rigid scrutiny be applied to every project which involved its further increase. While it was desirable that all public improvements of general importance should be pushed forward as rapidly as possible, the mayor regarded it as "also essential that the credit of the city should be kept unimpaired, and the annoyances and ill effects of deranged finances and an oppressive debt should be avoided." The ill-advised legislation which a few citizens deeply interested in some particular project had been enabled to procure, whereby the bonded debt had been increased without the sanction of the city authorities, was to be regretted, and for the better protection of the future interests of the city the mayor suggested that the Committee on Ways and Means of the City Council "be instructed to watch the introduction of all bills in the Legislature involving the expenditure of money on behalf of the city, and to take active measures to oppose them as far as possible, unless of an entirely desirable character." The scarcity of money and consequent tightness in financial circles, together with unusual demands upon the city's finances, rendered the utmost carefulness and economy absolutely necessary in the operations of the city during the succeeding fiscal year.

The Thirteenth Ward disappeared on the reorganization of the wards in 1874. In his message in May of that year the mayor significantly remarked that the Council had been "recently reorganized by the people," but expressed his regret at the comments of "some of our citizens who should know better" concerning the city's indebtedness, because at a public meeting during the canvass "exaggerated statements" had been made "which conveyed the impression that the bonded debt of St. Louis was representative of nothing but the wastefulness of the city government during the past twenty or thirty years." This the mayor regarded as a "gross misstatement," and added "that an inspection of the records not only exhibits the public purposes for which the bonds were issued, but establishes the fact that instead of having "nothing to show for the debt," we have everything to show, viz., all our more important public improvements, such as our parks, the sewer system, the harbor and wharf, public railways, subscription to railways in earlier years, our hospitals and other institutions, and, lastly, our waterworks, which represent an expenditure of over one-third of the entire amount. The existence of the debt is, of course, to be regretted, but I see little good in animadversions thereon calculated to mislead the uninformed and injure the good name of the city."

Notwithstanding the bad condition of the streets of St. Louis, the act authorizing the issue of $2,500,000 of reconstruction bonds was voted down at the election, thus depriving the city "for an indefinite period not only of granite pavements on our central business thoroughfares, but of a general system of street improvement which would facilitate business, enhance property values, and assist the progress of the city in every way." The influences which procured their defeat are characterized by the mayor as follows: "First, the fact that the act, unfortunately, embraced a list of streets proposed to be improved which excited a sectional opposition to the measure; second, there is always a class in the population of a large city who are opposed to all expenditures looking to any increase in the taxation, and in St. Louis they have more than once exercised a powerful influence in defeating extensive public improvements; lastly, the true bearing of the measure was not understood, and a violent effort was made to drag in local politics, and the howl of 'corruption' was hurled at one of the most-needed improvements ever sanctioned by the Legislature and sought to be inaugurated by the city government." Notwithstanding this defeat, the mayor was able to make an arrangement with the tunnel company to lay down granite instead of wood at the bridge approach on Washington Avenue and as far west as Fifth Street.

Mayor Brown, on retiring from office at the expiration of his four years of service, reviewed in his valedictory address the condition and future prospects of the city. The wonderful growth of St. Louis in population and in all material interests had been beyond all precedent or expectation. The city directory indicated a population of four hundred and ninety thousand (grossly exaggerated, as it was only three hundred and fifty thousand at the time of the census of 1880), and in manufactures and every other branch of substantial improvements the city had kept pace with any other city on this continent, or, perhaps, in the world. The mayor, forecasting the future, could "see no reason to doubt that before the close of the present century this city will count her population by millions rather than hundreds of thousands." The mayor, after setting forth in succinct terms his views as to what ought to be done, as well as left undone, resigned the office of mayor into the hands of Arthur B. Barret, who had been elected his successor.

Joseph Brown was born in Jedburg, Scotland, and when eight years of age emigrated with his parents to America. The family first located in St. Louis, but afterwards removed to Alton, Ill., where the father died. Joseph received good educational advantages, but left college at the age of eighteen, before completing his course, for the purpose of engaging in

business, in which he was very successful. He was elected mayor of Alton, and lent his support to the efforts made during his administration for the extension of the Chicago and Alton Railroad through instead of around the city, contributing materially to the success of that important enterprise. About the same time Mr. Brown embarked in the steamboat business, and subsequently commanded in succession a number of fine steamers, some of which were constructed under his personal direction. At the beginning of the war, Mr. Brown, who had retired from the steamboat business, and had transferred his permanent residence to St. Louis, where he was largely interested in real estate, espoused the cause of the Union with great earnestness and ardor, and subsequently assisted in the construction of gunboats for the United States navy. In 1868 he was elected State senator as a war Democrat from St. Louis, and on March 28, 1871, was chosen president of the Pacific Railroad Company. Early in the following month he was elected mayor of St. Louis, and re-elected, continuing to serve until 1875. Mayor Brown was an able and successful officer, and was conspicuous for his zeal in fostering all benevolent and humanitarian enterprises.

Mayor Barret, who succeeded Mayor Brown, delivered his inaugural address on the 17th of April, 1875, and in it expressed his "firm conviction that no increase of taxation will be so willingly accorded as that which would secure to our citizens relief from the terrible dust clouds that permeate every house, shop, and manufactory, carrying destruction to many of our industries, and proving no less an inconvenience than an incalculable loss, from every point of view, to our entire community." Mayor Barret died during the same month (April 24, 1875).

Arthur Buckner Barret was born in St. Louis, on the 22d of August, 1835. His father was Dr. R. F. Barret, Professor of Materia Medica in several medical schools, and his mother was a daughter of the late Hon. R. A. Buckner, for many years judge of the Supreme Court of Kentucky, who was also at one time a member of Congress from the Green River District, and on terms of intimate friendship with Henry Clay. After his removal to St. Louis, Mr. Buckner became Professor of Law in the St. Louis University.

In 1866, Arthur B. Barret, then in his thirty-first year, was elected president of the St. Louis Agricultural and Mechanical Association. At this time many of those who had been connected with the enterprise thought it had proved a failure, and predicted for the young president speedy disaster. The Fair Grounds were then held by the government. Mr. Barret brought to his aid youth, energy, and an enterprising spirit, and in a short time succeeded in bringing the affairs of the association into a condition which had not been reached before. The first exhibition under the new management was a success, and each successive year the prosperity of the association increased, until at the close of the eighth year of President Barret's administration the annual exhibition had become famous not only throughout the United States but in Europe. In 1874, Mr. Barret was succeeded in the presidency of the Agricultural and Mechanical Association by Julius S. Walsh. His interest in its affairs, however, was not abated; he still retained the position of director in the association, and was its vice-president. He was also a director of the Butchers' and Drovers' Bank, and one of the board of Fellow Park commissioners. In March, 1875, he was nominated as the Democratic candidate for mayor of St. Louis, and though opposed by two of the most popular gentlemen in the city as leaders of the Republican and Independent parties, he was elected. He had only been inducted into office and had performed but few official acts before he was stricken down by the illness which terminated in his death.

Mr. Barret was a gentleman of fine presence, and of the most genial disposition and address. His social qualities made him a universal favorite, and his honorable and upright nature gained him the respect of the whole community. He was retiring and modest in his habits, and preferred not to place himself in conspicuous positions. The most notable instance of his deviation from this practice was his acceptance of the position of grand marshal at the celebration of the 4th of July, 1874, in honor of the completion of the Illinois and St. Louis bridge. He only consented to serve in this capacity, however, in obedience to the unanimous call by the committee of arrangements. In 1859 he married the only daughter of the late James L. Swearingen, one of the oldest and wealthiest merchants of St. Louis. His wife and several children survived him.

After Mr. Barret's death, H. Rectien acted as mayor, and in a message to the Council he remarked that "the prolongation of the contest as to the occupancy of the executive office now threatens to seriously impair the material interests of the city by stopping public works, closing public charities, hindering needed repairs of streets and wharves, and impeding, if not stopping, the administration of municipal laws." At the special election of April 15, 1875, Col. J. H. Britton was declared elected mayor by the judges of election, but was unseated

by the Council after a protracted and exciting contest, and Hon. Henry Overstolz was installed as mayor when nearly one-half of the official term had elapsed.

James H. Britton was born in Shenandoah County, Va., on the 11th of July, 1817. His ancestors were of Welsh origin, and emigrated to this country at an early period. At the age of thirteen James entered a country store at Sperryville, Va., and subsequently managed a similar establishment at Thompsonville, Va. At the age of nineteen he was admitted to a partnership by the proprietor, George Ficklen. In 1840, Mr. Britton removed to Missouri and settled at Troy, where he opened a store for the sale of general merchandise. His business at Troy prospered until his removal, in 1857, to St. Louis, to assume the position of cashier of the Southern Bank, of which he became president in 1864. He was subsequently chosen president of the Third National Bank, and afterwards of the National Bank of the State of Missouri. Mr. Britton was also largely interested in other enterprises, and filled the important position of president of the Life Association of America, and treasurer of the company which erected the great bridge across the Mississippi River, of which project he was one of the earliest and most enthusiastic promoters. In politics he belonged to the Democratic party, of which he was an active and influential member. In 1848 he was elected secretary of the Missouri State Senate; in 1852, and again in 1854, was elected to the Legislature from Lincoln County, and served as chief clerk of the House of Representatives during the session of 1856–57. For several years also he was postmaster at Troy and treasurer of Lincoln County. On the 10th of May, 1875, he was nominated for mayor by the Democratic party, but after having been returned as elected, was, as previously stated, dispossessed by the opposing candidate, Hon. Henry Overstolz.

Mr. Overstolz assumed charge of the mayoralty under trying and unusual circumstances, but discharged its duties with conspicuous ability. On the 20th of March, 1877, a "call," embracing several thousand names, was published in the *Republican*, asking Mr. Overstolz to be a candidate for re-election at the ensuing April election. This "call" was by far the most comprehensive one that had ever been published in St. Louis, and indicated a very general desire that Mr. Overstolz should continue to serve the city. Among the signers were bankers, brokers, commission merchants, dry-goods merchants,—in brief, representatives of every mercantile, professional, and industrial pursuit in the city.

The Democratic Convention nominated Mr. Overstolz for mayor, and the Republican Convention paid that gentleman the unusual compliment of indorsing him. This was an extraordinary tribute to the worth of an official who had so administered the affairs of the mayor's office as to have gained the approbation of nearly the whole community irrespective of party.[1]

The delay incident to the contested election prevented the mayor from entering upon his duties contemporaneously with the opening of the fiscal year, and compelled him when installed in office to request the resignation of appointive officers, so as to enable him to discharge the duty assigned to the mayor of organizing the administration for which he was responsible. These unusual circumstances restricted the participation of Mr. Overstolz in the financial administration of the city to the last three months of the fiscal year. Unusual difficulties and new responsibilities met the mayor at the very threshold of his administration. "In population," the message said, "in building, and foreign credit we were never in a more prosperous condition, but, at the same time, our bonded indebtedness, incurred in the execution of public works, is larger than at any other period in our history, the demands of our current expenses were never heavier, and the depreciation of real estate and the depression pervading business interests have seriously affected our revenues, irrespective of the direct decrease caused by the provisions of the new Constitution. In addition to these facts, the problem arising from the condition of our streets, the unsettled questions with the gas companies, and the pending scheme for the separation of the city and county, involving as it does the direct increase of our bonded debt by about six millions of dollars,[2] and also a considerable addition to our annual expenses, all contribute to the gravity of the situation and call for the soundest judgment and the most careful action on the part of the city authorities." The total bonded debt was $16,318,000, involving an annual interest charge of $1,250,000; the floating debt amounted to $622,000 and interest claimed by the St. Louis Gas Company, $300,000 outstanding city treasury war-

[1] In the Democratic Convention there was a trifle of opposition to Mr. Overstolz, but the grounds of the same were so well understood that it had been discounted in advance, and the infinitesmial "bolt" that occurred created neither surprise nor indignation, but rather amusement and gratification.—*Republican*, March 22, 1877.

[2] Section 23 of the miscellaneous provisions under the charter provided that in the adjustment of the relations between the city and county the city should take upon itself the entire park tax, and, in consideration of the city becoming the proprietor of all the county buildings and property within its enlarged limits, that it should assume the whole of the existing county debt, and thereafter the city and county of St. Louis should be independent of each other.

rants or "brown-backs," $105,000 overdue coupons due sinking fund, and about $10,000 old street opening claims. The total resources for the year were $3,915,043.74, and the total expenditures for general purposes $3,864,841.81.

The Constitution of the State of Missouri, adopted in 1875, provided for the separation of the county of St. Louis from the city of St. Louis, and for a separate government for each. In accordance with the provisions of this Constitution, the board of freeholders therein provided for, consisting of Geo. H. Shields, president, Silas Bent, Jas. O. Broadhead, M. Dwight Collier, F. H. Lutkewitte, Henry T. Mudd, Geo. Ward Parker, Geo. Penn, M. H. Phelan, and Samuel Reber, reported on the 3d of July, 1876, the "scheme for the government of the county and city of St. Louis and charter for the city of St. Louis," which was adopted by the qualified voters of the city and county. On March 5, 1877, the Court of Appeals, after four days' deliberation and careful examination, declared the "scheme and charter" ratified, the former by a majority of twelve hundred and fifty-three, and the latter by a majority of three thousand two hundred and twenty-one. This scheme and charter thus became the organic law, and under its provisions the county was separated from the city, the corporate name and style of the city becoming "the city of St. Louis."

The corporate limits of the city as established by this charter were as follows:

"Beginning at a point in the middle of the main channel of the Mississippi River, and running thence westwardly at right angles to said channel to a point on the west bank of said river two hundred feet south of the centre of the month of the River des Peres; thence westwardly and parallel to the centre of the River des Peres and two hundred feet south thereof to the eastern line of the Lemay Ferry road; thence westwardly to a point in the west line of said Lemay Ferry road at its intersection with the centre of the Weber road; thence westwardly along the centre of the Weber road to its intersection with the east line of lot 1 of the Carondelet commons south of the River des Peres; thence westwardly to the southeast corner of Rudolph Overman's, or northeast corner of B. H. Haar's land; thence westwardly to said Haar's northwest corner; thence northwestwardly to a point in the centre of the Gravois road six hundred feet southwardly from the centre of the bridge across the River des Peres; thence northwestwardly to the southeast corner of lot 31 of the sub-division of the McKenzie tract in United States survey 1953; thence northwestwardly in continuation of said last-mentioned line to the southern line of lot 21 of the sub-division of the said McKenzie tract; thence northwestwardly to a point in the southern line of United States survey 2035, twenty-six chains eastward from the southwest corner of said survey; thence northerly to a point in the north line of the sub-division of East Laclede, six hundred feet west of the McCausland road; thence northwardly and parallel to the centre of the McCausland road to a point on the Clayton road six hundred feet west of its intersection with the McCausland road; thence northerly and parallel with the Skinker road, and six hundred feet west thereof to its intersection with the old Bonhomme road; thence northeasterly to the intersection of the centre lines of McLaren Avenue and Mead Street; thence in a northeasterly direction to a point in the Bellefontaine road six hundred feet north of its intersection with the Columbia Bottom road; thence northerly and parallel with the centre line of the Columbia Bottom road to the northern boundary line of United States survey 114; thence easterly along said line to the centre of the main channel of the Mississippi River; thence with the meanderings of said channel southwardly to the point of beginning."

The city was divided into twenty-eight wards, the boundaries of which are as follows:

"*First Ward*—Shall be bounded on the east by the Mississippi River, on the south by the line dividing the First and Second Congressional Districts, on the west by Twelfth Street, and on the north by Pine Street.

"*Second Ward*—Shall be bounded on the east by the Mississippi River, on the south by Pine Street, on the west by Eleventh Street, and on the north by the line dividing the [illegible] and Third Congressional Districts.

"*Third Ward*—Shall be bounded on the east by the Mississippi River, south by Rutger and Autumn Streets, west by Stoddard Avenue and Twelfth Street, and on the north by the line dividing the First and Second Congressional Districts.

"*Fourth Ward*—Shall be bounded on the east by the Mississippi River, south by the line dividing the Second and Third Congressional Districts, west by Eleventh Street, and north by Webster Street.

"*Fifth Ward*—Shall be bounded on the east by the Mississippi River, south by Geyer Avenue and Emmet Street, west by Rosatti Street and Stoddard Avenue, and north by Rutger and Autumn Streets.

"*Sixth Ward*—Shall be bounded on the east by the Mississippi River, south by Webster Street, west by Thirteenth Street, and north by Herbert, Eleventh, and Robert Tyler or Harrison Streets.

"*Seventh Ward*—Shall be bounded on the east by the Mississippi River, south by Victor Street, west by Rosatti Street, and north by Geyer Avenue and Emmet Street.

"*Eighth Ward*—Shall be bounded on the east by the Mississippi River, south by Robert Tyler or Harrison Street, west by Bellefontaine road, and north by the present city limits.

"*Ninth Ward*—Shall be bounded on the east by the Mississippi River, south by Arsenal Street, west by Jefferson Avenue, and north by Victor Street.

"*Tenth Ward*—Shall be bounded on the east by Eleventh Street, south by Pine Street, west by Jefferson Avenue, and north by the dividing line between the Second and Third Congressional Districts.

"*Eleventh Ward*—Shall be bounded on the east by the Mississippi River, west by Jefferson (?) Avenue, and north by Arsenal Street.

"*Twelfth Ward*—Shall be bounded on the east by Eleventh Street, south by the line dividing the Second and Third Congressional Districts, west by Jefferson Avenue, and north by a line running from its western boundary along Waterway Street to Twentieth Street; thence south along Twentieth Street to Mullanphy Street; thence along Mullanphy Street to Thirteenth Street; thence north on Thirteenth Street to Webster Street; thence east on Webster Street to Eleventh Street.

"*Thirteenth Ward*—Shall be bounded on the east by Re[illegible]

Street, south by Victor Street, west by Jefferson Avenue, and north by Lafayette Avenue and Lafayette Street.

"*Fourteenth Ward*—Shall be bounded on the east by Thirteenth Street, south by the Twelfth Ward, west by Jefferson Avenue, and north by Herbert Street.

"*Fifteenth Ward*—Shall be bounded on the east by Rosatti Street, Stoddard Avenue, and Twelfth Street, south by Lafayette Avenue and Lafayette Street, west by Jefferson Avenue to Chouteau Avenue, thence west along Chouteau Avenue to Jefferson Avenue, and on the north by the line dividing the First and Second Congressional Districts.

"*Sixteenth Ward*—Shall be bounded on the east by Eleventh Street and Bellefontaine road, south by Herbert Street and the new St. Charles Rock road, and west by the present city limits.

"*Seventeenth Ward*—Shall be bounded on the east by Twelfth Street, south by the line dividing the First and Second Congressional Districts, west by Jefferson Avenue, and north by Penrose Street.

"*Eighteenth Ward*—Shall be bounded on the east by Jefferson Avenue, south by the line dividing the First and Second Congressional Districts, west by present city limits, and north by the line dividing the Second and Third Congressional Districts.

"*Nineteenth Ward*—Shall be bounded on the south by Victor Street and Shenandoah Street extended to the present city limits, west by the present city limits, north by the line dividing the First and Second Congressional Districts to Jefferson Avenue, thence south along Jefferson Avenue to Chouteau Avenue, thence east along Chouteau Avenue to Jefferson Avenue, thence south along Jefferson Avenue to Victor Street.

"*Twentieth Ward*—Shall be bounded on the east by Jefferson Avenue, south by the line dividing the Second and Third Congressional Districts, west by the present city limits, and north by the new St. Charles Rock road and Herbert Street, and a line from the new St. Charles Rock road to Herbert Street.

"*Twenty-first Ward*—Shall be bounded on the east by Jefferson Avenue, south by Chippewa Street extended to the present city limits, west by the present city limits, and north by Victor and Shenandoah Streets.

"*Twenty-second Ward*—Shall be bounded on the east by the Mississippi River and Jefferson Avenue, south by Fillmore Street and Wilmington road, west by the present city limits, and north by Chippewa Street.

"*Twenty-third Ward*—Shall be bounded on the east by the present city limits and the Mississippi River, on the south by the line dividing the Second and Third Congressional Districts, and on the west and north by the city limits herein established.

"*Twenty-fourth Ward*—Shall be bounded on the east by the Mississippi River, south and west by the present city limits, and north by Wilmington road and Fillmore Street.

"*Twenty-fifth Ward*—Shall be bounded on the east by the present city limits, south and west by the city limits herein established, and north by Gravois and Clark roads, King's Highway, and the line dividing the First and Second Congressional Districts.

"*Twenty-sixth Ward*—Shall be bounded on the east by the present city limits, south by the Twenty-fifth Ward, and west and north by the line dividing the First and Second Congressional Districts.

"*Twenty-seventh Ward*—Shall be bounded on the east and south by the line dividing the First and Second Congressional Districts and by the present city limits, west by the city limits herein established, and north by Lindell Avenue and Lindell Avenue extended to the limits of the city as herein established.

"*Twenty-eighth Ward*—Shall be bounded on the east by the present city limits, south by Twenty-seventh Ward, west by the city limits as herein established, and north by the line dividing the Second and Third Congressional Districts.

"The Municipal Assembly shall, every five years after the adoption of this charter, establish corrected ward limits, which correction shall be made as near as practicable so as to equalize the number of registered voters in each ward; but in making the division the present eastern and western boundaries of wards as herein established shall be retained, so that Rosatti, Twelfth, and Eleventh Streets, Jefferson Avenue, and the present city limits shall remain division lines."

The term of elective officers was fixed at four years, and a general election was directed to be held on the first Tuesday in April, 1877, and every four years thereafter. The legislative power of the city was vested in a Council and a House of Delegates, to be styled the "Municipal Assembly of the city of St. Louis." The Council was made to consist of thirteen members chosen on a general ticket by the qualified voters of the city for four years; the House of Delegates to consist of one member for each ward, to be chosen every two years by the qualified voters of the several wards. The elective officers of the city are the mayor, comptroller, auditor, treasurer, register, collector, recorder of deeds, inspector of weights and measures, sheriff, coroner, marshal, public administrator, president of the board of assessors, and the president of the board of public improvements.

The duties of each elective officer are clearly and distinctly defined and set forth. The charter is perhaps the most elaborate and carefully prepared municipal document to be found in this country.

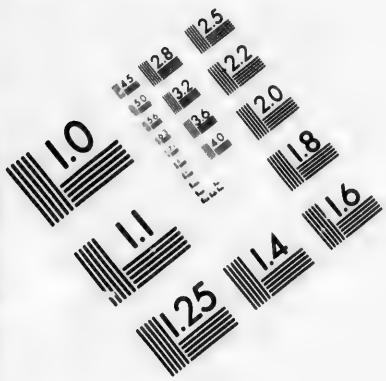
At the election in April, under the charter, Mr. Overstolz was elected by the largest majority ever given in St. Louis to a candidate for mayor.[1]

Mayor Overstolz's message to the special session, July, 1877, reviewed the railroad riots and the efforts of the city government to suppress them and to restore order. The "strike," which was attended in many cities with riotous proceedings and great destruction of property and life, was confined in St. Louis to a total suspension of labor, unattended, ow-

1 "The bolt, as was feared, has had the effect to give the Republicans the control of the Municipal Assembly, and to defeat nearly all of the Democratic candidates for the general offices. Had there been no opposition on the part of dissatisfied Democrats to the ticket nominated at Armory Hall, with Overstolz at the head, we do not doubt that the entire Democratic ticket would have succeeded by a handsome majority. The fight against Overstolz brought out the full German Republican vote, and while this was not disadvantageous to Mr. Overstolz, it was very damaging to his colleagues on the regular Democratic ticket."—*Republican*, April 4, 1877.

ever, with either loss of life or destruction of property. By the suspension of business on all railroads centring at East St. Louis eastern freights were stopped, and a heavy loss entailed upon St. Louis merchants. During an entire week the strikers at East St. Louis had complete control over all railroad property there, and both State and city were powerless to remove the blockade which existed not in Missouri alone, but in Illinois. It was only by the interruption of business that St. Louis suffered from this blockade. The proclamation of the mayor calling for volunteers to protect the city was so promptly responded to and in such spirit and numbers that the lawless spirits were at once overawed. In a single day "thousands of citizens of all classes sprang forward to maintain the honor and peace of the city, and arming and organization were the work of a few hours, and the same afternoon companies of well-equipped volunteer soldiery were available for guard and patrol duty." Arms and ammunition, supplied at the United States arsenal, and two thousand Springfield rifles, furnished by Governor Phelps, enabled the city authorities to arm the volunteers, and their prompt and energetic action prevented confusion and, probably, bloodshed. The mayor took advantage of this episode to urge upon the Municipal Assembly the importance of increasing the police force. The force at the time of the strike amounted to but three hundred and twenty-five men, which, "when divided for day and night service, hardly admits of one hundred and fifty men available for active duty at one time, inasmuch as there is always a percentage of sick and absent on leave." The establishment of an armory at the Four Courts was also recommended by the mayor. The city bonded debt under the new charter was $23,067,000, including $6,820,000 assumed by the city under the separation scheme. The total receipts for the year were $5,734,701.41, and the total expenditures $5,067,777.05.

It was not until a fiscal year had elapsed after the city government had been recast and reorganized under the charter and separation scheme that a fair opportunity was presented of summarizing and examining the results of the new system. This opportunity presented itself at the May session of 1878, when the mayor stated that the immediate results had been reduction in taxation and in the expenses of departments, an improved system of public works, and an improved management of public institutions. The reduction in taxation in 1876–77 was sixty-two and a half cents per one hundred dollars. The reduction in expenditures for the same years showed a difference in favor of the city of fifty-two thousand three hundred and forty-one dollars, or a reduction in cost at the rate of more than twenty-five per cent. in one year.



The "social evil" was found not to have been abated by the repeal of the regulation system, the law substituted for that system having increased the difficulty of proof and enlarged the opportunities for evasion, leaving the evil almost wholly unchecked as to cause and effect.

The municipal affairs of the city for the fiscal year ending in June, 1879, were prosperous and satisfactory to no ordinary degree. The penal and charitable institutions were in excellent order and economically managed; the fiscal and improvement departments were conducted with integrity and energy, and at no period in the history of the city had its credit been better, or had a more practical and efficient system controlled the expenditure of the city revenue, the management of the city debt, and the operations on public works. These results Mayor Overstolz attributed to the change in the organic law of the city, which placed the full control of its own affairs in the hands of its selected officers, abolished the irresponsible and conflicting jurisdiction of the county court, increased the stability of departments, and enabled a local system of civil service reform to be practically enforced by removing municipal patronage from the domain and dictation of partisan politics. The good effects of the new charter and separation scheme continued to demonstrate the wisdom of their adoption throughout the administration of Mayor Overstolz. He closed the four years of his service in 1881, when a long period of business depression was passing away, and the city was advancing rapidly in all the elements of prosperity and progress. No other period of four years in the history of St. Louis presents so many evidences of purity in administration and ability in the performance of executive duties as does that of the administration of Mayor Overstolz.

Henry Overstolz was born in the city of Münster, Westphalia, Prussia, on the 4th of July, 1822. His full name is Henry Clemens Overstolz, but in his signature he omits the Clemens.

He resided in his native town until 1836, and retains vivid recollections of his boyhood days spent near the historic home of his ancestors. After enjoying a thorough course of collegiate education in the celebrated Gymnasium of Münster, he came to America in company with his father and mother, and settled with them in St. Clair County, Ill., about seven miles from St. Louis. In 1846 he removed to St. Louis, which he has ever since made his home, and towards whose prosperity he has ever

tributed much by the exercise of his energy, integrity, and patriotism. Soon after locating here he opened a store (in 1847) for general merchandise, in which it was then customary to find the necessary supplies for the farmers of the surrounding districts. In this business he met with such success that in 1853 he retired, and two years later purchased an interest in saw-mills and a lumber business. Again he prospered, and once more retired from active business life in the year 1867 with a handsome fortune. Prior to this his high character and energy had won for him the confidence of his fellow-citizens, and he was induced in 1860 to organize the Tenth Ward Savings Institution, which was changed in 1882 under the National Banking Act to the Fifth National Bank of St. Louis, of which he is still the president. About the same time he became and still remains the head of a successful fire insurance company.

Henry Overstolz is the direct descendant of the oldest patrician family of Cologne. His father, William Overstolz, was born in Duisburg, Westphalia, in 1780, and died in St. Louis in 1853. His mother's maiden name was Thérèse Buse. She was born in Paderborn, Westphalia, in 1790, and died in St. Louis in 1862. The Overstolz stock is a sturdy one, and noted for its longevity. The ancestral family was one renowned in war and civil life. They were the merchant-princes of the thirteenth, fourteenth, and fifteenth centuries, and the name is held in high esteem in their native city of Cologne.

On Oct. 15, 1268, Mathias Overstolz, a knightly prince, and one of the most celebrated of this name, headed a successful resistance to the assaults of the forces of the archbishop, who had often endeavored to deprive the free city of its charter. Mathias lost his life in this struggle, and the grateful citizens erected to his memory a statue which is still to be seen in their city hall, and which bears a striking resemblance to the living representative of the hero.

Johann Overstolz, a brother of Mathias, was the mayor of Cologne in 1275.

Gerhard von Overstolz, son of Mathias, fell in the battle of Worringen in 1287, for a patriotic cause similar to that espoused by his father.

It had been the hereditary right of the patricians to have the chief magistrate of Cologne selected from among their number only, and for opposing the forcible abrogation of this right the landed estates of the Overstolz house were confiscated, and they, together with fifteen other celebrated patrician families, were banished from the city, and most of them fled to Westphalia.

Although legal steps were early instituted for a restitution of their property by the Overstolz claimants, the question remains undetermined, and the records of the German courts are still encumbered with the proceedings of this celebrated suit.

As an additional mark of appreciation of the eminent services rendered by Mr. Overstolz's ancestors, the city of Cologne purchased the ancient mansion of the family, and takes pride in preserving it in its original solidity, unimpaired by age.

Aside from his business prosperity, Mr. Overstolz can lay claim to eminent services rendered his fellow-citizens in a political life as satisfactory as it is honorable.

In the year 1849 he was elected a member of the City Council, which position he held until 1853, when he was elected comptroller of the city, and re-elected the following year. A third time he received the nomination of his constituents for the comptrollership, but was defeated by the Know-Nothing or Native American party. It is worthy of remark that he was the first German ever elected to a city office in St. Louis; and when in the autumn of 1856 he was elected a member of the State Board of Public Works, a body with great powers and responsibilities, he was also the first German to be elevated to a State office in Missouri. On this board he served the full term of four years.

In the spring of the same year he was elected alderman, the duties of which office he performed until he resigned to accept the position on the State Board of Public Works.

He was in 1871 again elected to the Council, and was subsequently chosen president of that body, over which he presided with dignity and satisfaction to all. His firmness and tact, his great experience in public matters, and his unsurpassed knowledge of men made his influence felt to such a marked degree among his colleagues and associates in public and private life, that in 1872 he was re-elected to the Council, and placed at the head of that body as presiding officer in 1873.

In 1875 he was called on by his constituents to represent his fellow-citizens in the capacity of chief magistrate of St. Louis. He accepted the candidacy on an independent ticket, but his opponent, Mayor Barrett, was declared elected. The latter's death only a few months after his installation made it necessary to again call an election, and once more Mr. Overstolz submitted his name as an independent candidate against Mr. Britton. Although his opponent was declared elected, Mr. Overstolz contested the election, and after an exciting contest before the deciding body and in the courts, lasting nearly a year,

established his title to the mayoralty by a rightful election of a majority vote. He was duly inaugurated Feb. 9, 1876, and served the remainder of the term until 1877, when he was re-elected under the provisions of the new charter which fixed the term at four years. During these four years he applied himself with untiring energy to the work of inaugurating a complete change in the government of the city and county.

The adoption of the charter marked a new departure in the political career of St. Louis. It was a radical severance of the city and county governments, and the emancipation of local questions from the control of the State Legislature. Under it the citizens now enjoy the privileges so jealously guarded by the free cities of Continental Europe. On the other hand, it introduced a new and untried system of local self-government, and it devolved on Mayor Overstolz to bring order out of chaos, and to set the machinery running in harmonious accord with the conflicting elements always present at such a revolution. How well he succeeded the result has shown. During this period, until the separation was satisfactorily accomplished, Mr. Overstolz possessed an irresponsible power that in the hands of many another man would have been abused, but he wielded it carefully and loyally for the public good alone. At length he succeeded in carrying out the wishes of the people, and in ridding them of the objectionable features of which they had so long complained under the previous dual government of city and county. The reorganization of the municipal government is a work to which Mayor Overstolz can look back as the proudest achievement of his political career, and for which the tax-payers of St. Louis will ever hold him in grateful remembrance.[1]

Mr. Overstolz's writings are confined to matters of a public nature, and bear evidence of that keen discernment and ripe knowledge which have formed such prominent elements in all his efforts. His address

[1] In an interesting address before the Missouri Historical Society on the public career of Mayor Overstolz, Col. T. T. Gantt paid the following tribute to that gentleman's services to the city during the critical period of the reorganization of its government:

"Prior to 1877," said Col. Gantt, "the municipal government of St. Louis was in a constant state of change. At no time from 1836 to 1876 did its charter continue for three years the same, and during the period from 1852 to 1876, when we had virtually annual sessions of the General Assembly, its charter scarcely escaped serious transformation in every period of twelve months. During all this time the city, being a part of the county of St. Louis, was subject to county government by taxation. The county outside of the city, having less than a fifth of its population and less than one-tenth of its wealth, outnumbered and outvoted the city on the bench of the county court, and the abuses consequent on this anomalous state of affairs was such as any one might have readily anticipated. It is not my purpose to enlarge upon the mischiefs of the dual government, by which the city was made tributary to the county, or the still more intolerable abuses by which it was pillaged. For more than ten years before 1875 it had been the hope of some of the most public-spirited of our citizens that some means might be devised of putting an end to these evils. At one time it was seriously contemplated, as something preferable to the double-headed and certainly double-handed system by which we were plundered, to extend the city government to the farthest limits of the county, as had been done in the case of Philadelphia; but the objections to this plan seemed too formidable. At length the convocation of a Constitutional Convention which met in 1875 gave an opportunity for grappling with the difficulty, and a provision found its way into the new Constitution of the State which not only made the proposed reforms possible in St. Louis, but in any other city of the State as soon as its population reached a certain figure.

"It is not out of place to say here that although the evils of the old condition of things were known to thousands, the bulk of the citizens of St. Louis took very little interest during the session of the convention in its action on this important subject. It happened that among the delegates from this city were some few who were very zealous in the promotion of such organic changes as would lead to the system under which we now live. But they were the smallest possible minority of those delegates, and those who represented St. Louis County were at first strenuous in their opposition to what they called 'a divorce.' A large majority of those who represented the city itself were either adverse or indifferent to the change, and a total failure to effect anything was imminent, when an earnest appeal was made by the friends of the measure to their constituents at home to come up and help them. The reply was very characteristic of the indolence of our citizens until abuses reach a point which makes further toleration out of the question. A statement was drawn up and signed by perhaps twenty property-holders, declaring in a languid way their approval of the proposed measure, with a promise that if it were altogether convenient some of them would visit Jefferson City in the ensuing week to urge its adoption. Of all these only one actually went to Jefferson City, and I shall die in the belief that to him more than to all others, certainly more than to all others not members of the convention, the passage of the measure itself was due. My belief further is that those of the convention who were apathetic and adverse were wrought upon by the zeal displayed by this one 'lobby-member' as they could not have been by any other agency, and whereas at the beginning of the last fortnight of the session of the convention the prospect of the amendment seemed almost desperate, within that time it received the approval of that body in the form which it now wears in the Constitution of the State.

"The Constitution being ratified by the popular vote, it remained to be seen whether the people of the whole city and county of St. Louis would avail themselves of the privilege extended to them by the organic law, and here again there were several noteworthy occurrences. Against the adoption of the amendments, against the acceptance of the privileges tendered, and in favor of adherence to the obstructions, the cost and complexity of the old system, were arrayed solidly the whole mass of what may be called the machine politicians. All who fattened upon the existing corruptions, and all the friends and relatives of this greedy tribe, were clamorous against a change which would put an end to their power to pick the public purse. The press of the city was divided, but, most fortunately, the

delivered before the convention held in St. Louis to encourage immigration to Missouri occupies a prominent place among the masterly pleas delivered on that occasion.

His home life is indicative of a mind of elegant attainments and studious tastes. His library is choice and large, and harmonizes well with the liberal taste displayed in a valuable gallery of pictures and art

oldest and most influential of the journals was in favor of the reform. The election came off, and it was at first declared by the officials of the old dispensation that the people had condemned the measure; but a canvass of the returns revealed the fact that most audacious frauds and falsehoods had been made use of in order to give color to this pretension, and it was judicially ascertained and declared that the separation of the city and county governments had been decreed by the people of the city and county.

"Time does not permit the mention of the particulars of the change of our municipal government effected by what is called the scheme and charter, framed by the freeholders called to that high duty by the new Constitution. I will only say that in the management of the public works, in the composition of the legislative department of the city, in the tenure of the office of mayor, in the fixing of the time when appointments to office shall be made, in the mode of obtaining supplies for the city, in the mode of contracting for public work, and in the freedom from legislative tinkering enjoyed by the charter now existing the changes are radical, and it is believed, without exception, most salutary.

"It was the lot of Mayor Overstolz—and I consider it a piece of rare good fortune—to be elected in 1877 as mayor of the city under the new system. His term of office was four years, a period long enough in which to give a fair trial to his administration. Here again I must be brief, but while I call attention to the great success which has marked him, I think it is proper to say that he has not had during the whole of his voyage the advantage of halcyon weather. In the very first year of his administration, the city was visited by the storm which laid waste many parts of our country. The strike of 1877 will not be soon forgotten by those who were in St. Louis during the week following the 21st of July. During that arduous crisis Mr. Overstolz acted as became the chief magistrate of a great city. The emergency was most alarming. He met it courageously, and strove with energy against the disorder which threatened us with ruin. He called to his aid, as was his duty, the citizens of St. Louis. They answered to his call, and with their assistance, without taking a single life, without a trace of that destruction of property and that disgraceful overthrow of lawful authority which marked the history of the strike in other cities, and without invoking the assistance of the Federal arm, the rioters were crushed and order restored in St. Louis in less than twenty-four hours after the Governor of the State, who fearlessly and well discharged his duty on that occasion, had placed a sufficient number of arms at the disposal of the mayor.

"Of course I do not mean to say that Henry Overstolz did all this with his single arm. The days are past when a single warrior was more than a match for a host of common men. The mayor was energetically and gallantly aided by the citizens of St. Louis, who gave proof on that occasion, as they so often have before, that though long suffering and slow to anger, they are, when fairly aroused, a body which it is not easy nor wise to withstand. To the gallant young men who on that occasion so patriotically tendered their services no stinted praise is due. They were under arms for several days, for they continued to watch over the good order of the city for seventy-two hours after all show of forcible resistance to authority had ceased, and, what was more trying, they assembled before they had sufficient arms, and with such imperfect weapons as private resources could supply, and held the disturbers of the public peace at bay until they grasped the means of enforcing submission to the law. All honor to them.

"There was no repetition of civil disorder in 1878, '79, and '80, but in the first two of these years we were menaced with a peril before which the bravest often shrinks. The yellow fever ravaged Memphis and threatened St. Louis. It was needful to enforce stringent sanitary measures, and to be vigilant not only in compelling all visitors from the South to comply with quarantine regulations, but to take care that every requirement of cleanliness was strictly observed in our own city. This duty was faithfully performed and the plague was stayed.

"On former occasions St. Louis had shown her capacity to deal with the trials of fire, of pestilence, of civil commotion and commercial disaster. In 1849, in 1854, in 1855, and in 1857 she had nobly endured all these tests. I am proud of St. Louis, and perhaps a little partial to a city in which I have spent the best years of my life, but I really think that an indifferent person, being now for the first time made acquainted with her fortitude under the conflagration which in 1849 laid in ashes almost the whole of the business houses of the city, the courage with which in that same year of desolation we, unaided and not asking for aid, met and overcame the terrors of a pestilence unexampled in the history of our land, the fraternal spirit with which, in 1855 and 1857, our men of property made themselves and their estates the security for our bankers, and the thoroughness with which, in 1854, after the demonstration of the powerlessness of the police force then in service of the city to repress the rioters who for two days and nights spread terror throughout her limits, the citizens embodied themselves and quelled the disorder, would be disposed to concede that the people capable of such things have a right to think not meanly of themselves. Our citizens have never shut their hearts or closed their purses when others in distress have appealed to their compassion. When smitten as no other place was by fire and pestilence in 1849, they performed their whole duty and asked for no aid from abroad; when some of those we had befriended on a former occasion tendered some small requital of our generosity we respectfully declined the offer; when commercial disaster impended we bore each other's burdens and enabled all to stand; and in 1877, when civil disturbances, which had wrapped other cities in flames and given them over to rapine, approached our border, we once more performed our duty, preserving the good order and peace of society by the performance of those duties which in a popular government belong to the people. Neither in 1854 nor in 1877 did we have occasion to invoke the interposition of the Federal arm to suppress an insurrection too strong to be dealt with by our State government. In saying this, and declaring that I, as a Missourian, am proud of it, I wish to say that I have no sort of jealousy of legitimate Federal authority. The whole is greater than any of its parts, and when necessity arises I have no sort of objection to calling on the Federal arm to do its duty. But it becomes a State or a city or a man to do without extraneous assistance whenever it or he can do the things which rest with the weight of obligation on it or him, and if to think thus be sinful, then am I 'the most offending soul alive.'

"But I must hasten to matters to which I cannot omit to call your attention without neglecting the principal purpose for which I am before you this evening. Conflagrations, pestilence,

objects. A happy home, graced by a wife and six children, crowns the labors of an active and honored citizen. The maiden name of Mrs. Overstolz is Philippine Espenschied. She is the daughter of one of the oldest and most successful wagon-makers of the West, and a citizen of the highest standing in the community. Mr. Overstolz is in the enjoyment of vigorous health, and in the full flush of a career of exceptional success and conspicuous usefulness to his fellow-citizens.

Mayor Overstolz was succeeded in 1881 by Hon. William L. Ewing, the present mayor of St. Louis.[1] William L. Ewing was born in St. Louis on the 16th of March, 1843. His father was a wholesale merchant, and his mother was a member of the old Berthold family. He was one of eleven children, six of whom are living. As soon as he arrived at the proper age he entered the college of the Christian Brothers, where he acquitted himself with credit. Immediately after leaving college he entered his father's business house in a clerical capacity, and largely contributed towards securing the great prosperity which enabled his father to leave at his death a large fortune to his family. On the dissolution of the firm, consequent upon the death of William L. Ewing, Sr., Mr. Ewing retired from commercial business, devoting most of his time during the several succeeding years to the care of the estate and to some farming interests in which he had invested. Being of an outspoken, impulsive nature, and a very positive character, young Ewing, boy and man, made many friends and not a few enemies. But, as is always the case where such traits are conspicuous, those who knew him best liked him most; and when in 1877 he was named for a seat in the lower house of the City Assembly, very little canvassing was necessary on his part to achieve success. At the organization of the House he was elected Speaker, which action, in view of his lack of parliamentary and political experience, was a rare compliment. He applied himself at once to his difficult duties, and the wealth of common sense which had served him so well in other walks of life was soon conspicuously exhibited. In his rulings the same positive, almost stubborn, characteristics above alluded to invariably manifested themselves; but while they at times irritated those to whom they were adverse, the ring of an honest purpose commanded a respect where concurrence was denied. Long before the close of his first term of public service Mr. Ewing had demonstrated a sagacity and earn-

---

and riot are of rare occurrence in our history. The incidents of municipal administration are with us always, and what more than anything else concerns the citizens of St. Louis is that its municipal administration should be efficient, economical, and pure. Under the present charter we have experienced improvements of which very few of our people have any idea. I have no time on this occasion to speak fully on this subject,—I wish that I had,—but some few matters I will lay before you. Between April, 1876, and April, 1880, there has been a reduction of the bonded debt of the city of $720,000, almost three-quarters of a million. The floating debt of the city accumulating for the year ending April, 1876, was $422,000. The floating debt of the city accumulating during the years ending April, 1877, April, 1878, April, 1879, and April, 1880, was—how much do you suppose? Just nothing at all. The deficiency in the revenue to meet expenditures in the year ending April, 1876, was $452,736.43. In the years 1877, 1878, 1879, and 1880 not only was there no deficiency, but a surplus applicable to the payment of our bonded debt of a large sum in each year. To particularize, the surplus was in 1877, $164,336.02, in 1878 it was $310,751.71, in 1879 it was $256,932.86, and in 1880 it was $307,446.58.

"In the fiscal year 1870–71 it was necessary to furnish revenue by issuing anticipation bonds (which bore interest of course; no account here will be taken of the discount at which they were sold in the market) amounting to $1,050,000. For the fiscal year 1871–72 anticipation bonds were issued to the amount of $1,100,000; in 1872–73, $1,523,000; in 1873–74, $1,625,000, and in addition city treasury notes to the amount of $300,000; in 1874–75, $1,150,000; in 1875–76, $1,550,000; in 1876–77, $1,500,000; in 1877–78, $725,000; in 1878–79, $420,000; in 1879–80, $350,000: and thus far in the fiscal year 1880–81, none at all. Yet you can all bear witness that though in arranging the scheme and charter the city took upon itself the whole debt of the old county and the maintenance of all its eleemosynary institutions, the taxes paid since 1877 are much less than those of the years 1873–76, and although the condition of our streets and the administration of criminal justice, both preventive and remedial, leave much to be desired, there is in the first particular at least a marked improvement upon the times before the charter. Less money is expended by the board of public improvements, but the expenditure is more judicious and the improvements are of a better character. In brief, immense advantage has come to us from the board of public works, which is one of the features of the present charter, and for that reason the machine politicians and all the enemies of good and economical administration of municipal affairs desire vehemently to abolish the board of public works, even if they cannot in all other respects destroy the present charter.

"Now to what essential and distinctive features in the present administration of city affairs are the improvements, of which I have only instanced a few, mainly ascribable? In my judgment to this: that the affairs of the city have been for about four years managed nearly, not quite, upon what are called 'business principles.' The public work has been mostly committed to men whose qualifications for doing good work were the motive of their appointment to do it. Faithful performance of their duties has been demanded, and in most cases the demand has been complied with. As part of this new departure, the city government has not been wholly governed by rules of party expediency. To his honor, the mayor has in some instances overlooked party lines while retaining or selecting an efficient officer."

[1] To Lyndon A. Smith, Esq., the popular and efficient secretary to the mayor, the author is greatly indebted for much valuable assistance in the preparation of this work,—assistance made all the more acceptable by the prompt and obliging manner in which it was rendered.

was compelled to make a new beginning. Nothing

estness of purpose which augured success to any measure to which he lent his support. Before he retired from the legislative body the suggestion was made in various quarters that he would prove a popular candidate for mayor, and give the city an honest and able administration. In April, 1881, the Republican party, of which he had always been a consistent member, canvassed the field for a man of sufficient strength to contest the election with Hon. Henry Overstolz, who had performed the duties of the mayoralty for six years with rare acceptability to the people, and who was justly regarded as a most formidable candidate for re-succession. It was necessary, moreover, that the Republican nominee should not only be Mayor Overstolz's equal in character and popularity, but that he should be so strong as to carry with him the balance of the Republican ticket in a city which had hitherto been overwhelmingly Democratic. Mr. Ewing was at that time absent from the city, accompanying his mother on a pleasure trip. The party leaders, however, agreed that he was the man for the emergency, and when far away from home he received intelligence that he had been chosen to lead the ticket. With limited oratorical ability, and with only a crude idea of the science of politics, he seemed a strange choice to those whose observation was superficial; but when election day came, and a majority of fourteen thousand votes was given for William L. Ewing, and the triumph of the entire Republican ticket secured, the wisdom of the selection was sufficiently demonstrated.

Mr. Ewing carried into the mayor's office the same democratic characteristics that had always been conspicuous in him, and the doors of his office have always been open to the humblest citizen, while his duties have never been so pressing that he could not find time to listen to those who had a right to speak. His appointments were such as to prove that he was a vigilant servant of the people rather than of party, and although he may have disappointed place-hunters, he has proved himself worthy of the confidence of those who gave him the largest majority ever received by a mayoralty candidate in St. Louis. At this writing (1883) he has two years of official life still before him.

William L. Ewing, father of Mayor Ewing, was born at Mont Clair, the family homestead, near Vincennes, Ind., Jan. 31, 1809, the eighth of ten children, and the third son of Nathaniel and Mary Breading Ewing, who were natives of Pennsylvania, and had moved to Indiana in 1807. Nathaniel Ewing, who was a man of considerable prominence, removed to Vincennes in order to accept an appointment from the government as receiver of public money.

He subsequently became a member of the Territorial Legislature, and was distinguished for legislative talents of a very practical and high order. His name is associated with those of the men who, in spite of great pressure, insisted that Indiana upon her admission to the Union should be a free State. Nathaniel Ewing died at Mont Clair in 1846, aged seventy-four, having exerted a marked influence upon the times in which he lived.

Young Ewing enjoyed very scanty school privileges at his early home, but made the best of what were afforded there, and at the age of twelve (in 1821) accompanied Dr. William Carr Lane (who had married his sister Mary) to St. Louis, where for a season he attended St. Louis College. Among his classmates were many who afterwards became prominent citizens of Missouri and other States. Elihu H. Shepherd was professor of the English language at the time he was a student there, and in his autobiography mentions young Ewing among those whom he had instructed, and who subsequently became leaders in St. Louis. In later years, and with better opportunities, Mr. Ewing's habits of application overcame to a great extent the deficiencies of early life, and he became unusually well informed on all matters of general interest.

On leaving college he served as clerk with Messrs. Hough & Co., and then with the *Missouri Republican* as book-keeper. In 1833 he returned to Vincennes, and engaged in mercantile business with John Ross, afterwards one of Indiana's most prominent bankers. After a successful career of some three and one-half years he returned to St. Louis, determined to try his fortune in a city which he was confident would become of commanding prominence in the commercial world, and on Jan. 1, 1839, he embarked in the wholesale grocery and commission business with Pierre A. Berthold and Louis P. Tesson.

Mr. Ewing had previously (in February, 1838) married Mr. Berthold's sister, Clara Berthold, who was the daughter of Bartholomew and Pelagie Berthold. During his lifetime Bartholomew Berthold was the manager of the American Fur Company in the West, of which John Jacob Astor, America's first millionaire, was the head. Mrs. Ewing's maternal grandfather was Pierre Chouteau, who with his brother Auguste came to St. Louis with Pierre Laclede Ligueste, its founder, in 1764.

Thus connected, Mr. Ewing began a prosperous career. The firm of Berthold & Ewing won a high place in the estimation of the business world, and was rapidly advancing to fame and fortune, when in 1849 it was swept away by the "big fire," and Mr. Ewing was compelled to make a new beginning. Nothing

daunted by the unexpected calamity, he resumed business under the title of William L. Ewing & Co., and his indomitable energy and high reputation as an honorable business man enabled him to establish the house firmly and conduct it to a remarkable success.

The establishment soon became one of the largest in the city, and its head was recognized as a representative business man. In his later years his health obliged him to withdraw from active participation in business personally, but the house continued under his name and control until his death, and there was scarcely one that was better known in all parts of the West and South.

Mr. Ewing was public-spirited, and liberally aided any project that seemed likely to advance the prosperity of the city and State. He was a great promoter of the steamboat interests, and owned at one time many fine vessels. One of the handsomest boats on the river bore his name. He was also identified with many other public enterprises, and for many years was president of the Merchants' National Bank, of which he was a director from its foundation. He was also a member of the St. Louis Agricultural and Mechanical Association, was one of the original members of the Merchants' Exchange, and was a stockholder and director in numerous other enterprises of importance to the city and State. He was liberal though unostentatious in his charities, and subscribed largely to the various public beneficiary institutions. While extremely careful in business matters, he acquired his wealth not by the practice of parsimony, but by the application of large and liberal views, supplemented by remarkable energy, perseverance, and industry. As a man, he was approachable and genial, and enjoyed to an uncommon degree the love and respect of his fellow-citizens.

In politics Mr. Ewing was an "Old-Line" Whig, but after the disruption of that party he took little interest in political affairs except in connection with local matters. After his marriage he became a member of the Catholic Church. He died Oct. 26, 1873, at Bailey Springs, near Florence, Ala., where he had gone for his health, and was buried in Calvary Cemetery, St. Louis.

Mr. Ewing left surviving him six children, three sons and three daughters, of whom William L. Ewing, the present mayor of St. Louis, is the second son.

Among the most popular and prominent of the public officials of St. Louis at the present time is Capt. Isaac M. Mason, sheriff of the city. In 1876 he was elected county marshal of St. Louis County, and in 1877 was elected city marshal for four years for the city of St. Louis. In 1880 he was chosen sheriff of St. Louis by a majority of ten hundred and thirty over two opponents, and his administration of the office was such as to win unstinted praise even from his political adversaries, all of whom cheerfully testified that he made as good a sheriff as St. Louis ever had. His administration was marked by the introduction and enforcement of reforms, and so efficiently did he discharge the duties of the office that in the summer of 1882 he received the nomination for a second term by acclamation in the two Republican Conventions, not a single voice being raised in opposition. The people, recognizing his eminent fitness for the place, elected him after a heated canvass by a majority of sixteen hundred and ninety-two over one of the most popular and dashing young Democrats in the city.

Capt. Mason's grandfather emigrated from Winchester, Va., to Pennsylvania in 1794, his supplies being transported in crossing the mountains by pack-horses. After locating in Pennsylvania he made two trips to Virginia by pack-horse modes of traveling. Mr. Mason settled first in Fayette County, Pa., and afterwards in Washington County, Pa., where, at the residence of his son, Morgan Mason, he died at the age of seventy-six, surrounded by four generations of his descendants. To Morgan and Pamelia S. Mason, who were both natives of Pennsylvania, Isaac M. Mason, the subject of this sketch, was born at Brownsville, Fayette Co., Pa., March 4, 1831. His ancestors on the father's side came from England to Virginia about 1700; on the mother's (Stevenson) side, also from England, settling in Baltimore in 1703. One of Capt. Mason's great-uncles was sheriff of Baltimore.

As a boy he attended the public schools at Brownsville, and received a fair English education. His early tastes were mechanical, and the machinery in his father's flouring-mill was a constant source of attraction, but his great desire was for a career on the river, and eventually, after spending a year in a store as a dry-goods clerk, he gained his father's consent to try a river life, and accordingly we find him employed on the steamboat "Consul," then running from Brownsville to Pittsburgh. The life suited him, and he brought to it such industry and fidelity that he soon gained the favor of his superiors, and rose rapidly in his calling. At the early age of nineteen he became captain of the "Summit," and for fourteen years acted as captain and clerk on different boats in the following order: "Consul," "Atlantic," "Summit," "Editor," "Australia," "Honduras," "Alma," "Belle Golden," "Vixen," "Denmark," "Fred Lorenz," "Savannah," and "Hawkeye State."

for the city of St. Louis. In 1880 he was chosen sheriff of St. Louis by a majority of [illegible] over two opposing candidates, one of the other was supported by a portion of the Democratic party. His administration was so efficiently conducted that he was elected by a majority of [illegible] over one of the most popular Democrats in the city.

Capt. Mason's grandfather [illegible] Chester Co., Va., to Pennsylvania, being transported in crossing the mountains on horses. After residing in Pennsylvania for a few years, he made trips to Virginia by pack-horse. Mr. Mason settled first in Fayette Co., Pa., and afterwards in Washington County, Pa., where he resided [illegible] of his son, Morgan Mason, at the age of seventy-four, surrounded by his descendants. To Morgan Mason, who was born a native of Fayette Co., Pa., the subject of this sketch, Uniontown, Fayette Co., Pa., March 27, 1818, his ancestors on the father's side came to Virginia about 1700; on the mother's side also from England, settling in Virginia. One of Capt. Mason's great-grandfathers was a Baltimorean.

As a boy he attended the [illegible] ville, and received a fair English education. His tastes were mechanical, and his father's flouring mill was a favorite resort. His education, however, was his great desire was to go to sea, and eventually, after several years in the goods store, he gained his father's consent, and accordingly went to Pittsburgh, on the steamboat "Consul," then plying between Louisville and Pittsburgh. The [illegible] brought to it much industry and energy, and soon gained the favor of the captain, who gave him a position on the boat. At the early age of [illegible] he was captain of the "Steamer," and [illegible] acted as captain and clerk on the following orders: "Consul," "Argo," "Eclipse," "Westmoreland," "Hibernia," "Belle Golden," "Vixen," "Lorenz," "Savannah," and "Hawkeye State."

Isaac M Mason

In 1851 he first visited St. Louis, and being highly pleased with the city and its prospects, determined to make it his home. He did not remove his family to St. Louis, however, until 1862. During the civil war his boats, the "Fred Lorenz" and "Savannah," were employed in transporting supplies to the Federal army at various points on the leading Western rivers.

In 1865 he retired from active steamboat service, but retained his connection with river business, being agent for the Northern Line Packet Company for sixteen years. While on the river he traveled over fourteen States of the Union, chiefly those penetrated by navigable rivers, and his careful observation supplied him with a fund of experience which made him an extremely valuable counselor in the various deliberations held for the improvement of the navigable streams of the West. Capt. Mason has always taken an active part in every feasible enterprise for increasing the commerce of St. Louis by improving the channel of the Mississippi and other rivers, as well as by the building of railroads. At one time he was president of the St. Louis Board of Trade, and for many years was a member of the Merchants' Exchange, in whose deliberations he always took an active part, his judgment being prized as that of one of the most sagacious of its members.

In November, 1852, Capt. Mason married Miss Mary Ann Tiernan, a native of Brownsville, Pa. Six children resulted from this union, five of whom are now living. Capt. Mason was reared a Baptist, but after marriage, his wife being an Episcopalian, he joined that communion, and has since been a member thereof, having been for many years a vestryman in St. George's Church. Without a particle of bigotry in his nature, he is a hearty supporter of every non-sectarian enterprise for benevolent purposes, whether the object be religious or merely charitable, and more recently has been among the leading promoters of the "Bethel's Home," a shelter for houseless and homeless unfortunates along the Levee.

Capt. Mason's social qualities are generally recognized, and he is a member of several societies, among which may be mentioned the Masonic order (which he joined in 1854), the Odd-Fellows (of which he became a member in 1853), the Knights of Honor, the St. Louis Legion of Honor, and the Ancient Order of United Workmen.

He was a Whig in politics as long as the party existed, and ever since its dissolution has been continuously a Republican. On several occasions, as we have seen, he has been conspicuously honored by his party, and in each instance has shown himself worthy of the confidence reposed in him.

Capt. Mason is still in the vigor and prime of manhood, and performs the duties of his laborious office to the satisfaction of the community. Uniformly courteous in his intercourse with all, of whatever station, probably no man in St. Louis is more universally popular. Those who know him most intimately speak of him most highly. He possesses an unusually well-balanced mind, is one of the quietest and most unassuming of gentlemen, and his constant success from youth to the present time constitutes a cogent argument in favor of earnest endeavor and the faithful discharge of duty as the pathway to high and honorable station.

Municipal Officers.

CITY ELECTIVE OFFICERS, FROM APRIL, 1881, to APRIL, 1885.—*Mayor*, William L. Ewing (Lyndon A. Smith, *Secretary*); *Comptroller*, Edward L. Adreon (Fred. Gabel, *Deputy*); *Treasurer*, Jacob S. Merrell (Frank W. Deidesheimer, *Assistant Treasurer*); *Auditor*, A. J. Smith (G. F. Rausser, *Deputy*); *Register*, Nicholas Berg (Henry Woods, *Deputy*); *Collector*, N. C. Hudson (H. A. Voelkner, *Deputy*); *Marshal*, Emile Thomas; *Inspector of Weights and Measures*, W. H. Rudolph; *President Board of Assessors*, David Powers; *President Board of Public Improvements*, Henry Flad; *President of the Council*, George W. Parker; *Coroner*, John N. Frank.

CITY APPOINTED OFFICERS, 1882–83.—*Board of Public Improvements*, 1879–83, John W. Turner, Street Commissioner; Thomas J. Whitman, Water Commissioner; Charles Pfeifer, Harbor and Wharf Commissioner; Eugene F. Weigel, Park Commissioner; William Wise, Sewer Commissioner; Emory S. Foster, Secretary of Board. *City Counselor*, Leverett Bell; *Assistant City Counselor*, Vernon W. Knapp; *Jailer*, Jeremiah Ryan; *Judge of Police Court, First District*, John Jecko; *Judge of Police Court, Second District*, George Dennison; *Clerk Police Court, First District*, Henry J. Bischoff; *Clerk Police Court, Second District*, W. F. Linck; *City Attorney*, Samuel Erskine; *Assistant City Attorney*, Daniel O'C. Tracy; *Chief Engineer Fire Department*, H. Clay Sexton (Geo. W. Tennille, *Secretary*); *Superintendent Fire-Alarm Telegraph*, Ernst Hilgendorf; *Superintendent Workhouse*, Wm. Kuns; *Inspector of Boilers*, John Holland; *Commissioner of Supplies*, Ferdinand Garesche; *Assessor and Collector of Water Rates*, Gen. John D. Stevenson (Charles W. Ohm, *Deputy*). *Board of Police Commissioners*, the Mayor, *ex officio President*; Samuel Cupples, *Vice-President*; Commissioners, E. C. Simmons, Jno. H. Maxon, Alex. Kinkead, Capt. Ferd. B. Kennett, *Chief*; George Gavin, *Secretary*. *Board of Health*, William L. Ewing, *Mayor and ex officio President*; Charles W. Francis, *Health Commissioner*; Members, George W. Parker, *President of the Council*, Joseph Spiegelhalter, M.D., W. B. Conery, M.D., John H. Maxon; *Clerk Board of Health*, Robt. Luedeking, M.D.

MAYORS FROM THE INCORPORATION OF THE CITY TO 1883.

1823–28. William Carr Lane.	1833–34. John W. Johnston.
1829–32. Daniel D. Page.	1835–37. John F. Darby.
1833.[1] Samuel Merry.	1838–39. William Carr Lane.

[1] Disqualified in consequence of holding office under the general government. J. W. Johnston elected mayor in his place.

1840. John F. Darby.
1841. John D. Daggett.
1842. George Maguire.
1843. John M. Wimer.
1844–45. Bernard Pratte.
1846. Peter G. Camden.
1847. Bryan Mullanphy.
1848. John M. Krum.
1849. James G. Barry.
1850–52. Luther M. Kennett.
1853–54. John How.
1855. Washington King.
1856. John How.
1857. John M. Wimer.
1858–60. Oliver D. Filley.
1861–62. Daniel G. Taylor.
1863. Chauncey I. Filley.
1864–68. James S. Thomas.
1869–70. Nathan Cole.
1871–74. Joseph Brown.
1875. Arthur B. Barret.[1]
1875. James H. Britton.
1876. Henry Overstolz.[2]
1877–81. Henry Overstolz.
1882. William L. Ewing.

CITY ALDERMEN.

1823.—Archibald Gamble, Prest., Thomas McKnight, James Kennerley, Philip Rocheblave, William H. Savage, Robert Wash, James Loper, Henry Von Phul, James Laknan, Joshua Barton.[3]

1824.—John Shackford, Prest., Bernard Pratte, Joseph V. Garnier, Hugh Richards, Matthew Kerr, Joseph C. Laveille, J. L. Sutton, Pierre Chouteau, Sr., David C. Walker.[4]

1825.—Joseph Charless, Sr., Prest., Philip Rocheblave, Elisha S. Beebe, Jacob Hawken, Hugh Richards, Hubert Guion, Louis T. Honore, Pierre Chouteau, Alfred Skinner, Charles Bosseron.[5]

1826.—Archibald Gamble, Prest., Asa Wilgus, Thornton Grimsley, William K. Rule, Joseph C. Laveille, Thomas F. Riddick, Joseph V. Garnier, David B. Hill, Henry Von Phul.

1827.—*North Ward*, John Mullanphy, Prest., William K. Rule, John D. Daggett; *Middle Ward*, Frederick L. Billon, Edward Charless, Christopher M. Price; *South Ward*, Joseph C. Laveille, John L. Sutton, David B. Hill.

1828.—*Middle Ward*, Joseph C. Laveille, Prest., Edward Charless, Frederick L. Billon; *North Ward*, George H. Kennerly, Michael Reily; *South Ward*, John L. Sutton, John Smith, John Smith, Jr.

1829.—*Middle Ward*, Joseph C. Laveille, Prest., Thomas Cohen, Edward Charless; *North Ward*, John Mullanphy, Michael Reily, Jabez Warner; *South Ward*, Hubert Guion, Herman L. Hoffman, John L. Sutton.

1830.—*Middle Ward*, Joseph C. Laveille, Prest., Thomas Cohen, Edward Charless; *North Ward*, John D. Daggett, William K. Rule, Edward Dobyns; *South Ward*, Elkanah English, Hubert Guion, Herman L. Hoffman.

1831.—*Middle Ward*, Joseph C. Laveille, Prest., Peter Ferguson, Jabez Warner; *North Ward*, Joseph Bates (resigned), Edward Dobyns, William K. Rule (resigned), Jesse Colburn (resigned), Hugh O'Neill; *South Ward*, John Pigott, Michael Rourke, Robert Simpson.

1832.—*Middle Ward*, Joseph C. Laveille, Prest., Edward Charless, Peter Ferguson; *North Ward*, Edward Dobyns, Hugh O'Neill, Solomon P. Ketchum (resigned), Robert Moore; *South Ward*, Michael Rourke (died), Robert Simpson, Cotton M. Tabor, Calvin Francis.

1833.—*Middle Ward*, Joseph C. Laveille, Prest., Edward Charless, Peter Ferguson; *North Ward*, Edward Dobyns, Hugh O'Neill, Jr., Robert N. Moore; *South Ward*, Sullivan Blood, Robert Simpson, Caleb Lockwood.

1834.—*First Ward*, Benjamin W. Ayres (resigned), Michael Gorman (resigned), George Morton, Benjamin W. Ayres, Wilson Primm; *Second Ward*, Horatio N. Cross, John Shannon, James P. Spencer; *Third Ward*, Thomas Andrews, John F. Darby, Hugh O'Neill, Prest.; *Fourth Ward*, Edward Dobyns, Robert N. Moore, Hugh O'Brien.

1835.—*First Ward*, George Morton, Wilson Primm, John P. Reily; *Second Ward*, Joseph Charless (resigned), James J. Purdy, James P. Spencer, Prest., Joseph C. Laveille; *Third Ward*, Thornton Grimsley, Hugh O'Neil, Dunham Spalding; *Fourth Ward*, Charles Collins, John Lee (removed), Joseph Bates (resigned), Solomon P. Ketchum, Bryan Mullanphy.

1836.—*First Ward*, George Morton, Wilson Primm, James J. Purdy; *Second Ward*, Thomas Cohen, Joseph C. Laveille, James P. Spencer, Prest.; *Third Ward*, William Preston Clark, Thornton Grimsley, Hugh O'Neil; *Fourth Ward*, Charles Collins, Hugh O'Brien, Bryan Mullanphy.

1837.—*First Ward*, Wilson Primm, Prest., Joseph S. Pease, Joseph W. Walsh; *Second Ward*, Thomas Cohen, David B. Hill, James P. Spencer (died), Stuart Ma..ews; *Third Ward*, Thomas B. Hudson, Peter Tiernan, Asa Wilgus; *Fourth Ward*, Charles Collins, Abel Rathbone Corbin, Hugh O'Brien.

1838.—*First Ward*, Benjamin W. Ayres, Joseph S. Pease, Joseph W. Walsh; *Second Ward*, Lewis V. Bogy, David Coons (president), Stuart Matthews; *Third Ward*, Merriwether Lewis Clark, Hugh O'Neil, Peter Tiernan; *Fourth Ward*, Abel Rathbone Corbin (resigned), Hugh O'Brien, John M. Wimer, Giles A. Lindley.

ALDERMEN AND DELEGATES.

1839.—ALDERMEN: *First Ward*, Benjamin W. Ayres, James G. Barry; *Second Ward*, Beverly Allen, Edward Tra..; *Third Ward*, George Collier (president), John B. Sarpy; *Fourth Ward*, John Lee, Archibald Carr. DELEGATES: *First Ward*, Elkanah English, Charles Coutts (resigned), William Horine, George Maguire; *Second Ward*, Wil..am Glasgow, Theodore Papin, David B. Hill; *Third Ward*, Bazil W. Alexander, Asa Wilgus, George Trask; *Fourth Ward*, George K. Budd (president), Abel G. Farwell, Samuel Gaty.

1840.—ALDERMEN: *First Ward*, James G. Barry, Benjamin W. Ayres; *Second Ward*, Beverly Allen, Prest. (resigned), Adam L. Mills (president), Thomas Cohen; *Third Ward*, William Burd, Archibald E. Orme; *Fourth Ward*, Archibald Carr, Horatio N. Davis. DELEGATES: *First Ward*, Elkanah English, George Maguire, Hiram Shaw; *Second Ward*, Edward Brooks (president), James Clemens, Stewart Matthews; *Third Ward*, Thomas Dresser, George Trask, Thomas H. West; *Fourth Ward*, George K. Budd, Samuel Gaty, David Weston.

1841.—ALDERMEN: *First Ward*, John Corcoran (resigned), James C. Lynch, Brannock Jones; *Second Ward*, B. Ayres, Stewart Matthews; *Third Ward*, Thomas Cobb, A. L. Mills (president); *Fourth Ward*, James H. Lucas, Archibald E. Orme; *Fifth Ward*, Robert Cathcart, Samuel Gaty. DELEGATES: *First Ward*, Joseph M. Magehe, Daniel H. Donovan, Thomas Denny; *Second Ward*, Elkanah English, Hiram Shaw, Henry McKee (resigned),

1842.—ALDERMEN: *First Ward*, James C. Lynch, William B. Wood; *Second Ward*, James G. Barry (president), Nathan Ranney; *Third Ward*, Edward Brooks, Adam L. Mills, Prest. (resigned), Adam B. Chambers; *Fourth Ward*, Archibald E. Orme, Joseph B. Crockett (resigned), B. S. Hollingsworth; *Fifth Ward*, John M. Wimer (resigned), Samuel Gaty (resigned), C. Campbell, Charles Todd. DELEGATES: *First Ward*, Daniel H. Donovan (resigned), Thomas Denny (resigned), Henry C. Lynch, John C. Mueller, John Stewart; *Second Ward*, Hiram Shaw, Ezra C. English, Ellis Wainwright; *Third Ward*, George K. McGunnegle, Francis Jones, William H. Jones (resigned), Beriah Cleland; *Fourth Ward*, Vital M. Garesche, Louis A. Labeaume, J. S. Wood; *Fifth Ward*, Abel R. Corbin, T. O. Duncan (president), Charles R. Anderson.

1843.—ALDERMEN: *First Ward*, Matthias Steitz, John Withnell; *Second Ward*, Wilson Primm (president), Stuart Matthews (resigned), John Black; *Third Ward*, Edward Charless, Louis A. Labeaume; *Fourth Ward*, Luther M. Kennett, John B. Camden; *Fifth Ward*, Anthony Bennett, Thomas Watson; *Sixth Ward*, Joseph S. Hull, William S. Stamps. DELEGATES: *First Ward*, Jacob Smith, James Caldwell; *Second Ward*, Ellis Wainwright, Charles Bobb; *Third Ward*, George K. McGunnegle, Francis Jones; *Fourth Ward*, George A. Hyde (president), John Finney; *Fifth Ward*, Abel R. Corbin, Rufus Kayser; *Sixth Ward*, Charles R. Anderson, Jacob Tice.

1844.—ALDERMEN: *First Ward*, Matthias Steitz, John Withnell; *Second Ward*, John Black, Ellis Wainwright; *Third Ward*, Edward Charless (president), George K. McGunnegle; *Fourth Ward*, Luther M. Kennett, John B. Camden: *Fifth Ward*, Thomas Watson (resigned), Archibald Carr, J. W. Ormsbee; *Sixth Ward*, William S. Stamps, George Mead. DELEGATES: *First Ward*, John Corcoran, Edward Warrens; *Second Ward*, Charles Bobb, George Morton (president); *Third Ward*, David Chambers, Francis Jones: *Fourth Ward*, George A. Hyde, Charles Todd; *Fifth Ward*, Samuel Knox, Charles J. Carpenter; *Sixth Ward*, James Gordon, Hugh Rose.

1845.—ALDERMEN: *First Ward*, Matthias Steitz, Daniel H. Donovan; *Second Ward*, Ellis Wainwright (resigned), James G Barry, B. W. Ayers; *Third Ward*, George K. McGunnegle, Edward Charless; *Fourth Ward*, Henry D. Bacon (resigned), Luther M. Kennett, Charles Collins, John B. Higdon (in lieu of Collins); *Fifth Ward*, Archibald Carr (president), George K. Budd; *Sixth Ward*, George Mead, John Hall. DELEGATES: *First Ward*, Edward Warrens (resigned), Amadee Vallé, Ezra O. English; *Second Ward*, Thomas B. Targee, Robert Holmes; *Third Ward*, Singleton H. Kimmel, William Glasgow, Sr.; *Fourth Ward*, Charles Hequembourg, Isaac T. Greene (resigned), Charles M. Valleau; *Fifth Ward*, Samuel Knox (president), Charles Jabine: *Sixth Ward*, Henry Loane, Nathaniel Childs, Jr.

1846.—ALDERMEN: *First Ward*, Matthias Steitz, Daniel H. Donavan (resigned), George Maguire; *Second Ward*, James G. Barry, Daniel D. Page; *Third Ward*, Edward Charless, Adam L. Mills; *Fourth Ward*, Luther M. Kennett (resigned), John B. Higdon, Stephen W. Adreon; *Fifth Ward*, George K. Budd (president), Reuben Knox; *Sixth Ward*, John Hall, Nathaniel Childs, Sr. DELEGATES: *First Ward*, A. Vallé (resigned), W. Tighe, John Dunn; *Second Ward*, C. P. Morse, Robert Holmes; *Third Ward*, S. H. Kimmel, Prest. (resigned), W. Glasgow, Jr. (resigned), P. C. Morehead, James Glasgow; *Fourth Ward*, C. Hequembourg (president), C. M. Valleau; *Fifth Ward*, John Whitehill, James H. White; *Sixth Ward*, Joseph S. Hull, Robert B. Bell.

1847.—ALDERMEN: *First Ward*, George Maguire (president), Richard S. Blennerhasset; *Second Ward*, D. D. Page (resigned), J. G. Shelton, Wilson Primm; *Third Ward*, Adam L. Mills, James Glasgow; *Fourth Ward*, Isaiah Forbes, Samuel Hawken; *Fifth Ward*, Reuben Knox, L. Riggs (resigned), Louis Bach; *Sixth Ward*, Nathan Childs, Reuben B. Austin. DELEGATES: *First Ward*, Jacob Smith, H. C. Lynch; *Second Ward*, J. P. Thomas, E. W. Decker (died), Louis Du Breuil; *Third Ward*, W. H. Jones, William Robb; *Fourth Ward*, D. A. Magehan (president), J. H. Lightner; *Fifth Ward*, A. P. Ladue, Hugh Rose; *Sixth Ward*, D. W. Dixon, R. N. Moore.

1848.—ALDERMEN: *First Ward*, R. S. Blennerhasset (resigned), George Maguire (president), Edward Haren; *Second Ward*, John G. Shelton, George R. Taylor (resigned and re-elected); *Third Ward*, James Glasgow, Adam L. Mills, Daniel D. Page (to fill vacancy); *Fourth Ward*, Samuel Hawken (resigned), James H. White, Demetrius R. Magehan; *Fifth Ward*, Louis Bach, Robert Cathcart (vacated seat), T. J. Beirne; *Sixth Ward*, Reuben B. Austin, Isaac H. Sturgeon. DELEGATES: *First Ward*, Henry C. Lynch (president), A. C. Cordes; *Second Ward*, Jacob P. Thomas, Edward E. Hunter; *Third Ward*, Thomas Cohen, Charles Robb; *Fourth Ward*, William M. Morrison, Joseph F. Franklin; *Fifth Ward*, Thomas Jackson, Frederick Laumann; *Sixth Ward*, Thomas Harsant, Erastus Wells.

1849.—ALDERMEN: *First Ward*, George Maguire, Prest. (resigned), Edward Haren (resigned), William Freund, John Dunn; *Second Ward*, William Palm, George R. Taylor; *Third Ward*, Daniel D. Page, Adam L. Mills; *Fourth Ward*, C. M. Valleau (president), William Bobb; *Fifth Ward*, Thomas J. Beirne, J. B. Gibson; *Sixth Ward*, Henry Holmes, Isaac H. Sturgeon. DELEGATES: *First Ward*, H. C. Katz, William R. Price; *Second Ward*, J. P. Thomas, William Walton; *Third Ward*, E. R. Mason, Francis Jones (president); *Fourth Ward*, R. Kayser, George W. Rucker; *Fifth Ward*, Peter Miller (died), George Bushey, Thomas Harsant; *Sixth Ward*, A. Ward (died), H. Overstolz, Willis R. Pritchard.

1850.—ALDERMEN: *First Ward*, John Dunn, R. S. Blennerhasset; *Second Ward*, William Palm, Louis Dubreuil; *Third Ward*, Joseph Charless, John J. Anderson; *Fourth Ward*, C. M. Valleau (president), John W. Rucker; *Fifth Ward*, J. B. Gibson (resigned), J. S. Freligh (resigned), Charles H. Pond, E. C. Blackburn; *Sixth Ward*, Henry Holmes, Isaac H. Sturgeon. DELEGATES: *First Ward*, Stephen Stock, Frederick W. Beckwith; *Second Ward*, Benjamin B. Chamberlain (died), E. B. Taylor, William Smith; *Third Ward*, William Carroll, C. Edmund Labeaume; *Fourth Ward*, Edwin Smith, George Trask (president); *Fifth Ward*, John Shore (resigned), George Bushey, C. L. Holthaus; *Sixth Ward*, Henry Overstolz, Willis R. Pritchard.

1851.—ALDERMEN: *First Ward*, John C. Dagenhardt, Henry C. Lynch; *Second Ward*, William Palm, Robert Clarkson; *Third Ward*, John J. Anderson, Louis A. Labeaume, Prest.; *Fourth Ward*, George W. Rucker, Edward C. Blackburn; *Fifth Ward*, Charles W. Lightner, Charles H. Pond; *Sixth Ward*, Henry Overstolz, Thomas L. Sturgeon. DELEGATES: *First Ward*, George Bremermann, Samuel B. Pilkington; *Second Ward*, J. T. Moore (resigned), Philip B.

Reily, John McDowell; *Third Ward*, Joshua W. Owings, David R. Risley; *Fourth Ward*, Rufus Kayser, Prest., Benjamin C. Farrar; *Fifth Ward*, George Bushey, James McNichol (resigned), —— Garrison; *Sixth Ward*, Daniel Crouse (died), Stewart McKee, John Brotherton.

1852.—ALDERMEN: *First Ward*, John C. Degenhardt, Henry C. Lynch; *Second Ward*, Philip B. Reily, Robert Clarkson; *Third Ward*, John J. Anderson (resigned), Louis A. Labeaume, George K. Budd; *Fourth Ward*, George W. Rucker, Edward C. Blackburn, Prest.; *Fifth Ward*, Thomas J. Beirne, Charles W. Lightner; *Sixth Ward*, Thomas L. Sturgeon, John W. Thornburgh. DELEGATES: *First Ward*, Samuel B. Pilkington, Frederick P. Sanguinette; *Second Ward*, C. C. Simmons, Charles Mehl (resigned), Martin Dubbs; *Third Ward*, David R. Risley, Prest., Joshua W. Owings; *Fourth Ward*, J. K. Burtis, James Ham; *Fifth Ward*, Thomas Harsant, W. R. Pritchard; *Sixth Ward*, Daniel G. Taylor (resigned), Cyrus Spear, John Sexton, Jr.

1853.—ALDERMEN: *First Ward*, John C. Degenhardt, Samuel B. Pilkington; *Second Ward*, Philip B. Reily, Cornelius Campbell; *Third Ward*, Louis A. Labeaume (resigned), David R. Risley (resigned), William M. McPherson, Theophile Papin; *Fourth Ward*, Edward C. Blackburn, John Hartnett; *Fifth Ward*, Thomas J. Beirne, Eneas McFaul; *Sixth Ward*, John W. Thornburgh, Alfred Heacock. DELEGATES: *First Ward*, George W. Sherrick, Charles W. Gottschalk; *Second Ward*, Charles A. Clarke, John H. Rohlf; *Third Ward*, Isaac M. Veitch, Charles H. Tillson; *Fourth Ward*, James Ham, Franklin Weston; *Fifth Ward*, Davis Moore, George Kyler; *Sixth Ward*, Charles W. Horn, James Graham.

1854.—ALDERMEN: *First Ward*, S. B. Pilkington, C. W. Gottschalk; *Second Ward*, Cornelius Campbell, Prest., Philip B. Reily; *Third Ward*, Theophile Papin, Daniel G. Taylor; *Fourth Ward*, Edward C. Blackburn, John Hartnett; *Fifth Ward*, Eneas McFaul, Norman J. Colman; *Sixth Ward*, J. W. Thornburgh, Albion T. Crow. DELEGATES: *First Ward*, George W. Sherrick, H. J. Hillsdorf; *Second Ward*, Charles A. Clarke, Henry Graefenkamp; *Third Ward*, Isaac M. Veitch, Charles H. Tillson; *Fourth Ward*, Franklin Weston, Joshua Houston; *Fifth Ward*, Davis Moore, George Kyler, Prest.; *Sixth Ward*, John Sexton, Jr., John H. Niermeyer.

1855.—ALDERMEN: *First Ward*, C. W. Gottschalk, George W. Sherrick; *Second Ward*, Philip B. Reily, Henry B. Belt; *Third Ward*, Daniel G. Taylor, Erastus Wells; *Fourth Ward*, E. C. Blackburn, Prest. (died), Franklin Weston, John Shore; *Fifth Ward*, N. J. Colman, George Kyler; *Sixth Ward*, J. W. Thornburgh, Prest., John Sexton, Jr.; DELEGATES: *First Ward*, H. J. Hillsdorf, Christian Staehlin; *Second Ward*, Henry Graefenkamp, Thomas M. Wannell; *Third Ward*, James F. Small, Charles H. Tillson, Prest.; *Fourth Ward*, Joshua Houston, Jesse W. Heath; *Fifth Ward*, William S. Cuddy, Charles E. Loring; *Sixth Ward*, James H. Vail, Benjamin L. Van Court.

1856.—ALDERMEN: *First Ward*, Godfrey Schoenthaler (resigned), Henry C. Lynch, David Bayles; *Second Ward*, Cornelius Campbell (resigned), Charles W. Gottschalk, Brannock Jones; *Third Ward*, C. C. Simmons, William Palm; *Fourth Ward*, George R. Taylor, Prest., John Kern (died), Amadee Vallé; *Fifth Ward*, Erastus Wells, Charles H. Tillson; *Sixth Ward*, John Shore, Unit Rasin; *Seventh Ward*, Patrick Deegan (died), Henry Dusenbury; *Eighth Ward*, C. D. Colman, George Kyler; *Ninth Ward*, James Graham, Charles W. Horn; *Tenth Ward*, Henry Overstolz, Charles R. Anderson. DELEGATES: *First Ward*, Henry Olmstead, Henry C. Kats; *Second Ward*, John H. Abelin, Henry Graefenkamp; *Third Ward*, Gerhard Schepmann, Theophile Papin; *Fourth Ward*, Samuel Simmons, Prest., Smith Litchfield; *Fifth Ward*, John F. Long, C. C. McClure; *Sixth Ward*, Jesse W. Heath (resigned), Augustus Pomeroy, Edward S. Wheaton; *Seventh Ward*, W. S. Bachman, C. Tiernan; *Eighth Ward*, John C. Vogel, David Moore; *Ninth Ward*, William McKee, Robert Graham; *Tenth Ward*, Andrew Getty, Daniel McGill.

1857.—ALDERMEN: *First Ward*, Henry C. Lynch, L. Babcock. *Second Ward*, John H. Fisse, Brannock Jones; *Third Ward*, C. C. Simmons, R. M. Renick; *Fourth Ward*, George R. Taylor, Prest., Amadee Vallé; *Fifth Ward*, Charles Tillson, Erastus Wells; *Sixth Ward*, John Shore, C. C. McClure; *Seventh Ward*, Charles G. Stifel, E. M. Powers; *Eighth Ward*, C. D. Colman, George Kyler; *Ninth Ward*, James Graham, Charles W. Horn; *Tenth Ward*, Charles R. Anderson, John Sexton. DELEGATES: *First Ward*, James Gorman, Henry Olmstead; *Second Ward*, Theophile Papin (resigned), Thomas S. Nelson, William D'Oench; *Third Ward*, E. P. Tony, J. H. Graefenkamp; *Fourth Ward*, Samuel Simmons (resigned), Frederick Buschmann, Solomon J. Levi; *Fifth Ward*, A. D. Pomeroy, John W. Burd; *Sixth Ward*, James H. McClure, Thomas R. Axtell; *Seventh Ward*, Thomas J. Dailey, Robert Kinnear; *Eighth Ward*, John C. Vogel, Prest., Davis Moore; *Ninth Ward*, Wm. McKee, Conrad Doll; *Tenth Ward*, Felix A. McDonald, James R. Dobyns.

1858.—ALDERMEN: *First Ward*, L. Babcock, Thomas Allen; *Second Ward*, Brannock Jones, F. W. Cronenbold; *Third Ward*, R. M. Renick, J. H. Graefenkamp; *Fourth Ward*, Amadee Vallé, John G. Shelton; *Fifth Ward*, Erastus Wells, Charles Tillson; *Sixth Ward*, S. W. Adreon, C. C. McClure; *Seventh Ward*, Thomas J. Dailey, F. W. Corbitt; *Eighth Ward*, George Kyler, John C. Vogel; *Ninth Ward*, Charles W. Horn, Patrick Gorman; *Tenth Ward*, John Sexton, James Doyle. DELEGATES: *First Ward*, Frederick Hohenschildt, Henry Almstedt; *Second Ward*, Thomas S. Nelson, Prest., J. G. Vogel; *Third Ward*, Philip H. Bishop, Wm. Horine (resigned), George Bayha; *Fourth Ward*, Solomon J. Levi, Ira Stout (resigned), John Young; *Fifth Ward*, Bernard Pratte, Jr., Peter Ames; *Sixth Ward*, James S. Wilgus, Dwight Durkee; *Seventh Ward* John J. Wilshusen, Jesse W. Heath; *Eighth Ward*, David Moore, Horatio Wood; *Ninth Ward*, Daniel McGill, Casper Stolle; *Tenth Ward*, James R. Dobbins, Nicholas Hatch.

COUNCILMEN.

1859.—*First Ward*, Thomas Allen, Henry Kayser; *Second Ward*, F. W. Cronenbold, Thomas S. Nelson; *Third Ward*, J. A. Graefenkamp, Theophile Papin; *Fourth Ward*, J. H Shelton (resigned), George R. Taylor, Prest., John H. Andrews; *Fifth Ward*, Charles H. Tillson, Erastus Wells; *Sixth Ward*, S. W. Adreon, Dwight Durkee; *Seventh Ward*, Francis H. Manter, Casper H. Holthaus; *Eighth Ward*, John C. Vogel, George Kyler; *Ninth Ward*, Patrick Gorman (resigned), Casper Stolle, John Reilly; *Tenth Ward*, James Doyle, John Sexton, Jr.

1860.—*First Ward*, Henry Kayser (resigned), Thomas C. Chester, Joseph H. Locke; *Second Ward*, Thomas S. Nelson, F. W. Cronenbold; *Third Ward*, Theophile Papin (resigned), G. W. Dreyer, P. A. Ladue; *Fourth Ward*, Jotham Bigelow, John H. Andrews (resigned), Thomas Burke; *Fifth Ward*, Erastus Wells, Joseph H. McBride; *Sixth Ward*, Dwight Durkee, S. W. Adreon; *Seventh Ward*, H. H. Manter, Prest., J. W. Crane; *Eighth Ward*, Geor

Kyler, John C. Vogel; *Ninth Ward*, Casper Stolle, Isaac T. Greene; *Tenth Ward*, John Sexton, Jr. (resigned), L. W. Mitchell, Thomas M. Speers.

1861.—*First Ward*, Thomas C. Chester, J. Gabriel Woerner; *Second Ward*, F. W. Cronenbold, Thomas S. Nelson; *Third Ward*, G. W. Dreyer, John F. Thornton; *Fourth Ward*, Thomas Burke, Robert M. Funkhouser; *Fifth Ward*, Jos. H. McBride, Erastus Wells, Prest.; *Sixth Ward*, S. W. Adreon, Dr. S. B. Burnett; *Seventh Ward*, J. W. Crane, Earl Matlack; *Eighth Ward*, John C. Vogel, Robert Thornburgh; *Ninth Ward*, Isaac T. Greene, Patrick Driscoll; *Tenth Ward*, L. W. Mitchell, Thomas M. Speers.

1862.—*First Ward*, J. Gabriel Woerner (president), John C. Rust; *Second Ward*, Thomas S. Nelson, F. W. Cronenbold; *Third Ward*, John F. Thornton, G. W. Dreyer; *Fourth Ward*, Robert M. Funkhouser, Tony Niederwieser; *Fifth Ward*, Erastus Wells, John Cairns; *Sixth Ward*, J. B. Burnett, Joshua Cheever; *Seventh Ward*, Earl Matlack, Thomas J. Dailey; *Eighth Ward*, Robert Thornburgh, Charles W. Horn; *Ninth Ward*, Patrick Driscoll, Solon Stark; *Tenth Ward*, Thomas M. Speers, Aaron W. Fagin.

1863.—*First Ward*, John C. Rust, J. Gabriel Woerner; *Second Ward*, F. W. Cronenbold (president), Charles W. Gottschalk; *Third Ward*, G. W. Dreyer, Hermann Schepman; *Fourth Ward*, Tony Niederwieser, Henry McKee; *Fifth Ward*, John Cairns, Erastus Wells; *Sixth Ward*, Joshua Cheever, Samuel Plant; *Seventh Ward*, Thomas J. Dailey, Frederick Doering; *Eighth Ward*, Charles W. Horn, John Grether; *Ninth Ward*, Solon Stark, Patrick Driscoll; *Tenth Ward*, Aaron W. Fagin, Benjamin Charles (resigned), Charles Sessinghaus (died).

1864.—*First Ward*, J. G. Woerner, A. Krieckhaus; *Second Ward*, Charles W. Gottschalk, Henry C. Gempp; *Third Ward*, Hermann Schepman, Amadee Vallé; *Fourth Ward*, A. S. W. Goodwin, Tony Niederwieser; *Fifth Ward*, Erastus Wells, John Cairns; *Sixth Ward*, Samuel Plant, Joshua Cheever; *Seventh Ward*, Jesse W. Heath, Henry Stagg; *Eighth Ward*, John Grether (president), Charles W. Horn; *Ninth Ward*, Patrick Driscoll, Daniel McAuliffe; *Tenth Ward*, Charles Schoenbuck, Charles Borg.

Hagerty, A. J. Geraghty; *Ninth Ward*, John O'Brien, Thomas Morris; *Tenth Ward*, John P. Mullally, Michael Madden; *Eleventh Ward*, J. B. Woestman, J. H. Pohlman; *Twelfth Ward*, H. Rechtien (president), Samuel B. Stannard; *Thirteenth Ward*, James Meegan, P. Leahy.

1876.—*First Ward*, B. W. Etling, L. A. Steber; *Second Ward*, A. Fischer, Sr., Theodore Horman; *Third Ward*, J. H. Amelung, C. E. Salomon; *Fourth Ward*, William Keating, Charles W. Francis; *Fifth Ward*, James S. Foster, C. A. Spalding; *Sixth Ward*, James L. Patterson, George H. Loker; *Seventh Ward*, W. E. Kortkamp, John J. Sutter; *Eighth Ward*, A. J. Geraghty, John O'Malley; *Ninth Ward*, Thomas Morris, Thomas J. Hennessy; *Tenth Ward*, Michael Madden, John P. Mullally; *Eleventh Ward*, J. H. Pohlman, William H. Woodward; *Twelfth Ward*, S. B. Stannard, D. S. Irons; *Thirteenth Ward*, P. Leahy, M. J. Brennan.

COUNCIL.

1877-79.—S. D. Barlow, Thomas Foley, John J. O'Brien, George W. Parker, George Rinkel, Jr., John Rude.

1877-81.—John H. Lightner (president), Nicholas Berg, A. L. Bergfeld, Given Campbell (resigned, and was succeeded by Robert M. Parks), Moses Fraley, Edward S. Rowse, William H. Scudder.

HOUSE OF DELEGATES.

1877-79.—*First Ward*, A. C. L. Haase; *Second Ward*, Joseph Crawshaw; *Third Ward*, C. A. Stifel; *Fourth Ward*, John McManus; *Fifth Ward*, J. H. Amelung (resigned, and was succeeded by Philip A. Meinberg); *Sixth Ward*, W. C. Van Dillen; *Seventh Ward*, C. H. Reichman; *Eighth Ward*, P. Gundlach; *Ninth Ward*, E. H. Vordtriede; *Tenth Ward*, Frank Backof; *Eleventh Ward*, A. N. De Menil; *Twelfth Ward*, Patrick Sullivan; *Thirteenth Ward*, John Williams; *Fourteenth Ward*, H. C. Meyer; *Fifteenth Ward*, William B. Ryder; *Sixteenth Ward*, Otto Kulage; *Seventeenth Ward*, A. W. Henry; *Eighteenth Ward*, George W. Updike; *Nineteenth Ward*, Conrad Rose; *Twentieth Ward*, William F. Cozzens; *Twenty-first Ward*, William L. Ewing, Jr. (Speaker); *Twenty-second Ward*, R. L. Jones; *Twenty-third Ward*, Louis Nolte; *Twenty-fourth Ward*, P. O'Brien; *Twenty-fifth Ward*, Richard Merkel; *Twenty-sixth Ward*, A. B. Barbee; *Twenty-seventh Ward*, Jacob Thorp; *Twenty-eighth Ward*, Christopher Comrades.

1879-81.—*First Ward*, Michael O'Malley; *Second Ward*, J. G. Haas; *Third Ward*, John A. Wolfinger; *Fourth Ward*, John Tighe; *Fifth Ward*, Philip A. Meinberg; *Sixth Ward*, Amos S. Partridge; *Seventh Ward*, Paul Young; *Eighth Ward*, Peter Gundlach; *Ninth Ward*, Joseph G. Marriott (Speaker); *Tenth Ward*, Bernard Donnelly; *Eleventh Ward*, George Weisenburger; *Twelfth Ward*, Thomas J. Cornelius; *Thirteenth Ward*, Henry Ziegenhein; *Fourteenth Ward*, Frederick Siefker; *Fifteenth Ward*, William B. Ryder; *Sixteenth Ward*, Frank Hussman, Jr.; *Seventeenth Ward*, G. W. Carmichael; *Eighteenth Ward*, Thomas R. Garard; *Nineteenth Ward*, Frank H. Hecker; *Twentieth Ward*, John J. O'Neill; *Twenty-first Ward*, E. B. Kirby; *Twenty-second Ward*, John B. Dunn; *Twenty-third Ward*, William L. Hickman; *Twenty-fourth Ward*, Peter Bouchein; *Twenty-fifth Ward*, Ferdinand Kaiser; *Twenty-sixth Ward*, A. B. Barbee; *Twenty-seventh Ward*, Jacob Thorp; *Twenty-eighth Ward*, Peter G. Gerhart.

1882-83.—*First Ward*, A. Thoman; *Second Ward*, W. V. Rutledge; *Third Ward*, John A. Wolfinger; *Fourth Ward*, James H. O'Brien (succeeded by Patrick Brennan); *Fifth Ward*, John H. Amelung; *Sixth Ward*, William Aston (succeeded by Mr. Hortsbrink); *Seventh Ward*, Frederick Zelle; *Eighth Ward*, Peter Gundlach; *Ninth Ward*, Joseph G. Marriott (Speaker); *Tenth Ward*, Cyrus H. Walbridge; *Eleventh Ward*, George Weisenburger; *Twelfth Ward*, Samuel J. Somerville; *Thirteenth Ward*, Henry Alt; *Fourteenth Ward*, B. Hoffman; *Fifteenth Ward*, E. W. Donk; *Sixteenth Ward*, Frank Hussman, Jr.; *Seventeenth Ward*, Eugene C. Slevin; *Eighteenth Ward*, Joseph Stern; *Nineteenth Ward*, Conrad Rose; *Twentieth Ward*, John J. O'Neill; *Twenty-first Ward*, E. F. W. Meier; *Twenty-second Ward*, John W. Dunn; *Twenty-third Ward*, W. L. Hickman; *Twenty-fourth Ward*, Peter Bouchein; *Twenty-fifth Ward*, Ferdinand Kaiser; *Twenty-sixth Ward*, A. B. Barbee; *Twenty-seventh Ward*, George J. Davis; *Twenty-eighth Ward*, Louis Schaefer.

Clerk, James C. Broadwell; Assistant Clerk, William N. Belt, Jr.; Sergeant-at-Arms, M. Chartrand.

COUNCIL.

1881-85.—A. N. De Menil, E. C. Kehr, N. G. Larimore, P. McGrath, G. W. Parker (president), H. S. Parker, E. S. Rowse, Web M. Samuel, W. H. Scudder, R. P. Tausey, J. P. Vastine, F. E. Zelle, H. Ziegenhein, vice-president; William E. Raynor, secretary; Joseph M. Brown, assistant secretary; James T. Smith, sergeant-at-arms.

CHIEF CITY OFFICIALS NOT ELSEWHERE GIVEN IN THE CIVIL LIST FROM THE ORGANIZATION OF THE CITY GOVERNMENT IN 1823 DOWN TO AND INCLUDING THE YEAR 1846.

1823.—Mackey Wherry, register and collector to 1826, inclusive; Henry Von Phul, auditor; Jean P. Cabanné, treasurer to 1824, inclusive; Joseph C. Brown, surveyor; Rémi Paul, surveyor to 1828, inclusive; Asher F. Cook, lumber-master; Sullivan Blood, constable to 1828, inclusive; John Bobb, street commissioner; Joseph C. Laveille, street commissioner; Peter Ferguson, assessor to 1826, inclusive; Marie P. Leduc, assessor to 1825, inclusive.

1824.—Henry Gratiot, harbor- and lumber-master; Joseph C. Laveille, street commissioner.

1825.—John B. Sarpy, treasurer to 1826, inclusive; George H. C. Melody, harbor- and lumber-master to 1826, inclusive.

1826.—Daniel Hough, street commissioner.

1827.—Joseph A. Wherry, register and collector to 1842, inclusive; Daniel Hough, auditor to 1830, inclusive; William Higgins, treasurer to 1828; John Simonds, Sr., harbor- and lumber-master to 1839, inclusive; Jacob Rupley, street commissioner; David B. Hill, street commissioner; Elliott Lee, assessor to 1828, inclusive.

1828.—Isaac C. McGirk, attorney to 1829, inclusive; A. B. Dewitt, constable.

1829.—Joseph C. Brown, surveyor to 1831, inclusive; Jacob Cooper, constable; Charles Dumont, constable; Thomas Cohen, John S. Sutton, Jabez Warner, street commissioners; Patrick Walsh, assessor.

1830.—Theodore L. McGill, treasurer to 1831; Beverley Allen, attorney to 1831; Alpha O. Abbay, constable to 1832, inclusive; Louis A. Benoist, assessor to 1833, inclusive.

1831.—A. E. Hough, auditor to 1832; James J. Wilkinson, inspector of beef, pork, and flour, to 1840.

1832.—Herman L. Hoffman, treasurer to 1838, inclusive; John Newman, attorney to 1833; Réné Paul, surveyor to 1838, inclusive; Abraham Fox, superintendent of water-works to 1834; Cornelius Campbell, health officer to 1837, inclusive.

1833.—Jos. C. Laveille, acting mayor; Richard B. Dallam, auditor to 1835, etc.; Thomas J. Jones, constable; Daniel Busby, constable.

1834.—Arthur L. Magenis, attorney; James S. Mayfield, attorney; John Cowie, weigher of hay and coal; James Martin, constable; Augustine Kennerly, collector to 1842, inclusive; Joseph V. Garnier, assessor.

1835.—Charles D. Drake, attorney; Alonzo W. Manning, attorney; John M. Wimer, superintendent of the water-works to 1836; John Cowie, weigher of hay and coal at Centre scales to 1842; Hugh O'Neil, weigher of hay and coal at North scales; James Gordon, constable; John McCausland, assessor.

1836.—A. W. Manning, attorney to 1838; R. B. Dallam, auditor and clerk of the market to 1839; John McEvoy, weigher of hay and coal at North scales; George W. Rucker, constable; John H. Gay, assessor.

1837.—Trusten Polk, attorney; John Calvert, superintendent water-works; John Leach, weigher of hay and coal, North scales; Jacob Cooper, constable; Robert N. Moore, John Pitcher, street commissioners; John D. Daggett, assessor.

1838.—William Burd, superintendent of water-works; Peter Brooks, superintendent of water-works to 1845; C. J. Carpenter, health officer to 1839, inclusive; John Blackmore, weigher of hay and coal at North scales; John Atkinson, constable; John D. Daggett, street commissioner; James I. Reily, street commissioner; Solomon P. Ketchum, assessor.

1839.—Robert Simpson, comptroller to 1846; William Renshaw, treasurer to 1841; Charles D. Drake, attorney; Henry Kayser, engineer to 1845; Alexander Kayser, street commissioner; W. W. Kitzmiller, harbor- and lumber-master; Elliot Lee, marshal to 1841; John Leach, weigher of hay and coal, North scales; John McCausland, assessor to 1842; R. B. Dallam, auditor.

1840.—Logan Hunton, attorney; Wilson Primm, attorney to 1841; John H. Ferguson, harbor- and lumber-master to 1841; J. B. McDowell, health officer to 1841; John Paca, street inspector; Elijah Grant, clerk of the market; B. S. Hollingsworth, clerk of the market.

1841.—William F. Chase, attorney; M. Lewis Clark, engineer; John H. Ferguson, harbor-master; J. J. Wilkinson, inspector of flour; William K. Rule, inspector of beef and pork; John H. Carl, inspector of liquors; A. F. Parmlee, inspector of weights and measures; Archibald Carr, recorder to 1842; John L. Gray, captain city guard; George B. Brun, captain city guard; Samuel Daniels, superintendent of the workhouse; Henry C. Lynch, street inspector, First Ward; P. E. Bouis, James Martin, Second Ward; John Paca, William H. Pococke, Third Ward; John Shade, Fourth Ward; John McIlvain, Fifth Ward; John Lee, weigher of hay and coal, North scales.

1842.—Samuel Willi, treasurer; Thomas B. Hudson, counselor; James Dougherty, attorney; James S. Lane, harbor-master; Peter Tiernan, lumber-master; Jacob Feickart, inspector of flour; James L. Thorp, inspector of beef and pork; James V. Prather, health officer; John Atkinson, marshal; John F. Long, captain city guard; John Shade, superintendent of workhouse; Joseph M. Magehan, street inspector, First District; William H. Pocoke, street inspector, Second District; T. M. Darlington, street inspector, Third District; Peter Stoffle, clerk of the market; John Sefton, weigher of hay and coal, Market Street scales; James McKenna, weigher of hay and coal, North scales.

1843.—John M. Parker, register to 1846; John Bell, treasurer to 1845; Trusten Polk, counselor; John M. Eager, attorney; Joseph H. Conn, harbor-master; John H. Scott, lumber-master; Enoch Scott, inspector of weights and measures; John S. Moore, health officer; M. Lewis Clark, recorder to 1844; Stephen O. Coleman, marshal; James McDonough, captain city guard; D. H. Donavan, street inspector, First District; W. H. Pococke, street inspector, Second District; Sylvester V. Papin, clerk of recorder's court; J. D. G. Mauny, city weigher; Frederick J. Lynch, assessor, First Ward; James Caldwell, assessor, Second Ward; Stuart Matthews, assessor, Third Ward; Thomas H. West, assessor, Fourth Ward; Edward Dobyns, assessor, Fifth Ward; Brannock Jones, collector, First Ward; Ferdinand Provenchere, collector, First Ward; Henry Almstedt, collector, Second Ward; John R. Dicks, collector, Third Ward; Chauvin V. Le Beau, collector, Fourth Ward; Ferdinand Spencer, collector, Fifth Ward; Henry McKee, collector, Sixth Ward; Peter Stoffle, clerk of the market; Daniel Lloyd, weigher of hay and coal at Front Street scales; John C. Vogel, weigher of hay and coal at North scales; Charles Kick, sexton of cemetery; Charles D. Drake, counselor to 1845; James Daugherty, attorney; Wm. W. Greene, harbor-master; Henry Spence, lumber-master to 1845; Aloysius Z. Hilbert, inspector of flour, to 1845; Wm. Risley, inspector of butter, lard, and tallow, to 1845; J. N. McDowell, health officer; M. M. Pallen, health officer; Charles D. Priddy, marshal; James McDonough, captain of the city guard, to 1845.

1844.—Luther M. Shreve, attorney to 1845; Gideon Wood, inspector of beef and pork; Baltzer G. Goll, inspector of butter, lard, and tallow; John S. Moore, health officer; Solomon P. Ketchum, recorder; James S. Dougherty, marshal.

1846.—Wm. Glasgow, Sr., treasurer; Samuel Knox, counselor; Charles C. Carroll, attorney; Clement W. Coote, engineer; Sullivan Blood, harbor-master; Daniel F. Wright, lumber-master; Eli Anderson, wood-master; David Grant, wood-master; Joseph Morrow, inspector of flour; Wm. S. Stewart, inspector of liquors; Samuel Tilford, inspector of butter, lard, and tallow; Joseph Foster, superintendent of water-works; M. M. Pallen, health officer; Joseph W. Hall, health officer; Joseph T. Sutton, marshal; Abram Allen, captain city guard; Richard Condon, superintendent of workhouse.

FOREIGN CONSULS AT ST. LOUIS, 1882.

Belgium.—R. Mackwitz.
Brasil.—Alfonso De Figueiredo, vice-consul.
France.—Emil Karst, consular agent.
Germany.—Herman Gerlich. O. Stuebel, acting consul.
Italy.—Domenico Ginocchio.
Mexico.—John F. Cahill.
Netherlands.—B. B. Haagoma.
Spain.—Robert H. Betts, vice-consul.
Sweden and Norway.—Oscar Audreen, consular agent.
Switzerland.—Charles F. Mathey.

CHAPTER XIX.

MUNICIPAL DEPARTMENTS.

City Hall.—The first movement after the incorporation of St. Louis as a city for the erection of a town hall was made in 1827, in which year the board of aldermen passed an ordinance providing a loan of thirteen thousand dollars for the erection of a market-house and town hall on the old Place D'Armes, between Market and Walnut Streets. On the 19th of June, 1841, an ordinance was approved by the mayor appropriating three thousand dollars to improve and repair the town hall, and instructing the city engineer to draft a plan for erecting an additional story upon the town hall "suitably arranged for the accommodation of the two branches of the Council, and also for the alteration and arrangement of the rooms at present occupied by the Council and city officers, so as to accommodate the mayor, auditor, comptroller, register, engineer, superintendent of the water-works, and street commissioner." In 1849 a project for the building of a new town hall was set on foot, and the following act was passed by the General Assembly (approved March 5, 1849), authorizing the city of St. Louis to erect a city hall:

"*Be it enacted by the General Assembly of the State of Missouri:*

"1. The City Council of the City of St. Louis is hereby authorized to erect a building suitable for a city hall and offices for the use of the city government of said city, and for a convenient market-house, which building shall be erected on the square of land belonging to said city situate east of Main Street and between Market and Walnut Streets.

"2. For the purpose of erecting such building and defraying the cost thereof, the said City Council is hereby authorized to borrow a sum of money not exceeding seventy-five thousand dollars, and issue the bonds of the city therefor; and the rents and revenue derived from such building and market-house, after deducting the expenses of collecting the same, shall be set apart and exclusively appropriated for the payment of the interest and principal of the money borrowed for the purpose aforesaid.

"This act shall take effect from its passage."

Referring to the proposed erection of the city hall, the *Republican*, in its issue of March 29, 1849, said, "A foolish effort is making to array some feeling about the erection of a new market-house, stores, town hall, and offices for the city officers on the square occupied by the old market and town hall." On the 20th of March, 1851, the mayor and a committee of the Council solicited proposals for the donation or sale of a square of ground for a city hall and other municipal offices. Propositions were requested for property within the limits of Poplar Street on the south, Thirteenth Street on the west, and Fifth Street on the east. Among the propositions submitted was one for the sale of a block in "Lucas' common opposite Yeatman's row." This proposition was referred to a committee of the City Council, which reported in favor of the purchase, and offered a bill authorizing the mayor to issue bonds to the amount of sixty-eight thousand dollars, the proceeds to be applied to the purchase of the property. The bonds were to bear six per cent. interest, and were made payable in New York twenty-five years after date. The grounds were described as being ample, extending three hundred feet on Olive Street and two hundred and ninety feet on Eleventh Street. The proposition, however, failed to pass the City Council. "It will be learned with regret," said the *Republican* of Feb. 17, 1853, "that nearly all prospects for the purchase of a lot on which to erect the new town hall have been abandoned for at least the present session of the City Council. A bill drafted with a view to the proposed edifice, and allowing Mr. James H. Lucas sixty-eight thousand dollars for the greater portion of the square bounded by Eleventh, Twelfth, Olive, and Locust Streets, has been under consideration of the Council for the past month or more, but was definitely killed at the sitting of Tuesday."

On the 14th of October the same paper added,—

"We understand that J. H. Lucas, Esq., of this city, has proposed to the mayor to sell to the city a block of ground between Thirteenth and Fourteenth Streets, and Olive Street and Lucas Place. The block is numbered 514, and has a front of two hundred and eighty-one feet on Thirteenth Street and three hundred and thirty-six on Olive.

"Those who are familiar with the locality know that two splendid buildings occupy a part of this block, for which Mr. Lucas has arranged, in case the City Council should accept the offer. The price asked for the entire block is eight thousand seven hundred and fifty dollars. Upon this ground it is stipulated that the city hall shall be erected, the only condition being that a calaboose shall not be built upon it. If this proposition is accepted, then Mr. Lucas proposes to donate to the city block No. 825, immediately north of the above block, to be donated and improved as a public square. This block is one hundred and fifty-five feet front on Thirteenth by three hundred and thirty-five on Lucas Place. It is valued at thirty-six thousand dollars. The entire space which would be left for public use is six acres, and the cost to the city only about forty-seven thousand dollars."

In his message to the City Council during the same year (1853) Mayor How strongly urged the importance of erecting a municipal hall, particularly on the ground that the archives of the city were unprotected from fire, and "almost, I may say," he added, "from thieves." He further recommended, if the City Council was unwilling to purchase land especially for the purpose, that the necessary building be erected on property belonging to the city called Washington Square. None of the various propositions submitted or suggested to the Council were carried into effect, and in 1861, during the administration of Mayor D. G. Taylor, it was found necessary to lease a portion of the new county court-house for municipal purposes. In announcing the consummation of this arrangement in his annual message to the City Council on the 14th of October, 1861, Mayor Taylor said,—

"It is an additional source of pleasure to be able to inform your honorable body that we have at last obtained a suitable city hall. By the liberality of the honorable board of county commissioners and under authority of your ordinance No. 4871, I have leased for that purpose the just completed north wing of the county court-house for the term of ten years, at the almost nominal rental of one thousand dollars per annum. It affords ample accommodation for every department of the municipal government except the Health Department, which, by the terms of the contract with the county, is to be elsewhere located. . . . The hall set apart for the Council chamber has been fitted up and furnished under the direction of a committee appointed by your body, and I believe is now ready for occupation. The remainder of the building is now being sub-divided under direction of the city engineer, and I am informed will be ready for occupation about the first of the coming month. Thus has a change of great importance been effected. The archives of the city, its records, title-deeds, and other important documents, which for many years past have been subject to decay and destruction, will for the future be perfectly secure in a perfectly fire-proof building."

The offices thus secured, and which were occupied late in December, 1861, comprised four floors of the court-house, including the basement. The latter was occupied by the register of water rates and superintendent of water-works; the second floor by the mayor, comptroller, register, auditor, and treasurer; the third floor by the City Council and the city engineer; and the fourth floor by the board of assessors, superintendent of sewers, and sergeant-at-arms. All the offices were conveniently and tastefully fitted up, and the more important were supplied with new furniture. The office of the board of health was shortly afterwards removed to No. 17 Chestnut Street, almost immediately opposite to where it had been located.

In the early part of the year 1868 the subject of erecting a city hall was revived, and the City Council passed an ordinance, which was submitted to the approval of the voters of St. Louis, for the erection of the proposed building on Washington Square, Market Street, between Twelfth and Thirteenth Streets. The terms of the ordinance did not provide for the immediate erection of a city hall, but merely for the preparation of the ground. In October, 1872, was commenced the erection of the present city hall on Eleventh Street, extending from Market to Chestnut. In his message to the City Council, November 11th of that year, Mayor Joseph Brown stated that work on the new building intended for a temporary city hall was progressing satisfactorily, and would be completed within a few months. "In its original design," he added, "the building was only intended for the temporary accommodation of the city departments, but it now promises to answer all the purposes required for a number of years to come, and at a cost quite insignificant compared with the accommodations

THE CITY HALL.

provided. It is to be regretted that the present financial condition of the city does not seem to warrant the outlay necessary for a city hall commensurate with our existing needs and future growth; but I am glad to say that in the building now in course of construction we shall have all that public convenience will require, and we will be enabled to group the different departments in a manner that will greatly facilitate the transaction of business."

On the 30th of July, 1873, it was announced that the building was approaching completion. "It is not a very sightly building outside," added the local chronicler in his reference to it, "and, in fact, cuts rather a sorry figure in this day of ornate fronts and Mansard roofs, but when it is considered that it was built merely for temporary purposes, and that it admirably serves its purpose, a little homeliness can be excused. . . . The original estimate of cost was forty-eight thousand seven hundred and fifty dollars, which was the contract price, but it was afterwards concluded to put on a third story, which involved an additional outlay of thirteen thousand three hundred dollars.

By the time the building is ready for occupancy it will have cost about seventy thousand dollars." The new building was occupied for the first time by the mayor, comptroller, auditor, and treasurer on the 22d of October, 1873, and they were subsequently followed by the other city officers. The city hall is situated on city block No. 489, and has a frontage on Eleventh Street of three hundred and fifteen feet, with a depth of two hundred and twenty-one feet and six inches extending from Chestnut to Market. It is three stories in height and is built of brick. The lot and improvements are estimated to be worth about one hundred and fifty-three thousand two hundred dollars. As already indicated, the building is regarded as merely temporary, and must sooner or later be replaced by a more commodious and expensive structure. In his message to the City Council in May, 1880, Mayor Overstolz declared that the time had arrived when the municipal government should seriously consider the enterprise of erecting a new city hall. "The building now occupied by the municipal departments," he added, "was not intended to be permanent, and was not built in a substantial manner, and does not afford the necessary accommodations. It has stood the test of use and time very indifferently, and for several years past it has cost a considerable amount annually for repairs, and its condition to-day is certainly not favorable for the safety of the valuable archives, records, and other property stored therein. In character and size it is inadequate to the wants of the government, and its appearance is discreditable to a city of the reputation, wealth, and influence of St. Louis." In order to secure the needed accommodations the mayor suggested "the extension of the wings of the present court-house as the best method to adopt." The mayor's recommendations, however, were not carried into effect, and the old structure is still used as the city hall.

Court-House.—The first building erected in St. Louis for the purposes of a court-house was located on the west side of Third Street, between Spruce and Almond, and was constructed about 1817. It was a small one-story frame structure, fronting on Third Street, and the site was afterwards occupied by the hospital of the Sisters of Charity. In 1820 the courts were removed to a frame building which had been used as a boarding-house, adjoining a log cabin on the west side of Second Street, and were subsequently transferred to a building on the southwest corner of Third and Market Streets. The erection of a Baptist Church on this site had been commenced, but the unfinished structure had been torn down and the court-house built in its place. The building was used as a court-house until 1827, when the records and papers were transferred to the new court-house, and the old building was transformed into the National Hotel, the proprietors of which were Stickney & Knight. In December, 1822, the Legislature passed an act providing for the erection of a court-house and jail. The text of the section providing for the building of the court-house is as follows:

"AN ACT *concerning a court-house and jail in the county of St. Louis, approved Dec.* 14, 1822.

"SECTION 1. *Be it enacted by the General Assembly of the State of Missouri*, That Thomas Sappington, of Gravois, Ludwell Bacon, of Bonhomme, Robert Quarles, of St. Ferdinand, and Pierre Chouteau, Jr., and William Carr Lane, of the town of St. Louis, be and they are hereby appointed commissioners, for and in behalf of the county of St. Louis, to select a proper site within the town of St. Louis whereon to erect a court-house for said county; and the said commissioners are hereby empowered to receive proposals from all persons who may be willing to make donation of land to the said county for the purpose aforesaid, and to accept and receive such proposed donation as to them shall seem most beneficial to the county; and they are, moreover, authorized and empowered to cause a deed of conveyance to be executed whereby the land so offered shall be conveyed to the justices of the county court, and their successors in office forever, in trust for the use of said county, to be applied to the purposes aforesaid."

In accordance with the provisions of this act, the commissioners proceeded to select a site, and their action is set forth in the following document, which was filed among the records of the county office:

"We, the undersigned, commissioners appointed by an act of the General Assembly of the State of Missouri entitled 'An Act concerning a court-house and jail in the county of St. Louis, approved the 14th day of December, 1822,' have this day selected as a proper site whereupon to erect a court-house for the county of St. Louis a square of ground offered by John B. C. Lucas and Auguste Chouteau, Esquires, situated on the hill in that part of the city of St. Louis laid out by the said Lucas and Chouteau, bounded on the east by Fourth Street, on the south by Bonhomme Street, being the cross street that comes up from the market-house, on the west by Fifth Street, and on the north by a cross street; and the said commissioners as by the said act authorized, do by these presents accept and receive the said square of ground of said John B. Lucas and Auguste Chouteau, Esquires, the donors, as the site whereon the court-house of the county of St. Louis shall be built. The said Lucas and Chouteau are requested to execute a deed for said square, as is required by the act above referred to. Given under our hands at St. Louis, this 25th day of August, 1823.

"THOMAS SAPPINGTON.
"WILL CARR LANE.
"P. CHOUTEAU, JR."

The deed referred to was executed by Auguste Chouteau, Theresa Cerré Chouteau, and John B. C. Lucas, and is dated in September, 1823.

Before its selection for the court-house the ground had been the site of a whipping-post, which had been established there at an early period. The first step

towards the erection of the proposed court-house was made by the county court, composed of Judges Joseph V. Garnier, Peter Ferguson, and Francis Nash, on the 9th of November, 1825, and their action is recorded as follows:

"The court deeming it expedient to erect a court-house on the public square deeded to the county by Lucas and Chouteau, do order that a court-house be erected on said square, and that a sum of seven thousand dollars be appropriated for that purpose, to be raised from the tax on licenses, and the court appoint Alexander Stuart commissioner to superintend the building of said court-house."

Subsequently the judges reached the conclusion that seven thousand dollars would not be sufficient for the purpose, and at the next session, on the 7th of February, 1826, made the following order:

"WHEREAS, the court at their last November term, deeming it expedient to erect a court-house for St. Louis County, made an order for the building thereof, and at the same time appropriated a sum of seven thousand dollars, to be drawn from the tax on licenses; and whereas it appears to the court that the appropriation then made may be inadequate to the object intended, it is therefore ordered that an additional sum of five thousand dollars be appropriated, to arise from the same source, and the court authorize the superintendent, when he advertises for proposals for erecting said building (should he think proper to do so), to state that there is now in the treasury, specie of the aforesaid appropriation, the sum of eight thousand and twenty-five dollars, that the probable receipts from the same source will be about four hundred dollars per quarter, and that the court, when they have not money arising from the appropriation aforesaid under their control, or funds which may properly be applied in aid of said appropriation, will, on certificate of the superintendent, as required by law, direct the issue of certificates of not less than one hundred dollars each, bearing an interest of six per cent. per annum, for the redemption of which the aforesaid fund shall remain pledged, subject, however, to be redeemed at any time the court may have funds to do so, and which they may think proper to apply to that purpose."

The superintendent, Alexander Stuart, on the 9th of February, 1826, submitted to the county court a plan of the building to be erected, with the dimensions thereof, and an estimate of its probable cost, being the sum of twelve thousand dollars, which (says the court record), after being maturely examined, was approved.

There appears to have been some difficulty about the plans for the building, for at the next meeting of the court on May 1, 1826, a plan submitted by Messrs. Morton & Laveille was also approved, and two thousand dollars additional appropriated, and the contract for the erection of the building awarded to Joseph C. Laveille and George Morton for fourteen thousand dollars. The contract is dated May 26, 1826, thus virtually rescinding the acceptance of Stuart's plan.

Mr. Stuart thereupon resigned, and on the 25th of July, 1826, "Henry S. Geyer was appointed commissioner to superintend the building of the court-house, *vice* Alexander Stuart, resigned."

Mr. Geyer certified the building accounts from time to time as the work progressed, and the final settlement was made by Mr. Geyer, superintendent, with Morton & Laveille on the 10th of August, 1833, the building being then entirely completed, the cost of which was found to be $14,416.16.

The remainder of the square was unoccupied except by a whipping-post in the centre. Persons were sentenced to be publicly whipped, and the sheriff in each case "was sworn to lay the lashes on well without fear or favor."

From time to time between this date and June, 1836, various orders were made by the court in regard to the several offices and rooms in the old building, until it was found that the increase of legal business and the growing wants of the county required more room. Accordingly, on June 1, 1838, the court made an order that proposals be invited for the erection of a building for clerks' offices on the southwest corner of the square (corner Fifth and Market Streets), to be one hundred and thirty-two feet long by thirty-six feet in width; and on Sept. 7, 1838, another notice was given and an offer of one hundred dollars for the best plan was made for a building on the public square either adjoining the court-house or adjacent thereto, which resulted in the adoption of a plan submitted by Henry Singleton on July 8, 1839, and the appointment of said Singleton as architect and superintendent.

The first contract for work upon the building under the above order was made by the architect, Singleton, with Joseph Foster for the carpenter-work under date of Aug. 12, 1839, and in April, 1842, a contract for the cut-stone work of the rotunda was awarded to H. J. Hall, and the contract for plastering to John Shannon.

In order to raise funds for the erection of the structure the county court appointed a committee to procure a loan of thirty thousand dollars, and capitalists in Boston were applied to, but the money was not obtained from them as they decided that "St. Louis was situated at too distant a point in the West to be a safe place for the investment of so large a sum." In January, 1839, Col. John O'Fallon made a donation for the building of "a quarry of excellent limestone contiguous to the city." The corner-stone was laid on the 21st of October, 1839, with a public demonstration, including a parade of the Masonic, Odd-Fellows' and Hibernian societies and the St. Louis Grays, in the presence of a large assemblage of citi-

zens, Hon. Wilson Primm delivering an able address. Beneath the corner-stone was deposited a sealed glass, containing a parchment roll, with the following inscription:

"The corner-stone of the new court-house of the county of St. Louis, State of Missouri, being an addition to that erected A.D. 1825–26, laid on the 21st day of October, in the year one thousand eight hundred and thirty-nine. Martin Van Buren, President of the United States; Richard M. Johnson, Vice-President of the United States; Lilburn W. Boggs, Governor of Missouri; Frank Cannon, Lieutenant-Governor; Matthias McGirk, president judge of the Supreme Court; George Tompkins, associate of the same; William B. Napton, associate judge of same; Luke E. Lawless, judge of St. Louis Circuit Court; John Ryland, clerk and recorder of same; James B. Bowlin, judge of St. Louis Criminal Court; Julius D. Johnson, clerk of same; M. P. Leduc, Henry Walton, and Joseph Le Blond, justices of the county court; Henry Chouteau, clerk of same; Marshal Brotherton, sheriff of St. Louis County; John Brent, circuit attorney; Henry Singleton, architect; Joseph Foster, builder; William Carr Lane, mayor of the city of St. Louis; Elliot Lee, marshal of the same.

Specimens of all the coins of the United States, copies of all the newspapers printed in the city, and copies of the programme of the proceedings of the day, were also deposited in the stone.

On the 28th of October, 1842, the court ordered that a room be set apart for the use of the St. Louis Law Library, then in its infant days, and on the 19th of January, 1843, the northwest corner room in the second story was selected, which continued to be used for the library until the completion of the south wing.

During 1842, Mr. Singleton, the architect and superintendent, resigned, and was succeeded by William Twombley, who resigned about one year later. For a period of about eight years there was no architect, the judges of the county court superintending the work. The following entries on the records show the progress of construction from time to time:

June 21, 1843, Murison & Morrison, contractors for erecting the steps on the west front, having completed their work, were paid fifteen hundred and twenty dollars therefor.

June 26, 1843, Francis McDermott's bid for erecting the stone steps on the north and south fronts was accepted at a price of two thousand two hundred dollars, and under a contract at that sum they built the steps.

Aug. 19, 1843, Joseph Foster, the contractor for the carpenter-work, was instructed to complete the old rotunda with dispatch, which was done.

From 1843 until 1851 there was but little work done upon the building, and there being no architect, what was done was executed under the immediate direction of the county judges.

On Feb. 19, 1851, the court made an order for the erection of the present east wing, and in December, 1851, appointed Robert S. Mitchell architect and superintendent, with a compensation of four per cent. upon all expenditures.

Operations were commenced on the 31st of March, 1851, and on the following day it was announced by the *Republican* that two fire-proof buildings were to be immediately erected, fronting upon Fourth Street, at the intersection of Market and Chestnut Streets. On the 7th of September the same paper stated that "the county officers are busy making preparations for an early removal from their offices in the east wing of the court-house. A small building is being erected to front on Chestnut Street, near Fourth, and intended for the temporary convenience of the sheriff."

The demolition of "the old east wing, or, in other words, the old court-house," was commenced on the 7th of October, 1851, "the old stone steps in front falling the first a sacrifice to the new improvement." In October, 1852, Mr. Mitchell contracted with Bernard Crickard for the cut-stone work of the wing, letting out the brick-work to John C. Evens.

It having been decided to have the south and north wings also erected, Architect Mitchell contracted on the 28th of May, 1853, with Mr. Crickard for the cut-stone work of the south wing, and in July, 1853, for the six stone columns for the portico of the east wing.

The work thus progressed up to 1857, when a disagreement arose between the architect (Mr. Mitchell) and contractor (Mr. Crickard) in regard to the measurement of the cut-stone work, which was only settled after a long investigation by two different sets of arbitrators, their award being in favor of Mr. Crickard for sixty-eight thousand seven hundred and fifty-five dollars and seventy-eight cents.

On the 14th day of May, 1857, the county court superseded Mr. Mitchell and appointed Thomas D. P. Lanham to the office, at the same rate of compensation, four per cent. on the amount of work done under his supervision. Under Mr. Lanham the work on the west wing progressed (there having been some alterations made in the wing), the foundation of the north wing was laid, and the changes in the rotunda commenced by the removal of the upper portion of the dome, and the substitution of heavy iron plates representing paneling, the design being to increase the height of the rotunda in this manner.

The condition of the work in June, 1857, is thus described on the 14th of that month:

"The new court-house, occupying with its grounds the entire square bounded by Fourth, Fifth, Chestnut, and Market Streets, is of the Grecian Doric order of architecture, and was erected to its present state of completion principally from the designs of Robert S. Mitchell, Esq., architect. The Fourth Street

east front is two hundred and thirty-three feet, and the other fronts two hundred and fifty feet. The present rotunda and dome are to be removed and those of much larger dimensions constructed. The new dome will be supported by a Corinthian peristyle, and will be surmounted by what is known in architectural parlance as a 'lantern.' On the summit of the lantern will be a statue of the Goddess of Justice.

"The distance from the base of the building to the top of the statue will be one hundred and sixty-four feet. The basement of the east wing is at present occupied by various county offices. In the main story of the east wing are the county and probate courts, with their clerks' offices. On the second floor are the Circuit Court and Court of Common Pleas and the clerks' offices.

"On the first floor of the south wing is temporarily located the criminal court, and it will contain the recorder's office. In the second story is the Supreme Court and ante-rooms, also the law library. The west wing, now occupied principally by the land court, will eventually be occupied by the Court of Common Pleas.

"The first contract for the construction of the east wing was awarded in 1852, the floor to be of fire-proof and the roof of wrought iron. A portion of the wing was completed in 1855, and the entire wing was ready for occupancy in 1856. The south wing was put under contract in 1853. During the erection of this wing many causes combined to delay its execution, among which were limited means, strikes on the part of the operatives, and a leniency on the part of the court in extending the time to contractors. In the spring of 1856 the roof of the west wing was found to be in a dangerous condition, and upon this discovery the court ordered its reconstruction of wrought iron, and new fire-proof floors were ordered to be laid. In order to accomplish this the interior had to be cleaned out, and the opportunity was improved, under the direction of the court, to remodel the entire wing in accordance with the general design of the architect. The principal contract for erecting the north and last wing of the building, together with the rotunda, was given in 1856."

On the 30th of August, 1858, the contract for the brick-work of the north wing was awarded to James George. In January, 1859, the county court was abolished by the Legislature, and on the first Monday in August, 1859, the board of county commissioners were elected. The first meeting of the board was on August 15th of that year. On the 21st of September, 1859, the board declared the office of architect and superintendent to be vacant, and on the day after appointed William Rumbold to the office at a salary of one hundred and twenty-five dollars per month. Mr. Rumbold at once engaged workmen, and set about his task with vigor. On the 26th of October, 1859, the board, finding that James George, contractor for the brick-work of the north wing, was not progressing with the work, although having been notified to proceed by the architect, ordered that his contract be forfeited, and directed that new proposals be received for said brick-work.

The board having appointed a committee to inspect the rotunda and report as to its strength and capability to support the heavy, cumbersome iron dome that had been commenced by Mr. Lanham, a careful inspection of the work resulted in a majority and minority report, which were presented to the board Nov. 24, 1859, and the board requested Mr. Rumbold to report a plan for a dome as much lighter in weight than the one then in course of erection as possible. Accordingly Mr. Rumbold, on the 21st of December, 1859, submitted the plan of a wrought-iron dome, which, after being carefully examined, and the model subjected to the severest tests, was adopted Jan. 19, 1860, and Mr. Rumbold directed to proceed immediately with its construction. James G. McPheeters & Co. were awarded the contract for its erection Jan. 27, 1860, and a contract was awarded to A. C. Hull for coppering the west and north wings. On the 13th of February, 1860, Richard Cavanaugh's proposal for the brick-work of the north wing was approved, and on June 20, 1860, the north wing being nearly completed, a communication was received from Mr. Filley, mayor of the city, in regard to the occupancy of that wing by the city authorities, which the board laid over until June 4, 1861, when they decided to lease said wing to the city for the term of five years at a nominal rent.

On the 16th of July, 1860, the architect submitted a report in relation to covering the stone and glass for the walk of the observatory and for the eye of the dome, and specifications were ordered to be made and proposals for the work and materials advertised for; and on Aug. 24, 1860, Mr. Rumbold contracted with A. A. Briggs, of New York, for glass for the eye of the dome, and on the 29th of August agreed with Hall & Couzins for putting the copper covering on the dome, the copper having been furnished by Park, McCurdy & Co., of Pittsburgh, and manufactured from the best quality of Lake Superior copper. Mr. Rumbold also contracted with J. G. McPheeters for the glass basement of the observatory.

The erection of the wing being completed, excepting the columns, the board directed Mr. Rumbold, on the 8th of October, 1860, to instruct the contractors, Crickard & Doyle, to proceed without delay to procure and erect said columns, which they accordingly did. The superintendent, having previously advertised for proposals for plastering the inside of the dome and the ornamental work thereon, received several proposals on the 19th of April, 1861, and that of William C. Smith was accepted. On the 6th of June, 1861, an interesting ceremony took place in the dome, viz., the depositing of certain documents in the base of the ball above the dome. About fifteen persons ascended to the lofty elevation and witnessed the ceremonies. John H. Lightner, president of the board of county

commissioners, officiated. The following articles were deposited in the ball:

Autographs of the county commissioners attached to a certificate showing that William Rumbold designed the work.[1]

Autograph of Henry Singleton, the first architect employed in the construction of the court-house.

Card containing the price of labor for men and horses employed by the road superintendent, John F. Long.

Printed list of all the county officers, including the judges of the several courts.

Certificate to James G. McPheeters, contractor for the wrought-iron dome of the court-house.

Certificate to Hall & Couzins, contractors for the copper-work of dome.

ST. LOUIS COURT-HOUSE.

Certificate to Joseph Foster, contractor for the joiner's work.

Copies of the *St. Louis Daily Evening News*, *Republican*, *Democrat*, *Herald*, and the several daily German papers.

Ink-bottle and silver pen of Samuel W. Eager, Jr., secretary of the board of county commissioners, used by Samuel Gardner in writing the names of those present on the occasion.

A twenty-five-cent piece (United States coin), dated 1861, from Samuel Gardner.

The entire weight of the dome was two hundred and fifty-six thousand pounds, and at first it rested on the walls, but by an ingenious device of the architect was subsequently transferred or equally divided between the walls and several large iron beams. Soon after the completion of this design Mr. Rumbold applied for a patent, which was subsequently awarded to him from the Patent Office at Washington. The height of the dome from the ball to the sidewalk is one hundred and ninety-eight feet, and from the top of the flag-staff two hundred and forty feet. The rotunda is sixty feet in diameter. There are four circular galleries. The height of the first is eighteen feet, of the second thirteen feet, of the third twelve feet, and of the fourth thirty-two feet. From the fourth gallery to the base of the inner dome the distance is twenty-six feet, and from this point to the top of the dome the distance is thirty feet, making in all one hundred and thirty-one feet from the floor of the rotunda to the inner eye of the inner dome. The diameter of the rotunda is sixty feet, and of the inner circle forty feet. According to the original plan spiral stairways leading from the floor of the rotunda to the first gallery were constructed within the "inner circle."

When Mr. Rumbold began the design of his dome one of the most difficult obstacles he had to overcome was that of the construction of a stairway to the top of the dome without marring the symmetry and general beauty of the design. After due study he overcame the difficulty in such a manner as to increase rather than diminish its beauty. Commencing on the third gallery he designed four projections. Behind two of these projections, on opposite sides of the dome, he arranged for a narrow iron staircase to lead to the top of the dome or tholus. One stairway for ascending and the other for descending. The other two projections were planned to harmonize the design. In each projection a niche for statues was created. Externally the projections are beautifully frescoed, and ornamented with pillars. By the construction of these four projections four large pa-

[1] This certificate was as follows:

"UNITED STATES OF AMERICA, STATE OF MISSOURI, COUNTY OF ST. LOUIS.

"OFFICE OF THE SECRETARY OF THE BOARD OF COUNTY COMMISSIONERS, June 5th, 1861.

"This is to certify that this wrought-iron dome of the Saint Louis court-house was erected by William Rumbold, superintendent and architect, during the years 1860 and 1861, and was completed on the day of the date hereof, and that the undersigned are and were the county commissioners who authorized the erection thereof.

"J. H. LIGHTNER, *President of the Board.*
"PEREGRINE TIPPET, *Maramec township.*
"BENJ. FARRAR, *St. Ferdinand* "
"JOHN H. FISSE, *St. Louis* "
"WM. TAUSSIG, *Carondelet* "
"ROBERT HOLMES, *St. Louis* "
"A. R. EASTON, *St. Louis* "

"Attest: SAMUEL W. EAGER, Jr., *Secretary.*"

were created on the north, east, and south sides of the dome, and on each of these panels Mr. Wiemar executed an historical painting. First on the south side is the discovery of the Mississippi by De Soto, who, at the head of his faithful followers, is represented as emerging from the forest. Clothed in armor and mounted on a gaily-caparisoned charger, he is seen conferring with the red men of the forest on the banks of the noble stream which eventually became his final resting-place. On the eastern panel is the landing of Laclede at what is now the foot of Market Street, in 1764. This is an historical sketch, and is thought to be accurate. In addition to the written historical facts concerning Laclede's landing, Mr. Wiemar was so fortunate as to form the acquaintance of a Mr. Laconte, an aged Frenchman of Carondelet, who, years ago, frequently saw the barge in which Laclede landed. Mr. Laconte made a sketch of it from memory, and from this sketch Wiemar painted the barge. Mr. Laconte also gave a description of Laclede, which greatly assisted the artist. The barge is represented as nearing the shore. Large forest-trees and Indians line the bank of the river, and a spring of water bubbles out of the rocks near where the boat is about to land. Laclede, the most prominent figure on the barge, is clothed in the costume of "ye olden time," and seems quite ready to be welcomed by the friendly Indians who stand on the shore ready to greet him. The third picture, on the north panel, represents the alleged Indian attack on St. Louis in May, 1780; and the fourth, a Western landscape with a buffalo chase, etc.

In the fourth gallery Mr. Wiemar executed four figures representing law, commerce, justice, and liberty, all of which were painted in bold relief, and so as to show with excellent effect from almost any point of view.

The fresco-work was executed by Augustus H. Becker, and is very handsome. On the north side of the dome the leading products of the North, corn and wheat, are frescoed, and on the south side the products of the South, the pine-apple and the sugar-cane.

The plastering was executed by Wm. C. Smith & Co., and was very carefully and skillfully done, particularly the coat of arms of the State under each of the figures painted in the dome. The iron-work was by Thomas Howard & Co.

The following table, prepared by the county auditor, shows the total cost of the court-house:

Cut-stone work, to Crickard & Doyle....	$393,647.05
Outer stone-work.....	48,455.91
Iron-work.....	151,342.22
Brick-work and materials for same.....	71,115.23
Plastering.....	21,054.65
Carpenter- and joiner-work.....	146,607.19
Painting and glazing.....	21,650.13
Roofing.....	23,825 49
Sundries,—labor, materials, etc.....	288,329.71
Achitect and superintendent.....	43,844.33
	$1,199,871.91

The building thus completed in the summer of 1862 is one of the handsomest and most imposing public edifices in St. Louis. It stands in the form of a Greek cross, and is surmounted by one of the finest domes in the country. The lantern on its summit commands a view of from fifteen to twenty miles in different directions, and it is said that a person with a strong glass can survey an area of more than three hundred square miles, "extending beyond Kirkwood on the west, far out on the Illinois prairies to the east, up to Alton on the north, and far below Carondelet on the Mississippi." The chief characteristics of the edifice are solidity and symmetry without striking or elaborate ornamentation. Its interior arrangement is not so satisfactory, as portions of the structure are defective in respect to light and ventilation. These imperfections, however, are probably due not to any fault of the architect, but to the fact that the original plan did not contemplate the erection of the building in its present shape. The court-house as it now stands occupies the entire block between Fourth and Fifth and Chestnut and Market Streets, and its dimensions, including the wings, are one hundred and eighty feet in the direction of the four cardinal points of the compass.

The Four Courts.—Among the public buildings of St. Louis the structure known as "The Four Courts" is one of the handsomest and most conspicuous. It occupies the square formed by Clark Avenue and Spruce Street on the north and south and Eleventh and Twelfth Streets on the east and west. On its site formerly stood the mansion of Henry Chouteau, whose property extended in the form of a peninsula into a small lake then known as Chouteau's Pond. The mansion was replaced by the court-house, the erection of which was rendered necessary by the inadequacy of the accommodations provided in the old court-house. The new "Four Courts" was designed after plans by Thomas P. Walsh, architect, for the administration of criminal justice, both city and State, and is a large and substantial building in the renaissance style. It has a frontage of three hundred and thirty with a depth of fifty-four feet, and is three stories high, and there is a space of twenty-five feet between the building and the sidewalk. The façade is divided into five parts, viz.: the grand centre, two extreme wings, and intervening recesses. The extreme

wings and recesses form pavilions, covered with a mansard roof on inclined planes, and the centre is crowned by a dome surmounted by a large cupola, in the base of which is an illuminated clock having four faces.

The main entrance opens upon a hall thirty-one feet wide, from which ascends a stairway of cast iron twelve feet wide. The building is devoted to the use of the Criminal Court, Court of Criminal Correction, Police Court of the First District, and Police Department. Only three courts are held in the building, and the designation Four Courts is therefore a mis-

THE FOUR COURTS.

nomer. It is said that the name originated with one of the judges, a native of Ireland, who bestowed it upon it on account of its resemblance to the Four Courts at Dublin. The material of the building is cream-colored Joliet stone. In the rear of the main central structure is the city jail. The cost of the building was seven hundred and fifty-five thousand dollars, and that of the ground one hundred and twenty-five thousand dollars, making the total cost eight hundred and eighty thousand dollars.

The contractors for the building were Richard Brown, excavation; John Stoddard, masonry; Joseph Brown and Simon Dehner, cut-stone; Michael Fitzpatrick and Robert L. James, brick-work; Edward Illsley, carpenter-work; Maurice Pauley and William Colcard, Messrs. McMurray, Smith & Judge, iron-work; Jacob Bixler, plastering; Thomas Hayden, slating; Dunn & Wittee, galvanized iron-, tin-, and copper-work; Siegel & Bobb, plumbing, gas, and steam-fitting; William Colcold, steam boilers; Henry Bishop, sewers; Casper Stolle, concreting; Gustav Thym, flagging. The painting and glazing were done by John Williams, and the fitting up of the court-rooms was done under the superintendence of Capt. James A. Nolan. The building was finished and occupied in the autumn of 1871.

The City Jail.—As early as 1816 the Legislature of the Territory passed an act for the erection of a jail in St. Louis, and on the 22d of June of that year the following notice was published by the jail commissioners:

"We, the undersigned, being appointed commissioners by the Circuit Court of the county of St. Louis, under the authority of an act of the General Assembly providing for the erecting of a jail for the use of said county, met at the coffee-house, agreeably to previous notice, to receive proposals from any person or persons who wished to make a donation of a piece of ground for the purpose of erecting a jail thereon. Accordingly proposals were received from Auguste Chouteau and John B. C. Lucas, Esqs., and from Jeremiah Connor, Esq. The said Chouteau and Lucas offered the choice of lots numbered 32, 43, 49, 93, and 94 for the purpose aforesaid; Conner offered one arpent square of land, bounded on the south by the public road leading to St. Charles, west by Fifth Street, north by a street leading by Peter Chouteau's lot, and east by Fourth Street. Whereupon and after mature deliberation the lot No. 49, belonging to said John B. C. Lucas, fronting on Sixth Street, and containing about one hundred and fifteen feet by one hundred and thirty-five feet was selected, William Christy and Thomas Brady voting in the negative. The said John B. C. Lucas is therefore required to render to the said commissioners a deed for the aforesaid lot agreeable to law on the 25th instant, at the house of Charles Gratiot, in the town of St. Louis. It is further ordered, that a copy of the foregoing proceedings be inserted in the *Missouri Gazette* for one week.

"THEODORE HUNT.
"A. F. SAUGRAIN.
"CHARLES GRATIOT.
"W. CHRISTY.
"THOMAS BRADY.

"ST. LOUIS, June 18th."

On the 18th of September following, M. P. Ledu[c] for the commissioners, advertised for proposals for th[e] new jail, and on the 27th of December, 1817, th[e] advertisement was renewed by Theodore Hunt, one [of] the commissioners. The work proceeded slowly, a[nd] on the 18th of September, 1819, Theodore Hun[t] chairman of the committee, advertised for propos[als] to complete the jail by December 1st. This jail[1] w[as] of stone, and is described in the directory of St. Lo[uis] published in 1821 as being "a new stone jail of t[wo]

[1] In an address delivered before the Missouri Historical S[o]ciety by W. H. H. Russell it is stated that "the old jail, wh[ich] was a round tower, was located at Fourth and Walnut, in [the] centre of the street, with doors fronting on Walnut. On [the] north side wer winding steps to the second story, which fron[ted] to the north, looking up Fourth Street. It was a curious [old] old-time institution indeed."

stories, seventy by thirty," standing "west of the site for the court-house."

Notwithstanding the time consumed in its erection and the character of the material used, the old jail does not appear to have been very secure as a place of confinement.

In the latter part of September, 1826, says a newspaper account, the jail was broken into,

"and the following prisoners, confined in one cell, made their escape, and have not yet been retaken, viz., Patrick Soye, convicted of manslaughter; John Brewer, sentenced at the last term of the Circuit Court to be executed this day (September 28th) for perjury, but which was prolonged until some time in November: and French Strother, indicted at the last term of the Circuit Court for the murder of Horatio Cozens, Esq., and who was to have been tried in Ste. Genevieve County in November next at the instance of the defendant. The work of several days must have been required to form the passage through which they escaped. With an auger which they had by some means procured holes were bored near each other through the wood which lines the inside of the cells. To escape detection, the first of these were filled up until a sufficient number were made and connected together, when the pieces of timber were easily removed. A hole was then forced through the wall, formed of stone, and four feet thick, large enough to admit of their escape."

Three years later (in November, 1829) the jail was broken open about midday, and four prisoners made their escape, viz., Charles Gibson, Wilkins Elder, Joseph Johnson, and Daniel Bennett, severally charged with larceny. There were several other prisoners in the same cell, who, from fear of being apprehended or some other cause, did not attempt to get away. The others escaped through the door, having forced back the bolts of the principal locks with a pair of shears.

Commenting upon this affair the *Republican* of November 24th says,—

"The occasion is peculiarly appropriate for us to call the attention of the county court or the grand jury, which is now in session, to the condition of this jail. It is not of sufficient size, and contains very few apartments."

Another jail delivery occurred on the 28th of February, 1838. On this occasion John Duncan, Thomas Forbes, John Barr, Obediah Whitehouse, and George Thompson cut a passage through the ceiling, and effected their escape by getting from the garret into the passage, and from thence into the street. On the 2d of July, 1840, nine prisoners—John Dushat, William Atkinson, John Jones, Benjamin Gray, James Fugale, Rosanna McDonald, Benjamin Hogany, and John Lewis—escaped. The sheriff offered a reward of five hundred dollars for their apprehension and delivery to the jail. Their escape was effected by the assistance of a woman. There were so many in the jail that great numbers had to be kept in the same apartment. The woman was kept in a passage, and, it is supposed, picked the lock that held the bar to the inner door. The iron gratings to the outer door were cut off with the mainspring of a watch, and the outer padlock was broken with an iron bar. The newspaper in which the account of this affair appeared remarked in connection with it that "St. Louis needs greatly a larger and more secure jail."

On the 13th of August, 1841, the *Republican* announced that "the county court, after a long struggle to the contrary, have resolved to build a jail on the lot occupied by the present building. There is some question as to the propriety of building a jail in the heart of the city." The building of the jail was commenced during the same year, but proceeded slowly, and in its issue of the 7th of October, 1842, the same paper said,—

"We have never seen the old saw, 'penny wise and pound foolish,' more fully and directly illustrated than in the recent action of the county court in reference to the county jail. It will be remembered that the jail was commenced in 1841, under the supervision of Mr. Singleton. Under his direction several thousands of dollars were spent in laying the foundation and raising the building up to the base of the first range of cells. The foundation was laid, the steam boilers and pipes put in, and all the fixtures of the building constructed for a four-story house. When the superintendency was taken from Mr. Singleton the stone-work of the building was let out to the lowest bidder. Mr. Witherell got the contract at thirty-two thousand dollars to finish the stone- or mason-work of the building four stories high. The making of the grating for the windows and doors for a four-story building was also let at the same time, and all the grates and doors contracted for, we understand, are completed and ready. Lately the hands in Mr. Witherell's employ refused to take the city scrip and bear the discount at which it was going. The hands turned out, and therefore Mr. Witherell made a proposition to the court, that if they would give him twelve thousand dollars in bankable or current funds he would complete the building and wait one year for the remaining ten thousand dollars, the court having previously paid him ten thousand dollars. The court either could not or would not agree to Mr. Witherell's proposition, and finally in their wisdom resolved to stop the building at the third story, under an agreement with Mr. Witherell that it should be left to disinterested persons to say how much should be deducted from his contract for the fourth story."

The jail thus erected was by no means "prisoner proof," for on the 10th of November, 1848, William Jones, *alias* Fanning, C. C. Clark, *alias* Piper, William Jones, *alias* Smith, Robert Besaria, and a soldier whose name was unknown "escaped from the calaboose."

Another attempt in March, 1849, was not so successful. On that occasion Jack Milton, Patrick Noon, and Samuel Hughes "made a bold but unsuccessful effort to break jail by removing one of the outside stones from the wall of the cell in which they were

confined. The tools used were two old case-knives, with which they had progressed to a considerable extent by removing the mortar and cutting the lead with which the stones are sealed together. Being heard in their operations by the jailer, they were handcuffed and put into another cell."

On the 3d of August, 1851, it was announced that

"the new brick building erected by order of the county court in the jail-yard is now quite finished and ready to be put into use. It is designed for the use of the criminal court during the time occupied in erecting the new east wing of the court-house. Though intended to serve only a temporary purpose, it has been put up substantially, and is furnished with every necessary convenience. The criminal court-room is large, and has been fitted up with the fixtures of the old court-room. Adjoining this principal apartment are two smaller rooms for the county marshal and the jury. The house is built on piers. We learn that it is the intention of the county court, at the earliest practicable period, to remove the old stone jail which stands at the west front of the lot, and to extend the new building over the space which it at present occupies. A portion of this building is now used by the jailer as a residence for himself and his family, and the remainder as a jail for youthful and women criminals. When the addition to the main building is commenced, a residence for the jailer entirely separate from it will be erected on the south side of the lot."

In April, 1852, four prisoners, two of whom were convicts in the penitentiary, and a third under sentence of hanging for murder, escaped from the St. Louis County jail. Their names were James Andrews, sentenced to five years' imprisonment for mail robbery; Dick Jones, the murderer of Ephraim Hibler, the watchman; George Snell, under sentence of five years for counterfeiting; and George Smidt, one of the soldiers sentenced to the county jail for rioting.

On the 8th of April, 1854, Martha Green and Margaret Fennegan, imprisoned on a charge of larceny, succeeded in picking their way out by boring through the wall and opening the door of the room where they were locked up. They were in the old jail building, which was set apart for females, and after getting into the yard "it is thought they escaped over the wall by means of the framework which surrounds the well situated in a corner of the lot, the top of which is almost as high as the wall that surrounds the jail."

On the evening of July 28, 1861, twenty-eight prisoners confined in the county jail made a desperate attack on the deputy jailer and effected their escape.

The old jail property, including the jails and other buildings on the lot at the southeast corner of Sixth and Chestnut Streets, was sold at auction on the 20th of June, 1871, the successful bidder being Dr. Rudolph Bircher, to whom the property was knocked down at seven hundred and eighty dollars per foot, the whole amounting to one hundred and five thousand six hundred and thirty dollars and forty-one cents. There were some two hundred persons at the sale, including several prominent capitalists. Philip S. Lanham, auctioneer, announced the manner of sale, which was that the ground was to be divided into five lots fronting on Chestnut Street, and running back one hundred and four and a half feet to an alley fifteen feet wide. The first lot offered would be that adjoining the Laclede Hotel. The purchaser would have the privilege of taking two lots or the whole of them, in which case the jail and other buildings would be included in the sale. But if the lots were sold to different parties the county would hold possession of the buildings. The terms of sale were one-third cash, and the balance in one and two years with six per cent. interest, secured by deed of trust. The sum of one hundred dollars earnest money would be required to be paid to the auctioneer upon the bidding off of each lot. The purchaser of the property could take possession in ninety days. After these preliminaries the bidding commenced. William C. Taylor started at $600 per foot, followed by Messrs. Rutherford and Dr. Bircher, who bid alternately $700, $750, $775, where it stood (at Mr. Rutherford's bid) for some time. "Meantime," we are told "the auctioneer dwelt eloquently on the value of the property and its advantages. A person in the crowd propounded the question, 'Is the gallows included?' 'Certainly,' replied the auctioneer." Dr. Bircher then bid seven hundred and eighty dollars, and after waiting some time for an increase in the bid, the lot was knocked down to that gentleman. On this being announced, the successful bidder said he would take the remaining lots at that rate, as was his privilege. Dr. Bircher then paid over five hundred dollars earnest money for the five lots, and the matter was concluded.

On the completion of the "Four Courts" at Eleventh Street and Clark Avenue in the autumn of 1871, the prisoners were removed to the new jail in the rear of the main building. This jail, which is still used as the city prison, is arranged in the form of an amphitheatre, with a diameter of one hundred and fifty feet, and extending from the rear wall of the front building one hundred and ten feet. Prongs extend from the line of the semicircle, giving to the whole outline a star shape, and placing thereby fifty-nine cells on each floor. The cells are three tiers in height, making a total of one hundred and seventy-seven cells, all made of heavy plate of wrought iron, and of sufficient capacity to contain three prisoners each, or, in the aggregate, between five and six hundred. The cells are constructed in such a manner as to render

escape a practical impossibility. They are ranged round the walls in four sections, with the grated doors fronting the centre of the building. A corridor ten feet wide separates them from the wall, and in each cell a barred aperture, directly opposite the grated door, opens out upon this passage, so that every movement of the prisoner in an attempt to escape can be seen by the guard. Each cell is ten feet long by eight feet wide and eight feet high. The walls are of wrought boiler iron, one-quarter of an inch thick, and the corners are secured by "angle" iron riveted with boiler rivets. Inclosing the cells is a boundary or screen wall ten feet distant and perforated with large apertures and inclosed and secured by iron gratings, the space intervening between the iron cells and this wall forming a second place of confinement in case prisoners should escape from the first. A third barrier would be offered by the boundary wall of the jail, of great height and well secured.

Police Department.—In early times the preservation of order in the town of St. Louis was intrusted to watchmen or "patrolmen," those officials being the legitimate successors of the village constable. In the autumn of 1808 the following regulations, embodied in a municipal ordinance, were promulgated for the guidance and government of the patrolmen:

"SEC. 2. The said patrol shall consist of no less than four persons, including the captain of the same, who shall receive from the chairman of the said board of trustees, or the judges or justices of the peace aforesaid, such instructions as they shall deem necessary.

"SEC. 3. The said patrol shall be formed from the male inhabitants of the said town in the manner following: The names of all the male inhabitants of the said town above the age of eighteen years shall be taken, by order of the chairman, every four months, and each such inhabitant shall be obliged to serve on the patrol in his turn, when required thereto, or shall furnish another person to serve in his place; the chairman or the judges or justice aforesaid shall appoint the captain of the patrol for each night, and shall also give him in writing the names of those he is to summon on the patrol for that night, and if any person or persons shall neglect or refuse to serve on the patrol, such person or persons shall for every such neglect or refusal forfeit and pay the sum of one dollar, to be recovered with costs before the chairman or any justice of the said town.

"SEC. 4. The said patrol shall be armed, shall have power to command order and silence to all persons found after nine o'clock in the streets or public highways in the said town of St. Louis disturbing the public tranquillity, and every person or persons so commanded by the said patrol to keep silence as aforesaid, and refusing obedience thereto, shall on conviction forfeit and pay the sum of one dollar; to arrest all slaves found after nine o'clock in the streets or public highways aforesaid, and conduct them to their master or mistress; all persons found in gardens or lots not their own, and commit them to the jail of the district until morning, when the said patrol or the captain thereof shall take such person or persons thus found offending before the chairman of the said board, or a judge, or a justice of the peace of the said town, and the said person or persons thus found offending shall on conviction forfeit and pay a sum not exceeding five dollars with costs, and in case any slave should be thus found offending, the said patrol shall carry the said slave to the master or the mistress of such slave, who shall immediately cause the said slave to be whipped, and receive on his or her naked back ten lashes, and in case the said master or mistress should neglect or refuse to cause the said slave to be so whipped, then the said master or mistress shall for each such neglect or refusal forfeit and pay the sum of two dollars, to be recovered as aforesaid. They shall take up all Indians and carry them to the Indian agent, and, lastly, in case of a fire breaking out in any part of the town, the said patrol shall give the alarm, either by the ringing of the church-bell or any such means as they shall deem most expedient.

"SEC. 5. It shall be the duty of the said patrol on discovering in any house or negro cabin such a fire as to expose said house or cabin, or by communicating the adjoining property, to inform of the same the master or mistress of such house or cabin.

"SEC. 6. The captain of the patrol shall, on the morning next following said patrol, make to the chairman of the board or in his absence to any judge or justice of the peace of the said town, a report of the occurrences of the night and the situation of the town.

"SEC. 7. All fines and forfeitures accruing under this ordinance shall go to the chairman for the use of the town.

"SEC. 8. This ordinance shall be in force from and after the 24th day of September instant.

"In testimony whereof we, Auguste Chouteau, Edward Hempstead, Bernard Pratte, Alexander McNair, and Pierre Chouteau have hereunto set our hands this 21st day of September, in the year of our Lord one thousand eight hundred and eight, and of the independence of the United States the thirty-third.

"A. CHOUTEAU.

"B. PRATTE.
"A. MCNAIR.
"P. CHOUTEAU.

"Re-enacted at a meeting of the board of trustees held on the 16th day of December, in the year of our Lord one thousand eight hundred and nine, to take effect and be in force from and after the date hereof.

"A. CHOUTEAU.
"E. HEMPSTEAD.
"WM. CHRISTY.
"J. CABANNÉ.

"Attested,
"J. V. GARNIER, *Clerk.*"

A similar patrol had already been in existence for some years, for in December, 1810, we find that the Court of Quarter Sessions of the District of St. Louis ordered the payment of money advanced for the compensation of services "performed as patrol in the town of St. Louis in the year 1805."

On the 23d of February, 1826, the following ordinance regulating a patrol for the city was published:

"1. The register shall cause a roll to be made and kept of all the free white male inhabitants in this city, clergymen, invalids, and paupers excepted, between the ages of eighteen and sixty years, and the persons thus enrolled shall constitute a patrol company for the city; provided that any citizen may place his name upon the roll for patrol duty as many times as

he may deem expedient, and he shall be liable to perform patrol duty accordingly; and provided, also, that a good and sufficient substitute may be offered by any person liable to perform patrol duty who may be unwilling to serve in person.

"2. The mayor and board of aldermen shall appoint a captain and twenty-six lieutenants of patrol, who shall severally hold their places during one year, or during the pleasure of the mayor and board of aldermen. Each officer, before entering upon the discharge of the duties of his office, shall take an oath to demean himself faithfully in said office, and shall file a copy of his oath in the register's office.

"7. The register shall cause a suitable and uniform signal to be given every evening, such as the ringing of a church-bell, at ten o'clock from the 1st of May until the 1st of October, and at nine o'clock from the 1st of October until the 1st of May, as a warning to slaves to retire to their several houses. He shall also provide a suitable guard-room in a central situation, with the necessary furniture, fuel, and candles."

In June, 1828, a similar ordinance was promulgated, "regulating the police of the city of St. Louis, and to suppress riots, routs, and noisy assemblies, and to punish disturbers of the peace." By an ordinance approved May 28, 1839, the office of city constable was abolished, and it was provided that a city marshal should be appointed by the mayor by and with the advice and consent of the board of aldermen, and he appointed Elliott Lee to fill the office. In the city marshal were vested all the powers and duties vested in and required of the city constable, and he was to receive for his services the same fees receivable by the city constable for like services and the sum of four hundred dollars annually. The police force known as the "City Guards" was established by an ordinance approved Dec. 19, 1839. This ordinance provided that "in the month of December in the year 1839, and on the second Monday in May of every succeeding year, or as soon thereafter as practicable, the mayor shall nominate and by and with the consent of the board of delegates appoint sixteen men who shall be designated as city guards, and shall be selected equally from the different wards of the city." The guards thus appointed were to "keep watch and guard every night throughout the year at such stands and during such hours," and to "observe, perform, and execute all such matters and things as by the rules, orders, and regulations of the mayor and City Council" should from time to time be enjoined on them. They were *ex officio* "deputy marshals," and were authorized to apprehend "all night-walkers, malefactors, rogues, vagabonds, and all disorderly persons" whom they should find disturbing the peace in an unlawful manner, to enter any inclosure or house in which an affray or riot might happen, and to "stop suspicious persons found lurking about at late hours and at unusual places," and to apprehend them if they were unable to give a satisfactory account of themselves. They were further instructed to give the alarm in case of fire. The city marshal was *ex officio* captain of the guard, with power to nominate his deputies for the approval of the mayor; two of the deputies to be lieutenants of the guard, and each to receive a salary of six hundred dollars from the city. If any other lieutenants were appointed, their salaries were to be paid by the marshal. During their tour of duty the members of the guard, who received a salary of five hundred dollars per annum, were to carry "a rattle and a stout hickory staff four feet long, with a crook at one end and a steel point at the other end." The guards were to be equally divided and stationed within the several wards of the city, and were to be on duty from nine o'clock at night until daylight from the 1st day of October to the 1st day of April, and from ten o'clock until daylight from the 1st day of April to the 1st day of October. Part of their duty was to repeatedly proclaim the hour of the night while going the rounds assigned to them, regulating themselves by the clock on the Catholic Cathedral, or by such other clock as the mayor might designate. The mayor was authorized to procure for the use of the guard sentry-boxes, with the requisite lamps and other furniture therefor, which sentry-boxes were to be stationed within the several wards at such points as appeared to him most eligible. It was made the duty of the lieutenant of the guard to report forthwith any member of the force who should be found intoxicated or asleep while on duty, or should prove delinquent in any other particular. In case of emergency the guards were authorized to call upon the citizens for aid in arresting offenders, "either by outcry or sounding the alarum with their rattles," and any citizen who refused his aid when demanded was liable to a fine of not less than five nor more than fifty dollars. The guards were also instructed to report all nuisances, and to apprehend all slaves not having a pass from their owners or the person in whose employ they might be at the time who were found away from their homes after certain hours of the night.

On the 14th of May, 1835, ordinances passed by the board of aldermen establishing a night-watch and defining the duties of the city constable were approved by Mayor Darby. They directed that the mayor should be authorized to provide a night-watch for the protection of the city whenever he should deem the measure expedient, or be required so to do by the board of aldermen. The force was to be made up either of volunteers or of men detailed from among the respectable citizens above the age of twenty-one years. Refusal to serve on the force when detailed was punishable with a fine of five dollars. The city

constable was *ex officio* captain of the watch, whose duty it was to go or send some persons employed by the mayor about the several wards of the city once or oftener at convenient times in the night "to take notice whether the watchmen performed their duties." The northwest room of the centre building on the market floor of the market-house was set apart as a guard-room, and the mayor was authorized to make such alterations or improvements therein as might be necessary to render it suitable for the purpose. The city constable was appointed annually at a salary of three hundred and fifty dollars a year, besides certain fees, and his duties were of a comprehensive and rather arduous character. In the first place, he was to ascertain as far as possible all nuisances that existed from time to time in the city, and to cause the same to be removed; "to visit all parts of the city, to make diligent inquiry" after all breaches of city and State law; to "visit the St. Louis hospital at least three times in each week, on three several days, and see that the rules thereof are in force;" to visit suspicious and disorderly houses; to enforce the laws relating to negroes and mulattoes; and to arrest without warrant "all persons who may be found in the streets of the city in a state of intoxication, and convey them to some safe place of confinement, there to remain until they shall have become perfectly sobered."

An ordinance providing certain police regulations for the city passed Dec. 13, 1835, by the board of aldermen, was returned by the mayor, Hon. John F. Darby, without his signature, but was passed over his veto. It prohibited slaves from being in the street "between the hours of ten o'clock post-meridiem and four o'clock ante-meridiem from the 1st day of April to the 30th of September," and "between the hours of nine o'clock post-meridiem and five o'clock ante-meridiem from the 1st day of October to the 31st day of March, under any pretence whatever, unless such slave have a written pass from his or her owner or owners of that day's date." Fines were imposed for "hallooing, shouting, bawling, screaming, profane or obscene language, dancing, singing, whooping or quarreling, or any unusual noises or sounds in his or her house," and it was provided that "nothing contained in the first and second sections of this ordinance shall affect any country person, bond or free, coming from or going to any of the markets for the purpose of selling his or her marketing."

This ordinance was amended by another approved June 17, 1841, in which it was provided that the city guards should consist of a captain, three lieutenants, and twenty-eight privates, and one of the conditions of appointment to the new force was that the person should be "in no way interested in any tavern, coffee-house, or tippling-shop in the city," and should understand the English language so as to be able to read and write the same. The force was divided as follows: Two guards for the First Ward, six for the Second, six for the Third, six for the Fourth, and eight for the Fifth. The practice of proclaiming each hour of the night was still maintained, and any watchman neglecting or failing to cry the hour during the time he was on duty was to be adjudged guilty of a misdemeanor, and fined not less than one dollar, nor more than five dollars, and for the second offense was to be dismissed. The captain of the guards, who was also known as captain of the watch, received a salary of eight hundred dollars per annum, the lieutenants five hundred dollars each, and the privates four hundred and eighty dollars each. Each officer and private was directed when on duty "to wear a badge on his hat, and carry a rattle and a stout hickory staff, three feet long, with a steel point at one end made in the shape of a spontoon." The mayor was also empowered to employ private watchmen when he deemed it necessary. In the regulations for the government of the city guard, approved Dec. 1, 1841, it was provided that "the calaboose, with the keys thereof, shall be exclusively in charge of the captain of the guard, subject to the order of the mayor, from sundown of each day to the time of making his report on the following morning, to the recorder, or other proper officer, at which time he shall surrender the same to the city marshal." He was not, however, required to report on Sundays, except in extraordinary cases, and was empowered to detail a private of the guard to act as calaboose-keeper. Officers and members of the guard were not required to do duty in the daytime, except on extraordinary occasions when called upon by the mayor or captain of the guard. In accordance with the terms of an ordinance approved Sept. 5, 1842, the salary of the captain of the guard was reduced to six hundred dollars, of the lieutenants to four hundred and fifty dollars, and of the privates to four hundred dollars. The duties of the city marshal were again defined in an ordinance approved Aug. 3, 1843, and were substantially as heretofore stated. It was also provided that he should "keep his office in the town hall, or such other place as the Council may direct, and to keep the same open every day in the year," and should keep a record of all offenses committed in the city that came to his notice. In the execution of his duties in arresting any person accused or suspected of crime, or the arresting of any person under a warrant, or in the suppression of any riot or un-

lawful assembly, or in preventing the violation of any ordinance or any law of the State, he should have the power to require the aid of the city guard or that of any of the citizens. He was also to be the keeper of the city prison "from seven o'clock in the morning until the time the city guards go upon duty on each day." An ordinance more fully defining the duties of the officers and privates of the city guard was approved Aug. 14, 1843. Among its provisions was one enacting that "all persons found strolling about the streets or other public places at late hours of the night, not having a home or lodging-place, or in no way disturbing the peace or violating any ordinance of the city, and who may be unable to give a satisfactory account of themselves, may be confined in the city prison until morning," and another that it should "be the duty of the captain or lieutenant commanding, whenever required by any person who may have been arrested by the guard and brought before him at an unreasonable hour of the night, to dispatch a member of the guard with him or her to their home, or a message or note from such person to any well-known respectable citizen with whom he may be acquainted, unless the officer may be convinced that the request is made with a view to deceive him."

The police department was reorganized in 1846, in accordance with an ordinance approved August 7th of that year. Article I. of the ordinance provided that a department should be established to be called the police department, and embracing the city marshal, city guard, day police, and keeper of the calaboose. The duties of the city marshal were to see that all ordinances were enforced, to repair to any part of the city in day or night when advised that any breach of law or of the peace had been or was about to be committed, to act as the officer of the board of health, to keep a record of crimes, processes, etc., to see that no trespasses were committed upon the property of the city, and discharge various other functions. The city guard was to be composed of a captain, six lieutenants, and forty-two privates, and the mayor was instructed to rent in the First and Sixth Wards each a suitable room for a "lock-up," in which persons arrested by the guard and not suffered to go home should be confined until the time for the guard to go off duty in the morning when they were to be removed to the calaboose. The day police was to consist of one lieutenant and seven privates; the lieutenant to receive a salary of four hundred and fifty dollars, and the privates four hundred dollars each. The force was to be on duty from seven o'clock in the morning from April 1st to October 1st, and from eight o'clock for the rest of the year, and to remain on duty until relieved by the guard at night. Their badge was a gilded star not less than one and a half inches in diameter, worn upon the left lappel of the coat. The compensation of the keeper of the calaboose was four hundred dollars per annum. Among the miscellaneous provisions was one authorizing the procuring and keeping of horses for the use of the captain of the guard in the First and Sixth Wards, and another authorizing the organization of patrols by the white inhabitants of the city for mutual protection, the officers of which were to be commissioned by the mayor as patrol officers; the patrols thus organized to have the same powers and be governed by the same regulations as the city guard, but without any compensation from the city.

In this year (1846) an "independent police" was established, as appears from the following newspaper publication under date of June 5th:

"It will be seen by an advertisement in to-day's paper that Mr. McDonough, late captain of the city guard, and Mr. Du Breuil, late first lieutenant in the same, have established an independent police. They have been constituted deputies by a legal officer, and have qualified according to the requirements of law, and are, therefore, fully authorized to act as peace officers, and to execute any process issued in any criminal case. Of course they will receive no salary, and their compensation will often depend on what those who choose to employ them shall think proper. This kind of police has been tried in nearly all of the Eastern cities (in New York we believe it is known by the name of the Star Police), and has been found to be much more efficient than that of the regularly appointed officers.

"Capt. McDonough, who is at the head of the attempt here, is so well known to this community that it is almost useless to say anything about him. He has been for some years past engaged in the business of ferreting out rogues, and in his brief career has evinced a coolness, judgment, and courage which would not have disgraced old Hays himself. Our intimacy with the late mayor and knowledge of the operations of the police under his administration warrants us in saying that there never has been in this city the equal of Capt. McDonough in this department.

"Mr. Du Breuil is well known to the public as an efficient and assiduous officer. He has filled several stations in the police, which have brought him into intimate connection with this business. To much experience he adds a matured judgment and the essential of coolness and courage."

In the mayor's message of May 8, 1848, it was stated that the city guard during the previous year had been reduced to three lieutenants and thirty privates, and it was added that the city was then so much extended that it was impossible without great industry for thirty men to properly guard the whole city, and that there was great complaint on the part of citizens in respect to the inadequacy of the police. "Burglaries, larcenies, and petty thefts of the most daring character," added the mayor, "have been committed of late in every part of the city. . . . If the city guard cannot be made effective, it had better

abandoned altogether." In 1850, however, the mayor reported that the police force, which had been increased by the addition of ten privates, was, for its numbers, very efficient. On the 1st of April of this year the mayor approved an ordinance establishing a police department, to consist of the city marshal and officers and privates of the day and night guard; the day guard to consist of one lieutenant and nine privates, and the night guard of one captain, three lieutenants, and thirty-six privates; the city marshal to be *ex officio* chief of city police, and the captain of the guard to be *ex officio* deputy marshal. The mayor, chief of police, and captain of the city guard, conjointly, were instructed to procure a suitable building in each of the police districts except the Second for station-houses; the "present police office" to serve as a station-house in the Second District. The districts were defined by the same ordinance as follows: the First and Second Wards constituted the First District; the Third and Fourth Wards constituted the Second District; the Fifth and Sixth Wards constituted the Third District. The pay of the captain was fifty dollars per month, that of the lieutenants forty-five dollars per month, and that of the privates forty dollars. The chief of police was authorized to employ a suitable vehicle (the "Black Maria" of those days) "for the purpose of removing any person or persons arrested and confined in the First or Third Station-Houses to the recorder's court, or to the calaboose or to prison, as the case may require," the expense of the vehicle not to exceed twenty-five dollars per month. A supplementary ordinance was approved June 29, 1850, providing for the appointment of two deputy marshals of police at a salary of three hundred and sixty dollars per annum, and two additional lieutenants of the night guard. In his message of May 10, 1852, Mayor Kennett stated that the police force was well organized and active, and that it consisted of sixty-three officers and men,—one captain, six lieutenants, and forty men in the night guard, and one captain and fifteen men in the day guard,—making the entire pay-roll thirty thousand dollars per annum. Mayor How, in his message of Oct. 10, 1853, called attention to the fact that under the police regulations then in force the city was unguarded four hours out of the twenty-four; the night watch going on at 8 P.M. and going off at 5 A.M., and the day watch going on at 9 A.M. and going off at 8 P.M., and urged that a change be made, so that the city would be constantly protected. In his message of May 8, 1854, Mayor How recommended that the police should wear a uniform or badge that would be better adapted for designating their office than the one now worn." The uniform thus recommended was adopted, and notice was given to the police to appear in the clothing prescribed from and after the 1st of November, 1854. In 1855, Mayor King recommended that the police force be remodeled and the members be appointed during good behavior. The number of police, he added, was too small and their pay too little. At that time the night guard consisted of one captain, six lieutenants, and six privates, and the day guard of one captain, one lieutenant, and twenty-five privates. Mayor King also recommended that the office of marshal be entirely disconnected from the police, and that a chief of police at a competent salary be appointed. In 1856 the force was reorganized by ordinance of the City Council, in accordance with Mayor King's recommendation, and D. A. Rawlings was appointed chief of police. The office of marshal, however, was not abolished. In addition to the regular policemen, who wore a uniform, a detective force was organized, the members of which were not required to wear the uniform.

The present metropolitan police system of St. Louis was established by an act of the Legislature approved March 27, 1861, which provided for the establishment of a board of police, to be called the police commissioners of the city of St. Louis, to consist of four commissioners to be appointed by the Governor. The mayor of St. Louis was to be *ex officio* a member of the board, which was to have the entire control and management of the police force. The act expressly provided that the police organization should be entirely independent of the city government, the language of the act on this head being as follows: "The Common Council of the city of St. Louis may pass ordinances for preserving order, securing property or persons from violence, danger, or destruction, protecting public and private property, and for promoting the great interests and insuring the good government of the city; but no ordinance heretofore passed, or that may hereafter be passed by the Common Council of St. Louis, shall in any manner conflict or interfere with the powers or the exercise of the powers of the board of police commissioners of the city of St. Louis as hereinafter created, nor shall the said city or any officer or agent of the corporation of said city, or the mayor thereof, in any way impede, obstruct, hinder, or interfere with the said board of police, or any officer, or agent, or servant thereof or thereunder. So much of the city charter and ordinances as authorize the mayor and Common Council to appoint, pay, and arm the police of said city, and protect the said police in the discharge of their duty, be and the same is hereby repealed." It was further provided that the officers of the police force should be one chief,

of police, three captains, three lieutenants, not exceeding twelve sergeants, and four turnkeys. The appointment of five detectives was also authorized. The commissioners received a salary of one thousand dollars per annum; the treasurer, appointed from their number, to be paid five hundred dollars additional; chief of police, two thousand dollars; each captain thirteen dollars a week; each lieutenant eleven dollars and fifty cents a week; each sergeant ten dollars and fifty cents a week; each private and each detective ten dollars a week, and each turnkey eight dollars and fifty cents a week. The board of commissioners was authorized to appoint a clerk or clerks, to use a common seal, to have general jurisdiction of the peace and good order of the city, to summon through the sheriff, if necessary, a *posse comitatus*, to call out the military force for the suppression of riot or disorder, etc.

The first board of police commissioners under the new system, appointed by Governor Claiborne F. Jackson, was composed of Charles McLaren, John A. Brownlee,[1] James H. Carlisle, and Basil W. Duke. Mayor Daniel G. Taylor was *ex officio* member of the board, which met on the 10th of April, 1861, and organized by the election of Mr. Brownlee as president, and Mr. Carlisle as treasurer. James M. Loughborough was appointed secretary, and James McDonough chief of police. On the twenty-first of the same month it was announced that the commissioners, having rented Arnot's building on Chestnut Street, and having properly fitted it up, had occupied it on the previous evening for the first time as a police headquarters. Chief McDonough at once proceeded to organize the new force. Early in 1862 the board of commissioners, in view of the political excitement and the unsettled state of affairs, largely increased the force, which at one time numbered three hundred and twenty men, including officers. In April, 1862, it was reduced to one hundred and seventy-five men, and on May 10, 1862, it was still further reduced, until the regular force numbered twenty-five men. The expenditures of the police department for 1861 amounted to one hundred and four thousand dollars.

In August and September, 1861, a change was made in the board on account of the removal and resignation of the first board, and the membership was reduced to four, the board consisting of Jas. S. Thomas, mayor and *ex officio* member of the board, John How, Wm. Patrick, and John Riggin. Chief McDonough resigned in October of the same year, and J. E. D. Couzins was appointed in his place.[2]

In 1865 the force consisted of two hundred and twenty-five men, including twenty-five officers. At this time the police of St. Louis were charged with the protection of persons and property over an area of sixteen square miles, with a population of one hundred and eighty thousand.

In 1866 the force was constantly varying on account of resignations, sickness, etc., the average strength during the year being 225. A small station-house was erected near the arsenal; also one in New Bremen and one in South Market. By recommendation of chief Laibold the force was increased during the year until it aggregated 225 men. The expenditures for 1866 amounted to $164,933.49.

During this year (in June) was organized a steamboat detective police, under Capt. J. M. Baily, previously connected with the police force in Nashville, Tenn., and other places, who was authorized to organize a body of men to be called the Steamboat Detective Police Force, whose special duty it was to protect steamboats from incendiarism, accidental fire, robbery, and all the other dangers incidental to a crowded port; prevent the theft of freight or its injury in any way, so far as possible, while lying on the Levee; in fact, "a body of men with all the discipline and paraphernalia of a regular police force, wholly devoted to the protection of steamboats and property moving by the river." The force was organized on the petition of the principal steamboat owners of St. Louis, who stated that they were willing to pay one dollar a day to Capt. Baily for every steamer owned by the petitioners during the boat's continuance in port. During the night the number of men on the Levee was to be in proportion to the number of boats in port, not less than one man being allotted to each boat.[3]

In 1867 a much-needed increase of the number of sergeants was authorized, adding nine officers to the force. At the beginning of the year the force con-

[1] John A. Brownlee died on the 10th of October, 1861. Mr. Brownlee, who had been a resident of St. Louis for twenty-five or thirty years, was a member of the firm of Brownlee, Homer & Co., and at one time president of the Merchants' Bank, a leading business man and influential citizen. He left a wife and several children.

[2] On the 5th of September, 1861, it was announced that Ca... Turner, of the Central Police Station, had resigned in order ... accept the command of one of the gunboats then being b... by Capt. Eads.

[3] On the 5th of September, 1866, occurred the death at M... catale, Ill., of Paul Berger, who was born in St. Louis, ... participated in many of the important events connec... with its growth and development. In early years he was ... tain of the old French patrol police under Maj. W. Carr, a fo... which served the city without pay. He was sixty-three y... old at the time of his death.

sisted of 266 officers and privates. During the year 45 resigned, 6 died, and 45 were dismissed and dropped from the rolls. Ninety-three were appointed, leaving an aggregate of 263 at the end of the year.

In 1868, under an act amendatory of an act creating the board, approved March 13, 1867, a mounted police force of twenty men was organized to protect the outskirts of the city, and proved to be an invaluable auxiliary in suppressing highway robbery and in breaking up a number of dens for stolen property which existed outside the city limits, and in various other matters which could not be well reached by foot patrolmen of the force. The regular force was increased by adding twenty men, which increased the expenses for the current year to three hundred thousand dollars, of which the city paid three-fourths and the county one-fourth. It was during this year that the practice of "beer-jerking" was entirely suppressed. In 1868 the board redistricted the city into four police districts. During the year the number of patrolmen appointed was 84; dismissed, 32; resigned, voluntarily, 48; died, none; leaving the force at the end of the year 267 strong, classified as follows: 1 chief of police, 3 captains, 21 sergeants, 240 patrolmen (including special-duty men), 1 turnkey, and 1 porter.

In 1869, the aggregate of the force on March 31st was two hundred and seventy-eight officers and men. No change was made in the number of districts, and the station-houses remained the same, except the Third, which was changed to the west side of Seventh Street, between Franklin Avenue and Wash Street. This station-house was purchased at a cost of $14,-664.91.

The raids of the police on gambling-houses wherever they existed were very frequent and destructive during the year 1869, yet not wholly effectual in exterminating the evil. The expenditures for the police department during this year were $305,711.84. The reports of expenditures from other leading cities showed that, in proportion to area and population, no city was so economically policed, and no policemen so poorly paid. The health of the force during this year was exceedingly good; but one death from disease occurred, and one patrolman, John W. Skinner, was killed on the night of June 15, 1868, by a drunken man. During the year one hundred and seventy-five warrants against gambling-houses were executed by the police, and gambling implements, etc., to the value of $30,000 were seized and destroyed.

On October 13, 1869, the force was divided into two platoons. The hours of duty of the first platoon were from 11 P.M. to 11 A.M., and of the second from 11 A.M. to 11 P.M. The aggregate of the force at the end of the current year ending March 31, 1870, was three hundred and three. The station-houses in 1870 were valued at $27,500, and the rentals paid for station-houses amounted to $5090. By the annexation of Carondelet, with the intervening territory, the length of the city was increased to twelve miles, and the area to be patrolled by the police to twenty-two square miles. An increase of forty-four patrolmen and six sergeants was asked for by James McDonough, chief of police, who was reappointed Sept. 30, 1870. Forty-three fires were extinguished by the police without calling out the fire department. During the year James McClure and William D. Bowen were promoted to captains.

On Sept. 26, 1870, Ferdinand Meyer, William A. Hequembourg, and Julius Hunicke were removed from the board of police commissioners by Governor McClurg, and their places filled by the appointment of S. M. Randolph, Wm. Baker, and Wm. Moran. On November 1st, A. Rosenblatt was appointed to take the place of Samuel Bonner, resigned. The latter board were removed by Governor B. Gratz Brown in 1870, and their places filled by the appointment of the following: W. F. Ferguson, vice-president, Wm. Patrick, treasurer, and Julius Hunicke and O. B. Filley, commissioners. Mayor Joseph Brown was *ex officio* president of the board.

The force in 1871 consisted of two divisions. The first division contained 17 officers and 150 patrolmen, and the second division 17 officers and 154 patrolmen. The force was distributed according to districts, as follows: First District, 66; Second District, 112; Third District, 86; Fourth District, 57; mounted, 17; headquarters, 8. The mounted district included three miles outside of the city limits. The force was increased during 1871, 6 sergeants and 100 patrolmen being added, and the pay of detectives was increased from $75 to $100 per month. It was during this year that the "Institution for the Houseless and Homeless" was established at No. 213 Green Street, under the control and direction of the police force.

In 1872 the board of commissioners consisted of Joseph Brown, mayor and *ex officio* president; William F. Ferguson, vice-president; William Patrick, treasurer; Julius Hunicke, purchasing member; Joseph Pulitzer, commissioner; George Gavin, secretary; and Wm. Patrick, attorney. The force, including officers and men, numbered 366, classified as follows: chiefs, 1; captains, 4; sergeants, 34; patrolmen, 318; detectives, 5, and turnkeys, 4. On account of a further extension of the city limits, adding thirty-two and three-fourths square miles, an increase

of the force was made, adding 1 captain, 3 sergeants, and 66 patrolmen, twenty of whom were designated as mounted men in the new district. The rate of taxation assessed for police purposes was three-twentieths of one per cent. in the old limits, and three-fortieths of one per cent. in the new, which realized the sum of $212,270.05, lacking $98,821.90 of the amount of requisitions on the city. The two extensions of the city, taking in Carondelet, Forest Park, and Northern Park districts, occurred in such close succession, that a correspondingly rapid increase in the strength of the police force was necessitated. The city limits then contained fifty-two and three-fourths square miles, besides a large outside territory to be patrolled by the mounted force, making in all about eighty square miles, comprising a larger police territory than that of any city in the Union except Philadelphia, which took in the whole county. The expenditures for the year amounted to $393,721.54.

On Feb. 6, 1872, the Second and Third Police Districts were subdivided, thereby creating a fifth district. The Second, or Central District was bounded on the north by Washington Avenue, south by Chouteau Avenue, east by the river, and west by city limits. The Third District was bounded on the north by Cass Avenue, south by Washington Avenue, east by the river, and west by city limits.

In 1873 the board was composed of the following: Joseph Brown, mayor, *ex officio* president; C. C. Rainwater, vice-president; William Patrick, treasurer; D. H. Armstrong, member of the board of health; Lewis Dorsheimer, purchasing member; and George Gavin, secretary. The total strength of the force, officers and men, was three hundred and sixty-nine. An increase of nineteen men was made during this year, and the city was divided into five districts, containing five main and five sub-stations, all of which were connected by telegraph with the police headquarters. Four of the stations were leased, two rented, and four owned. The total amount of station-house rent paid during the year was $4863.92, and the total cost of purchases and improvements, $23,820.15. The total expense of the police department for the year ending March 31, 1873, was $439,112.46, being an average of $1164.80 for each man employed during the year.

During 1873, aside from the "Police Relief Fund Association," which extends only to relieving members while sick, there was established the "St. Louis Metropolitan Police Life Insurance Association." All the members of the force except ten voluntarily joined this association, and bound themselves to pay two dollars each upon the death of any member. The money realized from this source was given to the widows and orphans of deceased members.

In 1874 a change was made in the number of police districts, involving a reduction from five to four.

The members of the board in 1875 were Arthur B. Barret, mayor, and *ex officio* president; James C. Nidelet, vice-president and acting president; C. C. Rainwater, treasurer; Lewis Dorsheimer, purchasing member; John G. Priest, member of the board of health; and George Gavin, secretary.

Two new station-houses were built during 1875,—one on the corner of Seventh and C[illegible] Streets, and one on Soulard Street, between Seventh and Eighth; and the construction of two others was begun,—one in North St. Louis, at the corner of Ninth and Angelica Streets, and one in South St. Louis, at the corner of Second and Taylor Streets. The new stations are all substantial brick buildings, and their total estimated value is $25,000. The force at the end of the year 1875 aggregated four hundred and sixty-two, the average strength throughout the whole year being four hundred and five. The expenditures for this year amounted to $504,063.67.

In 1876 the only change made in the membership of the board was that occasioned by the death of Mayor Barret, who was succeeded by Mayor Britton, and afterwards by Mayor Overstolz, as *ex officio* president. The total force in 1876 numbered four hundred and thirty.

In 1877 the force, owing to a reduction of the police appropriation by the City Council, was cut down to two hundred and forty-four policemen to serve during the day and one hundred and eighty-six during the night. Its total strength at the end of the year was four hundred and thirty.

The board of commissioners for 1877 was composed of Henry Overstolz, mayor and *ex officio* president; D. H. Armstrong, vice-president; Basil Duke, treasurer; John G. Priest, member board of health; James C. Nidelet, purchasing member; and George Gavin, secretary.

In 1878 there occurred but one change in the membership of the board, occasioned by the resignation of Col. D. H. Armstrong, who was appointed by Governor Phelps to succeed L. V. Bogy (deceased) in the United States Senate, and whose place was filled by the appointment of Silas Bent. The force during this year numbered four hundred and sixty-seven officers and men.

During 1879 the average strength of the force was five hundred men, all told, to guard a police territory of sixty-three square miles, and the lives and property of about five hundred thousand inhabitants.

The board for 1879 was composed of H. Overstolz, mayor and *ex officio* president; David H. Armstrong, vice-president; Basil Duke, treasurer; Leslie A. Moffett, purchasing member; John D. Finney, commissioner; and George Gavin, secretary.

In 1880 the effective force of patrolmen as limited by law was four hundred and one, and the number of officers fifty-two. There were also ten detectives, eleven turnkeys, and twenty-two other employés, making a total of four hundred and ninety-six members. The expenditures were four hundred and seventy-nine thousand five hundred and seventy-five dollars and seventy-five cents. During the year the board was presented with fifty-two feet of ground on the northeast corner of Clay Avenue and St. Charles Rock road, as a site for a station-house, by citizens residing in that neighborhood.

Chief of Police James McDonough remained at the head of the department until June 8, 1881, when he resigned and was succeeded by Capt. Ferdinand B. Kennett. Capt. McDonough had been identified with the police force of St. Louis for many years. He arrived in St. Louis in 1839, as a journeyman carpenter, and worked at the trade for four years, assisting in the erection of the Planters' House among other buildings. In 1843 he was appointed captain of the "city guard" by Mayor Wimer, and continued in office under Mayor Pratte and during one year of Mayor Camden's administration. His salary during that period was fifty dollars per month, but the work done by the "guard" was recognized as most effective. In 1846 he retired from that position and opened a detective agency in one of the two small houses that then occupied the northeast corner of Third and Chestnut Streets, which agency he maintained until the year 1852. He then secured a position as clerk in the post-office. In 1856 he was appointed treasurer of the county, and during the succeeding three years he was county collector. Just before the commencement of the war he was urged by Nathaniel Paschall, George Knapp, Daniel G. Taylor, and others to go to Jefferson City and take steps towards the organization of a metropolitan police force, which he did. He assisted in drafting the bill creating the present system, and being appointed chief of police under it, he organized the force. When the war broke out he happened to be on the wrong side, and in October, 1861, he retired from the force. He did not resume that position again till 1870, when Gen. McClurg, the strongest Republican board the city had had, after looking around in vain for satisfactory material, accepted the assurance of a well-known specialist that James McDonough was the man of all men for the position of chief, and appointed him to that position. He remained as such for three and one-half years, when he again retired. On Nov. 30, 1875, he was reappointed, and remained until his resignation in 1881.

The following are the names and dates of appointment and retirement of the various chiefs of police who have served under the metropolitan police system:

Names.	Date of Appointment.	Date of Retirement.
James McDonough	April 10, 1861.	Oct. 18, 1861.
John E. D. Couzins	Oct. 18, 1861.	March 20, 1865.
Bernard Laibold	March 20, 1865.	Oct. 22, 1866.
Wm. P. Fenn	Oct. 22, 1866.	June 30, 1868.
Wm. Lee	July 1, 1868.	Sept. 26, 1870.
James McDonough	Sept. 30, 1870.	March 10, 1874.
Lawrence Harrigan	June 1, 1874.	Nov. 18, 1875.
James McDonough	Nov. 30, 1875.	June 8, 1881.
Ferd. B. Kennett	June 8, 1881.	Present incumb't.

The members of the board in 1882 were Mayor Wm. L. Ewing, president *ex officio;* Daniel Kerwin, vice-president; Alexander Kinkead, treasurer and purchasing member; D. W. Caruth, member of the board of health; F. P. McCabe, commissioner; George Gavin, secretary. The force employed during this year, with the salaries paid, was composed of the following:

	Salaries Per Annum.	Totals.
3 Police Commissioners, each	$1,000.00	$3,000.00
1 Police Commissioner and Treasurer	1,500.00	1,500.00
1 Secretary and Property Clerk	2,000.00	2,000.00
1 Chief of Police	3,500.00	3,500.00
6 Captains of Police, each	1,800.00	10,800.00
45 Sergeants of Police, each	1,200.00	54,000.00
10 Detectives, each	1,200.00	12,000.00
401 Patrolmen, each	900.00	360,900.00
14 Turnkeys, each	720.00	10,080.00
1 Superintendent of Police Stables	1,500.00	1,500.00
1 Hostler	720.00	720.00
3 Hostlers, each	660.00	1,980.00
3 Hostlers, each	540.00	1,620.00
1 Janitor	720.00	720.00
3 Janitors, each	600.00	1,800.00
1 Janitor	300.00	300.00
1 Carpenter	900.00	900.00
1 Armorer	900.00	900.00
Total Salaries		$468,220.00

Incidental Expenses.

Printing and stationery	$1,487.04
Stable and forage expense	7,300.73
Horses and equipage account	5,175.27
Fuel and lights	6,531.37
Rent of stations	584.00
Repairs on stations	4,553.75
Feeding prisoners	842.60
Secret service	1,200.00
Purchase of patrol-wagons, horses, and boxes	25,000.00
Expense of carrying on same	10,000.00
Miscellaneous expense	4,493.28
Total incidentals	$67,168.04
Grand total	$535,388.04

The following is a list of the different police stations, with dimensions, estimated value, etc.:

City Block.	Feet front.	Feet deep.	Street or Avenue on which property fronts.	Police Stations.	Estimated value, 1882. Real.	Estimated value, 1882. Improvements.	Total estimated value, 1882.
3056	50.7	137.11	Taylor Street	Police station	$700.00	$10,450.00	$11,150.00
886	50	115.2¼	Eighth Street	Police station	700.00	11,300.00	12,000.00
373	48.4	90	Soulard Street	Police station	6,000.00	18,000.00	24,000.00
32	46.2	70.3	Chestnut Street	Police station	9,233.00	12,690.00	21,923.00
1733 E.	78	147	Manchester Road	Police station	5,460.00	19,540.00	25,000.00
252	50	100	Seventh Street	Police station	7,500.00	20,000.00	27,500.00
970	60	118.3	Dayton Street	Police station	2,700.00	10,300.00	13,000.00
1227	50	130	Ninth Street	Police station	1,000.00	11,000.00	12,000.00
					$33,293.00	$113,280.00	$146,573.00

The following comparative table shows that the cost of the St. Louis police department is considerably lower than that of any other city in the country in proportion to population and police territory:

	Population.	Police Territory, square miles.	Strength of Force all told.	Pay of Patrolman, per annum.	Cost of Department for past year.	Number of arrests made during year.	System.
New York	950,000	40	2675	$1200.00	$3,293,318.34	69,631	Municipal.
Brooklyn	566,689	20 9/10	642	1000.00	755,970.13	28,889	"
Philadelphia	900,000	128	1379	821.25	1,290,818.84	45,129	"
Chicago	500,000	36	553	945.00	577,033.77	31,713	"
Boston	365,000	31	756	1095.00	899,974.43	29,056	"
Baltimore	365,000	14½	606	936.00	571,857.02	22,021	Metropolitan.
Washington City	180,000	65	238	1080.00	300,000.00	13,942	"
St. Louis	375,000	62½	495	900.00	474,999.15	18,555	"
San Francisco	235,000	43	405	1224.00	520,000.00	24,500	Municipal.

The following table shows the expenditures for each year ending March 31st, from 1861 to 1882 inclusive:

Year.	Expenditure.	Year.	Expenditure.
1861	$104,000.00	1872	$393,721.54
1862	121,000.00	1873	439,112.46
1863	53,000.00	1874	456,834.18
1864	66,939.00	1875	504,063.67
1865	115,753.00	1876	464,584.00
1866	164,933.49	1877	474,620.01
1867	214,666.65	1878	474,799.77
1868	210,000.00	1879	513,356.26
1869	305,711.84	1880	470,575.78
1870	310,216.92	1881	500,000.00
1871	357,366.75	1882	475,000.00

The police relief fund, established in part on the New York plan some time in '867, for the benefit of sick and disabled members of the force, and managed conjointly by the board and a committee elected by the force, has been found highly beneficial. It is made up from rewards, proceeds of sales of unclaimed property, and a monthly contribution from the whole force. The distribution of the fund is intrusted to a committee called the "Police Relief Fund Committee," consisting of six representatives, one from each district, elected annually by the members of the respective districts.

The members of the Police Relief Fund Committee elected for one year ending Feb. 1, 1883, are:

Sergeant Charles Rochow, representing the F District.

Sergeant James R. McDonough, representing Second District.

Patrolman Henry M. Jones, representing the C tral District.

Patrolman Robert L. Jacques, representing Third District.

Captain Michael Daley, representing the Fou District.

Captain Henry Frangel, representing the F District.

The police reserves, consisting of ten companie the most respectable young men of the city, w voluntarily sworn in by the police board to assist regular force in case of extraordinary emergenc riot. The oath administered was the same as taken by the regular police. They were supp with arms and equipments.

The officers in 1881 were: Colonel, J. G. Bu lieutenant-colonel, E. D. Meier; adjutant, Adol Meier, Jr.; surgeon, W. A. McCandless; qu master and commissary, C. E. Slayback; ord and inspecting officer, Pierre Chouteau; ser major, H. S. Harmon; quartermaster-sergean

	Estimated value, 1882. Improvements.	Total estimated value, 1882.
	$10,450.00	$11,150.00
	11,300.00	12,000.00
	18,000.00	24,000.00
	12,600.00	21,923.00
	19,540.00	25,000.00

ar Brinelle. There were six companies, with a strength of two hundred and fourteen.

In the fall of 1881 the reserves determined to incorporate their organization with that of the State militia, and at a meeting of the police commissioners held November 15th it was decided that they be honorably mustered out of the police service.

In addition to the regular police there is an average of one hundred and eighty-nine private watchmen employed throughout the city at the sole expense of their employers, who are, however, sworn in by the police board, and required to give earnest and prompt assistance to the regular force, as may be required.

EXECUTIONS.

[illegible]–September 16. John Long, Jr., hanged for the murder of George Gordon. The first execution in St. Louis.

[illegible]–May 20. Hugh King hanged for the murder of Martin Green.

[illegible]–July 9. Madison, *alias* Blanchard, Charles Brown, James Seward, *alias* Sewell, and Alfred, *alias* Alpheus Warrick, all colored, hanged for the murder of Jesse Baker and Jacob Weaver.

[illegible]–March 3. Johnson hanged for the murder of Floyd.

[illegible]–August 16. John McDaniel and Joseph Brown hanged for the murder of Chavis, a Mexican.

[illegible]–December 13. Hugh Gallagher hanged for the murder of Mary Ann Crosby.

[illegible]–February 14. John Thomas hanged for murder.

[illegible]–July 22. Dodge, *alias* Vanzandt, and Shoen, *alias* Shawnee.

[illegible]–June 17. George H. Lamb hanged for wife-murder.

[illegible]–November 11. Joseph W. Thornton hanged for the murder of Mr. Charless.

[illegible]–January 23. Michael Kerns hanged for the murder of Robert Baker.

[illegible]–December 6. Peter Christman hanged for the murder of Edward and Moses Ross.

[illegible]–August 12. Barney Gibbons shot for desertion.

[illegible]–August 19. Wm. Jackson Livingstone hanged as a spy.

[illegible]–October 15. John F. Abshire hanged by the Federal authorities.

[illegible]–December 26. James M. Uts hanged as a spy.

[illegible]–January 13. Abraham Purvis and Ephraim Richardson hanged by the military authorities.

[illegible]–March 24. William J. Harris hanged by the Federal authorities.

[illegible]–May 1. Thomas J. Thorpe hanged by the Federal authorities.

[illegible]–July 23. Wm. Edwards, *alias* Roach, colored, hanged for the murder of Louis Wilson.

[illegible]–October 22. ——— Brown hanged for the murder of Philip Pfarr.

[illegible]–February 1. Wm. Weiners hanged for the murder of James M. Lawrence.

[illegible]–April 23. Henry J. Redemeier hanged for the murder of Frank Voss. At the same time and place Edward Nugent hanged for wife-murder.

Market-Houses.—As early as 1811 a project for the erection of a market-house was set on foot, Charles [illegible], chairman of the board of trustees, announcing on the 29th of January of that year that he was authorized to receive proposals for building a market "on the centre square of this town." It was added that a plan of the market might be seen on application to Mr. Gratiot. On the 5th of September, 1812, the following regulations were published:

"For the better regulation of said market, from and after the first day of September next, each and every Wednesday and Saturday in each and every week shall be appointed and hereby are appointed market days at the said market-house in the town of St. Louis aforesaid, and from break of day until ten o'clock in the morning of each and every of said days shall be and hereby are declared to be stated market hours, during which last-mentioned periods of time it shall not be lawful for any person or persons to offer for sale in the street or streets of the town of St. Louis, or at any house or houses or to any person or persons residing in the town of St. Louis other than at said market-house, any article of provision whatever, under the penalty of one dollar for each and every offense.

"CHARLES GRATIOT.
"THOMAS BRADY.
"RUFUS EASTON.
"JOSEPH CHARLESS.

"J. V. GARNIER, *Clerk*."

On the 23d of March, 1816, it was announced that

"the St. Louis market has for some time sustained an extravagant advance in the necessaries of life, and demands the notice of the citizens generally. Poor beef is sold at from six to eight cents per pound; fresh pork will readily bring five and six cents per pound; butter rates at twenty and twenty-five cents; lard, twelve and one-half cents per pound; eggs, twelve and one-half cents per dozen; superfine flour will command ten dollars per barrel; horse-mill flour will sell at three dollars and fifty cents per hundred pounds; corn meal, fifty cents per bushel."

"We would beg leave," adds the paper in which these statements appeared, "to remind the trustees of this borough that the evils complained of can be remedied. Instead of demanding enormous rents for the stalls, they should be given rent free to the farmers who may attend the market, reserving the four stalls facing Front Street for the butchers, who may have them at moderate rents, and inflicting severe penalties on butchers vending meat in their slaughter-houses, and on farmers hawking produce through the streets before ten o'clock A.M.

"An ordinance was passed and published prohibiting butchers and others slaughtering within the most populous parts of the town, or selling meat in their slaughter-houses; but the subsequent conduct of the butchers evinced a sovereign contempt for the law. They not only sold their beef, etc., in their slaughter-houses, but in violation of the ordinance built a new one in the centre of the town, where the stench became so intolerable as to induce a respectable physician to remark that should an epidemic break forth, it might be traced to that seat of putridity."[1]

[1] In the same issue the *Republican* says, "Before we have done with the subject of town police, we will beg leave to bring before the citizens a view of their present exposed situation, as it stands between them and the nocturnal robber and incendiary.

"There are at present within the precincts of this town nearly fifty persons who have no visible means of support. There are at least ten persons who sell spirituous liquors to slaves, etc., and

In June, 1823, an ordinance was passed to regulate the market and to "govern the clerk thereof," and on the 12th of July, 1827, notice was given that sealed proposals would be received

"until the 10th day of August next for building a market and town-house upon the market square in this city, agreeably to the plan adopted by the board of aldermen, which may be seen in the register's office. The foundation and cellars to be of stone; the walls, piers, and pavements to be of brick; the timbers of oak or walnut, and the shingles of cypress, pine, or oak. Separate proposals will be received for the masonry, brick-work, carpenter-work, painting and glazing, plastering, and for the paving and making of stalls."

On the 7th of February, 1828, the following ordinance was published:

"AN ORDINANCE *authorizing a loan of money for the erection of a market and town house.*

"SEC. 1. Be it ordained by the mayor and aldermen of the city of St. Louis, that the mayor of this city be and he is hereby authorized and empowered to borrow, on the credit of this city, for the term of seven years, and at an interest not exceeding eight per cent. per annum, payable semi-annually, the sum of eighteen thousand five hundred dollars, for the purpose of building a market and town house upon the market square, in general accordance with the plan adopted by the board on this day.

"SEC. 2. Be it further ordained, that the revenues of this city, and particularly that part of the same which shall arise from the market-house and its appendages, be and they are hereby pledged for the repayment of said sum and interest, and that the mayor be and he is hereby authorized, as attorney in fact, to mortgage, in fee-simple, said market square, to secure the payment of said loan and interest, and to execute a promissory note therefor, to be signed by him and countersigned by the register.

"SEC. 3. Be it further ordained, that the ordinance entitled 'AN ordinance authorizing a loan of money for the erecting of a market and town house, and for other purposes,' passed 12th March, be and the same is hereby repealed."

An early sketch of St. Louis, speaking of the markets then in the city,—the Centre and North, owned by the city, and the South, belonging to a joint-stock company,—says,—

"The principal supply of provisions is derived from the fertile farms in the American Bottom in Illinois, directly opposite the city, with which a constant communication is kept up by steam ferry-boats plying between the city and Illinois town. The lakes a few miles back of the town furnish excellent fish and water-fowl, and venison and smaller game are procured in great abundance, and consequently are sold at low prices."

In June, 1845, a proposition was made by the heirs of the Chouteau estate to sell for fifty thousand dollars the south half of the block on which the Centre Market stood, extending about one hundred and twenty-five feet on Main Street and one hundred and twenty-five feet on Water Street. On the 1st of January, 1855, the Centre Market was sold under the direction of Messrs. Belt and Priest, real estate agents, and in January, 1856, the work of tearing down the market preparatory to erecting a fine block of buildings and a merchants' exchange was commenced.

MOUND MARKET.—A stock company was formed and incorporated in 1842 for the purpose of erecting a meat and vegetable market and a meeting hall in North St. Louis.

Early in 1843, Mr. Holmes, a prominent builder, began the erection of the structure which stood on Howard Street, at the junction of Seventh Street with Broadway.

The site belonged to the city, and was leased indefinitely free of rent to the Mound Market Association for market purposes only. The building occupied a space thirty feet front and forty-seven feet deep. The structure was two stories high, about twenty-five feet elevation, and made of brick manufactured from clay from the old mound. The brick wall was thirteen inches thick, laid in ordinary lime mortar. The mound from which the market took its name was the "Great Indian Mound," located between Florida, Webster, Eighth, and Main Streets. The topography of that part of the city then was hilly and rolling with large ponds of water at the foot of the hills and knolls, with small water-courses flowing from one pond to the other, and then into the river. The residences were placed upon the knolls, and were surrounded by yards some of which were several acres in extent. The top of the mound, about one hundred and twenty feet above the present level of Main Street, was a public park of three or four acres in area, and was the fashionable resort for cool breezes in summer time, and for sleigh-riding down its slopes in winter. The Mullanphy Lake, south of Howard Street and east of Eleventh Street, was a favorite place for skating, boating, and bathing.

In those times the marketing for family purposes had to be done in the central part of the city, and several of the residents of "the Mound," as they were familiarly designated, planned a scheme for assisting the citizens "to get fresh beefsteak and provisions for breakfast and tea," as the notice read. Wilson Stamps was the principal director of the project.

perhaps receive stolen property. There are now in this place eleven men who have no visible means of support, and we believe are capable of committing any crime within the catalogue of offenses. With these facts staring you in the face do you not believe it necessary to guard against impending danger? We would therefore propose that the citizens do meet on Monday next in town council at Mr. Peeble's tavern, to take into consideration the propriety of establishing a nightly guard, and such other matters as may be deemed necessary for the general safety."

erecting a new market, and most of the wealthy residents of North St. Louis subscribed for stock in the enterprise. The lower story was used for meat stalls and vegetable stands, and farmers from the vicinity of Florissant and Bridgeton used to have their wagon stands around the market. After the establishment of Biddle, City, and Union Markets, the improvement of streets through that section of the city, and the change in the class of residents, Mound Market dwindled into insignificance and became an eye-sore to advocates of public improvements.

The second story of the Mound Market building was arranged for a public hall, and in its earlier days was the finest in the city. Balls and "sociables" were given in the hall, which was also frequently used for

THE OLD MARKET-HOUSE AND LEVEE IN 1840.

religious and political meetings. The present Trinity Methodist Episcopal Church, corner of North Market and Tenth Streets, the Presbyterian Church, corner of Eleventh and Chambers Streets, the African Baptist Church, corner of Tenth and Chambers Streets, and the Church of the Latter-Day Saints, on Broadway, were started and partially organized in the hall, which was also the quarters of the old Mound Engine Company. Until about 1868 the Mound Market Association was a prosperous corporation, and its stock was held above par, though the amount was not more than a few thousand dollars. Subsequently, when the stock began declining in value, about two-thirds of the shares were purchased by William Stamps, and finally the property was purchased by the city for twelve hundred and fifty dollars.

LUCAS MARKET.—The contracts for the erection of Lucas Market were made about October, 1845. It stood on Twelfth Street, between Olive and Chestnut, and was demolished in 1882.

BROADWAY MARKET.—In 1832, Peter and Jesse G. Lindell owned as tenants in common an undivided half of the west half of block No. 67 of the city, fronting on the east side of Broadway and extending from Christy Avenue to Morgan Street. On the 25th of February, 1832, they deeded to the city a strip of this land for the widening of Third Street for the purpose of making room for the erection of the Broadway Market-House.

On the 30th of May, 1852, it was announced that twenty-five stalls had been leased in "this new and commodious market-house," which was opened to the public on the 1st of June following. The building, which was three stories high, fronted thirty-seven feet on Broadway, and had a depth of one hundred and eighty feet to the street in the rear. The basement was used as a vegetable market, and on the street floor were located forty butchers' stalls. The building was owned by Thomas Hunter (one-half) and Messrs. Francisco and Hoffman. After the demolition of the market-house the ground remained unused until July, 1869, when it was macadamized by the city and became part of the bed of the street. In 1865 a number of butchers offered to lend the city thirty thousand dollars to build a new market-house on the site, but the proposition was not accepted. Subsequently the heirs of Peter Lindell brought suit for

the property on the ground that it was being used for another purpose than that contemplated by the donors, but a decree for the defendants was rendered by Judge Bogle.

CITY MARKET.—The "City Market-House" was erected in 1857, on Broadway between Biddle and O'Fallon Streets, and subsequently the "City Market Scales" were established on Broadway near O'Fallon Street.

UNION MARKET was erected on City Block 121, fronting two hundred and twenty-six feet on the west side of Fifth Street, with a depth westwardly of two hundred and seventy feet, and bounded on the north by Morgan Street, south by Christy Avenue, and west by Sixth Street. The great inner quadrangle, devoted to the sale of meats, had a vaulted roof supported by iron arches, and the outer angles of the building, which was of red brick dressed with stone, were flanked by four quadrangular towers. The sidewalk spaces outside the building were set apart for the sale of vegetables and other articles.

The markets of St. Louis in 1882 were,—

Allen Market, State Street, northwest corner Russell Avenue.

Biddle Market, Thirteenth Street, between Biddl and O'Fallon.

Carondelet Market, Main Street, southwest corne of Schirmer.

Carr Market, Wash Street, corner of Twenty fourth.

Centre Market, Seventh Street, between Sprue and Poplar.

City Market, Broadway and Biddle Street.

French Market, Convent Street, at the junction Fourth and Fifth.

Gamble Market, Clark Avenue, southwest corn of Twentieth Street.

Lucas Market, Twelfth Street between Olive a Chestnut.

Magwire Market, Broadway and Salisbury Street

Reservoir Market, Eighteenth Street, near Bent

Soulard Market, Seventh Street, near Carroll.

St. George Market, 2527 Carondelet Avenue.

Sturgeon Market, North Market Street, betwe Broadway and Ninth.

Union Market, from Fifth to Sixth Streets, a from Morgan to Christy Avenue.

Parks and Squares.—FOREST PARK.—In 1872 some enterprising citizens residing in the western portion of St. Louis, among whom Hiram W. Leffingwell was especially active and prominent, procured the passage by the State Legislature of an act authorizing the purchase of a thousand or more acres of land to be used as a public park. The movement aroused the determined opposition of a number of property-owners, and the act, which had been approved March 25, 1872, was declared by the Supreme Court to be unconstitutional. Two years later the project was revived, and after a protracted struggle another act was passed by the Legislature and approved on the 25th of March, 1874. This act also was assailed, and another legal controversy ensued, Messrs. Glover and Shepley and Judge Th T. Gantt being retained by the contestants, ex-Governor Fletcher in support of the mea the validity and constitutionality of which were a wards sustained by the Supreme Court. The having given the county court discretionary pow the matter of the purchase, that body at once pointed an appraiser, upon whose report thi hundred and seventy-two acres of land on Street road, four miles from the court-house di west of the centre of the city, and fronting on on King's Highway, were condemned and purch for the sum of seven hundred and ninety-nine sand nine hundred and ninety-five dollars. O tract there were over eleven hundred acres of n

forest, and the name of Forest Park was therefore bestowed upon it. Under the provisions of the bill a board of commissioners was appointed, consisting of Joseph O'Neil, Hiram W. Leffingwell, Ansyl Phillips, John J. Fitzwilliam, Peter G. Gerhart, John O'Fallon Farrar, and Andrew McKinley.[1]

The board met on the 17th of June, 1874, and organized with Andrew McKinley, president; Ansyl Phillips, vice-president; Charles Bland Smith, secretary. Although appointed and organized in 1874, the board of commissioners did not obtain possession of the park lands until April 27, 1875, and under a proviso of the act providing for the purchase of the lands granting the St. Louis County Railroad a right of way through the northeastern portion of the grounds, negotiations ensued that delayed the work of improvement until the following August. It was then, however, prosecuted with vigor, and from a wild uncultivated expanse of forest and broken country the grounds were transformed into a beautiful park by the 25th of June, 1876, when the formal opening took place. Although the work had not been completed at that time, sufficient had been done to demonstrate the natural beauty of the site and the opportunities it offered for artificial improvement. One of the greatest disadvantages with which the commissioners had to contend was the presence of the tracks of the St. Louis County Railroad within the park. This promised not only to be a source of annoyance and danger, but to destroy the harmony of the surroundings. The company had a right of way of seventy feet, "entering through Duncan's sub-division on the west side, running westwardly on the northern side of the River des Peres, and passing out at a point on the northern line thereof east of Union Avenue." Accordingly the commissioners, whose approval of the route through the park was necessary, entered into a treaty agreement with the St. Louis County and St. Louis, Kansas City and Northern Railroads, by which the latter constructed a tunnel one hundred feet long at the eastern approach, where the road entered the park through an open cut, and made an embankment of sufficient height to admit of a viaduct under it for pedestrians and vehicles. The eastern boulevard passed over the tunnel, so that absolute safety was secured. The unveiling of the bronze statue of Edward Bates, formerly attorney-general in President Lincoln's cabinet, June 25, 1876, was made the occasion of the formal opening of Forest Park, within the bounds of which the monument had been placed. Several members of the National Democratic Committee were in St. Louis at the time, and they accompanied the then mayor, Henry Overstolz, to the park. About forty thousand persons visited the park and attended the ceremonies, which included a prayer by Rev. Dr. Brank, and addresses by Governor Hardin, President Andrew McKinley, of the Forest Park commissioners, Chief Justice Chauncey F. Shultz, of the county court, and Lieutenant-Governor Dorsheimer, of New York. At the unveiling ceremonies Mayor Overstolz presided, and addresses were delivered by Montgomery Blair and Senator Doolittle, of Wisconsin. Up to Jan. 1, 1876, the park cost the city, including the purchase of the lands, $1,047,889.16, and to Aug. 10, 1877, $1,385,426.16. After the latter date the annual appropriation was cut down to the minimum allowed by law, $30,000, and the completion of the improvements in the magnificent style contemplated in the beginning was thus rendered impracticable, yet Forest Park is to the people of St. Louis what Central Park is to New Yorkers, Fairmount to Philadelphians, and Druid Hill to Baltimorians. It has become a popular resort for the masses, and especially for picnic parties. Approached by broad boulevards and accessible by both horse and steam railroads, and the centre of the park system of the city, its advantages are manifold. Its scenery embraces a diversity of landscape seldom to be met with in an inclosure of its size, and much of its artificial beauty is due to the River des Peres, a romantic little stream which traverses it from northwest to southeast and feeds numerous miniature lakes and cascades, adding greatly to the picturesque effect. Handsome drives and shady walks traverse the park, and fine buildings, pagodas, music-stands, etc., have been constructed, and many other attractions have been added from time to time, greatly enhancing its value as a place of popular recreation.

The visitor at Forest Park, as he saunters along the well-drained and neatly-graveled promenades, or about the park lake with its pleasant island orchestra, or rests in the grove in the shade of some one of its giant oaks, would find it difficult at best to re-create out of all the embellishments of those beautiful pleasure-grounds a true picture of the wild surroundings,

[1] Andrew McKinley, who superintended the embellishment of Forest Park, was one of the most active and influential men of St. Louis. He was a Kentuckian by birth, and a lawyer by profession. In 1840 he removed to St. Louis, where he practiced for five years, returning at the expiration of that time to Kentucky. In 1859 he returned to St. Louis and became a member of the firm of McKinley, Peterson & Co., and subsequently president of the Great Republic Insurance Company and the Board of Underwriters, and trustee of the Western Division of the Union Pacific Railroad. In 1865 he removed to New York, but in 1872 took up his residence for the third time in St. Louis.

the dangers, and the savage bewilderments of the primal site. The property was retrieved to usefulness indeed long years before its ownership had passed to the city of St. Louis, a large part of it within the easy recollection of the present generation, as the farm of the late Robert Forsyth, embracing the accessories of a complete American country home, with broad wheat- and hay-fields, and on an elevation about the middle of them, where the restaurant now stands, a neat two-story frame house, flanked by the necessary servants' quarters, barns, and out-houses.

But the pioneer settlement of the noted grounds goes back to yet another age and race, reaching the period of primitive Spanish domination, the days of picket-fences, log houses, and prowling Indians, when St. Louis was a village outpost only, and its population a meagre band of adventurous French and Spanish colonists.

On the first day of September, 1796, a concession was signed by Zeñon Trudeau, a French colonel acting then in the Spanish service as Lieutenant-Governor of "the western part of Illinois," which invested the family of Joseph Marie Papin with the ownership of a tract of land measuring three thousand two hundred arpens, embracing within its liberal scope all of the present Forest Park (except a narrow strip along its southern line), and extending northwardly quite a distance beyond the present Olive Street road. The title was vested in the wife, Madame Marie Louise Chouteau Papin, a sister of the founders of St. Louis, Auguste and Pierre Chouteau.

Joseph Marie Papin figures in the French and Spanish archives of the period as a "negociant," a merchant or trader engaged in the business of the day and settlement—the purchase and shipment abroad of Indian peltries. His village residence, a large square stone house, planned after the style of the better French colonial dwellings, with high basement for stores and miscellaneous uses, and an upper story for the family, occupied with its garden and grounds the southern half of the city block now bounded by Main, Second, Pine, and Chestnut Streets. This early pioneer was the American progenitor of a large family whose names run prominently through all the primitive as through the subsequent history of St. Louis, surviving notably down to this day and generation.

Everybody who has studied the early occupation and development of the western country has been struck by the extreme precaution and painstaking wariness with which the successive French and Spanish governments moved in their schemes of American colonization; and the dominant precaution, the particularity and minute methods often of the parent governments entered largely, and sometimes without apparent purpose, into the local and domestic regulations and habits of the French colonists themselves. The various town archives present a curious example of this in their careful perpetuation of the history and experiences of the inhabitants.

Thus, for instance, in the making up of the present sketch the mouldy records still extant in the city of Montreal, Canada, show that the family came over from La Rochelle, in France, more than two centuries ago. These records also furnish many interesting facts concerning the subsequent history of the family. The first American of the name, Pierre Papin, was born in Montreal in 1666, and the two succeeding generations domiciled respectively at L'Assomption and Montreal. Joseph Alexander Papin visited the French settlement of St. Louis, remaining only a short time, however, and then returning to Montreal. Later on, and after the death of his wife, he took his only son, Joseph Marie Papin, who was then a lad, to France, placing him at a college in the vicinity of Blois, after which he returned to Canada, settling at the border post of Frontenac. Ten or twelve years later he returned to France for his son, quitting Canada forever, as did many other French about this time, the period of the cession to the English. After a sojourn in the mother-country of only a few years he returned to America accompanied by his son, and they settled permanently at St. Louis. This must have been prior to 1766, as shown by a deed in the St. Louis archives of a first purchase of real estate made by him in that year.

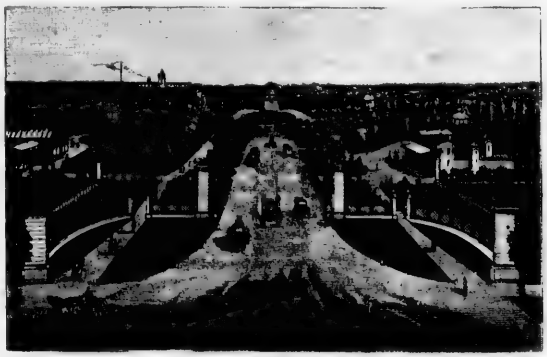
The careful education in France of the founder of the St. Louis branch, however instructively and agreeably employed in a social way within the narrow circle of the village outpost, seems to have proved unavailing as against the ventures and hazards of the Indian traffic in which he had embarked, for, after meeting various minor mishaps, the more serious finally of a cargo of furs and peltries put a stop to the business of the untrained pioneer, and induced him to remove with his family to the grant of the Spanish Governor mentioned above.

There were eleven children born of the Papin-Chouteau marriage who attained the age of maturity. Of these, seven were boys, who set out as young men to retrieve the lost heritage. Two cast their lot in the settlement, but the majority struck out for the farther Indian country, the wild territories of the Osages, Sioux, and Blackfeet. After the lapse of a few more years the name, always maintained in high and honored esteem in the community, reappeared multiplied seven times, among the most solid con-

ture to the book of the town tax collector. They have left many descendants, and the name is still as well known and as highly esteemed in the overgrown metropolis as it was in its village cradle.

The long, active, and prominent business career of Theophile Papin should designate him properly as the family representative of the present day. He is the son of Sylvestre Vilrey Papin, the grandson of Jean Marie Papin, and was educated at the St. Louis University, completing his course in St. Mary's College, Marion County, Ky.

Some early contributions to the *St. Louis Reveille*, a sprightly journal of thirty odd years ago, introduced him to the late J. M. Field, its proprietor, and secured him the position of reporter and assistant editor, succeeding in that capacity John S. Robb, whose brilliant writings under the *nom de plume* of "Solitaire," many of the citizens of St. Louis still remember.



After a few years spent in this occupation, Mr. Papin embarked in the real estate business, to which he has applied himself without intermission to the present time with remarkable success. The management of a large private business, covering frequent ventures of magnitude, the discharge of important duties imposed upon him by the courts in the subdivision and adjustment of great estates, and the performance of the varied trusts and responsibilities, both public and private, confided to him in the course of an especially active life have vindicated his unerring judgment, and won for him the abiding confidence of the community to whom he is so familiarly known.

Mr. Papin has also filled a number of public positions. He was elected to the City Council four times, being chosen to represent successively every ward that he has ever lived in, and in 1861, at the instance of Gen. Frank P. Blair, he was appointed assessor of internal revenue for St. Louis City and county. In connection with the late Samuel H. Gardner, the collector, he organized the service in St. Louis. He was subsequently elected president of the City Council, and was finally chosen county collector at a time when it was rated as the most profitable office in the State. While thus holding public office and carrying on his large private business, he has also served under other appointments, and has fostered different public and private interests in various ways. At one time he was a member of the House of Refuge management, director in the Boatmen's Savings-Bank, etc. Mr. Papin was one of the first and principal organizers of the Real Estate Exchange. He was three times elected its president, but declined a proffered election on account of his multiplied business cares.

Mr. Papin seems never to have parted with the tastes and habits of his original calling, and all his life he has been a contributor to the press. On the occasion of an extended tour with his family in Europe, recently, a series of his letters, running through all his protracted rambles, were published in the *Missouri Republican*. The originality and good sense of his observations abroad and the graceful and facile language in which they were expressed attracted general attention. Mr. Papin is still in the full vigor of matured manhood, and the lapse of time has left his energies unimpaired.

TOWER GROVE PARK.—For two of the most popular and attractive public reservations in the city, Shaw's Garden and Tower Grove Park, St. Louis is indebted to the munificence of Henry Shaw, one of its most prominent citizens, a large bulk of whose wealth has been devoted to improving these two beautiful resorts for the inhabitants of his adopted home.

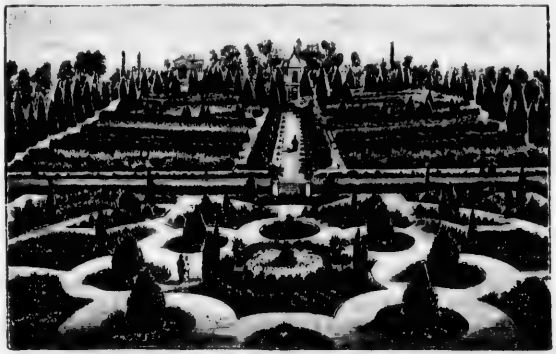
Tower Grove Park is situated on Grand Avenue, between Magnolia Avenue and Arsenal Street road, and contains two hundred and seventy-six and three-fourths acres. Early in 1868, Henry Shaw made a proposition to the city authorities to give them one hundred and ninety acres of ground, extending from Grand Avenue to King's Highway, eleven hundred and twenty-one feet in width and six thousand one hundred and sixty-three feet in length, reserving a strip of two hundred feet around the tract to lease to the city for ninety-nine years, the proceeds to be devoted to the maintenance of Shaw's Garden, and requiring the city to devote three hundred and sixty thousand

TOWER GROVE PARK ENTRANCE.

dollars to the improvement of the ground for a public park. No action was taken by the City Council, and in June the Board of Trade appointed a committee to inquire into the matter. This committee had an interview with the mayor and Mr. Shaw, and the latter subsequently prepared a deed for the land and presented it to the board. The result was that the Board of Trade, supported by the Union Merchants' Exchange, procured the passage of an ordinance accepting Mr. Shaw's gift with some modifications. Under this ordinance a board of commissioners, consisting of James S. Thomas, Charles P. Chouteau, Adolphus Meier, Judge Wm. Ferguson, and Henry Shaw, was appointed to carry out its provisions, under the general supervision of Mr. Shaw. The work of improvement was commenced at once, and in the summer of 1870 the tract was formally opened, with the name of Tower Grove Park. The park is ornamented in the most artistic style, and abounds in beautiful shade-trees, shrubs, and flowers indigenous and foreign. There are also handsome walks and drives, miniature lakes, springs, rustic bridges and bowers, summer-houses, pagodas, fountains, statues, etc. Up to 1875 nearly half a million dollars had been expended on the park, twenty-five thousand dollars per year being appropriated by the city, in addition to the original appropriation. In 1878 its value and attractiveness were further enhanced by the gift of a bronze statue of Shakespeare from Mr. Shaw, and later by a similar statue of Von Humboldt from the same donor. The total estimated value of Tower Grove Park in 1882, including land and improvements, was $1,027,675.

HENRY SHAW.

SHAW'S GARDEN, or, more properly speaking, the Missouri Botanical Garden, situated on Shaw Avenue west of Grand Avenue, embraces about fifty acres of a tract of eight hundred owned by Mr. Shaw, who, after his retirement from business, began the preparation of the garden with a view to presenting it to the city. Under his personal direction it grew from year to year until it has become one of the finest places of the kind in the country. Mr. Shaw also erected a museum, where curiosities of the animal, vegetable, and mineral kingdom are exhibited free to the visiting public, as are also the grounds, which have been tastefully beautified and ornamented. The botanical garden and arboreum embrace every known variety of flower, plant, and tree, and there is also an experimental fruit garden that has proved a valuable acquisition. The garden has been for years maintained by Mr. Shaw at his own expense.



Henry Shaw, to whose liberality the city of St. Louis owes some of her richest and most lasting ornaments, is an Engl[illegible]an by birth, and is connected with a family w[illegible] noted for its success in business. At the age o[illegible] nineteen he left his native country to seek his fortune in America, and arrive[illegible] in St. Louis May 4, 181[illegible] establishing himself in th[illegible] hardware business with [illegible] small stock of goods whic[illegible] he had brought with hi[illegible] For a considerable perio[illegible] he managed the store wit[illegible] out the aid of a cler[illegible] attending personally to th[illegible] minutest and humblest [illegible] tails, and practicing t[illegible] most rigid economy. T[illegible] usiness prospered, and [illegible] due season the young m[illegible] chant began dealing a[illegible] in supplies for Ind[illegible] agents. His success [illegible] such that in about twe[illegible] years, and when he [illegible] only forty years old, he [illegible] enabled to retire from business with a fortune t[illegible] was regarded at the time as very large. Mr. Sh[illegible] conducted his busi[illegible] on the strictest principles, [illegible] paid close and assiduous attention to the economi[illegible] money-making; but in other respects (even in [illegible] days of his early struggles) was noted for l[illegible] minded and open-handed views and habits. [illegible] spare hours were devoted to learning the French [illegible] guage and other polite accomplishments, and [illegible] leaving trade he was well fitted by taste and the [illegible] imposed training he had undergone to enjoy [illegible] eight or ten years of travel that ensued, and in [illegible] course of which he visited nearly every quart[illegible] the habitable globe. On his return he de[illegible] much of his time to the cultivation of plants

flowers, and established the nucleus of what is now an institution of St. Louis, the Missouri Botanical or Shaw's Garden. As stated above, Mr. Shaw expended much time and money on the development of the beauties of nature as displayed in floriculture, horticulture, and kindred pursuits, and as he prosecuted this recreation, the desire that others should share in the enjoyment which resulted from it grew upon him, and he conceived the idea of making his estate a public resort. With this end in view he opened his gates unreservedly to the citizens of St. Louis, and for many years has supported at his own expense the grounds that were virtually the property of the public, although owned by himself. Subsequently Mr. Shaw determined to present to the city an even more valuable property, Tower Grove Park, which has become almost as much a feature of St. Louis as the Gardens. Although the city maintains the Park, Mr. Shaw has since expended much of his wealth and a good deal of his time upon it, and two of his donations, the Shakespeare and Humboldt statues, alone represent a small fortune. In bestowing his gifts upon the city Mr. Shaw exhibited, as in all of his acts which concerned the public, a modesty that was almost severe. His interest in his fellow-citizens was sincere and manifest, but, as far as possible, he avoided all publicity and display. Mr. Shaw's munificence was the occasion of frequent recognition. On the occasion of the fiftieth anniversary of his arrival in St. Louis, May 4, 1869, Tower Grove, his residence in the park of that name, was thronged by a brilliant assemblage of St. Louisians, including many prominent citizens among the older inhabitants. On this occasion Mr. Shaw delivered an address relating his first arrival in St. Louis and many interesting early reminiscences, to which Governor B. Gratz Brown responded. In the Park the day was observed as a gala day, and among Mr. Shaw's visitors were bands of children from the Orphans' Home and the Protestant Orphan Asylum, which had frequently been the recipients of his charity. Another interesting event of the same character was the adoption of a series of resolutions at a meeting of the Merchants' Exchange of St. Louis, Dec. 19, 1878. These resolutions were inscribed on white satin fringed with gold and hung upon a solid silver roller, and a copy thereof was transmitted to the mayor for preservation among the archives of the city. They read as follows:

"To HENRY SHAW, *testimonial of respect and gratitude, by the Merchants' Exchange of St. Louis, December*, 1878.

"The members of the Merchants' Exchange, in behalf of the commercial and industrial classes of the city of St. Louis, realizing the great and lasting benefits conferred upon the city by Mr. Henry Shaw, deem it a duty to express in a formal and public manner their appreciation and gratitude, and to that end, in meeting assembled in the hall of the Exchange, Dec. 19, 1878, do order and adopt the following resolutions:

"*Resolved*, That in the creation of Tower Grove Park by the donation to the city of the valuable lands composing it, in the recent gift of the magnificent bronze statues of Shakespeare and Humboldt, with their pedestals and relievos for the adornment of the same, and in the establishment of the Missouri Botanical Gardens, with their museum, conservatories, and the most remarkable collection in this country of the flora of all climes, Mr. Shaw has materially aided the reputation and growth of St. Louis, and at the same time created delightful and permanent pleasure resorts for our citizens, in which the influences of nature and art are combined for the advancement of that general taste and culture without which there is no genuine civilization.

TERRACE, SHAW'S BOTANICAL GARDEN.

"*Resolved*, That in the devotion of a private fortune, acquired during an honorable business career in this city, to the benefit of the public, and the admirable mode selected to carry out his benevolent designs, by which the pleasure and profit of all citizens are permanently secured, together with the adornment of the city, and the creation of those features of local interest which are always important elements in civic progress, Mr. Shaw has made himself the benefactor of our people, reflected honor on the city of his home, endeared his name to its present and future population, and is entitled to the earnest gratitude of all classes of society.

"*Resolved*, That, as merchants and business men of the city of St. Louis, it is especially incumbent upon us, and we esteem it a most pleasant duty to acknowledge the benefits bestowed upon the city and its citizens by one so long and intimately identified with the mercantile interests of the city. Although now retired from active business, he worthily represents the spirit and liberality which should characterize the merchants of a metropolis representative of Western civilization, and throughout a useful and industrious career has evinced an active interest in the growth of the city which he has greatly aided. It is peculiarly gratifying to the members of this Exchange that a citizen who is among the oldest of our merchants

should have achieved the illustrious distinction of benefiting all classes of our people, and furnishing an impressive example of individual honor and rectitude linked with the most exalted and philanthropic purposes.

"*Resolved*, That the members of the Merchants' Exchange, in view of the facts herein stated, and in accordance with the universal sentiment of the people of St. Louis, hereby tender to Henry Shaw their deep and heartfelt acknowledgments and thanks for his public spirit and noble generosity. No other return than words of gratitude and respect is now appropriate or possible, but their significance is not limited to the present time; so long as his gifts to the city endure, and there are people to enjoy them, his name will be consecrated in the public heart, and his memory will bloom in the beauties of the park and gardens which he created for the enjoyment of all.

"*Ordered*, That these resolutions be spread upon the records of this body, and that, when suitably engrossed, a committee consisting of the president and directors of the Exchange and twenty-one citizens, to be designated by the president, shall formally present them to Mr. Shaw.

"GEORGE BAIN,
"*President.*
"HENRY C. HAARSTICK,
"CRAIG ALEXANDER,
"*Vice-Presidents.*
"JOHN CRANGLE,
"JOHN A. SCUDDER,
"E. O. STANARD,
"J. C. EWALD,
"A. T. HARLOW,

"JOHN O. TALBOT,
"P. E. FLETCHER,
"W. LEIGH WICKHAM,
"A. GUYE,
"GEORGE H. MORGAN, *secretary*,
"*Directors.*"

The following gentlemen were appointed a committee, in conjunction with the board of directors of the Merchants' Exchange, to present the resolutions to Mr. Shaw: Henry Overstolz, George Knapp, R. J. Lackland, R. P. Tansey, Gerard B. Allen, Adolphus Meier, John E. Gilkeson, Joseph Brown, John G. Priest, Edwin Harrison, E. O. Stanard, Oliver D. Filley, Carlos S. Greeley, Robert Campbell, D. H. Macadam, Thomas Allen, Wayman Crow, Charles P. Chouteau, James E. Yeatman, Robert A. Barnes, Albert Todd.

Ever since establishing his residence at Tower Grove, Mr. Shaw has kept practically "open house," and his attractive residence is a favorite resort of the cultured people of the city, who find in him a most genial and generous host. It is his pride, also, to entertain the distinguished people who from time to time visit St. Louis, and the most eminent men of the nation (and, it may be added, of the world) have enjoyed his hospitality. His career justifies the observation that St. Louis has never known a close and assiduous business career that has been supplemented by more graceful and appropriate donations of its aggregated wealth to purposes of public usefulness and adornment, nor one of its citizens who, engrossed for a long time in the pursuits of business, ever opened his heart more abundantly to all that is beautiful in nature, or displayed more zeal and liberality in extending to the general public the pleasures which he himself enjoyed.

O'FALLON PARK is situated in the northern portion of the city, on the Bellefontaine road. It is used as a driving-park, and is also popular as a picnic-ground, and has great natural advantages. It was formerly the estate of the late Col. John O'Fallon, and has a wealth of forest-trees which had been carefully preserved by Col. O'Fallon. It occupies a commanding position overlooking the river, and became the property of the city under a legislative enactment in 1875. It contains 159.41 acres, and its land and improvements are estimated to be worth (in 1882) $243,174.

CARONDELET PARK was established by an act of the Legislature in 1874, about the time that Forest and O'Fallon Parks were created. It comprises one hundred and eighty acres, situated on South Ninth Street, between Loughborough and Kansas Avenues. In May of the same year the county court appointed as commissioners M. I. Brennan, B. Guion, Jr., H. J. Hinsman, E. J. Shores, and P. A. Bamberger, of whom Mr. Brennan was president; Mr. Guion, vice-president; and J. F. Young, secretary. The ground cost over one hundred and sixty-five thousand dollars, and two hundred thousand dollars having been appropriated by the legislature for its purchase and improvement, the balance was used in adapting the grounds to their purpose, ornamenting them, etc.

OLD CARONDELET PARK, comprising about three acres, was acquired from the general government in 1812, and was a part of the old St. Louis common. The character of the land and its location, however, made it unavailable for park purposes, and although some improvements were made, it has never been used as a public resort. It is estimated to be worth four thousand eight hundred dollars.

LACLEDE PARK, a small reservation of about three acres, bounded by Osage and Maramec Streets and Iowa and California Avenues, was reserved in the sub-division of the city in 1853 and 1854. It has been somewhat improved, but not in the same proportion as other squares. It is estimated to be worth eleven thousand dollars.

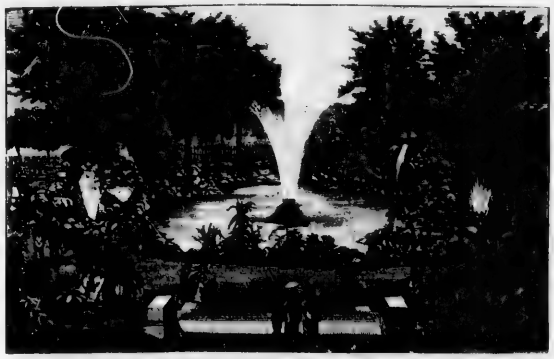
MISSOURI PARK, comprising between three and four acres, lying between Olive, St. Charles, Thirteenth, and Fourteenth Streets, was created by

ordinance in 1854, a portion of it being purchased from James H. Lucas for ninety-five thousand five hundred dollars, and the remainder being a gift from the same gentleman. The first city appropriation for it was made in 1858, and up to 1877 forty-one thousand one hundred and sixty-five dollars had been expended on it. It is a popular resort, and has been greatly ornamented and improved. The ground and improvements are estimated to be worth two hundred thousand dollars.

HYDE PARK was acquired by purchase in 1854 from Ann C. T. Farrar, for thirty-six thousand two hundred and fifty dollars. It lies between Salisbury Street and Bremen Avenue and Twelfth and Fourteenth Streets, and the original tract of fourteen and one-half acres has been reduced to about twelve by the widening of contiguous streets. For several years after its purchase it was leased to various persons as a beer-garden, and the revenue accruing therefrom was expended in improvements. Owing to the occurrence of a number of disturbances, however, this arrangement was subsequently discontinued. No. 8 engine-house occupies the southeast corner of the tract. Up to 1877, $65,041.87 was expended in improvements, and the square is now in an excellent condition. The ground and improvements estimated to be worth one hundred and thirty-five thousand dollars.

BENTON PARK.—In accordance with the provisions of a city ordinance, approved June 25, 1866, the old city cemetery was transformed into Benton Park. It comprised originally seventeen acres, but was reduced by the extension and widening of streets to fourteen and one-third acres, and was found to be excellently adapted to park purposes. It is situated between Jefferson Avenue and Arsenal Street and Wisconsin Avenue and Wyoming Street, and immediately sprang into popular favor, being the most frequented park in South St. Louis. It has been made a beautiful spot, and the inhabitants of a large surrounding district flock to its cooling shades and pleasant walks for rest and recreation. The land and improvements are estimated to be worth seventy-five thousand dollars.

LYON PARK.—An act of Congress, approved March 3, 1869, granted that portion of the Arsenal grounds lying between Carondelet Avenue and Fourth Street for a public park, on condition that the city complete the proposed monument to Brig.-Gen. Nathaniel Lyon within three years. The grounds were transferred to the city by the War Department in September, 1871, and on the 22d of April, 1874, the then Secretary of War, Gen. W. W. Belknap, wrote to Mayor Brown to know if the conditions had been fulfilled. An obelisk monument was thereupon dedicated to the memory of Gen. Lyon, Sept. 13, 1874, and the reservation, which is situated on Carondelet Avenue between Arsenal and Utah Streets, was thereafter known as Lyon Park. It embraces an area of over ten acres, and was very little improved up to the separation of the city from the county in 1877. Since then, under the direction of the city authorities, it has been made a very attractive spot. The estimated value of ground and improvements is seventy thousand dollars.



WASHINGTON SQUARE, containing six acres and situated between Market and Thirteenth Streets and Clark Avenue and Twelfth Street, was originally a part of the old Chouteau mill tract. It was purchased by the city on the 28th of November, 1840, with the understanding that it was to be used as a "public square forever." Its original cost was twenty-five thousand dollars, but it is now valued with the improvements at two hundred and thirty-six thousand dollars. The sum of fifty-six thousand five hundred and twenty-five dollars and fourteen cents was expended from 1855 to 1882 in maintaining and embellishing the grounds.

GRAVOIS PARK, which comprises eight and a quarter acres, is one of the original St. Louis commons' grants, and lies between Pontiac Street and Kansas Avenue and Miami Street and Louisiana Avenue. Its isolated position caused it for a time to be less frequented than any other of the city parks. It has the advantage of large shade-trees, and is now being enjoyed by large numbers of people. The ground and improvements are estimated to be worth twenty thousand dollars.

CARR SQUARE, situated between Carr, East Sixteenth, Wash, and West Sixteenth Streets, and containing nearly two and a half acres, was presented to the city in 1842 by Wm. C. Carr, "to be forever used as a square." It was for many years a receptacle for refuse, but was subsequently filled in and improved, and is now a popular and very attractive resort. The estimated value of land and improvements is seventy thousand dollars.

ST. LOUIS PLACE lies immediately north of the old reservoir. It is a narrow strip of ground two thousand feet long, and contains 15.19 acres. It is bounded by Benton, Hebert, West Seventeenth, and West Eighteenth Streets, and was given to the city in 1848 for a pleasure ground by Col. John O'Fallon, Governor Miller, L. A. La Baume, Messrs. Todd & Dayton, Josiah Dent, and others. The land and improvements are estimated to be worth one hundred and fifty thousand dollars.

LAFAYETTE PARK is situated one and a half miles southwest of the court-house, between Mississippi and Missouri and Park and Lafayette Avenues. It contains nearly thirty acres, and is one of the oldest parks in the city. Its creation was due mainly to the efforts of the late John F. Darby and Col. Thornton Grimsley. In 1835 a bill was passed by the State Legislature authorizing the sale of the old St. Louis commons, the territory which afterwards became Lafayette Park being reserved by the city for a park. Nothing further was accomplished until 1851, when Lafayette Park was dedicated and established under an ordinance approved November 12th of that year, under which the then mayor, Luther M. Kennett, City Engineer Samuel R. Curtis, John C. Rust, Stephen D. Barlow, and Edward D. Bredell were named as commissioners. For the first five years the only progress made was by means of eight thousand one hundred and seventy-three dollars contributed by adjacent property-owners. In 1857 the City Council made its first appropriation for Lafayette Park, amounting to two thousand dollars, and gave a similar sum the ensuing year. Then came a lapse of six years of inactivity, and in 1863, $14,532.13 was expended in improving the grounds. During the following year the Legislature authorized the issue of thirty thousand dollars in bonds for the improvement of the park, and in 1868 an additional issue of seventy-one thousand five hundred dollars. From the date of the issue of these bonds the improvement of the park was rapid, and it is now one of the most attractive and popular resorts in the city. Imposing entrances have been erected, walks, drives, and avenues have been laid, and groves of trees of many varieties and beds of flowers have been planted. The park has also a lake, with sail-boats and various water-fowl, grottoes, and cascades, and many other ornamental features, including a copy of Houdan's statue of Washington, and a bronze statue of Thomas H. Benton. A music-stand was erected in 1867, and was replaced by another in 1876, which was dedicated July 27th with imposing ceremonies. Concerts are given regularly during the summer season. The park and improvements are valued at one million one hundred and three thousand and fifty dollars.

FOUNTAIN IN LAFAYETTE PARK.

CLINTON PLACE, JACKSON PLACE, and MARION PLACE are three circular lots in North St. Louis, used respectively as sites for a public school, a public square, and a church. The public reservation, Jackson Place, Tenth and North Market Streets, was improved by the city, and is a popular resort for children. The three reservations were presented to the city in 1816, by Chambers, Christy, and Wright, for the purposes for which they are used.

EXCHANGE SQUARE was also presented to the city in 1816, by Chambers, Christy, and Wright, to be used as a commons forever. It is bounded by Wharf, Warren, Jefferson, and Front Streets, in North St. Louis, and has an area of nearly thirteen acres. It has been unimproved until recently, when a portion of it was fenced in, planted with trees, and sown in grass-seed. Part of the lot is rented for the storage of lumber, and the remainder is being filled up to make it available for park purposes. The ground and improvements are estimated to be worth ninety-six thousand one hundred and fifty dollars.

GAMBLE PLACE, the smallest square in the city, is bounded by Gamble and Dickson Streets and Garrison and Glasgow Avenues, and occupies the site of the old Gamble reservoir. It comprises but little over an acre, and was opened as a park in 1875 at the expense of the adjacent property-owners. Since then it has been maintained by the city. The land and improvements are estimated to be worth twenty-two thousand dollars.

Monuments.—In the public squares and cemeteries of St. Louis are many handsome and imposing monuments to public personages, together with a number of similar memorials of private individuals, situated in Bellefontaine Cemetery and the various burial-grounds belonging to religious denominations. The first popular movement for the erection of a monument to a public man seems to have been the effort on the part of leading citizens to secure funds for a memorial of Henry Clay.

On the 10th of July, 1852, a mass-meeting was held to consider the project, at which the following committee of fifty was appointed:

Henry Von Phul, Daniel H. Donovan, David R. Risley, William Palm, A. B. Chambers, George R. Taylor, C. Kribben, Henry N. Hart, J. B. S. Lemoine, John McNeil, B. Gratz Brown, H. I. Bodley, Henry N. Hart, S. M. Breckenridge, Thomas Grey, Thomas Dennis, Bernard Crickard, Frederick Bechelmar, Thomas B. Hudson, Charles L. Hunt, Thomas J. Weir, James O'Neil, Willis R. Pritchartt, Thomas J. Sturgeon, Daniel Taylor, C. C. Simmons, Henry C. Lynch, Adolphe Abeles, D. D. Mitchell, R. S. Blennerhassett, George I. Barnett, George R. Allen, L. A. Labeaume, J. K. Burtis, P. R. McCreery, William Harper, Edward Brooks, E. C. Blackburn, A. S. Mitchell, Charles P. Choutean, Capt. James R. Sprigg, M. B. Laughlin, D. H. Armstrong, James L. Faucette, J. L. Bailey, Hiram Shaw, John B. Carson, P. J. McSherry, Samuel R. Curtis, Peter D. Papin. To whom were added, by resolution, the officers of the meeting, as follows: Mayor L. M. Kennett, James H. Lucas, Joshua B. Brant, E. M. Ryland, Robert Campbell, William M. Tompkins, Thornton Grimsley, James Clemens, Jr., Isaac H. Sturgeon, J. M. Clendenin.

On the 15th of July, 1852, the committee met and designated a committee consisting of W. M. Tompkins, C. C. Simmons, J. B. S. Lemoine, M. B. Laughlin, and Henry N. Hart to report a plan of organization. In September, 1852, the Clay Monument Association was organized by the election of James H. Lucas, president; Henry D. Bacon, D. H. Donovan, vice-presidents; J. B. S. Lemoine, secretary; Robert Simpson, treasurer. Directors, Robert Campbell, John O'Fallon, L. M. Kennett, A. B. Chambers, S. R. Curtis, Henry N. Hart, John G. Priest, Joseph O'Neil, C. C. Simmons, Thornton Grimsley, George R. Taylor, John McNeil, Edward Walsh, and Joshua B. Brant. In January, 1853, the association received a charter from the General Assembly, and began soliciting subscriptions. In May following the following officers were elected:

James H. Lucas, president; Daniel H. Donovan, first vice-president; L. M. Kennett, second vice-president; Robert Simpson, treasurer; J. B. S. Lemoine, secretary. Directors, Charles P. Chouteau, Thornton Grimsley, A. B. Chambers, C. C. Simmons, Joseph O'Neil, John G. Priest, Thomas Dennis, Henry D. Bacon, John McNeil, John Knapp, Samuel R. Curtis, Henry N. Hart, Daniel G. Taylor. The members of the association then present subscribed two thousand eight hundred and twenty-five dollars towards the erection of the proposed monument, making nearly ten thousand dollars contributed to this object. This monument, it appears, was never finished. Quite a number of other monuments were also projected at various times, but never completed.

In 1854 a monument was erected in Bellefontaine Cemetery to the memory of A. B. Chambers, one of the proprietors of the *Republican* newspaper. The building committee appointed at a public meeting held in the Merchants' Exchange, in June, consisted of James E. Yeatman, Hon. Samuel Treat, John McNeil, Dr. C. A. Pope, William D'Oench, Hon. J. B. Bowlin, H. T. Blow, J. How, L. M. Kennett, and G. K. McGunnegle.

The monument to Thomas H. Benton in Lafayette Park was the first testimonial of the kind to any public man erected in the State of Missouri. In 1860 the General Assembly of the State appropriated two thousand five hundred dollars for the purpose, on condition that an additional subscription, on the part of individuals, should be realized sufficient to secure a bronze portrait statue of Col. Benton, and Col. John O'Fallon, Edward Walsh, John How, J. B. Brant, Robert Campbell, M. L. Linton, and Wayman Crow were appointed commissioners to superintend the execution of the work. During the same year the commissioners selected Harriet Hosmer as the sculptor, and in the following year the statue was cast at the Royal Foundry of Munich. After its arrival in St. Louis a delay of several years occurred before it was erected. It was originally intended to place it in Missouri Park, but this idea was abandoned, as was also a proposition to erect it in Union Square, and Lafayette Park was finally selected as the site. The statue was unveiled with imposing ceremonies on the 27th of May, 1868. Gen. Frank P. Blair delivered the oration, and Mrs. Jessie Benton Fremont, daughter of the illustrious statesman, unveiled the statue, this part of the ceremony being attended by the firing of a national salute of thirty guns in accordance with an order from the War Department. Many distinguished persons were present, and in the afternoon there was a general suspension of business throughout the city in honor of the event. The statue occupies a site immediately north of the music-stand, on one of the most conspicuous locations in the park. It is ten feet in height, and stands on a pedestal of Quincy granite, which is also ten feet high. The figure is enveloped in a Roman toga, and in the hands is clasped a map, the idea of the artist being to reproduce as nearly as possible the appearance of Col. Benton at the great railroad meeting in St. Louis in 1849. On the west side of the pedestal is the inscription taken from his celebrated speech on that occasion, "There is the East, there is India," and at the top is the word "Benton." The cost of the statue, mounted, was thirty-six thousand dollars.

The unveiling of the statue of Edward Bates, attorney-general in President Lincoln's first cabinet, in Forest Park, June 24, 1876, was made the occasion of the formal opening of that beautiful and popular resort. The assemblage present on this occasion was estimated at forty thousand persons. Mayor Henry Overstolz presided, Miss Minnie Holliday performed the act of unveiling, Hon. Montgomery Blair delivered the oration, and United States Senator Doolittle, of Wisconsin, made an address. The monument was designed and executed by J. Wilson McDonald, formerly of St. Louis. The work was begun in the spring of 1871, when the sculptor had just completed busts of James T. Brady and Charles O'Conor for the Young Men's Library of New York, and a colossal bust of Washington Irving for Prospect Park, Brooklyn. The clay model was about one year in process of forming, the modeling being done from photograph and the artist's personal recollection of the man. The statue, which is made of fine bronze, is about eighteen feet high. The subject is represented as in the attitude the most commonly assumed when addressing the court or a jury. His elbow rests at his side, and the forearm is stretched out in an easy manner, the forefinger of the hand extended as if to draw attention to some point in the argument. One foot is placed a little in front of the other, the right hand resting upon a volume of legislore, which in its turn rests upon the back of an eagle standing at his side; the head is erect, the lips firmly closed.

The bronze statue of Shakespeare, which with that of Humboldt is one of the principal attractions of Tower Park, was presented to the city of St. Louis by Henry Shaw, on April 23, 1878. It is the work of Baron Von Mueller, of Munich, and stands on a pedestal eighteen feet high, with a centre-piece of polished Missouri granite, on which are several bas-reliefs.

The statue of Humboldt, also the gift of Mr. Shaw to the city, was formally transferred to Mayor Henry Overstolz, Nov. 24, 1878, in Tower Park, in the presence of ten thousand citizens. It is of bronze, eleven feet in height, and rests on a granite pedestal eight feet high, which stands on a granite base. The statue, like that of Shakespeare, which faces it from a higher elevation one hundred yards west, is the work of Ferdinand Von Mueller, of Bavaria. It represents Humboldt as a naturalist at the age of thirty years. He is clad in the costume of a traveler of the olden time, and leans against the stump of a tree, seemingly in a reverie, holding a partially rolled map of South America in his left hand. His head is slightly bowed, and his eyes set as though he were looking down from some mountain height. The pedestal, which is about three feet square, is of polished Missouri granite, and in a panel on each of its four sides is a bronze medallion of twenty inches square. On the front medallion is the name of Humboldt in large letters. That at the south side is a landscape view of Mount Chimborazo, of which mountain Humboldt made the first ascent. On the east side is a portrait of Henry Shaw, surmounting the inscription, "In honor of the most accomplished traveler of this or any other age. Erected by Henry Shaw, 1876." The medallion on the north side represents a view in the Amazon valley. This statue with that of Shakespeare represents an investment of nearly one hundred thousand dollars.

In Bellefontaine Cemetery is a memorial shaft erected in 1879 to the memory of Bishop Marvin, of the Methodist Episcopal Church South. It was dedicated May 21, 1879, and cost two thousand five hundred dollars. It is constructed of Maine granite, is twenty-eight feet in height, and rests on a pedestal four feet in height. It bears the following inscription:

"Enoch Mather Marvin,
Bishop
Methodist Episcopal Church,
Born in Missouri, June 12, 1823,
Entered the Ministry 1841,
Ordained Bishop 1868,
Died in St. Louis, November 26, 1877."

The memorial in Lyon Park to Gen. Nathaniel Lyon, who was killed at the battle of Wilson's Creek in 1861, was erected by the efforts of an association of survivors of the war, which was permanently organized July 30, 1865, with the following officers: President, Dr. E. C. Franklin; Vice-Presidents, Col. Samuel A. Holmes, Brig.-Gen. Chester Harding, Maj. Wade, Capt. E. Meyer, Maj.-Gen. Osterhaus; Treasurer, Col. John S. Cavender; Recording Secretary, Brig.-Gen. Pile; Corresponding Secretary, Maj. Maurice.

At the first meeting the project of erecting a monument to Gen. Lyon's memory was inaugurated, and a committee to take charge of the matter was appointed, as follows: Gen. Pile, Maj.-Gen. Osterhaus, Dr. Stark, Col. C. D. Wolf, Dr. E. C. Franklin, Col. Simmons, and Maj. Stone, "with power to add other members, such as they may think best."

The subsequent progress of the movement up to May 2, 1874, is shown in a communication of that date from Isaac T. Shepard, "Secretary Lyon Monument Association," to Mayor Joseph Brown, in which he says,—

"In 1868 a public meeting of the friends of the deceased hero was called and held in the St. Louis court-house, to act in accord with the congressional purposes. The meeting resulted in the formation of an association. . . . This association has been in active operation ever since, and has made much progress. An equestrian colossal statue was determined upon, and steps at once taken to secure funds for its completion. About fifteen thousand dollars has been raised by private subscription and by a grant from the county court. Designs and models were submitted by different artists, and in 1870, J. Wilson McDonald was selected as the artist, and a contract with him executed for the work. The artist presented a model, which the association adopted, and went to work upon it. Payments were made according to progress, and now the plaster is completed and ready for the hands of the foundry. Up to this point all payments have been made, but for the completion of the statue, with its pedestal, more funds are needed, and as fast as procured the work will be pushed to completion, which we earnestly hope will be during the summer."

This communication was in response to one under date of April 22, 1874, received by Mayor Brown from Secretary of War Belknap, asking if the provisions of the act of Congress, approved March 5, 1869, ceding a portion of the old arsenal grounds, afterward Lyon Park, to the city as a public reservation, on condition that the monument to Gen. Lyon be completed within three years, had been fulfilled. The territory in question had been transferred to the city under instructions from the War Department bearing the date of Sept. 5, 1871. Under this condition of affairs the erection of the proposed bronze statue was abandoned, and a granite shaft was obtained instead.

The latter monument was dedicated Sunday, Sept.

13, 1874, in Lyon Park, the site being the spot where Gen. Lyon organized his military division for the campaign in Western Missouri, and where occurred the first military preparations for the Western army on the Federal side. The monument is of Missouri red granite, twenty-eight feet high, composed of a large die and an obelisk resting on a small base on top of a sloping and wide-spread knoll about ten feet high. Each side of the die has a deep circular niche, two of which once held large photographic pictures of Gen. Lyon, while the other two were left unoccupied. At the dedication there was a large military and civic procession from Central Turner Hall to the park, with Gen. A. L. Smith as the marshal, and addresses were delivered at the park by Hon. Joseph T. Tatum, Capt. Valentine Grimm, and Col. John A. Joyce, who were in Gen. Lyon's command. The military part of the procession was composed of all the surviving soldiers on the Federal side in St. Louis and vicinity, who organized in companies and regiments as on the day of the Wilson's Creek battle, and carried the same flags. In 1879 two bronze medallions, one a portrait of Gen. Lyon and the other an allegorical scene entitled "Bravery," were made for the niches, and were placed in them with imposing ceremonies on August 10th of that year, the eighteenth anniversary of Gen. Lyon's death. Each medallion is seventeen inches in diameter, and weighs over one hundred pounds.

In March, 1879, a monument to Gen. Sterling Price, located in Bellefontaine Cemetery, was completed. The association for the erection of this memorial was formed on the 4th of August, 1870. At the meeting for the organization of the society, ex-Governor Trusten Polk was chosen president, Mr. Shyrock vice-president, and Mr. Park secretary. Mr. Park divided the State of Missouri into a large number of districts, appointed leading citizens as solicitors for subscriptions to the monument fund, and inaugurated the plan on which the money was subsequently collected. Messrs. Park, Pallen, Shields, and Polk died before the completion of the work, but the association was revived June 8, 1876, when C. L. Thompson was chosen secretary. Mr. Thompson adopted Mr. Park's plan, and prosecuted it to a successful issue, a sum sufficient to carry out the object of the organization being obtained in 1877.

The officers at the time of the completion of the monument were Edwin Harrison, president; Dr. McPheeters, vice-president; and Mr. Thompson, secretary and treasurer. These officers, with Silas Bent, James C. Edwards, John E. Liggett, and H. Clay Hart, constituted the board of directors. The material used in the construction of the monument was the Hurricane Island, Me., gray granite. A contract for the stone, and for the cutting and polishing of the material, was entered into with J. E. Hall, afterwards associated with Hon. Celsus Price, a son of the general. The monument was made near Portland, Me., and the twenty-five tons of granite used in the structure was placed in position in the cemetery early in March, 1879. The site of the monument is on the elevated knoll near the intersection of Lawn, Balm, and Woodbine Avenues, a short distance west of the main gateway on Bellefontaine road. A few yards west of the Price monument are the Masonic grounds; on the southwest is the Blow monument; on the southeast the red granite vault of George R. Taylor, and on the north the yellow stone tomb of Dr. D. S. Brock. The monument to Gen. Price is in the style of a pointed Egyptian monolith, and on the order of an obelisk. The lowest base is a stone eight feet square and one and one-half feet thick. The second base is a stone five feet eleven inches square and fourteen inches thick. The third base is a stone four feet square and thirteen inches thick. The die is a cubic stone measuring three and a half feet on its sides, and is the only portion that is polished. Above this is the plinth, a stone three feet square and fourteen inches thick. On the plinth rises the pyramidical shaft, thirty-three inches square at the bottom and twenty inches square at the top, and twenty-four feet long. This shaft is one solid piece of stone, weighing about fifteen tons. The total height of the monument is thirty-two feet and five inches. The third base is cut in as a letter S moulding. The die has chamfered corners, leading to a pendant block cornice about the plinth. All parts of the monument except the die have a hammered and unpolished face, giving the stone an appearance similar to that of the same kind of granite used in the fronts of the St. Louis custom-house. Three sides of the die are so polished that they have reflecting surfaces. The fourth or south side of the die is equally polished, and has cut into it in bas-relief a circular shield, with four spear-points projecting outside of the circumference line and at right angles to each other. Around the periphery of the shield, and extending two inches towards the centre, are groups of bar and parallel lines. In the centre of this shield is cut in block letters,—

Sterling
Price,
born in
Prince Edward Co., Va.,
Sept. 14, 1809,
Died Sept. 29, 1867.

On the south side of the second base is cut in large block and raised letters the word "Price." On the south side of the plinth is cut a large monogram consisting the letters S. P.

In the year 1880 there was placed in Bellefontaine Cemetery a monument to the memory of Col. John O'Fallon, which at the time was said to be the largest private monument in any cemetery in the United States. It consists of a plain pedestal of Hallowell granite surmounted by a figure of "Hope" thirteen feet in height, the whole weighing eighty tons, costing twenty thousand dollars, and rising to the height of sixty feet.

On the 14th of October, 1879, a certificate of incorporation was granted to the Blair Monument Association, the object of which was to take such steps as might be necessary to secure the erection of a suitable monument to the memory of Gen. Francis P. Blair. The names of the members forming the association as incorporated were Peter L. Foy, J. B. McCullagh, John Finn, Celsus Price, R. J. Howard, Daniel Able, John G. Prather, E. C. Cabell, Thomas Richeson, John D. Finney, D. H. Naylor, Chas. M. Elleard, James L. D. Morrison, John S. Griffin, Ed. P. McKay, James O. Broadhead, E. M. Joel, John J. Roy, Dr. W. N. Brennan, Gerard B. Allen, O. D. Filley, James J. Lindley, Henry C. Brinckmeyer, Wm. F. Filley, Michael Doyle, Samuel Simmons, Wm. Sells, Erastus Wells, E. S. Filley, Chas. Gibson, James B. Eads, George Knapp, O. B. Filley, Louis Nieschied, Adolphus Busch, St. Louis; James Rollins, Columbia; John W. Resi, Lafayette County; J. L. Stephens, Boonville; James Archer, Colorado; Alexander W. Doniphan, Liberty, Mo.; Thomas C. Reynolds.

The association was organized with R. J. Howard, president, and R. J. Griffin, secretary, and on the 12th of May, 1882, gave notice that "the contracts for the statue had been let and the monument will be completed at an early day."

Property, Debt, Revenue, Expenses.—The mayor of St. Louis, Hon. Wm. L. Ewing, in his last annual message (May 19, 1882) to the Municipal Assembly, says, "The finances of the city are in an eminently satisfactory condition. The increased assessment and valuation of property for taxation will increase the current revenue of the year. The tax levy has been fixed at the rate of last year, to wit: $1.75 per $100 valuation."

The basis of assessment in St. Louis, the property subject to taxation at the end of the fiscal year, May, 1882, is thus returned by David Powers, president of the board of assessors:

ABSTRACT OF THE TAXABLE VALUES OF THE CITY OF ST. LOUIS FOR THE TAXES OF 1882.

New Limits.	Real.	Personal.	Total.
23d Ward	$2,600,990	$307,430	$2,908,420
24th "	791,130	55,920	847,050
26th "	1,871,850	215,150	2,087,000
27th "	2,677,880	152,370	2,830,250
28th "	7,186,170	728,120	7,914,290
Railroads	15,480		15,480
Totals	$15,143,500	$1,458,990	$16,602,490
Manufacturers exempt from city tax			16,320
Total subject to city tax			$16,586,170

	Real.	Personal.	Total.
Old limits	$146,536,640	$28,808,920	$175,345,560
Manufacturers exempt from city tax			211,140
Total subject to city tax			$175,134,420

RECAPITULATION.

	Real.	Personal.	Total.
New limits subject to city tax	$16,586,170		$16,586,170
New limits exempt from city tax		$16,320	16,320
Old limits subject to city tax	175,134,420		175,134,420
Old limits exempt from city tax		211,140	211,140
Grand totals	$191,720,590	$227,460	$191,948,050
Value of steamboat property included in above values			$957,990

Omitted Property.	Real.	Personal.	Total.
Old limits for the year 1880	$130		$130
" " " " " 1881	1810	$150	1960
Total	$1940	$150	$2090
New limits for the year 1881	3200		3200
Grand total	$5140	$150	$5290

Ex-Mayor Overstolz said, in 1880, that these taxable values were about three-fifths of the market values; that is to say, that the $191,948,050 represents about $320,000,000 actual property. Charles W. Knapp, however, in a recent publication,[1] contends that assessments are made very nearly upon the basis of actual values. In 1870, it is to be observed, the relation of assessed values to census values in Missouri was very nearly as five to twelve, so that it is only a fair inference that the estimate of Mr. Overstolz is about correct.

The basis for estimating the municipal wealth of St. Louis is not more satisfactory than in other large

[1] St. Louis, Past, Present, and Future.

cities, because the real estate values are necessarily only approximations, and a large portion of the personal property either evades or is not subject to taxation. The aggregate assessment has been reduced the last few years owing to the exemption of church property and that held for charitable uses, under the new Constitution, and to other causes. It was over $181,345,560 at the time of the adoption of the new City Charter in 1877, and four years afterwards, in 1881, the assessors reported that the assessed value of real estate and personal property in the city of St. Louis subject to taxation only amounted to $167,336,600. This to a stranger would indicate a falling off in wealth, when of course the reverse is the case. The taxable values for the taxes of 1882 amount, as we have seen, to $191,948,050, and if we add to this assessment a rough estimate of the values not included therein, and the $33,758,367 for real estate exempt from taxation, we will arrive nearer to the true wealth of the city.

The real estate exempt[1] from taxation in 1881 was as follows:

1.	Value of property belonging to the city					$18,641,510
2.	Value of property belonging to the United States					5,787,800
3.	Value of property belonging to the State					75,000
4.	Value of property belonging to the public schools					2,382,342
7.	Value of property belonging to the Mullanphy Emigrant Relief Fund					222,076
10.	Value of property special charter exemptions (not before classified)					646,365
11.	Value of property erroneously classified as exempt (now taxable)					6,100
5.	Value of property belonging to		Private Schools & Convents			1,418,465
6.	Value of property belonging to			Churches		3,610,586
8.	Value of property belonging to				Cemeteries	345,352
9.	Value of property belonging to					Private Hospitals, Asylums, & other purely Charitable Institutions 622,741
$233,445	Baptist			$233,445		
91,550	Christian		$30,300	61,250		
95,943	Congregational			94,654	$1,289	
355,038	Episcopalian			314,644	11,134	$29,260
422,921	German Evangelical		24,810	362,426	35,685	
131,645	English Evangelical Lutheran		32,709	70,331	23,154	5,460
64,299	Hebrew			64,299		
210,505	Methodist		3,540	913,165	1,800	12,000
30,710	Methodist Episcopal			30,710		
668,464	Presbyterian			630,914		37,550
3,404,352	Roman Catholic		1,278,985	1,537,948	120,870	466,549
43,240	Unitarian		26,440	16,800		
38,108	Medical		15,940			22,168
206,924	Protestant (non sect.)		5,750		151,420	49,754
$5,997,144			$1,418,465	$3,610,586	$345,352	$622,741
	Grand Total					$33,758,367

The assets of the city, as given in the last report of the comptroller, are as follows:

First lien upon the earnings of the Pacific Railroad Company, bearing interest at 7 per cent. per annum		$700,000.00
Stock St. Louis Gas-Light Company, par value $10,000; estimated value		60,000.00
Real estate and personal property:		
Water-works and grounds	$7,183,090.00	
Public parks	5,359,579.00	
Public markets and grounds	711,650.00	
Engine-houses and grounds	153,833.00	
Police stations and grounds	146,573.00	
Hospitals and grounds	1,108,880.00	
Work-house and House of Refuge and grounds	148,495.00	
City hall, court-house, and Four Courts and jail and grounds	4,286,700.00	
Other real estate	156,520.00	
Personal property	497,420.00	19,752,740.00
		$20,512,740.00

A part of these assets are productive, but the revenue derived from them is variable, and the

[1] Section 6 of Article X. of the Constitution of Missouri directs that

"The property, real and personal, of the State, counties, other municipal corporations, and cemeteries shall be exempt from taxation. Lots in incorporated cities and towns, or within one mile of the limits of any such city or town, to the extent of one acre, and lots one mile or more distant from such cities or towns, to the extent of five acres, with the buildings thereon, may be exempted from taxation when the same are used exclusively for religious worship, for schools, or for purposes purely charitable; also such property, real or personal, as may be used exclusively for agricultural or horticultural societies: *provided*, that such exemptions shall be only by general law." Section 7 of the same article says, "All laws exempting property from taxation other than the property above enumerated shall be void."

Section 11 of Article II. declares that

ceipts and expenditures from each particular source go into the general account. There are also in the city sinking fund assets to the amount of $426,246.53, of which $100,000, however, is unavailable. The resource from this fund for the fiscal year 1882 was $76,526.52, applicable to the liquidation of public indebtedness. This fund, however (although since its organization in 1870 it has purchased and retired $1,894,000 of the municipal debt), is not a true sinking fund in the proper sense of the word. It is not the product of a special permanent tax, but of an annual appropriation of $10,000 from general revenue, and it is not allowed to accumulate at compound interest on the principle of forming a fund equal to the payment of the public debt at maturity, but is simply used to purchase and cancel the interest-bearing obligations of the city. A regular sinking fund, produced by taxation, of not less than $200,000 per annum, would be required to meet and control the debt which is convertible into 10-20 renewal bonds.[1]

[1] "Neither the General Assembly, nor any county, city, town, township, school district, or other municipal corporation, shall ever make an appropriation, or pay from any public fund whatever, anything in aid of any religious creed, church, or sectarian purpose, or to help to support or sustain any private or public school, academy, seminary, college, university, or other institution of learning controlled by any religious creed, church, or sectarian denomination whatever; nor shall any grant or donation of personal property or real estate ever be made by the State, or any county, city, town, or other municipal corporation for any religious creed, church, or sectarian purpose whatever."

[2] Article XIV., Section 2, of the city charter is as follows:

"There is hereby created a sinking fund for the city of St. Louis, the proceeds of which shall be appropriated exclusively to the purchase of bonds issued by said city. Said fund shall consist of three-fourths of the net proceeds of the sales of the city commons in the year 1854, and three-fourths of the net proceeds of city commons and other lands belonging to the city when further sales shall be made, and three-fourths of the net proceeds of all sales of the city commons and other lands belonging to the city subsequent to the year 1854 and prior to the passage of this charter, also all railroad stock belonging to the city in any railroad terminating in the city, or opposite to the same in the State of Illinois; and, in addition thereto, the treasurer shall, on the first Monday in October in each and every year, pay over to the fund commissioners the sum of ten thousand dollars out of the general revenue of the city, which, together with the money, notes, and railroad stock above mentioned, shall constitute a perpetual and irrevocable sinking fund for the payment of the city debt."

Section 4 of the same article directs the fund commissioners, as soon as money comes in their hands in suitable amounts, to "invest the same in bonds of the city, and when purchased they shall be canceled in the presence of the Committee on Ways and Means, which cancellation shall be recorded in the comptroller's office, together with all coupons having ten years to run from the date of purchase."

LIABILITIES.

The bonded debt of St. Louis at the end of the fiscal year, May, 1882, was	$22,311,000.00
The floating debt consists of so much as the city may be compelled to pay in the final settlement of the Gas Company claims and others growing out of those disputes, the amount of all the claims and interest aggregating	1,420,922.63

The annual interest charge upon the bonded debt of St. Louis is $1,350,280 and the purchase of principal brings it up to nearly $1,500,000. This is a permanent charge upon the revenue, for which there are special provisions made. In Mayor Ewing's message of May 19, 1882, the expenditures

For fiscal year ending April 10, 1882, were	$5,213,793.23
Of which there was paid for interest on debt and reduction of principal	1,693,766.79
The revenue from all sources for this fiscal year was	5,488,646.34
Estimated revenue for current year (1882–83)	5,150,554.82
Of which $3,469,863.05 is available for general purposes.	

The comptroller, in his report, says,—

"The receipts applicable for interest and general municipal purposes for city and former county during the four years preceding the adoption of the scheme and charter were as follows:

	Receipts from all sources.
Fiscal year 1873–74	$4,175,540.77
" 1874–75	3,949,755.85
" 1875–76 (tax rate increased)	5,167,551.48
" 1876–77	5,300,841.30

"Receipts for city and new county since the adoption of the scheme and charter, for the same purposes, were as follows:

Fiscal year 1877–78	$4,594,502.36
" 1878–79	4,124,731.58
" 1879–80	4,301,015.22
" 1880–81	4,191,345.89
" 1881–82	4,188,225.73
" 1882–83 (estimate)	4,274,000.00"

To a certain extent, however, these figures are illusory. They do not represent the amount taken from the people by taxation, direct and indirect, nor do they represent actual expenditures.

The comptroller also, in his general summary, gives the following abstract of the financial transactions of the past fiscal year:

Resources, as shown by "Statement A," as follows:	
1st. Interest and public debt revenue	$1,471,683.98
2d. Municipal revenue	2,890,258.01
3d. Water-works revenue (exclusive of transfer to interest and public debt revenue for interest on water bonds)	554,596.43
4th. Harbor and wharf revenue	90,296.40
5th. Collections set apart for special purposes	374,844.91
6th. Renewal bonds	106,966.61
	$5,488,646.34
Disbursements, as shown by "Statement B," as follows:	
1st. Interest and valid indebtedness existing prior to constitution and charter	$1,460,273.54
2d. General disbursements municipal revenue	2,758,024.31
3d. Harbor and wharf	62,612.84
4th. Water-works (excepting interest on water bonds)	364,906.85
5th. Paid out of special collections and proceeds of bonds issued for special purposes	274,158.46
6th. Redemption of bonds	250,000.00
7th. Auditor's warrants unpaid April 12, 1881	43,817.23
	$5,213,793.23
Condition of the treasury, as shown by "Statement C," as follows:	
Balance in treasury April 10, 1882	$362,441.03
Amount due treasury	178,527.41
Total amount due and in treasury	$540,968.44
Chargeable against this	463,320.34
Surplus unappropriated	$77,648.10

This again is a book-keeper's account, and does not give the information sought as to the costs and expenses of city government in St. Louis. Let us turn to still another account, that contained in the report of the collector of revenue. He returns the following:

COLLECTIONS FOR THE STATE.

Taxes and Interest.

Current taxes for 1881	$610,416.53
Back taxes of 1881	4,150.00
" " " 1880	44,813.03
" " " 1879	13,502.86
" " " 1878	5,018.32

Salaries of collector and deputies		$44,394.42
Expenses:		
Stationery, printing, repairs, &c.	$3,760.97	
Investigation of titles on back tax bills of 1879 and 1880	5,538.00	
		9,098.97
Surplus commissions paid over as follows:		
To the State	$1,030.93	
To the public schools	906.58.5	
To the city	4,232.04	
		6,169.55.5
Commissions on hand		1,891.32
		$61,554.26.5

A very slight comparison of these two reports of the comptroller and collector will suffice to show that each contains items of taxation not given in the other, but which still the people must pay. The collector's report takes no note of receipts from the water rates, or a part of the harbor board receipts, and of those of special collections set apart for special objects. The comptroller's report takes no note of school tax and State tax. The school tax is of course a State tax, but it is a special levy. It is part of the municipal burden of St. Louis, and no computation of taxes which does not include it can be considered complete. It is our object to present the actual facts as fully and as perfectly and intelligibly as possible, and hence we wish to show, actually and relatively, the amount of pressure exerted by the weight of government in St. Louis.

Rate of Taxation.—Says Comptroller E. A. Adreon: "The rate of city tax for the year 1882, on the one hundred dollar valuation, is seventy-five cents for interest and public debt revenue and one dollar for municipal revenue." But how is this arranged? Turn to the comptroller's "Statement D," in which are given the "estimated resources for current fiscal year, from April 11, 1882, to April 9, 1883." The rates and the rate being the same, this estimate will apply to the revenue collected for the fiscal year ended April 11, 1882:

I.—INTEREST AND PUBLIC DEBT REVENUE.

Taxes 1882:		
Seventy-five one hundredths of one per cent. on $172,700,000, estimated value of real and personal property (except steamboats) in old limits, less twelve per cent. allowed for delinquency		$1,139,820.00
One-tenth of one per cent. on $16,600,000, estimated assessed value of real and personal property in new limits, less twelve per cent. for delinquency		14,608.00
Railroad taxes, 1882		10,000.00
Delinquent taxes		102,000.00
Transfer from water-works revenue for interest on water bonds		140,000.00
Interest on current deposits		8,500.00
Pacific Railroad, for interest on $700,000 loan.		49,000.00
Unappropriated balance to credit (April 11, 1882)		11,763.77
		$1,475,691.77

II.—MUNICIPAL REVENUE.

Taxes 1882:		
One per cent. on $172,700,000, estimated assessed value of real and personal property (except steamboats) in old limits, less twelve per cent. allowed for delinquency		1,519,760.00
One-tenth of one per cent. on $1,000,000, estimated assessed value of steamboat property		1,000.00
Four-tenths of one per cent. on $16,600,000, estimated assessed value of real and personal property in new limits, less twelve per cent. allowed for delinquency		58,432.00
Railroad taxes, 1882		13,400.00
Delinquent taxes		150,000.00
Licenses:		
Commission merchants	$15,000 00	
Dram-shops	185,000.00	
Dog	7,500.00	
Manufacturers	95,000.00	
Merchants	185,000.00	
Vehicles	75,000.00	
Miscellaneous licenses	70,000.00	
		632,500.00
Miscellaneous Revenue:		
Building permits	$4,000.00	
Boiler inspections	6,000.00	
Fines and fees	60,000 00	
Markets	33,000.00	
Rents	5,000.00	
Recording fees	25,000.00	
Scales	30,000.00	
Weights and measures, inspection of	9,000.00	
		172,000.00

III.—HARBOR FUND.

Wharfage dues, rents, and other sources relating to harbor and wharf.	$65,000	
Unappropriated balance to credit, April 11, 1882	15,273.84	
		80,273.84

IV.—WATER-WORKS REVENUE.

Licenses, taps and permits	$750,000.00	
Unappropriated balance April 11, 1882	5,309.31	
	$755,309.31	
Less amount to be transferred to interest and public debt revenue for interest on water bonds	140,000.00	
		615,309.31
State's portion of cost of assessing revenue	$22,500.00	
State's appropriation for support of insane	15,000.00	
Opening streets, estimated collection of special tax bills issued	34,527.41	
Opening streets (new), estimated collection of special tax bills to be issued	20,000.00	
Dividends on gas stock	5,000.00	
From railroads, for Tayon Avenue bridge	15,000.00	
Miscellaneous collections	30,000.00	
Unappropriated balance April 11, 1882	10,160.49	
		2,699,279.90
V.—Proceeds of renewal bonds		205,000.00
VI.—Proceeds of sale of real estate		75,000.00
Total		$5,150,554.82

Statement E, the estimate of expenditures for the current fiscal year ending April 9, 1883, is as follows:

Costs, legal expenses, interest, discount, and expenses on bonded and temporary debts (including $65,940 sinking fund coupons), judgments, and sinking fund appropriation required by charter	$1,475,000.00
General expenses for municipal revenue	2,698,975.00
Harbor and wharf	80,273.84
Water-works	615,309.31
Bonds maturing	205,000.00
Purchases of real estate	75,000.00
Total	$5,149,558.15

A brief analysis of some of the foregoing figures will be advantageous in explaining the main avenues of expenditure and the main sources of revenue; and, first, of the debt, the city auditor's report contain the following:

RECAPITULATION OF CITY'S BONDED INDEBTEDNESS.

General bond account—city:		
For general purposes and renewal bonds	$7,738,000	
Real estate, etc	595,000	
Improvements of streets	70,000	
Water-works, old	127,000	
		$8,530,000
General bond account—county:		
Home of the friendless	$20,000	
Insane asylum	100,000	
County jail	500,000	
General county purposes	1,100,000	
Renewal bonds	650,000	
		2,370,000
Loan to Pacific Railroad Company (by old St. Louis County)		700,000
Bridge approach bond account		461,000
Fire department bond account		100,000
Harbor and wharf bond account		641,000
Park bond account, county		1,900,000
Tower Grove Park bond account		346,000
Sewer bond account		1,119,000
Water bond account		5,200,000
Water-pipe special tax refunding, bond account		800,000
		$22,167,000

Thus we have,—

	Cost.		Estimated value.
Parks	$3,624,663		$5,359,579
Water-works	6,127,000	(bonded debt)	7,183,090
Sewers	1,119,000	" "	
Harbor	641,000		
Improved real estate, —markets, engine-houses, courts, hospitals, etc	6,712,651		6,712,651

The water-works, which represent an indebtedness of $6,127,000, besides so much of their cost as may be chargeable to the general funds and accounts current and to renewal bonds, have yielded to the city since they were first undertaken an aggregate of $9,001,184 revenue, or, deducting cost of collection, a net of $8,500,000. The income from them for the last fiscal year was $706,145, less cost of collection (5.02 per cent.). This income is applied, in round numbers, exclusively to the payment of interest on the water bonds and to the costs of current expenses, improvements, and extensions of the service. If the Water Department income had a sinking fund to take up the renewal bonds for its own indebtedness, it could be called strictly self-sustaining. As it is, the water service is rather expensive.

The sources of revenue (calling the water rents and water liabilities equal) were as follows for the last fiscal year:

From taxes and interest on revenue account (including $167,000 transferred water revenue)—rate, $\frac{75}{100}$ of one per cent		$1,471,683.9
From taxes and licenses, fees, fines, commissions, rents, benefit assessments, sales, etc.,—rate, one dollar per hundred		2,890,25[illegible]
From harbor and wharf		90,296.4
Special collections for special ends		374,844.0
Renewal bonds		106,966.6
Receipts (less water revenue)		$4,767,049.9
The disbursements were as follows:		
For interest and debt		1,460,273.8
For municipal revenue (including leading items):		
Cost of assessment	$50,640.03	
City Hall	13,234.39	
Courts and court-houses	107,935.21	
Elections and registration	4,329.47	
Fire department	330,320.99	
Health department	350,489.81	
House of Refuge	33,944.14	
Insurance	8,429.25	
Jail	31,070.51	
Jury and witness fees	31,999.70	
Lighting city	278,672.01	
Markets	16,409.15	
Municipal Assembly	25,468.52	
Police	474,999.15	
Printing and stationery	15,233.54	
Parks	73,102.95	
Sewers	83,806.76	
Streets	416,037.31	
New work,—streets, sewers, bridges	730,079.72	
Recorder of deeds	22,493.45	
Salaries	50,615.95	
Work-house	38,716.79	
		2,758,024
Harbor and wharf		62,61[illegible]
Special purposes		274,15[illegible]
Redemption of bonds		250,00[illegible]
Auditor's warrants		45,3[illegible]
Total (less water accounts)		$4,681,8[illegible]

Recapitulation.

Municipal	$4,681,886.38
State, direct	689,933.72
" license	218,328.60
" schools	777,986.57
Water rents	706,145.65
Total	$7,074,280.92

This represents the total weight of State and municipal tax, direct and indirect, upon St. Louis [illegible] subject to a direct tax upon the assessed [illegible] real and personal property ($172,700,000 [illegible] on the $100, with allowance made for [illegible] quencies. Upon the supposed actual values of [illegible] and personal property, it would represent a direct [illegible] of $2.22 on the $100, and good government [illegible]

dom purchased so cheaply.[1] Of these total disbursements on account of expenditures there are derived,—

From licenses	$910,406.29
Rents, interests, fees, commissions, etc.	1,390,460.91
Special collections	374,844.91
Bond revenues	106,966.61
Total	$2,782,678.72

having to be raised by direct tax $4,291,602.20, equal to a tax of $2.75 on the $100, with allowance for delinquencies. Of the entire tax pressure, the water supply is ten per cent., in round numbers, the cost of schools eleven per cent., debt twenty per cent., police and fire twelve per cent., health and streets, including new work, twenty-five per cent.

OFFICIAL ASSESSMENTS FROM 1864 TO 1882.

Year.	City of St. Louis. Real Estate.	City of St. Louis. Real and Personal.
1864	$53,205,820	$63,059,078
1865	73,960,700	87,625,534
1866	81,961,610	105,245,210
1867	88,625,600	112,907,660
1868	94,362,370	116,582,140

[1] Section 12 of Article X. of the Constitution of Missouri limits the debts of cities, etc., as follows:

"No county, city, town, township, school district, or other political corporation or sub-division of the State shall be allowed to become indebted in any manner or for any purpose to an amount exceeding in any year the income and revenue provided for such year without the assent of two-thirds of the voters thereof voting at an election to be held for that purpose, nor in cases requiring such assent shall any indebtedness be allowed to be incurred to an amount, including existing indebtedness, in the aggregate exceeding five per centum on the value of the taxable property therein, to be ascertained by the assessment next before the last assessment for State and county purposes previous to the incurring of such indebtedness; *provided*, that on such assent any county may be allowed to become indebted to a larger amount for the erection of a court-house or jail; and *provided further*, that any county, city, town, township, school district, or other political corporation or sub-division of the State incurring any indebtedness requiring the assent of the voters as aforesaid shall, before or at the time of doing so, provide for the collection of an annual tax sufficient to pay the interest on such indebtedness as it falls due, and also to constitute a sinking fund for payment of the principal thereof within twenty years from the time of contracting the same."

Section 13 of the same article declares that "private property shall not be taken or sold for the payment of the corporate debts of a municipal corporation."

Section 8 of Article IX. of the same Constitution says,—

"The corporate authorities of any county, city, or other municipal division of the State having more than two hundred thousand inhabitants, which has already exceeded the limit of indebtedness in Section 12 of Article X. of this Constitution, may, in anticipation of the customary revenue thereof, appropriate, during any fiscal year, toward the governmental expenses thereof a sum not exceeding seven-eighths of the entire revenue applicable to general governmental purposes (exclusive of the payment of the bonded debt of such county, city, or municipality) that was actually raised by taxation alone during the preceding fiscal year; but until such excess of indebtedness has no further bonded debt shall be incurred, except for the renewal of other bonds."

Year.	City of St. Louis. Real Estate.	City of St. Louis. Real and Personal.
1869	$113,626,110	$138,523,480
1870	119,080,800	147,969,660
1871	123,833,950	158,272,430
1872	129,235,180	162,689,570
1873	149,144,400	180,278,950
1874	141,041,480	172,109,270

								$23,311,000

Sewerage System.—As early as 1778 provision was made for draining the town of St. Louis, as appears from the fact that on the 15th of March of that year the inhabitants assembled at the close of the mass

"in the government hall, in presence of Don Francisco Cruzat, Lieutenant-Governor, to consider as to the most convenient means of giving a proper drainage to the rain-water that settles in the back lots of the village along the back street; and they agreed that a gutter or canal should be made at once down the street or road between the lots of François Bissonnet and Conrad (now Chestnut) Street, to draw the water to the Mississippi, and to allow a constant drainage to the water from the gullies and sink-holes; and for this purpose they named Lapierre, Taillon, Deschennes, Lachause, and Baccaunet to devise a plan for the same and have it done."

Those present and signing the official record were Lachause, Baccaunet, Deschennes, Taillon, Bissonnet, Conand, Dubreuil, A. Chouteau, Labuscière, Barada, Terraute, Benito, Jos. Labrosse, Ortes, Roubien, Bargas, Francisco Cruzat.

No action looking to the construction of a general system of sewerage, however, was taken until 1843, in which year the Legislature granted the city a new charter, among the provisions of which was one giving the mayor and City Council power by ordinance to "establish, erect, and keep in repair bridges, culverts, and sewers, and regulate the use of the same; to establish, alter, and change the channel of watercourses, and to wall them up and cover them over." In the message of the mayor, Hon. John M. Krum, to the City Council on the 8th of May, 1848, it was stated that the want of proper sewers was a serious cause of complaint on the part of the citizens. St. Louis, he added, was favorably situated for the construction of sewers, but the city finances would not then admit of the expenditure. Mayor Krum, however, recommended that the subject be kept steadily in view in all the street improvements thereafter made. "Sewers," he said, "are so essential to cleanliness, and contribute so largely to comfort and convenience, that their construction in this city cannot and will not be long delayed. If the public mind is not now prepared to sanction the undertaking it will soon be. Of this I have no doubt." Mr. Krum's prophecy was realized much sooner than he anticipated, for the great cholera epidemic of 1849 directed public attention most forcibly to the vital importance of at once beginning the construction of an efficient system of sewerage. Prior to this time the city had depended mainly upon surface drainage, and within the city limits were a number of sluggish streams and stagnant ponds, into which the drainage of the most thickly-settled quarters found its way. The water thus became fearfully contaminated, exhaling noxious vapors and miasma, which were a prolific source of disease. The cholera made its appearance early in January, and was undoubtedly stimulated by the wretched sanitary condition of the city. In those days the topography of St. Louis was very different from what it is at the present time. There were sink-holes where level streets now extend, and knobs, mounds, and hillocks. As the neighboring grounds were cleared away and plowed over, and there began to be accumulations of garbage in the city which it was necessary to remove, the great sink-holes that used to gape over the surface from Eighth Street to Twentieth Street, and from Chestnut to Salisbury Streets, became dumps, and their outlets became obstructed. In course of time the city was surrounded by stagnant ponds which turned green in summer, and from their fetid waters was wafted the breath of the dreadful malaria. For years St. Louis was noted far and near as the "sickly city," and men avoided it, travelers hastened their journeys, and business men from abroad pressed their affairs to a speedy conclusion and hastened away from the place.

Among the most noted of these poison laboratories with which St. Louis was afflicted a generation ago was that situated about where are now Eleventh and Twelfth and O'Fallon Streets and Cass Avenue, extending north of the last-named street for nearly a block. It was called "Kayser's Lake." Mr. Kayser was at that time city engineer, and the residents in its neighborhood, no doubt thinking he was in some way responsible for the continuance of the nuisance, dubbed it "Kayser's Lake." It was a very large pond, the basin of a sink-hole whose outlet had been stopped up; and it was a very ugly body of water which in summer changed to a yellow-green, and emitted vapors freighted with chills, fevers, and death. Means to drain it effectually were demanded. It was deep and wide then, and to fill it up at once would be an undertaking not to be thought of. An underground sewer was the practical thing by which to accomplish the desired end. Surveys were made, and "Kayser's Lake" became the location of the Biddle Street sewer, the first of the great underground drainage canals with which St. Louis is supplied. This was about 1851–52.

The dam across the stream, and the growth of the city, with the rapid accumulation of garbage, filled up the lower portion of the course of Mill Creek, and Chouteau's Lake became an unsightly pond. The water which fell upon seven thousand acres of ground was all collected and forced down the valley of Mill Creek, and hundreds of acres of land on which

city is now built were converted into swamps when the heavy spring rains fell. It became necessary to do something with Mill Creek, and a vast arched underground canal was projected.

St. Louis is admirably located for drainage purposes, its site descending in a series of terraces to the river. Its surface, almost impenetrable by water and exhibiting no extensive levels, possesses all the conditions requisite for perfect drainage; but before the streets were graded and sewers constructed the ground was broken by ridges which cut off large districts from all direct drainage to the river, and there were, as stated above, numerous basins or depressions of considerable area which had no natural outlet for surface water except through sink-holes and crevices of the rocks.

These natural outlets sufficed for a time, but as the city grew and grades were established and elevations leveled off, the earth was deposited in the sink-holes. Consequently the natural drains were clogged, and noisome pools of stagnant water, into which most of the city's filth was swept, were created. In time, as already indicated, malaria was generated, and, according to a local writer, "an atmosphere of chills and fever seemed to envelop the town."

The problem of constructing a complete system of drainage was carefully studied before the work was finally undertaken, and at first it presented very unpromising features to the engineers. Elaborate surveys, however, developed the fact that while there were few natural water-courses, there was no serious obstacle to a complete and effective drainage. Mill Creek, cutting through the centre of the city, was really the only natural channel practicable for a large sewer, but there were several important basins entirely without outlets, and to tap these was the necessity. The succession of ridges rising one behind the other which diversified the surface of the city constituted a system of barriers which had to be pierced through by the sewers in order to drain the stagnant waters beyond, and it is this method of piercing through a ridge to tap the inclosed basin that distinguishes the St. Louis sewer system.

The principal basins were as follows: Beginning on the north, the ridge at the southwest of Gingrass Creek enclosed a broad depression that had no surface outlet. Then in the vicinity of Fifteenth and Benton was another region that required artificial drainage. From this range southward along Twentieth Street runs a rocky ridge which constitutes a divide between the river slope and a depressed region farther west. This depression was formerly filled with sink-holes, the drainage of which had cut natural channels through the rocks under the ridge. Rocky Branch found its way under the divide by these channels and broke out on the eastern slope. From the fact that the ridge, so to speak, bridged these drains, it was called the Natural Bridge.

West of Grand Avenue, in Butchertown, was still another sink-hole basin, comprising about one thousand acres. The water from this region, draining through under the Grand Avenue ridge, used to come out about Elliott Avenue, which was the head of Rocky Branch. About the neighborhood of Twentieth and Wash Streets was a depression which had to be tapped. Passing on to the southward the valley of Mill Creek, comprising some six thousand acres, shed all its water, freighted with filth and surface-washings, into Chouteau's Pond. This eventually became an unwholesome slough, and was made the central artery of the great system. South of Mill Creek there was a broad stretch of land that slopes with comparative evenness from the region of the city hospital to the river. At Arsenal Street, however, the ridge incloses another depression with walls of stone. Still farther south at Chippewa Street was one more sink-hole basin, and in Carondelet at Stein Street was another.

The need of a thorough system of sewerage having, as we have shown, been brought into conspicuous prominence by the frightful mortality from cholera in the winter of 1849, the Legislature passed an act authorizing the City Council of St. Louis to borrow a sum not exceeding fifty thousand dollars for the construction of a sewer or sewers, "commencing at any point on or near Seventh Street, and north of Washington Avenue, as may be deemed most desirable, to drain off all the water that collects at intersections of cross streets with Seventh Street and north of Washington Avenue." This act was approved March 12, 1849. About the same time the Legislature passed the first act (also approved March 12, 1849) "to provide a general system of sewerage in the city of St. Louis." The act was as follows:

"*Be it enacted by the General Assembly of the State of Missouri as follows:*

"1. The mayor and City Council of St. Louis shall cause by ordinance the city to be laid off into districts to be drained by principal and lateral or tributary sewers, having reference to a general plan of drainage by sewers for the whole city, and number and record the same.

"2. Whenever a majority of the owners of real estate within any district shall petition for the construction of the sewers in said district, the City Council shall have power by ordinance to levy and collect a special tax on the real estate within said district so drained, not to exceed one-half of one per centum per annum on the assessed value of said real estate, for the purpose of constructing said sewers, which tax shall be annually levied and collected as other city taxes, and shall constitute a lien on the real estate on which it is assessed, and shall not be repealed

or altered until the debt created thereby shall have been fully paid.

"3. Whenever a petition signed as aforesaid is presented to the City Council, they shall provide by ordinance for the letting and construction of the sewers or such parts thereof as shall be necessary, and may from time to time extend, enlarge, or alter the same, under such terms and on such conditions as they may deem necessary.

"4. The mayor and City Council, upon the presentation of a petition as aforesaid, may borrow any sum of money necessary for the construction of the sewers in any district, and issue the bonds of the city for the same, payable and predicated in interest and principal upon the tax in the second section of this act mentioned.

"5. All moneys collected under and by virtue of this act shall be applied to the district from which they are so collected, and to no other purpose or use."

Prior to the passage of this act a number of short box drains had been built across the public landing to the river, nearly or quite all having been constructed by private parties for the drainage of their own property. In March, 1850, the construction of the first public sewer was commenced. It was known as the Biddle Street sewer, and was intended to drain a large pond formed by the closing of sink-holes or openings in the rock which were the natural outlet for the drainage of a large basin centering in the vicinity of Ninth and Biddle Streets.

On the 27th of July, 1850, the mayor, Hon. Luther M. Kennett, approved an ordinance passed by the City Council "to provide a general system of sewerage," which directed that the sewers should be constructed under the supervision of the city engineer, in conformity with plans and specifications to be made by him in each case, and to be submitted by him to the City Council for approval. It was also provided that there should be constructed

"in addition to the large sewer on Biddle Street, already provided for by ordinance, another large sewer on Poplar Street, commencing at or near Ninth Street, and ending at the low-water line at the foot of Poplar Street. Said sewer shall be twenty feet wide in the span of the inverted flat arch, and forming the bottom of it, or of the same width if the bottom should be on the natural rock, and ten feet high in the middle, and shall have a regular and uniform descent from its upper to its lower end."

Besides these large sewers the construction of other sewers was ordered,—on Seventh Street, commencing at the highest point in said street and running thence northwardly with a regular descent into the sewer on Biddle Street; on Ninth Street, commencing at the highest point on said street and extending to the sewer on Poplar Street; on North Ninth Street, commencing at the highest point north of Biddle Street and south of Cass Avenue, and running thence to the Biddle Street sewer; and on every street running east and west between Poplar and Biddle Streets, a sewer commencing at the highest point in the street east of Eighth Street, and running thence eastwardly with a regular descent to the low-water line at the foot of such street; and also from said highest point, running westwardly, to intersect the sewer in Seventh or Ninth Street, as the case might be. For the purpose of draining the cellars on private property, it was provided that lateral sewers should be constructed on all the streets in each sewer district running at right angles to the main sewer of such district.

Four days later, July 31, 1850, the mayor approved an ordinance providing for the creation and management of a common sewer fund, which authorized him to issue bonds from time to time as they were needed in the prosecution of the work to an amount not exceeding ten thousand dollars, and directed the officers of the Treasury Department to open an account to be styled the "Common Sewer Fund," which should be charged with the amount of all the common sewer bonds sold and with all payments made under authority of the ordinance. It was further provided that it should be the duty of the auditor in the month of January of every year to make out sewer tax bills charging each lot in any sewer district with a tax in equal proportion, not exceeding one-half of one per centum on the assessed value thereof, according to the assessment of the same and the improvements thereon as the same appeared on the assessment books of the city for the preceding year; such tax to constitute a lien upon the real estate respectively charged therewith until paid. The tax was to be collected in the same manner as the other taxes were collected, and all moneys thus obtained were to be placed to the credit of the common sewer fund, and credited to every sewer district accordingly.

In his message to the City Council, Oct. 14, 1850, Mayor Kennett stated that the sewers necessary below Market Street had been put under contract, and recommended that the Legislature be petitioned for legislation authorizing the city to borrow money for the completion of the Biddle Street sewer, and the construction of the sewer on Poplar Street from Ninth Street to the river, and the sewers provided for by the ordinance on Ninth and Seventh Streets. In this connection the mayor said,—

"The great sewer on Biddle Street is a work of which our city might be proud, as well on account of its magnitude and the good it is to accomplish as the excellent manner in which it is being constructed. The necessary means to complete and make the connection on Seventh Street, at least as far up as Franklin Avenue, should be provided at the earliest possible moment, and I confidently hope that the Legislature will give the power, and that these works, as also a sewer of large size

Poplar Street, from Ninth to the river, will be completed before the expiration of the ensuing year."

In the report of the city engineer for the same year attention was called to the remarkable advantages possessed by St. Louis for the perfecting of a complete and thorough system of drainage. "The deep channel and rapid current of the Mississippi," he remarked, "will be the great trunk which lies one hundred and fifty feet below the highest portions of the city. The Biddle Street sewer, twelve feet in diameter, now in progress in the north part of the city, will serve as a stem for all such branches as may be found necessary to completely drain the deep depression in the northwest part of the city. The work is rapidly progressing under the efficient exertions of the contractor, Mr. Brooks. . . . The north part of the city will next year in all probability be penetrated with a sewer which will effectually drain the offensive pool that is now located in that portion of the city." Even at this comparatively early day the importance of constructing a sewer to drain Mill Creek was fully recognized. "Another large sewer," wrote the city engineer, "should be constructed to drain the valley of Mill Creek, including the pool of the dam known as Chouteau's Pond. This pool is now the receptacle of all the sewage water of the adjacent grounds, and it is constantly filling up, as a great cesspool, with the solid particles of the sewage, augmented by the offensive deposits that are discharged from the adjacent dwellings."

In the engineer's report, Oct. 12, 1852, it was stated that "sewer-work continues to increase in all sections of the city, and in all instances seems to satisfy the designs of those who have urged it forward." At this time the Thirteenth Street sewer had been completed; Poplar Street sewer was "progressing with energy and success;" Morgan Street sewer was being built; and St. Charles and Christy Avenue sewers had been commenced.

In the city engineer's report, Oct. 10, 1853, the drainage of Chouteau's Pond was again brought to the attention of the City Council. "The water," it stated, "collecting in the artificial pond created by the dam in former years built across Chouteau's valley west of Ninth Street finds its passage only gradually through the flood-gate of the old mill, which, being somewhat higher than the surface of the bottom of the pond, does not effect a complete drainage, and forms a large shallow sheet of water, which during warm weather soon becomes very offensive and injurious to the health of the neighborhood. With the consent of the owners concerned and under the order of the Board of Health to correct the evil, a cut is now being made through the dam, in continuation of the sewer, wide and deep enough to carry off all the water as fast as it collects, and to effect a complete drainage." On the 8th of May, 1854, the city engineer reported that there were thirteen districts in which sewers had been built, "covering together an area of about one hundred and fifty-six acres." The total length of the principal sewers in these districts was about twenty thousand five hundred feet, and of the branches upwards of twenty-two thousand feet. The number of inlets was two hundred and seventy-five. The construction of the common sewer on Poplar Street was reported to be progressing slowly. In the report for the following year (Oct. 8, 1855) the engineer stated that sewers were constantly on the increase. At that time there had been constructed "thirty-one main sewers, draining over four hundred acres of that part of the city most densely populated, having a total length, including laterals and inlets for surface drainage, of about seventeen miles." Their construction had cost over four hundred thousand dollars, excluding Biddle Street sewer, which alone cost one hundred and twenty-five thousand dollars. In the engineer's report of May 12, 1856, it was stated that the whole length of the sewers was twenty miles, draining an area of six hundred and twenty-five acres, and their cost up to that time over five hundred thousand dollars.

The construction of Poplar Street sewer progressed very slowly, owing to the fact that "a stratum of quicksand percolated by water" had been encountered at one of the stages of the work, presenting difficulties which were not easily overcome; and on the 10th of May, 1858, the engineer reported that the sewer had not capacity enough "to drain off at some future time all the water and filth collecting in Mill Creek valley," and intimated that a larger sewer for that purpose would have to be constructed. The sewer system of St. Louis at this time is thus described:

"Our sewer system is divided into three parts,—public, district, and private sewers. The public sewers are built at the general expense of the corporation along the main lines of drainage, such as Benton, Biddle, Poplar, Barton, and some other streets, and are paid for out of the proceeds of the sale of bonds issued by the city under the authority of a vote of the people, in accordance with the charter and act of March 12, 1849. This system of public sewers has not yet been extended over the territory of the new portion of the city, nor has any plan for that purpose yet been presented to the City Council for adoption.

"District sewers are the lateral and branch sewers connecting with the main public sewers. The districts are established by the City Council, and upon the petition of the owners of a majority of the property within the limits of a district, the Council directs the engineer to cause the sewer to be constructed under contract with the lowest and best bidder for the work at public

letting. The sewer is paid for out of the proceeds of the sale of bonds issued by the mayor and comptroller, for the payment of the principal and interest of which a special sewer tax of one-half of one per cent. is levied annually upon the property within the limits of the district, according to its assessed valuation, until the whole debt is paid. The Council specifies the amount of bonds that may be issued for each district, and this specified amount is generally in accordance with the liberally-estimated cost of the sewer. The bonds are negotiated as the money is required during the progress of the work, and the amount sold is limited to the final cost of the sewer.

"Private sewers are the drains from cellars, etc., connecting with the district sewers, and are built and paid for entirely by the persons whose premises they accommodate."

Prior to 1859 about thirty miles of sewers had been constructed, including the following main sewers with their branches: Biddle Street sewer (already described); Benton Street sewer, from the river to Fifteenth Street, thence along Fifteenth Street to Howard Street, draining a smaller basin adjoining the Biddle Street sewer on the south; southeastern sewer, on Lesperance Street; Emmet Street sewer, draining the then southern portion of the city; and a number of smaller sewers in the central portion of the city, built on each street from the river westwardly to the summit of the grades near Sixth Street. On the 14th of March, 1859, the General Assembly of Missouri passed an act establishing the present sewer system.

F. Hassendeubel, city engineer, reported, May 14, 1860, that "a thorough system of public sewers for draining the whole city (as far as the tracts of land within the same are sub-divided and streets laid out therein) was at the close of the last fiscal year submitted to the honorable Council and finally adopted." The public sewers, it was added, would as nearly as possible follow the natural water-courses and the lowest parts or valleys of the city, and the grades of the streets were established so as to drain all surface water from the dividing ridges; "the district sewers to be established and to extend from said public sewers towards the ridges."

In the engineer's report of Oct. 8, 1860, it was announced that the work on the public sewers was progressing rapidly. "Mill Creek sewer," it was stated, "from Chouteau Avenue to Seventh Street, is a work of great magnitude, and although every effort has been made to urge it forward, yet it may be regarded as only just commenced. The portion passing under Chouteau Avenue has proved a more difficult piece of work than was anticipated, owing to the soft nature of the base upon which the Chouteau Avenue embankment rests, and to the presence of the main gas-pipe and district sewers. Serious slides have occurred in the side slopes of the excavation, which have caused necessarily a much larger amount of work to be performed than under ordinary circumstances would have been required. . . . This sewer is intended to drain a large portion of the city for all future time, and in consideration of the fact it was deemed advisable to remove all the old culverts, in order to give it a uniform capacity and render it complete and efficient. . . . The public sewerage is much behind every other species of improvement, for the reason that the former system had become inoperative long before the present system was established."

In his report of May 13, 1861, the city engineer remarked that it was manifest "to the most casual observer that St. Louis without her sewer system would be almost uninhabitable at certain periods of the year, and although there is over thirty miles of sewerage completed, still there is much to be done that cannot well be delayed." During the war, owing to the general suspension of works of improvement the progress in the construction of sewers was naturally slow, and in the city engineer's report of May 8, 1866, it was stated that the sewerage of the city was still far behind other improvements, although nine miles had been added during the previous year. St. Louis was again scourged by cholera in the summer of 1866, and public attention was once more directed by the stern hand of death to the dangers of an inadequate or defective system of sewerage in so populous a community. It is worthy of note in this connection, however, as showing in part the good results accomplished by the construction of the sewers which St. Louis then possessed, that notwithstanding the population had increased enormously the percentage of deaths during the epidemic of 1866 was not so great by one third as during the epidemic of 1849. In his message of Oct. 8, 1866, Mayor Thomas, after congratulating the citizens on the fact that the city was "again free from the devastating blight of the fearful scourge that has lately visited us," said that the experience which had been gained during the season of the epidemic taught that more efficient and stringent regulations should be adopted for the care of the public health, and called special attention to the defects of the sewerage system. "The great want of this city, in a sanitary point of view," said the city engineer, in his report of April 30, 1867, "is the complete extension of the sewer system, and the large public sewers needed are so costly that extraordinary means must be provided to pay for them." In the revised charter granted to the city by the Legislature, and approved March 13, 1867, the Council was empowered to establish a general sy-

ystem, which should be divided into three classes,—public, district, and private sewers. To pay for their construction the Council was authorized to levy a tax on all property made taxable for State purposes over the whole city, to be known as the "special public sewer tax." Up to Oct. 11, 1869, the total length of public sewers built was nearly twenty-one miles, at a cost of about one million three hundred thousand dollars, and of district sewers about one hundred and five miles, at a total cost of about three million one hundred and thirty thousand dollars, including all expenses for repairs, superintendence, etc. At this time the sewerage in most of the old parts of the city had been completed, and the system was extended only as the progress of improvement required it. The following table shows the length of sewers built during the preceding years, beginning in 1861, with the cost of same, including miscellaneous expenses:

	Miles.	Cost.
Sewers constructed up to January, 1861	31.50	$841,768.78
Sewers constructed during the year 1861	1.17	47,895.18
Sewers constructed during the year 1862	.76	37,090.10
Sewers constructed during the year 1863	1.96	41,262.18
Sewers constructed during the year 1864	3.25	73,735.58
Sewers constructed during the year 1865	9.44	201,418.12
Sewers constructed during the year 1866	18.92	553,353.26
Sewers constructed during the year 1867	16.50	555,519.23
Sewers constructed during the year 1868	17.50	575,463.35
Total	101	$2,977,505.78

In 1869 the greatest height of the public sewers varied from four feet, the height of Barton Street sewer, to fifteen feet, the height of Mill Creek sewer, the best of all in regard to construction and size. Their greatest width varied from four feet, the width of Barton Street, Carroll Street, Chambers Street, Morris Street, and Twelfth Street sewers, to twenty feet, which was the width of Mill Creek sewer, while some of the branches were not higher than three and a half wider than two feet. Their height and width diminished in proportion to their distance from the river and the more densely populated parts of the city. The Rocky Branch sewer, for instance, to a length of one thousand three hundred and forty-seven feet, was seven feet high and twelve feet wide; from thence it was only ten feet high.

The sewer system was made to conform with the grade of the streets, the main or public sewers following up the lowest grades or valleys (except in those cases where they passed through ridges to secure more direct passage), and decreasing in size as they approached the head of these valleys; then there were branch sewers following up the valleys on either side of the main trunk, into which the district sewers emptied their contents, the whole system corresponding with the natural drainage of the surface. The size and capacity of the different sewers were determined by the engineer, who had to estimate the quantity of water that might be required to pass a given point, taking in consideration the rate of fall. To the class of public sewers belonged also the so-called wharf sewers.

The sewers across the wharf in the central part of the city were originally constructed in a temporary manner with plank, and were subsequently connected with the district sewers on the west line of the wharf.

The second class comprised the district sewers. They were constructed in any district, whenever a majority of the property-holders resident therein petitioned for them, or whenever the City Council deemed the establishment of a district sewer necessary for sanitary or other purposes. Immediately after the work was accomplished the city engineer computed the whole cost, and assessed it as a special tax against each lot of ground within the district, in proportion to the area of the whole district. The repairs, cleaning, and other incidental expenses were paid out of the *general* appropriations made for that purpose, but at the end of each fiscal year they were charged on the tax bills of the property-holders in whose district the repairs were made.

The first of these district sewers, built in 1849, 1850, and 1851, were all higher and wider than those made subsequently. They had a height of five feet and five feet six inches by a width of from three to four feet. Gen. Samuel R. Curtis, the city engineer during Mayor Kennett's administration, is said to have first opposed the large-sized district sewers. He reduced the original size of the Seventh District sewer, calculating the necessary capacity of a sewer not to be the sectional area alone, but taking in account also the length, the inclination, the friction, and the head which accumulates at the inlets. The new district sewers at the commencement, and some at a length of about two thousand five hundred feet, were not more than three feet six inches in height by two feet six inches in width, and then they narrowed generally to thirty by twenty inches, and a great many terminated even in round pottery tubs of eighteen inches in diameter.

In 1871 the total number of main sewers was 56 miles, their length 24¼ miles, and the total cost up to that time $1,730,389.08. The number of district

sewers was 306; total length, 92½ miles; total cost, $1,943,090. In 1875, 164.40 miles of public and district sewers has been constructed. In addition to this upwards of seventy-five miles of private sewers had been built, at an estimated cost of more than one million five hundred thousand dollars.

Since 1875 the work of extending and perfecting the system has been carried forward with great energy and skill by the present efficient sewer commissioner, William Wise. Section 20 of the new city charter, adopted in 1876, provided that a sewer system was thereby established consisting of three classes,—"public," "district," and "private" sewers; the public sewers to be constructed "along the principal courses of drainage, at such times, to such extent, of such dimensions and material, and under such regulations as may be provided by ordinance to be approved by the board of public improvements," with such branches as might be considered expedient; district sewers to be established within the limits of districts to be prescribed by ordinance as approved by the board of public improvements, and "so as to connect with a public sewer or some natural course of drainage;" such district sewers to be constructed in any district, "whenever a majority of property-owners resident therein shall petition therefor, or whenever the board of public improvements shall recommend it as necessary for sanitary or other purposes;" private sewers, connecting with the public and district sewers, to be constructed "under such restrictions and regulations as the Assembly may prescribe, by general or special ordinance, approved by the board of public improvements," the city, however, to be at no expense in the construction, repairing, or cleaning of the same. All special tax bills for work contemplated by the section were to be registered by the city comptroller, and by him delivered to the party in whose favor it was issued for collection, "and his receipt taken in full of all claims against the city on account of said work," the tax bill to be and become a lien on the property charged therewith. It was further provided that, except in case of necessary repairs requiring prompt attention, the work should be given out by contract, after proposals had been advertised for, to the lowest bidder. Section 2, Article IV. of the charter authorized the mayor to appoint an officer to be known as the sewer commissioner, who was to be one of the members of the board of public improvements and the head of his department, and to have under his special charge the construction, repairs, and cleaning of all public and district sewers, inlets, man-holes, and other appurtenances belonging thereto. In accordance with these provisions, the Municipal Assembly from time to time enacted ordinances for the perfecting of the sewerage system, and for carrying on the work of the department. Article V. of the revised ordinance approved March 29, 1881, provided that the sewer commissioner should hold office for four years, or until his successor was appointed; that he should be a civil engineer, and should take cognizance of all matters pertaining to the city, have general charge of the sewers, etc. Various other ordinances were adopted providing regulations for the management of the department, construction and repairs of sewers, etc.

As previously indicated, Mill Creek sewer is the most important of the system. It was commenced in August, 1860, is twenty feet wide by fifteen feet high, and is now three miles in length. The Mill Creek valley, through which it is located, divides the southern part of the city from the central, and is the entrance to the city for all the railroad lines west of the Mississippi, except the Iron Mountain. Several large tributaries to Mill Creek sewer have been constructed in the valleys branching to the north and south, and the western portion will require considerable extension. Among the other main sewers may be mentioned Arsenal Street sewer, with its branches draining an area of about seven hundred acres west of the United States arsenal; the southern sewer on Chippewa Street, draining an area of one thousand acres; the Stein Street sewer in South St. Louis, and Louisa Street, Trudeau Street, Barton Street, Carr Street, Miller Street, Rutger Street, Chambers Street, Rocky Branch, Bremen Avenue, and Ferry Street sewers, making a length of 45.23 miles of public sewers, together with 157.15 miles of district sewers. The total length of public and district sewers in St. Louis in 1882 was 202.38 miles, draining an area of 4215 acres, and providing as complete and effective a system as any in the country. Each sewer or sewer district is regulated according to the requirements as it comes up, but is made to conform with the existing sewer system. Perforated man-hole covers are placed on some of the sewers, but the greater portion is without ventilation. The Mississippi carries off the sewage flow, the upper portion of the large sewers being above the surface during the ordinary boating stage, and the mouths of the smaller sewers delivering below the surface of the river except at low water. Public sewers, which are the main channels of drainage, are paid for out of the general revenue of the city, while district sewers are paid for by the property-owners within the district in proportion to the ground area.

Table showing the length in miles of public and district sewers constructed annually from April, 18 to April, 1882:

Date.	Public sewers constructed during the year.	District sewers constructed during the year.	Total length of sewers constructed during the year.	Total length of public sewers.	Total length of district sewers.	Total length of public and district sewers.

Water-Works.—For some years after the settlement of St. Louis there were no wells sunk, the underlying formation being limestone but a few feet below the surface and cropping out at various points, particularly on the edge of the bluffs, where the rock was bare along the whole front. With the exception of two or three springs, the inhabitants used the river water for all purposes, and for this reason the lots along the river-front were first sought and built upon. "A long period elapsed before any wells were dug, and the original water-works of St. Louis consisted of a man with Chinese attachments, the water being carried in buckets fastened by strips of wood to a yoke which rested on the shoulders. Sometimes the water was brought up to the village from the river on a rude sledge drawn by ponies. This sledge was constructed of two long poles connected by cross-bows, the front ends being used as shafts and the rear ends resting on the ground. On this primitive 'drag' barrels of water were hauled up for the use of the inhabitants. In course of time a few wells were dug on Second and Third Streets, but the cost was so great that only a wealthy man could afford the luxury, the expense of sinking a well through the thick bed of limestone amounting in some instances to one thousand dollars,—in those days a modest fortune. Nor was the effort to obtain water always successful even when the well had been sunk. Col. Chouteau, for example, sunk two wells on his grounds, one of them being over one hundred feet deep, but in neither instance did he succeed in reaching water. The river water was healthful and pleasant to the taste, but in summer too warm to be palatable. As ice-houses were then unknown, wells were the only sources from which a supply of cool water could be obtained. Even those who had wells, however, drank the water from them only during the summer season; in cool weather the preference for river water was universal."[1]

In the summer of 1829 a movement was set on foot for the construction of a system of water supply. The first suggestion appears to have been made in a communication signed "An Old Citizen," and read at a meeting of the board of aldermen on the 17th of July of that year, which called for the establishment of water-works. Later in the same year, on the 7th of September, the then mayor, Daniel D. Page, sent to the board a communication relating to the subject, and inclosing three propositions made by a firm named John C. Wilson & Co. for building water-works. It was considered important enough to be referred to a select committee, which was instructed to hold a conference with the firm. Still further action was taken a few days after, when the committee, in conjunction with the mayor, were authorized to contract with J. C. Wilson & Co. for supplying water to the city. The "company" was, it appears, Abraham Fox, for on the 17th of September Wilson & Fox entered into the contract, and it was approved by Messrs. Charless, Bryan Mullanphy, and the other members of the board, unanimously.

By the terms of the contract Wilson & Fox agreed to furnish a supply of "clarified water" from the Mississippi. The condition of the original agreement was that Wilson & Fox, for and in consideration of certain grants of privileges and concessions made to them by the city, should furnish water for twelve fire-hydrants for the Sisters of Charity's hospital, and for a fountain to be erected on the grounds of Gen. Wm. H. Ashley, free of charge for all time. This agreement was entered into and signed, as stated, on the 17th day of September, 1829, and was the first decisive action taken toward supplying the city with water by means of reservoirs and a system of pipes. The first plans were drawn by Thaddeus S. Smith, civil engineer.

Nothing, however, was done toward commencing the work of construction until the following spring. April 3, 1830, a lot of ground was acquired by Wilson & Fox from Gen. Wm. H. Ashley, one hundred and seventy by one hundred and sixty feet, on what was then known as the Little Mound, situated on the corner of Ashley and Collins Streets. The cost of this property was five hundred dollars, conditioned, however, upon its continued use for the purpose of a reservoir, and to revert to the original owner or his heirs when it should be diverted from that use.

On the 29th of June, 1830, the firm purchased from the United States, for the sum of two thousand two hundred and sixty-five dollars, a lot of ground on the bank of the river, at the foot of Bates Street, one hundred and fifty by two hundred and fifty feet, as a site on which to erect their pumping-engines and such buildings as would be necessary for carrying on the business of the company.

Work was commenced in 1830, but very little progress was made. In May, 1831, a competent engineer made an estimate of the cost of the works when completed, placing it at thirty-five thousand dollars. Previous to this time it had become manifest to the projectors of the St. Louis water-works that the conditions to which they had subscribed were one and could not be fulfilled except at a sacrifice to them of their individual interests. In those days rain was not so abundant as now, and St. Louis was

[1] Prof. Waterhouse.

mere village compared with its present extent. To add to the embarrassments of the original proposers of the project, who were Eastern mechanics, with much energy but small capital, their funds ran short before the work was half completed. It thus happened that little progress was made, and the unsatisfactory prospect led the city authorities to enter into a new agreement with the company, which was accomplished April 12, 1832. Meanwhile, the financial embarrassment of the company was relieved by Daniel D. Page, who came forward and advanced the money to continue operations. The work thenceforward progressed satisfactorily. A reservoir was built on Little Mound, excavated, and partly embanked. The floor was of heavy boards, tongued and grooved and driven together, on which was laid a brick pavement. The steam engine for the works was built by Mr. Pratt, of Pittsburgh. It was not a very large piece of machinery. Engine-houses were built at the foot of Bates Street, the supply and service pipe laid down, and water dispensed to the people for the first time in 1832.

The main pipe at that time was only six inches, and the supply pipes for the city were four, three, and two inches. The first pipes laid down in the city were manufactured by Vanleer & Co. and Woods, Tucker & Co., of Tennessee. Afterwards the Messrs. Harrison and Gaty & Coonce, of St. Louis, furnished the pipe. About 1833 Fox became sole proprietor of the water-works, and acted as superintendent. In the revised agreement of 1831 he had a right to tax private families ten dollars per annum, and hotels and similar establishments in proportion. The works were in operation, but the proprietor did not find them a very profitable investment. An ordinance passed by the board of aldermen, Nov. 23, 1833, and approved November 26th, authorized a loan for the further extension of the water-works, and in July, 1835, during the mayoralty of Hon. John F. Darby, a proposition was made to buy the interest of Fox in the water-works, and make them an institution solely owned and controlled by the city. Previous to this time the city had been compelled to lend assistance in order to keep the works in operation. The proposition met with favor, and a bargain was consummated in the same month, the city agreeing to pay Fox eighteen thousand dollars, from which were to be deducted certain advances made to Fox, so that he actually received only about seven thousand dollars.

An ordinance passed by the board of aldermen and approved March 31, 1835, provided that a superintendent of the water-works should be appointed by the mayor, who should hold his office for one year, and receive a salary of eight hundred dollars, and that the water rates should be as follows:

"For each private family not exceeding eight persons in number, at the rate of ten dollars.

"For a family of nine, and not exceeding sixteen persons, at the rate of twenty dollars.

"For each tavern, hotel, or public-house, at the rate of not less than fifty, nor more than one hundred and fifty dollars.

"For each private boarding-house, at the rate of not less than ten, nor more than one hundred dollars.

"For each livery stable, at the rate of not less than fifty, nor more than one hundred and fifty dollars.

"For each blacksmith's shop or foundry, at the rate of not less than ten, nor more than two hundred dollars.

"For the supply of any store, shop, office, or other establishment, any sum not less than at the rate of ten, nor more than five hundred dollars."

It was also provided that no person should use water from the water-works without having a license for that purpose. The necessary hydrants were to be supplied, and the furnishing and laying of the pipes required for the conveyance and delivery of the water from the main pipe or conduit to the place where the water was intended to be delivered were to be done at the proper cost and expense of the person or persons requesting or causing the same to be done, and no pipe or other fixture for the conveyance of water was to be permitted to be placed in communication with the water-works under any pretense, unless it was done under the control and direction of the superintendent or of the mayor and aldermen, under a penalty of fifty dollars. By an ordinance approved March 10, 1836, the superintendent was empowered to appoint a deputy, and the salary of the superintendent was fixed at nine hundred dollars, and of the deputy at four hundred dollars.

Abraham Fox, who continued to act as superintendent under the new system, gave place before the year 1835 closed to John M. Wimer, afterwards mayor, who remained superintendent until about the end of the year 1836. Mr. Wimer was succeeded by William Burd, who ceased to be superintendent Oct. 19, 1838. Peter Brooks, a somewhat distinguished civil engineer of those days, assumed the position of superintendent Oct. 20, 1838. During his incumbency it was found that the demand for water had become greater than the capacity of the works could supply. Accordingly he proceeded to erect a new reservoir, immediately above the old one. This was really nothing more than a huge tank built of solid oak lumber, sustained by immense beams and stays. It was one hundred by one hundred feet and twelve feet deep. This tank proved to be quite durable; but as it was built immediately above the old reservoir, which was still retained in use, the difficulties

encountered in repairing the latter were very great, and as it had become cracked and the embankment was sliding away, the people of the neighborhood became much alarmed lest it should burst and do great damage to surrounding property. It was during this period that new main pipes were laid down. These were ten-inch pipes, and it was deemed that they would be sufficient to meet any probable future requirement.

Before 1846 there were no water-pipes laid down west of Fourth Street; indeed, that street was scarcely marked out. All the pipe that had been laid had been manufactured by Vanleer & Co., Woods, Stacker & Co., of Tennessee, and by Garrison Brothers, and Gaty & Coonce, of St. Louis. In 1846 the third engine put up in the water-works was built by Kingsland & Lightner, of St. Louis. This engine was of larger size than any yet erected in the West, but owing to want of stability in the foundations for it, it was in a measure a failure and soon broke down. It was afterwards repaired, and continued to be run until Gaty & McCune placed the "Hercules" in position in 1852. This engine was then regarded as a mighty achievement in engine-building. Nothing like it in the way of machinery had ever been seen in the West, and for years it was so much of a wonder that visitors to the city were deemed not to have seen all its features unless they had inspected the big engine at the water-works. This engine cost the city twenty-five thousand dollars.

A newspaper description of the engine before its completion (Jan. 6, 1847) says,—

"In this foundry we saw the new but unfinished engine and pump for the city water-works, and, so far as we may judge, they will be no discredit to the manufacturers. The cylinder of the engine is about twenty inches in diameter, and of eight feet stroke. The new pump is of about fifteen inches in diameter and eight feet stroke, and will be capable of throwing an immense stream of water. This pump, it should be known, is manufactured of iron from the Iron Mountain in this State, which Mr. Kingsland pronounces greatly superior to every other metal used or brought to this city from any quarter." The engine was at the foot of Bates Street, and its capacity was not any larger than required. The plan of supplying the water was the same imperfect one which existed for many years afterwards. A pipe was thrust into the current, and the thick fluid forced to such an elevation that it could be distributed through the mains with just such a small portion of the mud freed from it as could form itself into a sediment during a short storage in the reservoir. As the city grew the capacity of the reservoir lessened by reason of the accumulating deposits, and there was an increased demand for water. The step next taken to remedy the deficiency was the construction of another receptacle on Benton Street. This was about two hundred feet square, considerably larger than the other, but still of quite limited extent. The power had to be increased, and an engine was constructed with an eighteen-inch cylinder and ten feet stroke. A new engine-house was also erected.

The introduction of water into the new reservoir is thus described under date of Jan. 22, 1850:

"Yesterday a number of the members of the City Council, city officers, and invited guests attended to witness the introduction of water into the new reservoir. The new reservoir is situated in the northwestern part of the city, west of the late Mrs. Wright's residence, upon a plat of about ten acres owned by the city. It is the highest point of ground around the city within a suitable distance from the river. This reservoir is but the commencement of more extended works. The ground has been so laid off that it is calculated that four reservoirs of equal size with the present may be constructed upon the plat. It is two hundred and fifty feet square and fifteen feet deep, and capable of holding one million of gallons of water, or, with the present population of the city, a supply for seven days. It is firmly embanked around with clay, the walls well covered with flagstone coping, a mud valve in the centre, a twenty-inch main leading the water into it, and other proper connections with the old reservoirs on Broadway and the street mains and pipes through the city.

"The new reservoir has cost the city about thirty thousand dollars, and the laying of the ascending mains and other expenditures have swelled the whole cost of the new water-work as stated by Mr. Donovan, the superintendent, to about the sum of one hundred and eighty thousand dollars."

The demand for water continued to increase apace as the city grew, and the capacity of the works had to be increased to meet the demand. In 1854, under the direction of the then city engineer, Henry Kayser, the Benton Street reservoir was constructed, with a capacity of forty million gallons. It was commenced in the spring of 1854, and water was let into the reservoir, which measured five hundred and twenty-seven feet in length, two hundred and thirty-seven feet in breadth, forty-seven and one-half feet in depth, and rose about forty feet above the natural surface of the ground upon which it was built, Aug. 15, 1855. The work of extending the mains, meanwhile, had steadily gone on. During this time the superintendency of the works had successively devolved upon Willis R. Pritchard and Daniel H. Donovan. During the early part of the war Gen. Schofield, then in command at St. Louis, relieved Donovan from the post of superintendent, and Willis R. Pritchard was appointed his successor, and continued to serve throughout the war.

In his report of Oct. 6, 1859, Superintendent Pritchard stated that the city then had an abundant sup-

of water in its seventy miles of iron pipe, and that as additional attachments were made to the old ascending main on Mullanphy Street, it might be expected that the few high points that then experienced a scarcity would be fully supplied.

During the war there was a general suspension of improvements in the city, and but little was done in connection with the water-works, but in January, 1865, the State Legislature passed a law creating a board of water commissioners for St. Louis.

The first board was appointed by Governor Fletcher, and consisted of Hon. James S. Thomas, then mayor, and Messrs. Dwight Durkee, T. Weigel, N. C. Chapman, and S. D. Barlow. Dwight Durkee was elected president of the board, the organization being effected on the 24th of March, 1865.

The requirements of the city had become such that long before the appointment of the first board of water-works commissioners it was deemed absolutely necessary to establish new works. When this board was appointed the members sought to take active measures, and they requested James P. Kirkwood to supply them with a plan. He did so, but it was rejected by the City Council. The plan contemplated the placing of low-service engines and the construction of settling reservoirs and filtering beds at the Chain of Rocks, some six miles north of the northern city limits, a brick conduit to Baden, high-service engines on the Bellefontaine road, and storage reservoirs at Rinkles, on the St. Charles Rock road, with an auxiliary reservoir in the city commons, the capacity of the proposed works to be twelve million gallons daily. It was estimated that the total cost would not be less than seven and a half million of dollars. The commissioners recommended the adoption of the plan on the ground that if the water was taken from the river at Bissell's Point it would contain many impurities, while at the Chain of Rocks it would be much purer. This plan was submitted to the Council in March, 1866. It was rejected because it was complex and costly and the result doubtful, the plan being regarded as merely experimental. Mr. Kirkwood devoted much time to the subject, and visited Europe to inspect the most celebrated water-works there, and afterwards prepared the plans which led to the construction of the present works. It was represented to the City Council by a sub-committee appointed to inquire into the matter that the objections to Bissell's Point were based upon popular prejudice, and not upon facts, and the Bissell's Point plan was consequently carried out.

Upon the rejection of their plan the commissioners resigned, and a new board was appointed by the Governor, which organized on the 2d of August, 1866. This board was composed of Mayor Thomas, Messrs. Amadee Vallé, G. M. Dreyer, C. E. Salomon, and George K. Budd. New plans were submitted to the Council without result, and during the session of 1867 the Legislature passed another act, approved March 13, 1867, which created a board of three commissioners, named in the act, viz.: Alexander Crozier, Henry Flad, and Amadee Vallé. The board met on the 22d of March, and organized by electing Mr. Vallé president, Mr. Crozier vice-president, and A. R. Bowman secretary. Thomas J. Whitman was subsequently appointed chief engineer, at a salary of four thousand dollars per annum, Mr. Kirkwood being retained as consulting engineer.

The works which came under the charge of the first board of water commissioners were the two reservoirs on Benton Street and the engine-house at the foot of Bates Street. Subsequently a reservoir two hundred feet square was constructed on Gamble Avenue, near Garrison Avenue.[1]

The smaller Benton Street reservoir, however, was abandoned, as it was too low and nearly filled with mud. The adjoining one was forty feet higher, and was one hundred and thirty-nine feet and ten inches above the city directrix. The machinery in 1870 still remained on Bates Street. The engines were the one with an eighteen-inch cylinder, before referred to, and two with cylinders thirty inches in diameter and with ten feet stroke. No improvement had been effected in the quality of the water supplied to the public since the first reservoir was built. The old works cost one million seven hundred thousand dollars.

Ninety-seven acres of land at Bissell's Point were purchased of Capt. Bissell, and work was commenced in the fall of 1867. The work was not without the delays which frequently take place in such undertakings. Considerable difficulty was experienced in laying the foundations of the low-service engine-house, but they were at last laid, and the reservoirs were constructed.

The settling reservoirs—the object of which is indicated by their name—are the most important part of the system. Situated about three hundred feet from the river-bank, they are each six hundred feet in length by two hundred and seventy feet in width and four-

[1] Ground was broken July 6, 1867, for a new reservoir, with a capacity of two hundred thousand gallons, in block No. 1007, extending from Gamble Avenue through to Dayton Street, which was intended to temporarily supply the city with water while the old reservoir was being cleaned out, the contractors, Messrs. Budd, Decker & Ault, engaging to complete the work by the 15th of October. The reservoir, which cost four hundred and fifty thousand dollars, was abandoned prior to 1870.

teen feet in depth. There are four of these huge basins, which are separated from each other by division walls eleven feet in width at the base and eight feet at the top. The outer walls are five feet in width, buttressed every seven feet, with an embankment behind them twenty feet wide at the top, and having a slope of two to one, which gives, where the walls are fifteen feet high, a width of about fifty feet at the base. The foundations of the walls are in excavations, and are laid upon a base of six inches of concrete, bedded oak timbers placed transversely and longitudinally, and another layer of concrete. The material used in the construction of the walls is Grafton limestone, but the copings are of Cannelton sandstone. Between the masonry and the embankment there is a puddle wall of clay four feet in thickness.

The bed of the reservoirs, with the view, of course, of rendering it impervious to the water, is formed of a layer of clay puddle one foot in thickness, six inches of concrete, and a course of brick paving laid on edge. The bed has a slope to the centre, where there is a wide gutter for the carrying off of the mud.

There is a distributing well near the centre of the eastern bank and opposite to the middle division wall, and the water is conveyed into it by the two lines of pipe before mentioned. The inside divisions of the well are twenty-six feet by eight feet, and the depth eighteen feet. The water is carried from this well by two other lines of thirty-six-inch pipe two hundred and seventy feet in length to ends of the north and south division walls, where it flows into the influx wells. There is a waste-well in the middle of the front well of each reservoir for carrying off the sediment during the process of cleaning. There are two gates in each influx well. On the opposite side of the reservoirs are the efflux wells, with eight gates in each chamber, for the taking of the water from the surface, at whatever height that may be.

The water settles in twenty-four hours, which is considered a sufficient time to eliminate all the mud from it except that which would require filtering-beds for the purpose.

The buildings at Bissell's Point comprise two series of structures, known as the high-service and low-service buildings, the latter located on the river-bank, and the former about a quarter of a mile distant. They are of brick trimmed with stone. On the pediment of the principal façade of the high-service engine-house are two sculptured figures, the Union of Waters, representing the union of the Missouri and Mississippi.

Each of the reservoirs has a capacity of twenty-three millions of gallons, and while one is being cleaned, the second reservoir is being filled, the third being drawn from, and the fourth one being settled.

The water flows from the reservoirs in a brick conduit, after it has gone through this rough process of purification, to the clear well. This is a basin one hundred by one hundred and fifty feet and sixteen feet deep, adjoining the high-service engine-house and not far from the settling reservoirs. It has been constructed for safety and as a preventive of accident to the engines in case the water at the reservoirs should be shut off by mistake, or any accident occur to the gates.

The pumping is done by two sets of pumping-engines. The first set, consisting of two pumping engines of a capacity of eighteen million gallons each and one engine of twenty-four million gallons capacity, lifts the water from the river into the settling basins. After being cleaned of its sediment the water is elevated into the storage reservoir and into the distribution mains by another set of pumping-engines, two of which have a capacity of sixteen and one-half million gallons, and the third a capacity of twenty-four million gallons per day. The water is carried by a brick conduit ten feet in width and sixteen feet in height from the clear well to the wet well of the high-service engine-house, and is pumped through eighteen thousand feet of thirty-six-inch pipe and seven thousand feet of thirty-inch pipe laid along Grand Avenue, Cass Avenue, Laclede Avenue, and various other points connections are made with twenty-inch mains, and the water is there partly distributed through the city; but the distribution is not completed until it passes through Compton Hill reservoir.

A stand-pipe was erected at Fourteenth Street and Grand Avenue to relieve the strain on the high-service engines at the time of starting. It will be readily seen that to move the mass of water in the miles of pipe between the high-service engine-house and Compton Hill reservoir up grade requires immense power. The stand-pipe is one hundred and sixty feet in height, and the power required to move the body of water in motion is lessened by the latter being broken, a portion of it being forced up the stand-pipe. The diameter of the pipe is five feet, and is made of various thicknesses of boiler iron, the latter decreasing as the height increases. The pipe is inclosed in a Corinthian column, and there is a mound eight feet in height and ornamental work of Chicago stone at the base. The shaft is of brick, and the interior a spiral staircase winds round the pipe, and there is an observatory at the top from which a fine view of the surrounding country may be obtained.

The storage reservoir known as Compton Hill

rvoir is situated on the block of ground south of Lafayette Avenue and adjoining Grand Avenue. The area owned by the Water-works Department is forty acres, about half of which is covered by the reservoir. The dimensions of the basin are eight hundred feet by two hundred and fifty feet, and the depth wenty-two feet, and it has a total storage capacity f fifty-six million gallons. It is divided into two compartments by a division wall running from the influx to the efflux chamber. The water in the Compton Hill reservoir is one hundred and seventy-six feet above the city directrix, thus commanding the whole city.

On the 16th of July, 1870, the completion of the four settling reservoirs was made the occasion of a celebration. At the invitation of the contractors, Thomas M. Hackett and John Ackley, a number of leading citizens participated, among them being Hon. J. J. Lindley, Chas. M. Elleard, G[illegible] S. P. Simpson, P. McCahill, city auditor, Bernard McSorley, J. R. Finley, W. J. Budd, Dr. D. V. Dean, J. S. Metcalfe, M. Lemmon, of Hill, Lemmon & Co. Edward H. Garrigues, M. B. O'Reilly, Judge Dryden and others. The system thus inaugurated supplied from nine to ten millions of gallons of clear water daily, while its capacity was fifteen and a half millions. Its chief feature was the securing of the water without retaining the mud of the Missouri and Mississippi, and the furnishing of it in a comparatively pure state to the public. This was the great desideratum, and one that received great attention from the board of water commissioners and the engineers which its importance suggested.

The sudden change in the water, effected by the new works, was very marked, and a local writer declared that it "would be astonishing to our citizens had it not been generally anticipated. This change has yet been unaccompanied by any public celebration or ovation, as was done in other cities on the completion of such enterprises. Where the supply is abundant all are unanimous in their praise of the clear water that they now receive, instead of the muddy fluid that they have been in the habit of using for years."

The great advantage possessed by St. Louis consists in the fact that its source of supply is inexhaustible. The Mississippi, in time of an ordinary stage, carries past the city about one million gallons of water per second, or enough in a few seconds to supply the greatest necessity for a whole day. It is not only abundant, but is one of the most wholesome waters known. It is true that in time of high water it contains a large percentage of sedimentary matter, brought down by the swift current of the Missouri River, but of this it is easily freed by settling and filtering.

An analysis of the river water, made by Dr. Theodore Fay, chemist of the board of water commissioners, is given in the following form, exhibiting the comparative quality of the water obtained from the old and new reservoirs:

Water drawn from hydrant (old supply).

Solid matter separated by filter.....	232	grains per gallon.
Hardness.....	7.05	
Oxidizable organic matter.....	.504	grains per gallon.
Carbonate of lime.....	5.60	grains per gallon.

Settled water drawn from hydrant (new supply).

Hardness.....	8.75	
Oxidizable organic matter.....	.784	grains per gallon.
Carbonate of lime.....	7.17	grains per gallon.
Animalculæ.....		in considerable numbers.

Dr. Fay, in connection with the above, makes the following explanation:

"The above statement in regard to the difference in organic matter and hardness is hardly a fair test, on account of the excess of time that the water remained exposed to the sun, the solution of a portion of the lime used in the construction of the reservoirs and culverts, in which many thousands of bushels have been used. It is my opinion that we will have as good water from the Mississippi as any in the United States when the clay and sand are removed."

Early in March, 1871, a test of the high-service engines was made. "On Monday afternoon," says a contemporaneous account, "high-service engine No. 2 was started and was worked several hours, but without the water being let on. The engine was run at varying speed, making as high as fifteen and twenty revolutions in a minute. On Tuesday afternoon, after running the engine light for about half an hour, the water was let on, and in a moment was rushing through the main pipe towards Compton Hill reservoir, five miles distant, and at an elevation above the river of nearly two hundred feet. At half-past five o'clock the cataract burst through the circular mouth of the pipe, and a steady stream was soon pouring into the reservoir.

"On Thursday and on Friday afternoons the engine was kept running several hours, and was satisfactorily tested in various ways. On Friday morning steam was let on No. 1 high-service, but the water was not let in. Six hours afterwards the load was put on, and the engine was worked for some time, pumping directly into the reservoir. The conduct of the engine was pronounced elegant, and the result of the first informal test was generally regarded as most satisfactory.

"The new water-works are now practically completed, at a cost to the city of nearly four million dollars. The actual cost of the construction is as follows (in a few particulars the figures are close

approximations, as the work is not yet quite developed):

"Low-service engines	$111,943.54
High-service engines	198,374.00
Settling reservoir	578,436.94
Compton Hill reservoir	290,444.81
High-service engine, foundations	120,000.00
Low-service engine, foundations	250,000.00
Two engine-houses, chimneys, etc.	220,000.00
River inlet tower (iron resting on rock)	115,000.00
Pipe line and bridge	116,000.00
Reservoir gates, stop-cocks, etc.	45,000.00
Piping connected with new works	677,752.00
Stand-pipe	50,000.00
Real estate	444,000.00
Total	$3,216,951.09"

The value of the entire St. Louis water-works and grounds was estimated in 1882 as follows: real property, $263,090; improvements, $6,920,000; total estimated value, $7,183,090.

The low-service engines were tested in June, 1871, and during that month water was supplied to the citizens generally from the new works. The length of the force main pipe from the river at Bissell's Point to the Compton Hill reservoir is a little over five miles, and its diameter is thirty-six inches.

The Water Department of St. Louis, as at present constituted, is in charge of a water commissioner, that office having been created by an ordinance of the City Council (embodied in the revised ordinance approved March 29, 1881), who holds office for four years, and must be a duly qualified engineer. The present water commissioner is Thomas J. Whitman.

In his report for the fiscal year ending in April, 1882, Mr. Whitman gave the following statistics of work done at each of the pumping stations:

LOW-SERVICE STATION.

Record of Work done by Low-Service Engines.

Months.	Hours of Pumping.	No. of Revolutions.	Bushels of Coal.	Per ct. of Ashes.	No. of U. S. gallons of water pumped.
1881—April	1,128	615,400	21,150	14	749,121,000
May	1,164	612,300	21,384	15	834,785,000
June	1,250	717,300	25,449	14	880,628,000
July	1,215	664,500	26,470	16	852,740,000
August	1,318	707,400	27,104	14	920,785,000
September	1,311½	782,300	28,243	14	852,241,000
October	1,128	639,200	26,705	14	861,586,000
November	1,233½	681,200	29,908	14	791,927,000
December	1,229	629,500	27,693	14	857,063,000
1882—January	1,194	646,500	26,119	14	806,058,000
February	1,036½	587,600	22,122	15	682,267,000
March	1,145	603,100	26,389	15	834,398,000
Total	14,372½	7,826,300	308,774	...	9,932,410,000

HIGH-SERVICE STATION.

Record of Work done by High-Service Engines.

Months.	Hours of Pumping.	No. of Revolutions.	Bushels of Coal.	Per ct. of Ashes.	No. of U. S. gallons of water pumped.
1881—April	1,227½	864,800	67,394	14	742,113,000
May	1,436½	1,008,100	72,736	16	835,247,000
June	1 432	1,008,100	74,451	16	878,081,000
July	1,443	1,021,700	72,844	15	865,054,000
August	1,517	1,032,900	77,284	15	909,465,000
September	1,485¼	1,018,800	75,821	14	827,552,000
October	1,345	906,700	69,435	15	851,361,000

March	1,491	1,029,100	76,076	15	827,891,000
Total	16,814½	11,437,100	883,308	...	9,852,430,000

Hours of pumping, Engine No. 1 ..... 5,214½
" " " " " 2 ..... 4,404½
" " " " " 3 ..... 7,195½
Total 16,814½

The cost of pumping one million gallons was $5329 at the low service, and $13,046 at the high service.

On the 6th of December, 1881, a contract was awarded to H. A. Ramsay & Co., of the Vulcan Iron Works, Baltimore, for the construction, at a cost of $89,900, of a fourth high-service engine, and on the 22d of February, 1882, Skrainka & Vieths were awarded a contract for building, at a cost of $87,81[illegible] the foundations for engine and building[illegible] conduits, etc.

"Another question requiring consideration and the official action of the municipal authorities," said Mr. Whitman, in his report, "is as to whether we shall continue to take the water from the river at Bissell's Point, or, in the extension of the works, they shall be planned with a view of taking the water higher up the river at the 'Chain of Rocks.'

"Within a very short time it will be required to procure additional pumping capacity at the low service, and the question as to whether the new pumping machinery shall be temporary or permanent depends upon whether we continue to take the supply of water from the river at Bissell's Point or not."

During the year ending in April, 1882, over twelve miles of water-pipe were laid, viz.: of 20-inch pipe, 0.873 miles; of 12-inch pipe, 1.132 miles; of 6-inch pipe, 10.726 miles.

The following table shows the property owned by the Water-Works Department and its estimated value:

WATER-WORKS AND GROUNDS.

City Block.	Feet Front.	Feet Deep.	Acres.	Street or Avenue on which Property fronts.	Water-Works and Grounds.	Estimated Value, 1882. Real.	Estimated Value, 1882. Improvem'nts.	Total Estimated Value, 1882.

The amount of revenue collected each year since [illegible], and the percentage of cost for collecting the same, have been:

Date. From	Date. To	Collections.	Expenses.	Per Cent.
[illegible] 1, 1870	May 1, 1871	$385,626.91	$26,063.13	7.7
" 1871	" 1872	373,194.60	29,763.03	7.9
" 1872	" 1873	426,922.59	34,690.78	8.1
" 1873	" 1874	441,622.55	30,732.73	6.9
" 1874	" 1875	414,870.44	34,644.73	8.3
" 1875	" 1876	456,163.39	42,432.16	9.3
" 1876	April 9, 1877	445,041.14	45,358.12	10.1
[illegible] 1877	Oct. 6, 1877	263,080.98	23,659.92	9.0
" 1877	April 8, 1878	249,052.21	14,094.76	5.6
[illegible] 9 1878	" 7, 1879	550,140.60	29,445.15	5.3
" 1879	" 12, 1880	620,280.30	34,499.93	5.5
" 12, 1880	" 11, 1881	660,024.75	36,495.21	5.5
" 12, 1881	" 10, 1882	706,145.65	36,823.21	5.2

The following is a comparative statement of the [illegible] of revenue for the fiscal years 1880–81, and 1881–82:

	1880–81.	1881–82.
General licenses	$422,741.90	$428,006.00
Meters and elevators	180,904.35	222,397.00
Fixed sprinkling	14,080.00	14,800.00
Private sprinkling	17,189.00	15,811.00
Hose	1,674.00	2,156.00
Back-yards	1,500.00	1,600.00
Filing cisterns	2,214.50	2,160.00
Building purposes	$8,132.50	$10,043.00
Permits and taps	3,780.40	4,857.90
Meter repairs and connections	7,440.90	3,879.75
Private fountains	367.50	435.00
	$660,024.75	$706,145.65

There are now attached to service pipes nine hundred and five meters, of the following sizes:

Date.	Size. ½ in.	⅝ in.	¾ in.	1 in.	1½ in.	2 in.	3 in.	4 in.	6 in.	Total.
Up to April 11, 1881	...	117	8	235	91	81	32	6	...	573
During the past year	32	107	22	114	28	13	7	6	3	332
	32	224	30	349	122	94	39	12	3	905

Comparative statement of meters and elevators in use and the revenue derived therefrom:

Fiscal Year.	No. of Elevators.	No. of Meters.	Amount collected.
1877–78	95	318	$113,454.08
1878–79	114	363	127,616.17
1879–80	126	435	142,860.50
1880–81	139	573	180,904.35
1881–82	184	905	222,397.00

The yearly revenue derived from the water-works from their first introduction into the city is shown in the following table:

Date. From	Date. To	Annual Collections.	Increase.	Decrease.
Total receipts up to	May 14, 1835	$23,483.51	.....	.....
May 14, 1835	April, 1836	4,588.73	.....	.....
April, 1836	1837	5,338.21	$749.48	.....
" 1837	" 1838	8,372.13	3,033.92	.....
" 1838	" 1839	12,694.11	4,321.98	.....
" 1839	" 1840	20,517.25	7,823.14	.....
" 1840	" 1841	20,672.16	154.91	.....
" 1841	" 1842	14,954.31	.....	$5,717.85

Total revenue of water-works		$9,001,184.49		

The assessment of water rates and the collection of the revenue therefrom are distinct from the duties of the water commissioner, and are confided to an assessor and collector of water rates appointed by the mayor and confirmed by the Council. The assessor and collector of water rates in 1882 was John D. Stevenson. All contracts for work, supplies, etc., ordered by the Water Department must be approved by the Board of Public Improvements.

CHAPTER XX.

FIREMEN, FIRE COMPANIES, AND PROMINENT FIRES.[1]

No special regulations with reference to the extinguishment of fires appear to have existed in St. Louis until 1810. On the 27th of January of that year Auguste Chouteau, Wm. C. Carr, Edward Hempstead, and Jean P. Cabanné, the trustees of the town, passed "an ordinance for forming the inhabitants of the town of St. Louis into fire companies and other purposes." The ordinance enacted

"that all the free male inhabitants within the said town above the age of eighteen years,—to wit, all the free male inhabitants as aforesaid residing south of a cross street bounded southerly by a lot the property of the widow of William Hebert, *dit* Le Compte, northerly by another lot the property of Auguste Chouteau, Esq., and leading from the Mississippi to the court-house of the district of St. Louis, shall be enrolled to form a fire company, to be commanded by Pierre Didier, Esq., and all the free male inhabitants as aforesaid residing north of said street shall be enrolled to form another fire company, to be commanded by Bernard Pratte, Esq.

"Sec. 2. It shall be the duty of the said officers, immediately after the passage of this ordinance and once every six months to enroll all the free male inhabitants as aforesaid and appoint their under officers, and to exercise their respective companies at least one hour in each and every month, at such time and place as shall by them be thought most fit within the limits of their companies.

"Sec. 3. The said officers shall immediately, on notice that a fire has broke out in a dwelling-house or other building, assemble their respective companies and march them to the spot and arrange them in such a manner as to render the most effectual service.

"Sec. 4. Any person thus enrolled who shall neglect or refuse to meet at the time and place appointed for exercising aforesaid, after being notified thereof, or who shall neglect or refuse to obey any legal orders from his commanding officer shall be fined a sum not exceeding one dollar for every such neglect or refusal. And if an officer shall refuse or neglect to do his duty as aforesaid, he shall be fined in a sum not exceeding three dollars, to be recovered, with costs, before the chairman of the board of trustees or a justice of the peace of said town.

"Sec. 5. Each and every householder, occupier of a store or shop within the limits of the town of St. Louis shall within two months from the passage hereof furnish himself or her with two leather or other buckets to be made use of in case of fire, and in case of neglect or refusal to provide the same within the limited time as aforesaid, then in each and every such case the captain is hereby empowered to supply such deficiency and on complaint of such captain to the chairman of the board or any justice of the peace of the said town, process shall issue against such delinquent or delinquents for the purchase money of such bucket or buckets with costs.

"Sec. 6. The captain of each company shall, once in

[1] In the preparation of this chapter the author has been greatly aided by the "History of the Volunteer Fire Department of St. Louis," which was kindly placed at his disposal by the author, Mr. Thomas Lynch.

month, make a return of the delinquents in his limits who have neglected to furnish buckets as aforesaid to the chairman of the board, under the penalty of five dollars.

"SEC. 7. It shall be the duty of each occupier of a house, store, or other building to cause the chimneys thereof to be swept at least once in each month; and if any chimney shall take fire, the occupier of such house, store, or other building shall forfeit and pay a sum not exceeding ten dollars, to be recovered with costs before the chairman of the said board or a justice of the peace of the said town, unless such person proves to the satisfaction of such chairman or justice that such chimney has been swept within one month.

"SEC. 8. Vacancies occasioned by the death, resignation, or removal out of the limits of the town of any captain of a fire company shall be filled by the chairman of the board.

"SEC. 9. All fines arising from this ordinance shall go to the chairman of the board for the use of the town.

"SEC. 10. This ordinance shall be in force from the date hereof."

It would seem that these leather bucket companies served to keep down fires for a good many years, for it was not until about 1822 that the first regular fire company was formed and the first engine procured. The attachment of the early inhabitants to the leather buckets seems to have been nearly as great as that of the poet to the "old oaken bucket that hung in the well;" and if they were not regarded with quite so much sentiment, they were certainly made to render fully as valuable service. In those primitive times every householder was required to keep a ladder high enough to extend to the roof of his house, and two leather buckets hung up near the door. When an alarm of fire was given, every man took down his fire-buckets from the pegs whereon they hung and ran with all haste to the scene of conflagration; or, if he could not go himself, threw them out into the street for the use of the first comer who might pass. During the progress of a fire there were few or no idlers or mere spectators. Long lines of people were formed, extending from the pumps to the fire, to "hand along the buckets," and if the curious and idle attempted to pass, the cry echoed along the line, "Fall in! fall in!" The directors of companies were required to attend all fires, and to distinguish one from another, each director was required to carry a small staff with a small white flag on the end of it. Each company also had lane-men who were distinguished by a staff, and who regulated the formation of the lanes for the fire-bucket men. These buckets were used in later times for conveying water to supply the engines, as hose and fire-plugs were not then in use.

No further safeguards but the leather buckets appear to have been considered necessary by the good citizens of St. Louis for the suppression of fires until March, 1817, when the Territorial Legislature passed "an act to authorize a lottery for the purchase of fire-engines and other apparatus for the extinguishment of fire for the use of St. Louis." The lottery consisted of six thousand tickets at five dollars each, and three thousand blanks and three thousand prizes. There was one prize of five thousand dollars, one of one thousand dollars, four of five hundred dollars, forty-nine of fifty dollars, and two thousand nine hundred and twenty of six dollars each. All prizes were subject to a deduction of twelve and a half per cent., payable in sixty days after the drawing was completed, and prizes not demanded after the expiration of one hundred and twenty days were to be considered as donations for the benefit of the town. The commissioners appointed to superintend the lottery were Auguste Chouteau, Theodore Hunt, Henry Von Phul, William C. Carr, and Thomas F. Riddick.

This plan for the organization of a fire department did not succeed, however, as the people "so set their faces against lotteries," says the *Gazette* of Nov. 13, 1818, "that nothing could be done in that way to raise money for those who ought to buy and pay for engines out of their own purses."

At this time the citizens seem to have been roused to a sense of their danger, as two attempts had been made to set fire to the town. "They now see the necessity," said the same journal, "of organizing fire companies, and subscribing, liberally and agreeably to the value of each individual's property, a sum necessary to purchase two engines and a proper number of ladders, hooks, and buckets." It added that

"two fire companies, a northern and a southern, should be formed out of the owners and occupiers of town lots, their sons above twelve years of age, and inmates. Each company should have six directors and twelve sub-directors, whose duty should be to make a selection of twenty-four engineers, ten guardians of property, and a sufficient number of axe- and ladder-men. Stated meetings of the companies should be held to exercise in forming lines and passing buckets, so that in case of fire order and discipline would effect everything in the attack and defeat of the enemy."

The alarm occasioned by the then recent danger caused a meeting of citizens, which was held in the latter part of November, 1818, for the purpose of forming two companies, to be called the "St. Louis South Fire Company" and the "St. Louis North Fire Company," and for the election of officers. The former company met at the auction-room of Col. Thomas F. Riddick, and the latter at the house of De Vincent Buis. The "North Fire Company," it is believed, organized and elected officers at the time and place appointed, but the "South Fire Company" did not form until December 19th, at the room of Mr. Horrock.

After the organization of these two companies, all anxiety on the subject of fire seems to have died away for a time, and the inhabitants appear to have reposed implicit reliance in the protection and guardianship of those famous "leather buckets" and the strong arms of the firemen. Indeed, as late as May, 1823, another ordinance was passed by the authorities, "requiring the citizens of St. Louis to furnish fire-buckets." Before this date, however (in 1819), it is said, the citizens raised by private subscription a sufficient amount to purchase two small rotary fire-engines in Cincinnati. They arrived in due time, and for many years were kept in very unsatisfactory quarters. Up to 1826 they were operated by the citizens in general. One of these primitive engines was called the "None-Such," and is described as having been "a large square box on wheels, said wheels being not over eighteen inches in diameter, the whole being painted red and black. The internal pumping machinery was worked by two large iron wheels, one on each side, revolved by the hands of persons standing on the ground, communicating the power through cogs."

The first two fire-engines finally became so much out of repair that they were practically useless, and the populace returned to the "good old way" of extinguishing fires with buckets. After the introduction of the engines, however, greater attention appears to have been paid to the protection of property from fire, public interest in the matter probably having been quickened, as the town increased in wealth and population, by some disaster or danger from this source. At all events the inhabitants began to appreciate the importance and necessity of greater precautions and more thorough organization, and on the 12th of September, 1825, it was "ordained" by the mayor, William Carr Lane, and the board of aldermen, of which William Charless was president,

"that the citizens of the city be and hereby are empowered and authorized to form themselves into fire companies, one company in each ward, to consist solely of citizens of that ward, and that no person shall become a member of either company who shall not be at least twenty-one years of age.

"*Be it ordained*, That the number of members in each company shall not at any time exceed seventy-five, and as soon as fifty members shall have subscribed in either ward, that a meeting shall be called and officers appointed, and the said company, a majority being present, shall immediately proceed to draft a set of by-laws, which, if approved by the mayor and board of aldermen, shall be deemed to have the force and effect of city ordinances until repealed."

In accordance with this ordinance the following citizens enrolled themselves for the purpose of forming a fire company in the Middle Ward:

Josiah Spalding, Charles Wahrendorff, Wilson McGunnegle, August Kerr, Andrew Hay, H. L. Hoffman, John H. Gay, Henry Von Phul, William Hempstead, Joseph Powell, Frederick Dent, Theodore L. McGill, Samuel Willi, Edward Charless, Thomas Andrews, George K. McGunnegle, Antoine Chenie, William E. Starr, Hugh Richards, Joseph Charless, Jr., Thomas Cohen, John Warburton, Frederick L. Billon, A. L. Magennis, Charles Bosseron, John J. Bouberman, J. Baum, A. Hill, E. F. Smith, N. B. Atwood, E. Baker, W. S. Derring, John B. Sarpy, William Christman, John McCausland, Bernard Pratte, R. C. Pilkington, B. Berthold, John Smith, William Smith, Sept. Pettus, Sullivan Blood, Thomas Crusoe, Peter Powell, James S. Thomas, William R. Grimsley, R. H. McGill, C. M. Price, Thomas D. Potts, Henry Reilly, D. D. Page, I. J. Sparks, D. Shepherd, Thomas Essex, John Simonds, Thomas Estes, John L. Sutton, Henry Chouteau, John Andrews, James Philibert, R. J. Wilkinson, Michael Tesson, James Clemens, Jr., S. Parmelee, and J. Wilson.

The first meeting was held at the Baptist Church on June 2, 1826, when Josiah Spalding was chosen chairman, and Wilson McGunnegle secretary. A committee consisting of Charles Wahrendorff, who had been secretary of the St. Louis North Fire Company in August, 1819, Edward Charless, Wilson McGunnegle, and Charles Spalding was appointed to frame a constitution and by-laws to govern the company, which task they satisfactorily discharged. The following officers were elected to serve for the first year: President, Bernard Pratte; secretary, Wilson McGunnegle; captain, Christopher M. Price; lieutenant, John Simonds, Jr.; first engineer, Amos Hill; second engineer, John L. Sutton; first director, Henry Von Phul; second, Thomas Andrews; third, John H. Gay; fourth, Charles Wahrendorff.

The organization of the "Phœnix" Fire Company, as it was determined to call it, having been approved by the mayor and board of aldermen, the latter body passed the following order:

"WHEREAS, an association of the Middle Ward styled the Phœnix Fire Company have submitted a constitution and by-laws, *Therefore*, be it resolved that this board do approve the constitution so subscribed and constitute the same as a fire company for said ward, and said company shall have charge of the engine now in the market house,"

which was the "None-Such," one of the two purchased by the citizens in 1819.

The "Phœnix Fire Company" did not preserve its organization very long, and in 1829 another effort was made to form a company, which was called the "St. Louis Fire Company"; but, like its predecessor, it died after a very brief existence.

The fever of running "wid der masheen" having spread thoughout the city on the receipt of the new engine, culminated in 1832 in the formation of "Central Fire Company, No. 1," and in the fall of the year in the organization of another company called

the "Northern Fire Company," its location being in the North Ward. The membership of the latter, Mr. Lynch says, was composed principally of

"Irish citizens, backed by influential Americans, large property owners in the vicinity of Fourth and Washington Avenue, the site pitched upon being a lot on the east side of Third street, just north of Washington Avenue, removing subsequently to the west side, one-half block below, where they remained up to the date of their dissolution in 1855. They subsequently took the name of 'Union, No. 2.' The 'Southern Fire Company,' afterwards taking the name of 'Washington, No. 3,' the roll of whose membership with a few exceptions were German and French citizens, was organized in 1833, their location being on the east side of Second Street, south of Spruce, removing in 1835 to Spruce, between Second and Third Streets, and again in 1852 to Third Street, a few doors south of Elm Street, west side. They were considered the protectors of the southern portion of the city, though in after-years there was a company a mile south of their location. In the spring of 1839 the 'St. Louis Fire Company, No. 4,' was organized, their first location being a one-story frame shed on the northwest corner of Locust and Fourth Streets, removing in 1841 to the southeast corner of Locust and Third Streets, the membership of which was almost exclusively young mechanics, clerks, etc., the preponderance being aristocratic Eastern men. In the fall of the same year the 'Missouri Fire Company, No. 5,' was formed by a number of business men, merchants and their employés, they sharing the same shed in which the 'St. Louis' was domiciled, removing in 1841 to the east side of Third Street, next door to Ludlow & Smith's theatre, the present site of the post-office, southeast corner of Elm, where they remained up to the year 1852, when they again moved to the east side of Seventh Street, south of Olive, the present location of 'Old Headquarters.' In the year 1842 a company was formed, principally from the employés of Gaty, McCune & Co.'s foundry, the firm building their first engine, the location selected being a lot donated by the city on the northwest corner of Franklin Avenue and Broadway, which they occupied up to the time of dissolution in 1858. The next company to come forward as the champion of public safety was 'Phœnix Fire Company, No. 7,' composed mainly of German citizens who had settled on a site a distance south of the most orderly engine-houses, domiciling themselves in the spring of 1843 in a one-story frame building situated at the junction of Second and Fifth Streets and Carondelet Avenue, subsequently moving across to the west side of Fifth Street, opposite. In the winter of 1847 the citizens of the northwestern portion of the city felt the desideratum of a fire organization in their quarter, and formed 'Franklin Fire Company, No. 8,' housing their first apparatus in a shed comprising part of the wagon-yard of Fred. Laumann, Esq., situated on the northwest corner of Eleventh Street and Franklin Avenue, removing thence to Eleventh Street, north of Wash, west side, the present location of No. 13 in the paid department. The membership of this company was also German citizens ('wooden shoes,' as they were derisively called) with a few exceptions, developing into a very active company. Next in order was 'Mound Fire Company, No. 9,' composed of American citizens principally, residents of the northeastern portion of the city, their first house being on the south side of Howard Street, east of Broadway: their second and last, Broadway south of Brooklyn, succeeded by the steamer of the name and number of the present time. They were followed by 'Laclede Fire Company, No. 10,' a quarter of the city sadly needing their services, their original location being the south end of Lucas Market, removing subsequently to the west side of Sixteenth Street, north of Chestnut, and again, in 1850, to the north side of Market Street, three doors east of Fifteenth, the present location of No. 14. The membership was almost exclusively of old firemen, members of other companies who had moved into that neighborhood. There never were any hose companies proper in the department, each company including its own hose service, and the only hook-and-ladder company ever in existence was 'Lafayette, No. 1,' instituted in 1852, their original location being on the east side of Eighth Street, south of Washington Avenue, making several changes during their career, dissolving in 1858.

"But one other company may be mentioned, closing the record of the volunteer fire department, the 'Good Will Fire Company, No. 11.' They were an offshoot of several of the old companies, and born of the violent opposition of the volunteers to the establishment of the paid department. After an existence of a few months they succumbed to public opinion and returned their borrowed apparatus to their respective owners."[1]

Notwithstanding these efforts to establish a fire system for St. Louis, the inhabitants adhered to the old leather fire-buckets until a very late period.

On the 3d of June, 1835, Mayor John F. Darby approved an ordinance requiring the citizens to procure fire-buckets. By this act

"every owner in fee-simple, fee or tail for life, or on perpetual lease of any dwelling-house, store, or warehouse, or every tenant occupying the same, at the expense of the proper owner, shall keep at his or their own proper cost and expense for each story which such dwelling-house, store, or warehouse shall comprise at least one strong, substantial, and sufficient leather bucket, which shall be marked in paint and in conspicuous letters with the name or names of the owner or owners thereof, and which shall be kept in some convenient or public part of the house, and which shall not be removed, notwithstanding the tenant's may, and which shall not be used for any domestic purposes, under the penalty of five dollars, nor be employed except on occasion of fire or exercise of the engines belonging to this corporation, and shall always be kept in good order at the expense of the owner or owners of the dwelling-house, store, or warehouse, and which shall be carried or sent to places on fire, or to places where the engines may be exercised, by tenants or occupiers of such dwelling-house, store, or warehouse."

For a violation of this section of the ordinance the offender was compelled to pay five dollars for each bucket required, and it was "the duty of the city constable, from time to time, and at least once in every six months, to visit each and every dwelling-house, store, or warehouse," to examine if they were furnished with the requisite number of fire-buckets, and to report to the mayor. If the owner or owners of property failed to provide the number of fire-buckets required by the ordinance, they forfeited and were compelled to pay for the use of the city the sum of five dollars.

In time the old hand-engines superseded the fire-

[1] "The Volunteer Fire Department of St. Louis," by Tom Lynch, pp. 8 and 9.

buckets, and on May 13, 1840, an ordinance was approved repealing the ordinance of 1835 relative to the buckets. When the hand-engines had been brought near perfection they were in turn superseded by the present steam fire-engines, as will be seen hereafter.

In February, 1841, the fire department of the city consisted of the Central, Union, Washington, St. Louis, and Missouri Companies. To aid in keeping their engines and apparatus in repair, the city appropriated to each company the sum of three hundred dollars. In June of the same year the city also purchased for the fire companies two thousand feet of leather hose, which was divided among them; and in September following the mayor procured from Boston twenty-five hundred feet more. On Feb. 9, 1842, the superintendent of the water-works was directed to erect hydrants in the engine-house yards. On Aug. 24, 1842, the City Council appropriated the following sums to the companies named: Liberty, seven hundred dollars; Washington, seven hundred dollars; Missouri, two thousand dollars; and Central, seven hundred dollars. On the 31st of July, 1843, each fire company in the city which was organized and fully equipped with engine, hose, and other necessary apparatus was authorized to receive from the city the sum of three hundred dollars in quarterly payments on the last days of March, June, September, and December, provided they made a report to the mayor at the end of every quarter, showing the condition of the company, the number of active members, the officers of the company, and that their engine and apparatus were ready for service, together with a detailed statement of their expenditures, signed by the captain or superior officer of the company, and attested by the secretary.

On August 14th of the following year an ordinance was passed "for the prevention of fires," and on Aug. 8, 1845, the superintendent of water-works was authorized to lay down water-pipe in certain sections of the city and to contract for fire-plugs.

The fire department thus progressed until July, 1850, when it was organized under an ordinance embracing regulations for its government which was passed by the City Council. By this ordinance an inspector of fire department was appointed by the mayor, on the recommendation of the Firemen's Association, at a salary of three hundred dollars per annum. It was the duty of the inspector to make an examination every three months into the actual condition of each fire company in the city, and report the same to the City Council. He was to ascertain the amount and condition of the apparatus of each company, the number of members, and how many were under the age of twenty-one years. The city was authorized to pay to each company that had an effective organization with not less than forty men, and recognized the authority of the inspector, and obeyed the city ordinances regulating the fire department, the sum of one thousand dollars annually, payable in quarterly installments. The department under this organization was conducted successfully, and the number of fires during the next year was fewer than during the preceding one. All of the companies excepting the Union and Liberty accepted the ordinance immediately on its passage, and received the thousand dollars yearly allowance provided for their support. Those two large and efficient companies, under a misconception of the terms of the ordinance and the intention of the Council, refused to accept the conditions imposed, and preferred to remain independent of the city until late in 1852, when they joined the department. In the mean time they had continued to render valuable service whenever an alarm called them to duty, relying for their support upon contributions from their friends as before.

In accordance with the "ordinance establishing and regulating the fire department," Edward Brooks, the inspector, on May 10, 1852, made a detailed report of the condition of the department for the quarter commencing April 1, 1852. At this time there belonged to the department, under the organization and control provided by the city ordinances, eight companies, viz.: the Central, Washington, St. Louis, Missouri, Phœnix, Franklin, Mound, and Laclede, "having in service four forcing-engines, four suction-engines, three four-wheeled hose-carriages, eighteen two-wheeled ladders, and nine thousand nine hundred and fifty feet of leather leading-hose." Besides having eight hundred and fifty feet of leather hose, the Central had in service six hundred feet of hemp hose, and the Missouri one hundred feet of the same kind, which was used only for forcing through from the engine. There belonged to the department 493 enrolled members, distributed among the several companies as follows: Central, 48; Missouri, 53; Franklin, 52; Washington, 80; Phœnix, 46; Laclede, 45; St. Louis, 11; and Mound City, 52. The aggregate amount of indebtedness of all the companies was $648.54. The aggregate amount of cash on hand belonging to the companies was $3444.69. The estimates of the department for the ensuing year were as follows:

Allowance for eight companies ($1000 each) ..	$8,000
Repairs of buildings and apparatus.....	500
Salary of inspector	300
One new engine and two suctions.....	4,000
Three new hose-carriages.....	2,100
Amount necessary to be appropriated...	$15,300

In May, 1854, Edward Brooks, the inspector, made another report to the Council, in which he stated that

the following companies belong to the department under the control of the city: Central, Union, Washington, St. Louis, Missouri, Liberty, Mound, Phœnix, Franklin, and Laclede. They have in service five forcing-engines, nine suction-engines, seven four-wheeled hose-carriages, seventeen two-wheeled tenders, and nine thousand two hundred and fifty feet of hose. The department numbers 805 enrolled members, the several companies numbering as follows: Central, 51; St. Louis, 100; Phœnix, 90; Laclede, 47; Union, 67; Missouri, 66; Mound, 83; Washington, 46; Liberty, 151; Franklin, 104. The aggregate amount of indebtedness of the companies on April 1, 1854, was $1381.02. The amount of cash on hand was $1331.17, exclusive of the quarterly allowance of two hundred and fifty dollars due to each company. The amount paid for hose, repairs, etc., during the year was $1681.95, in addition to which several bills of repairs which were rejected by the inspector make the whole sum expended for repairs $2357.85. The fire department will require during the current year six thousand two hundred and fifty feet of hose to be purchased by the city. The appropriation required for current expenses for the present year is estimated at $18,826.

In May of the following year, George N. Stevens, the inspector of the fire department, recommended to the City Council among other things the propriety of purchasing the requisite apparatus for a hook-and-ladder company. This company, under the presidency of Charles P. Chouteau, was organized about the same time, and was provided with a house for its truck.

On April 5, 1856, an ordinance was approved by the mayor which regulated and reorganized the fire department. In pursuance of this ordinance, on May 1, 1857, the inspector (George N. Stevens) reported that there were then under the control and organization of the city ordinances eleven companies,—Central, Liberty, Laclede, Missouri, Mound, Franklin, South St. Louis, Jefferson, St. Louis, Washington, and Phœnix,—with a total membership of seven hundred and forty-nine enrolled men. The service had eight forcing-engines, nine suction-engines, fourteen four-wheeled hose-carriages, ten two-wheeled tenders, and nine thousand eight hundred feet of leather hose. The Jefferson and South St. Louis were new fire companies which had been added to the department during the year, and during the same year the Lafayette Hook-and-Ladder Company, with fifty enrolled members, one truck, five ladders, nine hooks, four axes, and two picks, was also incorporated with the department. The current expenses required during the ensuing year were estimated at eighteen thousand three hundred and seventy dollars. The inspector also renewed his recommendation, made the year before, for the erection of cisterns near the intersection of the several streets where no fire-plugs were located, to remedy the deficiency of a supply of water.

"The city, up to the year 1846, possessed a small reservoir of the capacity of only half a million gallons per day, the site of which is now the southwest corner of Bates and Collins Streets, the débris of which can still be seen, while the 'plug' privileges amounted to a stand-pipe, inclosed in a cast-iron cylinder eighteen inches in diameter, by a height of three feet above the sidewalk, surmounted by an urn, and having two openings of two and one-half inches diameter each. These plugs or hydrants were distributed through the business portion of the city at a distance of every three blocks, or about one thousand feet apart, and were a familiar object to all the inhabitants up to the year 1860, and probably the last to fade away before the march of improvement was one which stood upon the southeast corner of Sixth and Olive Streets. The largest diameter of pipe in those days was only nine inches, and it was not until the advent of the steam-engine in 1856 that the city fathers concluded to adopt not only the underground plug, of which there is now one on every corner in the district bounded by the Levee and Eighth Street and Cass and Chouteau Avenues, and one on every other corner in the rest of the city, but also an increased diameter of pipe, the latter now reaching a maximum of three feet, while the present water-works contribute a daily quantum of thirty-three million gallons of clear water, in place of the half-and-half mud and water of the old *régime*.

"St. Louis being built upon the bank of the river principally, and of very narrow breadth, the majority of the engine-houses were located on Third Street, or Broadway; the former name extending from the southern limits to Green Street, and then taking the name of Broadway to the northern limits. These two streets were the main artery of the city from north to south, and six of the engine-houses were but a few blocks apart, necessitating the greatest vigilance on the part of the members to prevent surprises, and to obviate the disgrace, as it was always considered, of being 'passed in the house.' Particularly was this the case with the volunteer hose companies, and the exciting contests of speed occurring on this thoroughfare north to the 'Mound' and south to the 'Phœnix' were the inexhaustible theme of comment and glorification in the engine-houses, and if written up would fill volumes."

In those days, when a fire was discovered, "the steward" or watchman at each engine-house would ring his bell violently, and not only members, but a certain class of shoulder-hitters who were retained by each company to help it through an "emergency" made a grand dash for their respective engine-houses. The "bunkers," or such of the members as occupied bunks in the houses, always had all in readiness for a start; a long rope was led off, all hands caught hold, and with a whoop and a yell that the clangor of the bells could not drown, away the brigade went for the fire. A captain, with a huge tin trumpet, always ran alongside, shouting encouragement and making liberal contributions to the general din. The aim was to secure the plug nearest the fire, and to throw "first water." Not infrequently engines met at the intersections of streets, and the tactics then were for the engineer having the strongest force to run in on the rope of the other, and "skin the rope," running along its full length and compelling all who had hold of it to let go. This gained a little time and distance, and

often won the nearest plug. But even then the company accomplishing this success was not sure of "first water," for some enthusiatic, conscientious member of another company, rather than witness the defeat of his organization, might cut a gap in the hose of number one. This last was a trick often resorted to, and the uniform result was that two or three companies left the fire to take care of itself, while they tried issues with clubs and stones. The plugs in vogue then were large, upright, unsightly objects with two attachments. Frequently a collision was necessary to determine which of the companies should have the lower attachment, which was more desirable, for the obvious reason that the one having possession of that could suck nearly all of the water away from the men who were pumping on the other, leaving them to "pump wind."

Besides the regular apparatus of an engine and four-wheeled reel, each company had a light two-wheeled tender or "plug-catcher," the members of which, instead of being a separate organization, generally consisted of the younger members, constituting a company within a company, whose duty was to be on hand at all times, in order to secure, in case of fire, the best attainable position by an early arrival at the nearest plug. These volunteer hose companies, combined with others which several of the companies adopted, whose province was to follow the engine carrying the requisite amount of "leading" hose, were the nucleus or training-school for young men and boys under age, in which they were fitted to become at their majority the best and most efficient of firemen. Fanciful names were generally adopted for these tenders; No. 1's being "Shanghai"; No. 2's "Greyhound"; No. 3's "Wild Pigeon"; No. 4's "Tiger"; No. 5's "Snapper"; No. 6's "Gray Eagle"; No. 7's "Fashion"; No. 8's "Reindeer"; No. 9's "Peytona"; and No. 10's "Fairy." These companies consisted on an average of twenty men, and were considered the flower of the organizations to which they belonged; and no efforts were spared to make them all that practice and emoluments could make them, as regarded speed, vigilance, and efficiency. Many of them had a regular system of prizes, to be given to the member taking out the tender the greatest number of times in stated periods, quarterly, semi-annually, or annually; and nearly all of them had their race-course, in which they practiced speed at regular intervals, the Greyhound's being Washington Avenue from Eighteenth to Third Street, just one mile, which distance was often run, with twelve men on the rope, inside of six minutes. The Gray Eagle's was from Mound Market, on Broadway, "home," time at this day unknown.

Upon the establishment of the paid fire department in 1857, there were in active service ten companies as follows: "Central" Company, No. 1, was located on Chestnut Street, between Third and Fourth. It had fifty-six active members, two forcing-engines, two four-wheeled hose-carriages, and one two-wheeled One engine and one hose-carriage were owned by the company, and the others by the city. "Washington" Company, No. 3, was located on the west side of Third Street, between Elm and Myrtle Streets, and numbered fifty-eight members. It had one suction engine and one four-wheel hose-carriage, belonging to the city. The company owned the lot on which the engine-house was built, but the city owned the latter. "St. Louis," No. 4, was located on the southeast corner of Third and Locust Streets, and owned the house and lot and one engine and hose-carriage. All engine and hose-carriage then in its possession belonged to the city. This company had enrolled one hundred active members. "Missouri," No. 5, was located on Seventh Street, between Pine and Olive. It had one engine and two hose-carriages in its possession and the engine-house and lot were owned jointly by the company and the city. It had forty-eight members enrolled. "Liberty," No. 6, was located on Franklin Avenue, at the corner of Fourth Street, and had ninety-eight enrolled members. Its apparatus consisted of two forcing-engines and two four-wheeled and one two-wheeled hose-carriages, belonging to the company. The engine-house was the property of the company, and the lot belonged to the city. "Phœnix" No. 7, was situated on Fifth Street, near Park Avenue, and had eighty-seven active members, and owned one forcing-engine. It also had one suction-engine and two hose-carriages, belonging to the city. The company owned its engine-house, but the lot belonged to other parties. "Franklin," No. 8, was located on Eleventh Street, between Wash and Carr, and had seventy-three active members. It owned one forcing-engine and one four-wheeled hose-carriage, and was part proprietor with the city of one engine and one hose-carriage. "Mound," No. 9, was situated on the corner of Broadway and Mound Streets, and had eighty members enrolled. The city owned the hose-carriage, and the engine was the joint property of the city and the company. The engine-house was owned by the city.

"Laclede," No. 10, located at the corner of Fifth and Market Streets, had forty-eight members enrolled and owned one suction-engine and an interest with the city in another. Its hose-carriage belonged to the city, the engine-house to the company, and the lot to James H. Lucas. Lafayette Hook-and-Ladder

Company, on Wash Street, between Seventh and Eighth, owned its apparatus, but the house belonged to the city.

At this time the Fund Association for Disabled Firemen had on deposit between six and seven thousand dollars. The department was regulated by a union board of three members from each company, to which all matters concerning the department were referred. The fire department system was voluntary, and the organization was sustained by an annual appropriation of one thousand dollars to each of the companies, and by contributions from insurance companies, business men, property-owners, and the members of the various companies.

The engine-houses were all comfortable, and supplied with every convenience, and almost all of the halls or places of meeting in them were lavishly furnished with all that taste or utility could demand, the finest of them being the beautiful Gothic structure erected by Union, No. 2.

The abolition of the old department was not unattended with regret. For many years it had served the community faithfully without reward, and rendered valuable and important service. It had numbered many brave and generous men in its organization, and could boast of many deeds of gallantry, self-sacrifice, and heroism. The old system, however, not only trained bold and expert firemen, but gave rise to evils of the greatest magnitude. The spirit of rivalry not only produced competition in battling with the flames, but led to constant disorders and breaches of the peace.[1]

Some of the engine-houses became hot-beds for the growth of lawlessness and depravity. Youths not controlled by parental restraint, as soon as the shades of night closed in, sought the engine-houses, where hours

[1] A writer in the *Republican* of Dec. 30, 1877, says,—

"A few of these organizations were composed largely of men who preferred a whole skin to the excitement of a bit of fight, but the majority had always some unsettled score against some company or other, and, notwithstanding numerous vain and friendly essays, never tired of trying to effect a settlement. Whenever too much chaffing about town brought on a fighting mood there was sure to be a fire-alarm, and everybody of a belligerent disposition was fully accommodated. Of course many of these alarms were bogus, but they served their purpose well, and if genuine it was an easy thing always to open the hose by turning a stream of water into some industrious pump-well. It invariably had about the same effect as water upon lime,—generated an intense heat where it alighted, and the red-hot pumpers lost no time in abandoning their hose and hunting for something that might serve to lay out their fellow-men.

"This feeling of rivalry was exceptionally strong between the Franklin and Liberty Companies, and their little set-tos usually threw all others in the shade. So great did the mutual antipathy become that it was the rule, and not the exception, for them to begin to square off at each other on sight. One night a squad of men quietly effected an entrance to the engine-house of the Franklin Company, without awaking the watchman, stole the hose-reel, rushed it out to the vicinity of Uhrig's Cave, led off the hose, and laid it along in front of the residence of Capt. Cozzens, and then broke the reel to pieces and threw it into the pond or hollow which existed there then. Reels had frequently been captured and run into ponds or into the river before, but they were always recovered, and hence this unprecedented piece of mischief made the Franklin boys 'look cross-eyed,' and filled them with a desire for vengeance that nothing could satisfy. Of course the trick was chalked up against the Liberty men, and many a sore head attested to the earnestness of the desire to get even. Finally these companies had a battle that was calculated to satisfy the most savage of their members, and that 'laid over' anything in the history of the department. One Saturday evening, not a great while before the paid department was inaugurated, the companies met at the corner of Fifth and Morgan Streets, and indulged in a few knock downs as usual, and each drew off vowing vengeance. On the following morning, Sunday, a fire occurred in a little one-story building just south of Allen's foundry. There was a general turn-out. The fire was easily handled, but a few minutes later the Franklin and the Liberty Companies came together at the corner of Broadway and Liberty Streets. The Liberty men took up their position on the east side of Broadway, and the Franklin men on the west side. Two Liberty men got on the roof of a small house there, and two others got on the 'upper deck' of the Agnew engine which they possessed, and which was what was known as a 'double-decker,' being arranged for two sets of pumpers. The men on the roof kicked the bricks of the fire-wall loose, and then pitched them to their companions on the 'upper deck,' who passed them below. In this manner a good stock of ammunition was laid in for the inevitable conflict. After a little jeering on both sides the initiative brick was thrown by one side or the other, and then ensued a terrible scene. The air was fairly filled with clubs, bricks, and stones, and yells went up that could be heard to the uttermost limits of the city then. Blood flowed as freely as in a slaughter-house, and charge after charge was made on both sides without either securing any marked advantage. Finally pistols were drawn, and some forty or fifty shots were fired. Men dropped here and there from bullets or stones, and the scene resembled a real battle-ground. An eye-witness, in telling of the encounter, said that it was simply appalling. The sharp bark of the pistols, the dull thud of stones, and the yells and groans of men made many believe that there would be quite a death-roll for the city to mourn over that night. 'There was one man in that fight,' proceeded this relator, 'who did some of the most wonderful dodging I ever saw in my life. About half a dozen of the Franklin men got him by himself in front of a brick wall, and stood off and began to pelt him. He wore a red shirt, and was quite conspicuous. They were all throwing at once, and that fellow kept dodging around there for five minutes, with bricks cracking against the wall within an inch of his head or body every second, but never a one of them breaking his skin. It was probably the liveliest work he ever did in his life, and everybody who wasn't in the fight was hoping that he'd get away from them, but he began to grow a little tired, and a very swift shot finally doubled him up on the sidewalk. Then they let him alone.'

"Of the leaders of the Liberty men in this memorable battle, . . . two, as reckless dare-devils as ever lived, subsequently entered the Confederate service as spies, and made

were spent in the rehearsal of deeds of violence and crime, the planning of attacks on rival companies, or in scheming for the application of the incendiary match without danger of detection. Nightly, however, their conversation would be interrupted by the alarm-bell, "which in a majority of instances only heralded the intelligence that the incendiary had been at work." The "masheen" would go forth, "amid hootings and howlings, and the flames, fierce as they might be, would be as fiercely fought by the firemen, and when subdued, if not while they were still raging, the insulting taunt would be thrown out, and then a wild scene of riot would follow. Some of the participants would be taken to the police-stations, while others, with bloody heads, returned to the engine-house, to be the heroes of the next few hours." These riots were created and participated in by a certain class known as "hangers-on" and "runners." Many worthy citizens belonged to the companies, and exerted themselves to the utmost to prevent or check these evils. As has been truly said, the system had become a standing outrage. The spirit of rowdyism which had grown up under it, not satisfied with an occasional demonstration at fires, turned to the highways, and assailed the inoffensive citizen as he walked to his home. Political feuds were added to company fights, and the climax was an open warfare, not only as to companies, but individuals, the sight of a member of a rival organization being the signal for an attack. Suggestion followed suggestion, and restriction followed restriction, in the vain hope that a remedy could be found for the evils without the destruction of the system.

The old system was a power. It was no child's play to destroy an organization which the habits and needs of years had made a living thing, and which was endeared to the people by acts of the noblest heroism. The advocates of the department could point to half a century's unpaid toil; to acts of bravery for which comparisons could scarce be found; to deeds of daring which would have appalled the sternest warrior. All these deeds and all this half-century's toil had been given without reward, or at least none other than a knowledge that a whole community was grateful. They claimed for the members of the companies exemption from the charge of being riotous, and asked for protection against those who used the department for these disgraceful exhibitions. On the other hand, those who favored the change saw plainly the impossibility of separating the two elements. Nothing but the destruction of the good and commendable part would eradicate the evils which all deplored. They conceded the historical facts, of which all were so proud, but at the same time pointed to the disgrace which was inseparably connected with the department. They asserted that a volunteer department and acts of lawlessness were concomitants.[1]

many passages from St. Louis 'through the lines' with mails. They were everywhere in that row, urging on the boys, and doing very effective work themselves, yet, strangely enough, they were among the few who were unhurt. Once they went around a whole block and attempted to flank the Franklin men, but were set upon, and barely escaped with their lives. The outcome was that the Franklin men, in one of the most desperate charges of the day, routed the larger part of the Liberty men, just as the police, under command of Dan Rollins, then chief, arrived and put a stop to the proceedings. An inventory then showed that, although there was a very large list of wounded, only nine were seriously hurt, and only one was killed. This one was Owen Foy, a member of the Liberty Company. He was hiding behind a corner, and a crowd of the enemy coming suddenly round that way ran right on him, and one of them shot him through the heart. Several parties were arrested on suspicion, but it was never definitely ascertained who fired that shot, although it was done in broad daylight. None of the nine men who were badly injured died of their wounds.

"Owen Foy was the only fireman killed in any of the myriad rows, which is a very remarkable fact, but some of the volunteers met violent deaths by other means. During the great fire of 1849, for instance, Mr. E. Targee, a member of a volunteer company, in his efforts to check the flames, carried a keg of powder to a building which had just caught fire and threw it in. It exploded before he could get out of the way, and he was blown to pieces. The accident occurred at the corner of Second and Market Streets, and some time afterwards some repairers on the roof of old City Hall, at the corner of Main and Market Streets, found a part of one of Targee's legs in the water-trough. It was identified very positively by some peculiarity which was known to some of his friends. Another volunteer fireman was burned to death on the steamer 'Sultana,' which was destroyed at the foot of Florida Street in 1852 or 1853. He was on the upper deck, when the flames got so strong below him as to cut off his escape. He was a member of the old St. Louis. Another fireman named Baker was murdered one night in 1841 or 1842, in a building where he was employed, at the corner of Pine Street and Commercial Alley."

[1] Mr. Thomas Lynch, in his interesting history of the old fire department of St. Louis, says,—

"Toward the year 1851, two causes militated against the further successful prosecution of the extinguishment of fires by the volunteers. The first and prominent one was the acquisition as members, from time to time by the different companies, of a lot of refugees from justice and chronic roughs from the departments of the Eastern cities. The typical 'B'hoy,' or 'Sykesy,' was unknown in the department up to this time, but unfortunately he involuntarily transplanted himself from a clime where his safety and the wholeness of his skin were in jeopardy to 'the West,' where he would be unknown; but, alas for human calculations, the inherent 'cussedness' of their natures did not allow them to remain in obscurity any length of time, for, as a general thing, they were the best-known characters in the city within a few months subsequent to their arrival. These parties soon changed the aspect and *personnel* of the department from a band of friends and brothers to that

It became evident that nothing but the complete destruction of the volunteer system would secure the results desired. The ordinance creating the paid system was passed, and following close on its passage was its institution. The volunteer system retired. The engine-houses became places of mourning. The adherents of the system, chagrined at the cavalier manner in which they had been disposed of, met nightly to speak of the ingratitude of the people, recount the valuable services which had been rendered, or recall the crowd of reminiscences which were the glory and honor of the department. All the deeds, which were to them as precious jewels,—the heroism which only ended in the sacrifice of life, the winter midnight scene, the generous rivalry to risk life and limb, the hours of toil,—all, all were poured into sympathizing ears. One after another of the martyrs who at the post of duty scorned danger and courted death were reverted to, and as the virtues and heroism of each were truthfully recounted, many an eye that had looked fiercely and defiantly on the glaring flame grew dim with a manly tear. But while these brave firemen were sincerely mourning for the destruction of a system which they loved for the good it had done and still could do, there was another class who were lamenting its demise for entirely different reasons. This class were those who styled the apparatus "*de masheen!*" who said "*nah!*" and "*yaas!*" They regretted its destruction because they would have "*no more musses.*" They cursed a steam-engine as it passed them on the street, and called it a "*lum-mix!*"[1]

of rioters, 'scalawags,' and thieves and to this cause alone may be attributed the dissolution of the Union Fire Company in 1855.

"The character of 'Mose,' brought out about this time at the theatres, contributed largely to give *éclat* to the sayings and doings of these parties, and particularly in moulding the future character of the younger members. The other cause which also contributed largely to the change in the *personnel* of the companies was the passage through the Council in 1850, and during the administration of Mayor Kennett, of an ordinance appropriating the sum of one thousand dollars annually to each company, the immediate result of which was the withdrawal of all the wealthy citizens who heretofore had countenanced them by their membership and contributions, thus taking away their moral influence, or, in other words, their respectability or 'prestige' from the remainder. Still another source of mischief was the practice, too much indulged in, of giving false alarms, 'just for a run, you know,' often ending in disreputable scenes and lasting animosities. As may be imagined, the dissolution of the Union Fire Company and their introduction of the steam fire-engine created the greatest consternation in the ranks of the remaining companies, and the tremendous opposition set on foot by them delayed the formation of the steam paid fire department many months. Yet, through the extraordinary exertions of Daniel G. Taylor, George Kyler, of No. 8, and Davis Moore, of No. 6, who luckily were then members of the Common Council, and who possessed the unprejudiced foresight to recognize the advantages of the offer, the bill to accept the proposal of the Union Fire Company to present a steam fire-engine under certain conditions was carried against the combined efforts of the volunteers and all the 'old fogy' element at their back. Thus was the new order of things put upon a secure footing. In recognition of the supreme efforts of the two latter gentlemen mentioned, the first engines ordered by the department were named in their honor. This signal failure on their part only increased the opposition of the volunteers, who strained every nerve to not only strengthen their own position, but to throw every obstacle in the way of the successful completion of the 'new-fangled idea,' by not only starting new companies, but by harassing and impeding the work of the steamers at every opportunity.

"Spite of all their efforts, however, they weakened, and at last gave up the ghost. Evident superiority will conquer, and this fact being patent to a discriminating public and to the old firemen themselves, they gradually wound up and disappeared from the scene of action, the last one to fade away being the Central, the first to appear in 1837 and the last to succumb in 1858. Some of them, actuated by the good of the public, and recognizing the fact that they owed all they possessed to them, turned over their property to the city; others sold out and greedily pocketed the proceeds, and one became so disgusted at the turn affairs had taken that their premises were discovered on fire one evening, and everything they possessed went up in smoke. On this occasion the building was allowed to burn, the paid firemen having no disposition to 'conquer' so as to 'save' anything, and thus ceased to exist an active company deserving of a better fate, the ground upon which the house stood reverting to the city, its original owner."

[1] A writer in the *Republican* says that when the city determined to establish a paid fire department, the proposition met with the most bitter opposition "on the part of the volunteers, and on the part, too, of many others, for, notwithstanding their frequent little troubles, the volunteers unquestionably did some splendid service in fighting fire. Many of the boys opposed the 'paid department' project because at that time it seemed absurd to pay firemen. Others opposed it because it was sure to spoil lots of fun that could only be had under the volunteer system. Others opposed it because only eight men out of each company could get any benefit from it; and others opposed it because it threatened to do away with all opportunities for pillage at fires which the volunteer system gave, and which were always taken advantage of by a riff-raff class who are bound to get into all such miscellaneous organizations. Shortly after the ordinance was passed, and while Mayor Wimer was looking about for a chief engineer, Marlow's factory, on the site of the present foundry of Smith, Beggs & Co., burned down. H. Clay Sexton conducted affairs at that fire, it being in his part of the town, and through his efforts a man who was caught by the fire in the fourth story was saved. A lot of quilts, etc., were formed into what is known by the *pompiers* of the present day as a grip-sack, twenty or twenty-five men held them, and just as the flames reached him, the man in the fourth-story window was induced to jump. He was caught and suffered no injury. The mayor was so well pleased with Sexton's work that he tendered him the position of chief of the new department, which was accepted. The Mound Company joined the paid department by a unanimous vote, as did the Washington. The other companies were very vindictive towards these organizations, whom they regarded as renegades, and Sexton found a big job on his hands. He went to work, quietly, however, and by some

This class was severely grieved that they could not "bunk any more," and the wisest of them prophesied the failure of the system. Overcoming the few obstacles that were thrown in its way, the new system was inaugurated, and years have since elapsed. The results which have followed are the best encomiums which can be paid it. The startling alarm-bell, instead of being heard at almost any hour of the night, sending forth notes of horror from its brazen throat, is now seldom sounded. The institution of the fire-alarm telegraph, which is the great auxiliary of the department, is another great blessing. The alarm comes noiselessly over the wires, telling its tale with unerring accuracy. At the first stroke of the signal-box in the engine-house the firemen springing from their places, rush to the horses, and in another moment the harness is on, and the intelligent animals, apparently eager to reach the scene of fire, stalk unbidden to the apparatus. The match is applied, and in another instant they are on their way. Nothing is heard but the rumbling of the wheels of the engine and hose-carriages, the quick steps of the horses, and the occasional sharp whistle which is given *en route* to show that in five minutes and a half from the time the signal was received the engine was ready for work. There are no loud words spoken, no hooting or howling, and no street-fights. The same daring, the same heroism which characterized the volunteer firemen, is displayed by their successors. Tremendous streams of water are poured incessantly on the burning building, and as the angry flames burst out the *fiat* of the fireman goes forth, "Thus far shalt thou go, but no farther." Sinew and muscle will fail, the strength of men will grow to weakness, but the iron muscles and steel arms of the steam-engine are tireless,—no exertion can exhaust them, no labor affect them. As soon as the fire is extinguished, the horses, apparatus, and men are returned to their places. Such is the practical working of the St. Louis fire department,—a model in every particular, a source of pride to St. Louis, and a credit and honor to those who compose it.

The Paid Department.—For many years before the abolition of the old volunteer fire department, the subject of introducing a new system had occupied the public mind, and as early as October, 1854, the attention of the City Council was formally called to the matter by Mayor John How. In his message of the 9th of October he says,—

"I deem it my duty to recommend to your body the gradual abandonment of the volunteer fire department and the establishment of a paid one. In doing so care should be taken to secure, as far as practicable, the services of many of our experienced firemen, whose judgment and courage have been so frequently and thoroughly tested. The advantages of a well-regulated fire department are so great as to be absolutely necessary for our safety and comfort; and experience has shown that whilst the volunteer system possesses many strong recommendations, there are defects that a proper pay-roll would remedy."

The condition of the city treasury at this time was not such as to warrant the increased expenditure which would have been necessitated by the establishment of a paid department, and no practical action was taken upon the mayor's suggestions.

smooth talk induced Dick Beggs, of the Franklin, and Judd Bame, of the Phœnix, both of whom were excellent firemen, to accept positions as his assistants. The Phœnix and Franklin, after some ugly demonstrations, were induced to listen to a good-humored address one night from the chief, however, and not long aftewards 'came in.' The Liberty was very stubborn, but one night some one got into their engine-house and took the wheels off the engine and hose-reel, so that they could not be dragged out, and then set fire to the building. It burned down, and the wheelless outfit was ruined. This was the night of a grand parade by the volunteer companies, and not long afterwards the Liberty boys put their old machine on wheels, put on it the placard, 'Phœnix-like, we will rise from our ashes,' and paraded the streets with it. They never carried out the promise of the placard, however.

"The opposition to Sexton's men soon took a very annoying form. The volunteers, being much the stronger, used to make desperate attempts to draw the paid men into a row, but of course always made a failure of it. At nearly every fire for the first few months something would be done to harass the paid men and prevent them from accomplishing any good. At one fire, on the corner of Broadway and Franklin Avenue, when Madame English's house burned, two fine horses belonging to the department were stabbed and killed, and two men were knocked down, to say nothing of hose cut, etc. One night Mike Dressel, driver of the Mound engine, was struck with a stone and knocked off his horse on Franklin Avenue, between Ninth and Tenth Streets, while going to a fire, and frequently men were assailed by unknown parties. The only fire for a long time where there was harmonious work on the part of all was when the Pacific Hotel was burned, and so many lives were lost. It was a bitter cold night, and engines in one or two instances got stuck in the icy gutters, but always found ready hands to help them out, as everybody appreciated the terrible importance of united effort.

"One very troublesome trick the volunteers had was that of sounding false alarms, just to bring out the paid department and give it a tiresome run to no purpose. One night there were thirteen alarms. The paid men, of course, responded each time, and their horses were fairly worn out.

"The volunteers also endeavored always to beat the paid men out of the nearest plug to the fire, but Sexton conceived a plan to beat them that worked admirably. He had a light vehicle, with a few wraps of hose on it, and a very fast horse attached, located in a shed at a central point, and on the first alarm of fire Mike Dressel, the driver in charge, let his horse go his best. The result was that he reached the plug before any of the hand-engines of the volunteers in nine cases out of ten, and, having hose with him, was enabled to hold it till the first paid company arrived.

"Finally all of this opposition was tired out, and the volunteers, one by one, either dropped into the paid department or disbanded."

The subject was revived by Mayor Washington King in his message to the City Council on May 14th of the following year, but, for the reason previously mentioned, and owing to the great opposition manifested on the part of the volunteer firemen to the establishment of a paid system, nothing was done with the matter. Upon his re-election to the mayoralty in 1856, Mayor How, in his message to the City Council on May 12th, again renewed his recommendation made to that body in 1854, suggesting a change in the organization of the fire department. The subject was allowed to rest until July, 1857, when an ordinance was passed by the City Council and approved by the mayor creating a paid fire department. The first section of this ordinance provided that the fire department should consist of a chief engineer, two assistant engineers, and a board of fire engineers, one captain and twenty-five men for each regularly organized company, and as many hook-and-ladder men, not exceeding twenty-five, as should be required.

The late John M. Wimer, who was mayor at the time, took great interest in the establishment of the new fire department, and appointed H. Clay Sexton, who had been president of the Mound Fire Company, chief engineer of the new organization. The City Council appointed George Kyler and John Sexton, of the board of aldermen, and Davis Moore and Henry Almstedt, of the board of delegates, as a "board of fire engineers." The fire engineers held their first meeting on Aug. 24, 1857, and organized by the election of George Kyler chairman, and George W. Tennille secretary, and selected John W. Bame and Richard Beggs as assistant engineers. The new department went into operation on the 14th of September. The City Council, in establishing a paid fire department, was no doubt stimulated by the action of the Union Fire Company, No. 2, which, owing to the ruffianism that marked the old system, had resolved as early as June 22, 1854, to disband and retire from the department.

The company was urged to adopt this course mainly through the efforts of Frederick M. Colburn, who deserves distinction as being the father of the present steam fire department. Mr. Colburn was born in St. Louis, Nov. 26, 1826, and has distinct recollections of the great metropolis when it was but a small village, and the rendezvous of Indian tribes coming to receive their annuities. He received his education at the St. Louis University, where he passed through a full collegiate course. For many years he was one of the chief clerks in the St. Louis post-office, and in 1849–51 was manager of the telegraph lines on their first opening to St. Louis.

In 1853 he entered the railroad business as ticket agent of the Terre Haute and Alton Railroad. With the Terre Haute and Alton he also discharged the duties of general passenger agent and general treasurer of the company. Upon the completion of the Vandalia line to St. Louis he became its resident ticket agent, which important position he still fills to the satisfaction of the corporation and the public at large. No man connected with the vast railroad system of St. Louis is better or more favorably known than he. Naturally courteous, gentlemanly, and obliging, he is one of the most popular men in his position in the city.

Mr. Colburn was for eight years the efficient secretary of Union Fire Company, No. 2, and was an active member of the organization. In the spring of 1854, in view of the ruffianism which then marked the department, the members, as we have before stated, resolved to close their doors and retire from active service. They met, however, with great trouble in determining how to dispose of their property, for they were the only company which had refused to accept the stipend of one thousand dollars a year appropriated by the city, and were therefore the custodians of the only undisputed property in the entire department; but they also felt that all they possessed had been generously given them by their fellow-citizens, and should in some way still be employed for the public benefit. Several meetings were held to settle the matter, but without result, until on one occasion Mr. Colburn offered the following:

"*Resolved*, That the Union Fire Company dispose of their possessions and de.ote the proceeds to the purchase of a steam fire-engine, said engine to be presented to the city of St. Louis under the following conditions, viz.: The city to build a house for her reception in the quarter formerly guarded by us. Second, to employ at a salary a sufficient number of men to render her efficient. Third, the engine must bear the name of 'Union, No. 2,' and said name must be perpetuated in the new department for all time."

It is related that the idea struck the members like a revelation, and was followed by the greatest enthusiasm; the men sprang to their feet, hurrahed themselves hoarse, and adopted the recommendation unanimously. The city agreed to accept the terms proposed by the Union Company, and on Aug. 1, 1854, entered into a contract by which it was stipulated that the city should furnish the company with a suitable house, the company to provide a steam-engine, as proposed in the resolution offered by Mr. Colburn.

The smaller engine of the Union Fire Company was sold to parties in Highland, Ill., and its apparatus and property to other parties. About eleven thousand dollars was thus realized and invested in a

handsome steam fire-engine, and equipments manufactured by Abel Shawk, of Cincinnati, Ohio.

Thus the city is indebted to Mr. Colburn for the conception of the successful and brilliant fire department which to-day is the boast of all her citizens, and in which the name and fame of old "Union, No. 2," will forever live, when all its contemporaries shall have been forgotten.

Upon the dissolution of his company in 1855, Mr. Colburn retired from a fireman's life. He has for many years lived on his farm in St. Louis County, but is daily at his post in the city, dispensing the courtesies of a true gentleman to the traveling public.

Mr. Colburn is most respectably connected. His sister was the wife of the Hon. J. B. Bowlin, once member of Congress, United States minister to Central America, and United States commissioner to Paraguay.

The new steam fire-engine purchased by the Union Fire Company, No. 2, arrived on the east bank of the Mississippi Dec. 26, 1855, and the river being frozen it was drawn over on the ice by one of "Myers teams" at a cost of one hundred dollars. The new engine attracted a great deal of curiosity in the city, and a vast crowd stood for hours in the snow, which fell continuously, accompanied by a wind from the north and northeast, on Jan. 26, 1856, to witness the first trial. The experiment was entirely satisfactory, and the machine proved all that had been "heralded and anticipated of it." Six minutes and five seconds elapsed from the first application of fire to the first stroke of the engine; and from first lighting the fire until the first water was thrown, six minutes and fifty-eight seconds. The Union Fire Company having requested a number of prominent gentlemen to witness the trial of the first steam fire-engine introduced into the city of St. Louis and to report upon its merits, they acceded to the company's wishes, and the trial having been made, rendered a very flattering report in its favor. The document was signed by W. King, J. How, J. B. Mounton, J. W. White, James McCord, John Renfrew, Samuel Gaty, Wm. H. Clark, Wm. Palm, Edward Brooks, T. H. Buckland, George N. Stephens, A. Hull, George K. McGunnegle, N. J. Eaton, F. L. Ridgely, G. W. Sparhawk, Sr., George Kyler, James Cuddy, and John Sexton, Jr.

The City Council, in recognition of the liberality of the Union Fire Company in presenting to the city the first steam fire-engine in St. Louis, on motion of Alderman Kyler, passed a vote of thanks.

A second test of the new engine was made on January 31st, in compliance with a request of the committee appointed by the Union Company "to test the ability of the machinery to keep up steam for a longer period of time than was done on the 26th instant, at a pressure sufficient to warrant the belief that the engine will do the work which is expected of her." The second trial took place under the direction of the inventor and builder, Abel Shawk, at the foot of Carr Street. The committee in their report say,—

"The committee look upon this yet almost untried experiment in our city as the dawning of a new era in the organization of our fire department, and believe we have good reason to assert that at no distant time the efficient members who now compose the fire-fighting force will, in a great measure, be relieved from their most arduous labors. This opinion is supported not only by witnessing the experiments recently made in our city of the operations of the steam fire-engine, but from reports of their efficacy in other cities, where they have been introduced so successfully as not only much to reduce the number of persons employed in fire departments in those cities, but have had the effect of saving a large percentage of the cost of keeping up fire companies and lessening the rates of insurance.

"Results so desirable, if they can be obtained at a reasonable cost, should at once arrest the attention of our city government so far as to cause all necessary investigations to be made, in order to determine the propriety of introducing more of these engines into St. Louis. And if found to be expedient, it will be well for contracts to be entered into for their construction without loss of time, in order to secure to our citizens the greatest amount of benefits."

The new experiment was found to be entirely satisfactory; and the City Council, when it established by ordinance the paid department, in July, 1857, ordered, through the board of fire engineers, from A. B. Latta, of Cincinnati, three additional steam-engines, to be delivered in ten, thirty, and sixty days. The board of fire underwriters of the city also, immediately upon the organization of the new system, took measures to examine and assure themselves of the merits of the new agent for extinguishing fires. Becoming satisfied of the benefits of the steam system, they determined to order the construction of three new engines and present them to the city, as aids to the four that were already in use and owned by the municipal authorities. Accordingly, the association entered into a contract with Mr. Latta, who furnished the engines. The first of these, the "Missouri," arrived in St. Louis on June 30, 1858, and was tested on the following day at the corner of Olive and Main Streets, in the presence of the insurance representatives, officers of the fire department, and many citizens. It was described by one of the newspapers of the day as follows:

"It is called the 'Missouri, No. 5,' and bears on the wheel hubs an inscription indicating that it is the first gift of the board of underwriters to the city of St. Louis. On the metallic plate on the tool-box, in the front standing-place of the

machine, is engraved the motto, 'A sure thing.' The engine itself, in size, form, and capacity, is an exact counterpart of the 'George Kyler' and 'Davis Moore,' both of which are of the Latta make and patent. With it arrived a hose-carriage and 'dinker,' as the cart for the conveyance of fuel is called. The cost of the 'Missouri, No. 5,' we believe, is five thousand five hundred dollars, delivered, and the price of the whole, including tenders and all necessary apparatus put down in St. Louis, is five thousand eight hundred and fifty dollars."[1]

As soon as the three engines of the fire underwriters went into service, the old volunteer system began rapidly to dissolve.[2]

The first semi-annual report of the new department, rendered March 1, 1858, as compared with the report of the old system, from Sept. 14, 1856, to March 1, 1857, makes the following exhibit:

Old organization.

Loss by fire from Sept. 14, 1856, to March 1, 1857...	$595,580
Loss to insurance companies on same.....	383,010
Loss over and above insurance.	$212,570

New organization.

Loss by fire from Sept. 14, 1857, to March 1, 1858...	$244,930
Loss to insurance companies on same.....	141,550
Loss over and above insurance.....	$103,380

The annual report of the officers dated March 1, 1859, makes a much better showing:

Old organization.

Losses by fire from Oct. 13, 1856, to Oct. 13, 1857...	$1,302,250

New organization.

Losses by fire from March 1, 1858, to March 1, 1859.....	$211,629

The first anniversary of the organization of a paid fire system in St. Louis was celebrated Sept. 14, 1858, in an appropriate and handsome manner, by a parade of the entire department. The display was a very fine one, and elicited many complimentary remarks. The firemen were all dressed in their uniform,—black pantaloons and white shirts, without coats and vests, and each wore a water-proof hat. The machines were burnished and polished to the utmost, and several of them were gayly dressed with flowers and ribbons arranged in a tasteful manner.

The procession, under command of H. C. Sexton, chief engineer of the department, after forming at the corner of Fourth Street and Washington Avenue, traversed the principal streets, headed by a band of music in one of Arnot's cars, drawn by six black horses. Following the band came the engines, with their respective hose-carriages, in the following order: the George Kyler, No. 1; Old Union, No. 2; Davis Moore, No. 3; John M. Wimer, No. 4; Missouri, No. 5; Underwriter, No. 6; and Deluge, No. 7. Each of these machines were drawn by four horses, except the old Union, No. 2, which, weighing about a ton and a half more than any of the others, required six. Excepting the old Union, No. 2, the engines were all of Latta's manufacture, Cincinnati.

At three o'clock all the companies were in readiness at the corner of Fifth and Pine Streets to show the assembled people the relative efficiency of their respective engines. Patrick E. Burke, A. R. Easton, William A. Robinson, and M. W. Squire were appointed a committee to time the performance and measure the distance thrown. Twenty minutes were allotted to each engine for the trial, and they were tried in the same order that they had occupied in the parade. Each threw through one hundred feet of hose, using a nozzle of an inch and a quarter. The George Kyler raised steam in five minutes and fifty-five seconds, and threw two hundred and forty feet and eight inches. The old Union raised steam in nine minutes and five seconds, and threw two hundred and thirty-one feet. The Davis Moore raised steam in five minutes and five seconds, and threw two hundred and forty-four feet. The John M. Wimer raised steam in six and a quarter minutes, and threw two hundred and twenty-seven feet and three inches. The Missouri raised steam in six minutes and nine seconds, and threw two hundred and twenty-seven feet and seven inches. The Underwriter raised steam in six minutes and fifty seconds, and threw two hundred and thirty feet ten inches. The Deluge raised steam in four minutes and thirty-eight seconds, and threw two hundred and six feet and eleven inches. The average distance thrown was about two hundred and thirty feet. The whole affair was in a high degree creditable to the department and the city.

There were no changes in the officers of the de-

[1] On March 25, 1857, the mayor and City Council and a number of other invited guests visited one of the Wiggins Ferry Company's boats, which had been fitted up with one of Latta's steam fire-extinguishers. It proved a great success.

[2] The *Republican* of March 31, 1858, contains the following "card:"

"A report having been circulated that the volunteer fire companies are opposed to steam fire-engines, this is to notify the public that we, the undersigned, officers, in behalf of our respective companies, are, on the contrary, in favor of steam-engines, and that the only objection or difference between the volunteer and paid fire department is that the volunteer companies wish to have a voice in the election of the chief engineer and assistants, believing that they are the most competent persons to judge as to who is capable of taking charge of the companies in case of a fire.

"A. C. Hull, Central, No. 1; A. Sprague, St. Louis, No. 4; W. W. Branson, Missouri, No. 6; J. R. Wiseman, Liberty, No. 6; Geo. H. Clacker, Phœnix, No. 7; James Luthey, Laclede, No. 10; F. A. McDonald, Good Will, No. 11; E. E. Allen, V. P. Lafayette Hook-and-Ladder Company."

partment from its organization up to 1862, when the water and fire departments of the city were taken possession of by the military authorities. On June 20th, George W. Tennille, secretary, was removed on account of his alleged Southern sympathies, and on or about September 3d of the same year H. Clay Sexton, chief of the department, was removed by Gen. Schofield for the same cause, and put in Gratiot Street prison. Charles H. Tilson was chosen secretary to fill the vacancy occasioned by the removal of Mr. Tennille, and George N. Stevens was appointed, on September 15th, chief engineer by Gen. Schofield. Richard Beggs and John W. Bame continued as assistant engineers.

In May, 1863, there were connected with the department seven steam-engines, one hook-and-ladder, seven hose-reels and thirty-eight horses. The whole membership of the department, including the officers, was sixty-six men. The expenses from March 1, 1861, to March 1, 1862, amounted to $56,192.62, and from March 1, 1862, to March 1, 1863, to $51,543.54. The engine-house of the Davis Moore was burned in September, 1862, while the members were laboring at another fire. During the year ending April 1, 1866, the department purchased of A. B. Latta, of Cincinnati, one new rotary engine at a cost of six hundred dollars, for one of the new engine-houses which was then being built for the city. During the ensuing year two additional companies were organized, which increased the number of members to eighty-five. The city also purchased two of Silby's rotary engines for the department.

George N. Stevens continued as chief engineer until January, 1867, when he was succeeded by A. C. Hull, who held the office until the second Monday in May of the same year, when he was replaced by John W. Bame as chief engineer, whose assistants were Jacob Trice and Richard Beggs. During the administration of Hull and Bame, and up to May, 1869, there were no additions made to the apparatus of the department, excepting the purchase of one hook-and-ladder truck from E. C. Hartshorn, of New York, which was bought while Hull was chief engineer. In April, 1868, the fire department of St. Louis consisted of ten steam fire-engines and ten four-wheeled hose-carriages, one two-wheeled hose-carriage, two hook-and-ladder trucks, two fuel-wagons, eighteen thousand feet of two-and-a-half-inch rubber hose, fifty-eight horses, and an old two-wheeled hose-carriage and a hook-and-ladder truck, which were kept on hand in case of accident. The cost of the department for the year ending March 31, 1868, was $137,734.48, the expenses for the previous year having amounted to $173,864.31. The department consisted at this time of the Franklin, No. 1, which had been in service since November, 1857, and was located on the west side of Eleventh Street, between Wash and Carr Streets; Union, No. 2, which had been in service since December, 1860, and was located on the north side of Franklin Avenue, between Twenty-second and Twenty-third Streets; Washington, No. 3, which had been in service since January, 1858, and was located on the west side of Fifth Street, between Spruce and Poplar Streets; General Lyon, No. 4, which had been in service since April, 1858, and was located on Broadway, between Mound and Brooklyn Streets; Missouri, No. 5, which had been in service since June, 1858, but had no permanent location at this time, its apparatus being stored since Sept. 1, 1867, at the Central Station, on Seventh Street, between Pine and Olive; Underwriter, No. 5, which had been in service since July, 1858, and was located on Carondelet near Park Avenue; Deluge, No. 7, which had been in service since September, 1858, and was located on the north side of Market Street, between Fourteenth and Fifteenth Streets; Veto, No. 8, which had been in service since December, 1865, and was located on the corner of Twelfth and Salisbury Streets; J. F. Thornton, No. 9, which had been in service since June, 1866, and located on the corner of Barton and Easton Streets; Hampton Woodruff, No. 10, which had been in service since October, 1866, and was located on the corner of Jefferson Avenue and Estelle Street; Hook-and-Ladder Company, No. 1, which had been in service since September, 1859, and the present truck company, which was called W. T. Sherman, No. 1, after September, 1868, located on Seventh Street, between Pine and Olive Streets. Fuel-wagon No. 1 was located at hook-and-ladder truck-house, and fuel-wagon No. 2 was located at Washington Engine-House. The board of fire engineers were Messrs. Gottschalk, Parker, Friedrich, Etling, and Wells; John W. Bame, chief engineer; Richard Beggs and Jacob Trice, assistant engineers; and Wm. H. Dangler, secretary.

In May, 1869, H. Clay Sexton was again appointed chief engineer of the department, and has retained the position ever since. Mr. Sexton, before his first appointment as chief engineer of the fire department of St. Louis, had, as we have already stated, been for several years president of the Mound Fire Company.

Henry Clay Sexton was born in Wheeling, Va., in March, 1828. His father (who was a Virginian) gave him the fullest advantages of a public school education, and he graduated at the public high school. The elder Sexton moved to St. Louis in 1844, and took a leading position as carpenter and builder,

Chief of Fire Dept

erecting some of the finest edifices in the city. Young Sexton followed his father's trade until 1857, and was a fair mechanic. As we have seen, the question of organizing a thoroughly-equipped and well-paid fire department was under consideration in 1857, and H. Clay Sexton, who was a leader in the movement, exhibited in the discussions on the subject so thorough a knowledge of the requirements of the organization that his opinions were generally deferred to; and when in the fall of that year the department was established he was by universal consent appointed "fire chief" by Mayor Wimer. In a comparatively short time he organized the department, and had disciplined his men so thoroughly that the people reposed with a feeling of security from the ravages of fire. He discharged the duties so well that he was retained in the position by Mayors Filley and Taylor; but in 1862, when the city was under military rule, he was deposed, as previously stated, on alleged political grounds, although he had always been, and was then, a friend of the Union. The removal was resented by the most influential property-owners as an unwarrantable display of military power, but their protest was without effect.

Mr. Sexton then returned to his trade, in partnership with his brother, John Sexton,[1] and the firm transacted a very lucrative business, erecting some of the largest and finest buildings in the city. This connection continued until 1869, when Mayor Cole appointed him chief of the fire department once more; but the salary being only two thousand dollars a year, he declined. The insurance companies, however, having a very high estimate of his fitness for the position, offered to add three thousand dollars a year to the sum proposed by the Council, and Mr. Sexton then accepted the office, and has held it continuously ever since. It was his determination to make the department the best in the country, and it seems to be generally admitted that he has succeeded. The estimation in which he is held is shown by the fact that after the great fire in Chicago he was offered ten thousand dollars a year to take charge of the fire department of that city, but his salary having been increased he declined the proposition.

As "fire chief" Mr. Sexton is distinguished for his zeal and courage. He is usually first at the fire, and subordinates everything to duty, frequently risking his own life where he would not permit his men to venture. In "fighting fire" his judgment has been often most conspicuously exhibited in directing the right thing to be done at the critical moment. He has successfully battled with some of the worst conflagrations in the country, and his skill was specially displayed when lack of engines and of water rendered the conditions of his task inconceivably more difficult than at present. He has repeatedly been personally complimented by distinguished visitors who have witnessed his efficiency and bravery on critical occasions, and has frequently been injured while in the discharge of his duties. On one occasion his collar-bone, and on another his arm was broken. Among the members of the department he is is not only esteemed for his devotion and efficiency, but also for his magnanimous disposition. Although a thorough disciplinarian, he is generous and forbearing, and his treatment of the men is of a character that begets not only respect but affection.

Mr. Sexton has held many other offices of responsibility. In 1851–53 he served as constable; was collector of water rates under Mayor King; was director in the Benevolent Savings Association; is a prominent Mason, Knight Templar, etc.; belongs to the St. Louis Legion of Honor and nearly every other secret society, he says; and, besides this, has frequently been solicited to become a candidate for mayor, sheriff, etc., but has declined, much preferring the congenial duties of the St. Louis Fire Department.

In July, 1850, Mr. Sexton was married to Miss Sarah L. Lyon, of St. Louis, and from the union have sprung four children. He is eminently social in his tastes, warmly devoted to his family, and a man of healthy, religious convictions. For many years he has been a prominent attendant at St. John's Methodist Episcopal Church, and for a long while

[1] John Sexton was born in Wheeling, Va., in 1825, and removed in 1844 to St. Louis, where he was extensively engaged as a contractor and builder. Many of the principal buildings of St. Louis were erected by the Sexton brothers, among them being the *Republican* office, Jaccard's establishment, Singer sewing-machine building, City Hospital, House of Industry, and the fine buildings on Fourth Street adjoining the Chamber of Commerce building. Mr. Sexton was a member of the City Council for some ten or twelve years, being first elected a member of the board of delegates in 1852, having succeeded Hon. Daniel G. Taylor from the then Sixth Ward, as a Whig. In 1857, Mr. Sexton was a member of the first board of fire engineers, and assisted largely in organizing the present fire department. In addition to his services in the City Council, he represented his district in the Legislature in 1860–61, and went out with the "Jackson" Legislature to Neosho, but voted against the ordinance taking the State out of the Union. He was re-elected to the Legislature in 1872 and 1874, and held during his terms there the chairmanship of the Committee on Accounts and Retrenchment, and in 1875 was the chairman of the St. Louis delegation, in which capacity he won the confidence of his colleagues by his sturdy honesty of purpose. In many respects he wielded a decided influence over the deliberations of the House, owing to his energy and positive character. Mr. Sexton died April 25, 1875.

was superintendent of the Mound City Sunday-school. In every relation of life he is esteemed, and no man in St. Louis is more highly regarded or more deservedly popular.

George W. Tennille was appointed secretary of the fire department in May, 1869, and still discharges the duties of that position to the general satisfaction of the public. In 1871 an ordinance was passed by the City Council increasing the number of assistant engineers to three, and John W. Bame, on May 3d, was appointed to fill the extra position. During the year ending March 31, 1871, the department purchased new hose and a new engine, and erected an engine-house in Carondelet. Two years later, during the year ending March 31, 1873, the department was materially strengthened by the purchase of three new steam fire-engines of the "Latta" patent, with Ahrens & Co.'s improvements, of C. Ahrens & Co., of Cincinnati, Ohio, and four new hose-carriages, one of E. B. Leverch, of Brooklyn, N. Y., and three of B. Bruce, of Cincinnati. Two lots were also purchased and four new engine-houses erected, three of them for the three new engines, and one for a new hook-and-ladder apparatus which was purchased of G. W. Harris, of Chicago. The cost of these improvements amounted to more than fifty thousand dollars. The engines were fully equipped with men and horses and immediately placed in active service. The department had now (April 1, 1873) fourteen steam fire-engines, two hook-and-ladder trucks, and two fuel-wagons, all fully equipped and in good condition. The total expenditures for the year amounted to $242,416.14. In the following year three new steam fire-engines and five new hose-carriages were added, and three of the old engines were retired from active service, the department not having engine-houses for them. During the year ending March 31, 1875, the department had fourteen steam fire-engines, fourteen hose-carriages, two hook-and-ladder trucks, and two fuel-wagons in active use. On the 1st of December there were added three steam fire-engines, three hose-carriages, one chemical-engine, one fuel-wagon, and one hook-and-ladder apparatus. All the apparatus belonging to the department was then in good condition with the exception of seven of the old large engines, which had been in active service since 1857 and 1858. Although they were still used and were made to do good work, the department found that they were too heavy and took too long a time to generate steam to be as efficient as they should be, and, from their age and hard service and the increased cost of keeping them in repair, the city deemed it expedient to replace them with new ones of lighter build and all the later improvements. Accordingly, the department ordered seven new steam fire-engines of Messrs. C. Ahrens & Co., of Cincinnati, Ohio, to take the place of the old ones. Provision for paying for them was made by an act of the Legislature, which authorized the city to sell one hundred thousand dollars' worth of bonds for the equipment of the fire department. In the following year another new engine company was added to the department, which then had in all eighteen steam fire-engines and hose-carriages, one chemical-engine, four fuel-wagons, and three hook-and-ladder apparatuses. There were eight men for each engine and hook-and-ladder company, three men for the chemical engine, and two men for each fuel-wagon, all of whom, except the one on night watch, were on duty all the time both day and night. The total expenditures for the year amounted to $292,339.71.

The department, in equipment and general strength, was on March 31, 1878, at a higher point of practical efficiency than at any time in the previous history of the city. The number of engine-houses was seventeen; the number of fire-engines, eighteen; also one chemical-engine, eighteen hose-carriages, four hook-and-ladder trucks and apparatuses, and five fuel-wagons. The working force of the department embraced about two hundred men and one hundred and twenty-seven horses, and the length of hose was eighteen thousand feet two-and-a-half-inch rubber, and sixteen hundred feet two-and-a-half-inch cotton hose. The expenditures for the fiscal year ending March 31, 1878, aggregated $238,759.43, and the annual pay-roll $197,410.83. The amount spent for new apparatus was $3403.82. In January of the following year another steam fire-engine and apparatus was added to the department, making nineteen in active service. During the fiscal year ending March 31, 1881, another new steam fire-engine was purchased, making the department to consist of twenty engine and hose companies, one chemical-engine, two pompier companies, two hook-and-ladder companies, and five fuel-wagons; the force numbering seven officers and two hundred and seven men. There were also about twenty thousand feet of hose, and one hundred and thirty horses, and one extra engine and two extra hose-carriages. The cost of the department for the year ending April 10, 1882, was $290,276.86. All of the engines were of the "Ahrens Manufacturing Company" patent, and built in Cincinnati. The hose-carriages, which are two-wheeled, and made to carry one thousand feet of hose, were constructed in St. Louis. Under an ordinance passed by the City Council in February, 1876, two more assistant engineers were added to the department, and John Lindsay and John W. Shockey received the appoint-

ments. On Dec. 1, 1877, Jacob Trice, one of the assistant engineers, resigned, and M. J. Brennan was appointed to fill the vacancy. In August, 1881, Richard Beggs, first assistant engineer, died, leaving a vacancy which was filled by the appointment of John Lindsay, M. J. Hester being promoted to the position of assistant engineer. In October, Assistant Engineer J. W. Shockey was killed while on duty at a fire, and was succeeded by E. J. Gross.

The total value of the real estate, consisting of engine-houses, lots, etc., owned by the city and devoted to the use of the fire department is estimated at $150,000.

The officers of the department in 1882 were,—

H. Clay Sexton, chief engineer; John Lindsay, first assistant engineer; John W. Bame, M. J. Brennan, M. J. Hester, E. J. Gross, assistant engineers; G. W. Tennille, secretary.

The office of the department is at No. 816 North Seventh Street.

The following table shows the location of the different engine-houses, estimated value of the property, etc.:

ENGINE-HOUSES.

City Block.	Feet Front.	Feet Deep.	Street or Avenue on which Property Fronts.	Engine-Houses.	Estimated value, 1881. Real.	Estimated value, 1881. Improvements.	Total estimated value, 1881.

Fire and Police Telegraph.—One of the most valuable adjuncts to the fire department is the fire-alarm telegraph, which was completed and put in operation in St. Louis on January 2, 1858, by Gamewell & Co., of New York. The original cost was twenty-three thousand dollars, but since its introduction many improvements and additions have been made, until at the present time it is one of the most complete fire-alarm systems in the country. Upon the completion of the work and its transfer to the city, James A. Gardiner was appointed superintendent. At this time the alarm-bells were those of the Cathedral, St. Francis Xavier's Church, and the Mound fire-engine and South St. Louis fire-engine houses. The department had then only forty-five fire-alarm boxes in the city, but these have been from time to time increased until now it has in operation three hundred and forty-five street alarm boxes, eleven electro-mechanical tower bells, about seventy alarm-gongs (thirty of which are in insurance agencies and newspaper offices), twenty-two Barrett's engine-house registers, thirty-three police dial instruments, and five hundred and twenty-two miles of wire. The wires, which originally stretched across the house-tops, were nearly all removed in 1882 and reconstructed on poles. The appropriations for this department for the fiscal year ending April 22, 1882, amounted to $37,900, of which $18,900 was expended for improvements and additions, and $18,997.64 for salaries. Shortly after the introduction of the fire-alarm telegraph in the city, this system of telegraph was adopted by the police department. Several of the departments of the city government have in use also the telephone and police patrol telegraphic system, which have proven valuable auxiliaries to the municipal government. Ernest Hilgendorf is the present efficient superintendent of the fire and police telegraph department.

The Underwriters' Salvage Corps was organized on May 10, 1874, succeeding the organization then known as the "fire wardens," which had gone out of existence. The corps, which is conducted in the interest of the underwriters, relies entirely upon voluntary contributions from the local insurance companies for its support. During the year 1874 eighty-eight companies contributed. The force, as organized at

that time, consisted of one captain, one assistant captain, and six men. Charles Evans was selected captain of the corps in 1874, and has retained the position ever since. The first executive committee consisted of George T. Cram, chairman, W. D. Van Blarcom, J. B. S. Lemoine, W. G. Bentley, and Lewis E. Snow.

During the first (fractional) year, ending Dec. 31, 1874, the company attended sixty-seven fires, and spread two hundred and seventeen covers. On Nov. 21, 1874, William K. Keyes, a member of the company, was killed at the fire No. 309 North Fourth Street. He had been a member from the date of the organization. All the men belonging to the company have been selected with care, and are young, active, hardy, and intelligent.

In 1875 the executive committee was composed of William Bowen, president, Martin Collins, James Bartlett, W. D. Van Blarcom, and R. R. Fritsch, secretary and treasurer.

In 1876 the committee was composed of George T. Cram, president, H. A. Blossom, Martin Collins, W. G. Bentley, and W. C. Butler, secretary and treasurer.

In 1877 the Salvage Corps purchased for its headquarters the instrument known as "The Joker," by means of which alarms are received direct from the alarm-boxes, without the delay of waiting for their repetition at the court-house, as had previously been the custom, thus saving much valuable time. The executive board for this year consisted of George T. Cram, president, George D. Capen, Martin Collins, John W. Mason, W. C. Butler, secretary and treasurer.

In 1879 the company obtained a charter through an act of the Legislature, and removed to No. 619 St. Charles Street, leasing the premises now occupied by it for five years, at a rental of twelve hundred dollars per annum. The building was especially constructed for the Salvage Corps, and is complete in all particulars.

The members of the corps in 1882 were: Captain, Charles Evans; lieutenant, Frederick Williams; canvasmen, John Conway, Patrick Powers, Michael Kehoe, Frederick Williams, George W. June, John Leishman; driver, Francis Trowbridge; watchman, Henry Henley.

The executive board at present consists of George T. Cram, Martin Collins, George D. Capen, Howard A. Blossom, and C. F. Miller.

The following table shows the insurance, losses, and percentage on buildings and contents during thirteen years, ending December 31, 1881:

Year.	No. of Fires and Alarms.	Amount of Insurance.	Amount of Losses.	Percentage.
1869.....	146	$974,160.00	$362,322.00	$37.19
1870.....	220	1,798,950.00	650,317.00	36.69
1871.....	240	1,528,550.00	413,710.00	27.06
1872.....	234	2,442,945.00	944,231.00	38.57
1873.....	206	1,693,834.00	633,317.00	37.37
1874.....	222	2,214,133.00	503,937.00	27.75
1875.....	246	1,871,248.00	358,520.00	19.15
1876.....	301	2,161,890.00	401,147.00	18.55
1877.....	297	3,859,706.42	1,999,800.18	31.08
1878.....	293	2,057,346.00	372,186.67	18.09
1879.....	407	2,918,863.00	1,056,634.83	36.20
1880.....	461	3,398,819.08	1,110,725.34	32.70
1881.....	491	3,651,654.80	1,473,132.94	40.35

Old Volunteer Fire Companies.—Central Fire Company, No. 1. This company was organized in 1832, and was the first permanent company in the St. Louis volunteer fire department, its principal originators being Edward Brooks, G. K. McGunnegle, Thornton Grimsley, Thomas Andrews, Charles F. Hendry, and E. H. Beebe. To supply the company with necessary fire apparatus the mayor and aldermen of the city authorized Martin Thomas to visit the Eastern cities and purchase an engine. Mr. Thomas performed his task, and purchased a small brake engine manufactured by John Agnew, of Philadelphia, and called "Pat Lyon," in honor of a prominent iron manufacturer of that city and Pittsburgh. This engine was of the second-class pattern, with six-inch cylinders, seven-inch stroke, and had a "gallery," "brakes," and "foot-boards." Thomas Lynch, in his reliable little history of the "old fire-fighters" of St. Louis, says,—

"This engine arrived, as near as any information can be obtained, early in the fall, and the first test of her availability and fitness for actual service, considering the scanty means of water-supply, took place soon after her arrival, at the southeast corner of Third and Market Streets, in taking water from the cellar of Grimsley's National Hotel, which stood upon the original site of the old Baptist Church.

"Our old friends, the rotaries, were on hand also, and the announcement that all three engines were to be tried on a beautiful afternoon in October drew forth almost the entire population of the town, and much interest was manifested when one of the rotaries was put to the test, resulting in her discomfiture by the breaking off of almost all the cogs in the wheels at the third or fourth revolution, the breakage being caused by rust and neglect. This fact so disgusted the embryo firemen of the 'Central' that they refused to test the other rotary, and chose the 'Agnew,' which on trial proved satisfactory. What became of the two former engines it is now very difficult to discover, the prevailing impression among the old firemen being that the broken one was entirely discarded, and the other was used by the 'Union Fire Company,' pending the building of their regular engine, and then both dying an inglorious death by being sold for old iron."

The "Pat Lyon" was comfortably housed in a two-story frame structure situated on the west side of Main Street, about fifty yards south of Market Street, and opposite the only market-house in the city. In 1833 an engine-house was erected for the company's use on a lot belonging to the school board on the south side of Chestnut Street, midway between Third and Fourth Streets. The building was afterwards greatly improved, and a bell-tower erected on the roof. In 1842 the lot was purchased by the company.

In January, 1837, Edward Brooks, B. B. Brown, James P. Spencer, and E. H. Beebe, "their associates and successors," were "constituted and declared" by the Legislature "to be a body corporate and politic by the name and style of 'The Central Fire Company of the City of St. Louis.'" The first president was James Clemens, Jr., who served one year. He was succeeded by Thomas Andrews, who served two years; Edward Brooks, eleven years; Asa Wilgus, one year; Charles F. Hendry, one year; Edward Brooks (re-elected), five years; and A. C. Hull, until the company went out of existence. The other officers of the company during its existence were James G. Bury and William G. Hill, who were respectively secretary and treasurer. The foremen were Edward Brooks, Thornton Grimsley, Edward Polkowski, August Kehr, John Haywood, Joseph Andrews, and A. C. Hull. The company numbered among its members some of the most prominent and wealthy citizens of St. Louis.

The first engine of the company proving inadequate to the demands of the fire-service, a petition was presented to the City Council praying that body for the purchase of a new and more serviceable engine. The petition was granted, and in August, 1838, the company received from John Agnew, the builder, a fine fire-engine of eight-inch cylinder and nine-inch stroke. At the first trial "it every way equaled their expectations."

On the 7th of January, 1839, the following officers were elected to serve for the ensuing year:

Edward Brooks, captain; Charles Keemle, lieutenant; Thos. Andrews, first director; Nathaniel Paschall, second director; Edward Holden, third director; Jno. S. Shaw, fourth director; B. M. Backensto, first engineer; Thos. W. Cubberly, second engineer; Jos. W. Dougherty, secretary.

In January, 1840, the officers were,—

Edward Brooks, captain; C. F. Hendry, lieutenant; Jos. S. Simpson, first director; John Calvert, second director; Thos. Andrews, third director; Geo. Williams, fourth director; Geo. Trask, first engineer; Asa Wilgus, second engineer; J. W. Dougherty, secretary; A. E. Orme, J. Anderson, W. W. Amos, C. F. Hendry, John Calvert, committee of inquiry on applications for membership.

In 1843 the officers were,—

Edward Brooks, captain; Geo. Trask, lieutenant; D. H. Parker, foreman; J. C. Evans, first director; S. E. Polkowski, second director; J. S. Watson, third director; Bernard Pratte, fourth director; A. Wilgus, first engineer; J. F. Mitchell, second engineer; J. B. Carson, J. F. Mitchell, D. Tatum, C. F. Hendry, and D. H. Parker, committee on inquiry.

After it had been used for ten years, the company sold its second engine to J. P. Stiegers, and purchased a more modern engine of the same size and make, which, after a service of nine years, was sold to the city of Hannibal, Mo. "Their other apparatus, up to the year 1848," says Mr. Lynch,—

"consisted of a brace of two-wheeled hose-carriages painted black, one of which was surmounted by a bell hung amidships on a broad spiral spring, neither of which ever possessed a name, supplemented in the year mentioned by a four-wheeler built by Agnew, of Philadelphia, and called the 'Grace Darling,' painted blue, which color was thereafter adopted for the apparatus in general. The 'Grace Darling' is now in service in Springfield, Ill., and was, in the year 1853, replaced by another of the same make and of improved construction called the 'Perseverance,' also in use at present in the same place, and the usual tender or 'plug-catcher,' called the 'Shanghai.' The uniform worn upon parades or other gala occasions consisted of a light-blue shirt, trimmed with silver bullion fringe and stars (and while on this subject I will mention, to avoid repetition, that the shirts of all the companies in the department were made of fine merino,—no flannel being used, as was the custom in the Eastern cities,—and elaborately trimmed with either silver or gold bullion fringe, the wide sailor collar having a tassel and star in each corner), white pants, black necktie, patent-leather belt, light-blue low-crowned flat-top hat."

In August, 1859, the company sold its property to private parties and divided the proceeds equally among the remaining members, each share amounting to about seven hundred and fifty dollars. The Central was the last of the volunteer companies to disband. The only members of the company who joined the paid department were A. C. Hull, who was chief engineer for one year, Charles Tilton, of the "Pompier Corps," and John Murrell, of No. 8.

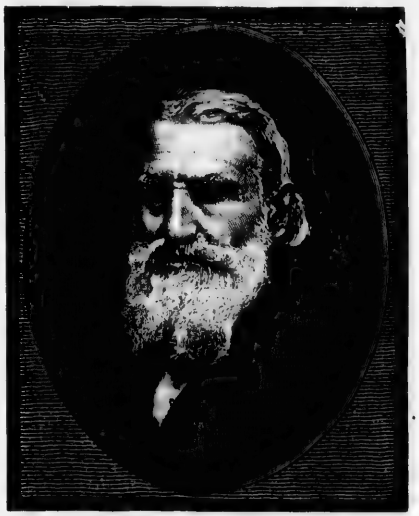
On its roll at different times appeared the names of the following citizens:

Joseph S. Pease, Frederick L. Billon, Bernard Pratte, Thomas H. West, Samuel Willi, Michael Tesson, Orville Paddock, John P. Reilly, Nathaniel Paschall, John Evans, E. H. Sheppard, James Spore, John Mullery, F. L. Cummings, Charles P. Chouteau, S. W. Meech, Alfred Tracy, Joseph L. Simpson, H. Smith, John and Robert Irwin, Edward Charless, J. A. Dougherty, John B. Gerard, N. Cross, Edward P. Tesson, John J. Anderson, Jules Delisle, Mark Smith, John H. Shannon, David Tatum, William F. Ferguson, A. L. Lyle, A. G. Switzer, John S. Watson, R. E. Ulrici, William and John Haywood, Charles Tilton, George W. West, Joseph Andrews, and William J. Austin.

Edward Brooks, who was captain of the Central Company for sixteen years, was born in Philadelphia on the 19th of August, 1809, and came to St.

Louis in the winter of 1830–31, embarking in the business of druggist on the corner of Chestnut and Main Streets, where he remained until burnt out by the fire of 1849. He then went into the insurance business as agent of the North American and Delaware Insurance Company, of Philadelphia, and afterwards accepted the position of secretary of the Boatmen's Insurance and Trust Company, of which Daniel G. Taylor was president. On the election of Mr. Taylor as city treasurer, Mr. Brooks was appointed his assistant, and continued to fill the position under all the succeeding administrations until his death, which occurred Jan. 23, 1879.

He was universally known and esteemed throughout the fire department for the sagacity, energy, and all-absorbing interest he manifested in everything pertaining to its welfare, and held more offices of trust in it than any other man who was ever identified with it. As previously indicated, he was one of the founders of the Central Fire Company, and continued an active member until the organization of the paid fire department, when he retired. Upon the creation of the office in 1850 he was appointed Fire Inspector, and held that position for some years. He was a member of the First Cavalry Company, commanded by Col. Thornton Grimsley, and was the founder and patron of the Firemen's Fund, and for eight years its president. He was also president of the "Fire Association" for three years. He was a member of the board of aldermen from 1840 to 1846, and was nominated by the Whigs for mayor about 1846 or 1847, but declined. Mr. Brooks was one of the founders of the Missouri Historical Society, and contributed materially to extending the sphere of the society's usefulness. He was noted for his kind-hearted and philanthropic disposition, and was generally regarded as one of the most valuable citizens of St. Louis.



Union Fire Company, No. 2, was organized in the autumn of 1832, through the efforts of Samuel Hawken, and was incorporated Feb. 6, 1837, by Hugh O'Neil, Benoni Severson, and Bryan Mullanphy. Its successive presidents were John R. Dobyns, Hugh O'Neil, George Trask, Nathan Coleman, Benoni Severson, F. W. Beltzhoover, George W. Atchison, William C. Corby, and Patrick Gorman, the latter of whom served thirteen years; and its secretaries, William A. Lynch, George A. Hyde, James Fortune, M. Mooney, and F. M. Colburn. The treasurers were Aug. Guelbreth, who served nine years, and Col. Joshua B. Brant, who retained the position until the dissolution of the company.

The following well-known citizens were members of the organization:

David Weston, John B. Philibert, Jr., Louis Le Duc, George Collier, Benjamin Lawhead, John Finney, John B. Sarpy, John and Edward Walsh, Henry Von Phul, Robert Campbell, Alfred Vinton, R. E. Bolton, Sr., Samuel Jackson, Charles C. Whittelsey, William Brannagan, John and Steven Rice, Henry Winstanley, William Traynor, William Buckley, William Fulton, William Grumley, William A. Watt, William Fullager, William Flynn, Beeson Townsend, Charles Marlow, Sr. and Jr., Daniel Bowe, Nathan Roff, Mark Murphy, Thomas O'Flaherty, Aug. Boardman, John C. Smith, Thomas and James Noonan, Michael Somers, Jeremiah Dwyer, Christ. Hoffmann, Joseph Murphy, P. S. Langton, Patrick Driscoll, Fred. Engel, James L. Faucett, Robert Tucker, John E. Scheutz, Edward Eggers, Charles and Edward Doll, Hugh Lynchy, Henry Delisle, John Darley, Fred. Harkman, Morrison Bryan, John Foley, John Martin, William K. Boggs, Walter Ransom, A. L. Kimball, Patrick and Martin Deegar, Moses Craft, Macklot Thompson, William Flynn, Fred. and Louis Siedekum, John Middleton, John D. Reed, Herman Metts, P. Norton, Charles A. Rose, A. C. and F. Williamson, William Thorpe, Hugh Corcoran, James and Daniel Coyle, Chris., Samuel, Jr., and Jacob Hawken, William and Thomas Francy, James Garvin, Aug. and William Lawrence, Patrick Lanigan, William A. Smith, John Freligh, Ed. Shields, Frank and Patrick Mooney, Richard and Enoch King, Samuel R. Filley, Thomas Rucker, Thomas and John J. Murphy, John Egan, Chris. Pickering, Statius Eggers, Jerome and Joseph Boyce, Rossington Elms, Ford. L. Garesché, Philip Coyne, Allen Riley, Michael and William Cody, S. Kehrmann, Martin Burke, M. Fitzsimmons, James Quigley, James Stewart, William and Samuel May, A. R. Hynson, F. Granniss, S. Birmingham, James and Hunt Owen, Bernard Higgins, Reuben M. Davis, Robert Kelleher, Joseph Givens, George Fairbanks, William Spencer, John Myers, George Trask, Jr., Tom, Dick, and Harry Connor, William Cannon, Joseph Shields, Frank Dugal, Daniel, Richard, and Ed. Byrne, George Hunt, D. Brislin, John Mulhern, William McDonald, Harry Yeckel, Ed. Fox, George Fye, and Thomas Lynch.

The company was first located in a one-story frame shed on the east side of Third Street, north of Washington Avenue, on the site of the present bridge approach, but subsequently secured a lot of ground on the west side of the same street, about half a block below, which was supposed to be school-land, and erected a plain two-story brick building, using the first floor only, and renting the second for school purposes. The company first occupied the building in October, 1835, but it was soon discovered that the property belonged to William Chambers, who compelled the company to pay a heavy rental for it. In 1845 the company petitioned the City Council for an appropriation of two thousand five hundred dollars to purchase a lot, but the application was refused, on the ground that the appropriations had already reached the limit allowed by law. In 1846, however, the lot belonging to William Chambers was purchased for three thousand dollars, and in 1847 a handsome Gothic building was erected, at a cost of five thousand three hundred dollars. Pending the erection of the building, the apparatus was housed in an old amphitheatre on the northeast corner of Fourth and Green Streets. The

first engine used by the company was a rotary, and the next was a small suction-engine built by Chase & Seymour, of Cincinnati, which arrived in St. Louis in 1835, and was sold to Hannibal, Mo., in 1847. The third engine was a first-class suction-machine built by Agnew, of Philadelphia, and was the best engine that had yet been used in St. Louis. It was received in 1843, and remained in use for twelve years, being dismantled in 1857. During that time it engaged in contests with the "Old Bull," the "O'Fallon," the "Liberty," and the "Phœnix," defeating them all, and gaining for itself the name of "The Emperor." In 1850 the company purchased a small Baltimore suction-engine, built by Rogers, as a tender to "The Emperor," which was called the "Dinkey," and was so small that it was an easy matter to lift it over fences and to work it in positions impracticable for the ordinary engine. It was sold by the authorities in 1856 to the town of Highland, Ill. The company also had two reels, one built by Joseph Murphy, of St. Louis, the hind wheels of which were nine feet in diameter, and called the "Legbreaker," a name which, Mr. Lynch says, "she richly deserved," and the other, built by Agnew, at a cost of eleven hundred dollars, and called the "Sam Hawken," in honor of the founder and oldest member of the company. The hose company adopted the name of "Greyhound," and the engine-tender that of "Slowline." The apparatus was painted vermilion, and the uniform consisted of a blue shirt, white pantaloons, blue low-crowned round-top hat, red patent-leather belt, and red silk necktie. The figure 2, in gold, was worn as a breastpin. The motto of the company was, "In union there is strength."

SAMUEL HAWKEN.

During its existence the company lost two of its members while attending fires,—Frederick Turnbull, who was killed by the falling of the floors of a warehouse on the Levee, near Washington Avenue, and Anthony L. Kimball, chief engineer of the company, who was killed by the falling walls of the store of Collier & Pettus, April 17, 1841.

The ruffianism which prevailed in the volunteer department had increased to such proportions in 1855 that the company resolved to disband. The question as to the disposition of the property then arose and gave the members considerable trouble before it was satisfactorily settled; but it was finally determined to sell it and invest the proceeds in an engine to be presented to the city.

A committee consisting of Capt. P. Gorman, William Fullager, and William L. Lynch was appointed to go to Cincinnati and procure an engine, and on the 26th of December, 1855, the engine, built by Abel Shawk, arrived in St. Louis, and was housed by the company until the city had erected a building suitable for its use on the south side of Washington Avenue, west of Seventh Street. The old house and lot were sold to the Collier estate, and the proceeds, together with those from the sale of the apparatus, netted eleven thousand dollars, which was expended in the purchase of the engine. The Union was one of the most popular volunteer companies that ever existed in St. Louis, and, as elsewhere stated, the city is indebted to it for the foundation of her present efficient fire department.

Samuel Hawken, the originator of Union Fire Company, No. 2, was in his day one of the most prominent and popular volunteer firemen in St. Louis. He was born at Hagerstown, Md., Oct. 26, 1792, and was a soldier in the war of 1812, participating in the defense of Washington and the battle at Bladensburg, which was afterwards jocularly termed the "Bladensburg races." He removed to St. Louis in 1822, and became a member of the Common Council. He was a gunmaker, and his "Hawken rifle" was famous from the Alleghenies to the Rocky Mountains, and was the weapon chiefly used by the hunters of the American Fur Company. His shop was located on Washington Avenue, and one day in 1832 there was an alarm of fire in his neighborhood, and Central Fire Company, No. 1, responded to the call. One of its members (Gilbert Chouteau) laughingly

chaffed Mr. Hawken on the fact that when there was a fire in his quarter they had to come from down-town and put it out. Mr. Hawken, with some spirit, responded, "You won't have that to say long!" and at once canvassed among his neighbors with such success that the Northern Fire Company was organized, the name of which upon its incorporation by the Legislature was changed to Union Fire Company, No. 2. It proved, as we have seen, to be one of the most active and popular fire companies that ever existed, and "Sam" Hawken (or "Uncle Sammy," as he was universally called) was one of its most efficient and best-beloved members. In 1845 the members purchased a four-wheel "reel," built by the famous Agnew, of Philadelphia, and costing eleven hundred dollars, and called it "Sam Hawken" after their trusty comrade. He was always foremost in the perils of fighting fire, and passed through many startling experiences. One of them deserves to be told. It was one bitter night in the winter of 1841–42 that the members were called out at a fire in the leather and hide warehouse of Raborg & Shaffner, at Main and Walnut Streets. The thermometer was twelve degrees below zero; the streets were a sheet of ice, and it was with the greatest difficulty that water could be made to go any distance through the hose without freezing, and the experiment of pouring whisky into the pumps of the engine was resorted to to prevent them from becoming entirely useless. The experience of many of the firemen on this memorable night was indeed frightful; several were picked up in the street insensible from the cold, and one was resuscitated only after hours of continuous labor. "Uncle Sammy" surrendered for probably the only time in his life, and while on his way home from the fire fell on the street insensible from the cold, and but for the lucky circumstance of his being immediately discovered would never have achieved his brilliant reputation as a fireman.

Mr. Hawken remained in active connection with "Union Fire Company" until its dissolution in 1855, when, having secured a competency, he retired to his farm in St. Louis County, where he is yet living, having passed his ninetieth year, in October, 1882. He is quite active for one of his years, and nothing so delights him as an opportunity to sit down with "the boys" and talk over "old times" and "fight his battles o'er again." Throughout his long career he has been distinguished for his honesty and general integrity of character. He was not only the idol of his company, but won and held the esteem of every fireman in St. Louis.

Washington Fire Company. No. 3, was incorporated in 1833, the incorporators being B. W. Ayres, John D. Daggett, James G. Barry, J. W. Walsh, Louis Dubreuil, P. Walsh, Isaac McHose, M. Steitz, and D. S. Richards.

The presidents, in order, were James G. Barry, John Kern, Hiram Shaw, John Warren, and B. M. Runyon.

Captains, John Warren, Isaac McHose, and Louis Guerette.

Secretaries, L. Dubreuil, Eugene Alcan, and John E. Liggett.

Treasurer, Ezra O. English.

Among the prominent members were the following:

Samuel C. Davis, Eben Richards, George R. Taylor, Wilson Primm, John Grimsley, John F. Thornton, George Maguire, Joseph L. Simpson, Jacob Thomas, Elkanah, James, and Joseph English, René Paul, George and Peter Morton, Eugene Laveille, Jacob Kern, Peter Guerette, James L. and Matt. Faucet, Peter, Richard, Joseph, and James Warren, David and Peter Monastes, J. B. Godet, Jabez Mulholland, Jacob Ziblin, Isaac McHose, Jr., Peter Berger, John W. Frakes, George W. Brackett, Milton Richards, George Martin, Ed. L. Chideaux, Frank and Charles La France, Frederick Kretchmar, Sr. and Jr., William Weightman, John Blake, Peter Kruess, A. L. Roland, Louis and Peter Turnot, J. Sabine, Frank Roper, J. A. Guyon, John and Peter Harvey, George Eberle, A. Fischer, Joseph and F. Brohammer, M. and J. Marley, Joseph and Adolph Brazeau, L. Perrin, Charles Mayhew, Gilbert and George Yeoman, B. Laibold, J. B. Teft, Thomas Busby, Joseph and William Kribben, William Sanford, George Miller, John Mulligan, J. H. Scott, Paul Wonderly, William Quellmotz, Christopher Burkland, James Meddicroft.

The company first occupied a one-story frame building on the east side of Second Street, between Almond and Spruce Streets; but in 1836 removed to a two-story brick engine-house on the south side of Spruce Street, between Second and Third Streets. The erection of this house and the purchase of new apparatus, etc., had involved the company in debt, and in order to relieve it the City Council, by ordinance approved Feb. 22, 1843, appropriated one thousand three hundred dollars to pay off the indebtedness, provided the company conveyed to the city its ground and engine-house. The city also agreed to provide another place more central and convenient whenever the company should petition for it, provided it could be done without loss or expense to the city. The company accepted these conditions, and continued to occupy the building on Spruce Street until 1853, when it removed to the west side of Third Street, south of Elm, adjoining Washington Hall, where it remained until its dissolution in 1857.

The first engine used by the company was the "Pat Lyon," which was loaned by the city government, and which it retained until 1837. In this year

a first-class forcing-engine was completed for the Washington Company by John Kern, of St. Louis, one of the incorporators and afterwards its president. This remained in use for sixteen years, and was replaced by one of Jeffries' manufacture, Pawtucket, R. I., which was of the same class as the former, but of lighter build. On the dissolution of the company it was sold to the town of Washington, Mo. The rest of the company's apparatus was also built by Kern, and consisted at different times of a two-wheel hose-carriage, a four-wheel one, called the "John Kern" in honor of its builder, and another four-wheeler, called the "Ezra O. English," in compliment to the lifelong treasurer of the company. The company also had the usual tender or plug-catcher, which was called the "Wild Pigeon." The apparatus was painted blue-black, striped with gold, and the motto of the company was "Veni, Vidi, Vici." The uniform consisted of a yellow shirt with silver trimmings, black pantaloons and belt, and black flat-top medium-crown hat.

The *personnel* of the company was composed principally of French and Germans. Their house was located in the district known as Frenchtown, and the few Americans who joined the company were well-known and influential citizens. In 1839 the officers of the company were Benjamin W. Ayres, captain; Isaac McHose, lieutenant; James Barry, first engineer; Louis Dubreuil, second engineer; Ellis Wainwright, first director; Hiram Shaw, second director; Thomas Denny, third director; Thomas H. Maddox, fourth director; Philip Reilly, secretary; and in 1840, Benjamin W. Ayres, captain; Isaac McHose, lieutenant; Ellis Wainwright, first director; Ezra O. English, second director; David S. Richards, third director; John Dunn, fourth director; John Kern, first engineer; Daniel Clover, second engineer; Louis Dubreuil, secretary.

ST. LOUIS FIRE COMPANY, NO. 4, was organized in 1839, and incorporated in February, 1841, with James H. Bayfield, Edward Holden, S. Sumner, Benjamin Ames, Joseph Southack, and David Woodman, incorporators. The first president was Joseph Southack, who was succeeded by C. W. Allen, John McNeil, and Ambrose Sprague, who held the position for thirteen years. The first secretary was Charles E. Allen, whose successor was Rudolph Wohleim, and the successive treasurers were Oliver Harris, John McNeil, and Sherr C. Hunt; engineers, David Woodman, Joseph McNeil, Antoine Goodyear, George N. Stevens, Charles H. Rigdon, John Pawley, and John Dunn.

A large number of the leading citizens of St. Louis were members of the company, among whom were,—

Joseph Woodman, George and John Knapp, Charles G. Chesley, John Thorning, Joseph Briggs, James and Thomas Turner, William T. and Taylor Blow, John B. Gerard, J. M. Kershaw, A. Brewster, Oliver A. Hart, Ed. Parry, Edwin Ellis, Ed. Chadwick, Thomas M. Wannell, John J. Murdock, John G. Priest, Isaac T. Green, R. Boyd, C. Kimball, James McNeil, Charles D. Walton, H. Robinson, C. Dunsmore, Gilbert Deacon, H. C. Hollingsworth, George Mattoon, Charles Smith, G. Bowen, George Sutton, R. E. Bolton, Charles Purdy, John Waters, Louis Neivergelder, Thomas Stroup, J. M. Eagan, Robert Baldwin, Samuel Treadway, Zero Marks, Samuel and Charles Stevens, Howard Shibley, Matthew Burns, George Scott, A. Robinson, Jules H. Guibord, A. A. Tutts, J. A. Phelps, J. J. Menges, John English, Jules Lachance, John Bell, Isaac Rigdon, William H. Curtis, and John O'Fallon.

The original location of the company was a one-story frame shed on the northwest corner of Fourth and Locust Streets, where it was afterwards joined by the "Missouri Company," and the building was divided by a partition, the St. Louis Company retaining the south side, which it occupied until the spring of 1841.

Col. John O'Fallon, who was one of the earliest members, had in the mean time presented to the company a lot of ground on the southeast corner of Third and Locust Streets, upon which a two-story brick engine-house was erected, the City Council appropriating fifteen hundred dollars for that purpose by ordinance approved Aug. 23, 1841. The front of the building was adorned with Doric and Ionic columns and an iron balcony. Above the roof rose a tower crowned by a figure, half fish, half human, which, says Mr. Lynch, for want of a better name, "was yclept a 'Prock.'" Another story was added to the building in 1845 and the hall refurnished, making it one of the most complete engine-houses in the city. The company remained in the building until its dissolution in 1859.

The St. Louis Company was partial to engines of Boston manufacture, but their qualities were not appreciated by any firemen outside of its own members. They were serviceable, but unwieldy and uncouth in appearance. The first engine, a second-class suction, built by Thayer, was known as the "Little Red," and after six years' service was purchased by the city of Galena, Ill. The second engine, "first-class in every respect," was built by Hunneman & Co., and was named the "O'Fallon" in honor of Col. O'Fallon. It remained in the possession of the company until the latter's dissolution, when it was sold to the city of Belleville, Ill. The last engine, also a first-class Hunneman, was bought for the company by the city, and reverted to the latter upon the disbanding of the volunteer organization. It was known as the "St. Louis,"

and was also eventually sold to the town of Belleville. The company's first reel was called the "Tiger," and was followed by a four-wheel single-reel with no name, and the "Rover," a handsome four-wheel double-reel. The tender was called the "Tiger." These carriages were all manufactured by Bruce & Snyder, of Cincinnati. The apparatus of the St. Louis Company was always of a vermilion color, and the uniform consisted of red shirt, white pantaloons, black patent-leather belt, red silk necktie, and red low-crowned round-top hat. The motto of the organization was "On hand." The company disbanded in the fall of 1858, and disposed of its property in March, 1859. The proceeds of the sale were divided among the members, each share amounting to between four hundred and five hundred dollars.

During the existence of the company three of its members met with violent deaths. Jesse Baker and Jacob Weaver were murdered by negroes April 17, 1841, in the store of Collier & Pettus, corner of the Levee and Pine Street, the building being afterwards fired; and Matthew Burns lost his life by jumping from the steamer "Sultana" while on fire, June 15, 1851.

Several of the members of this company joined the new department, viz.: George N. Stevens, who was for two years its chief, John R. Barret, No. 13, Lawrence Shea, No. 17, James Fitzgerald, No. 14, and Henry Burgh, No. 4, hook-and-ladder.

MISSOURI FIRE COMPANY, No. 5, was organized in 1839, and incorporated Jan. 29, 1841, by Nathan Coleman, David Watson, Timothy B. Edgar, Thomas B. Targee, John B. Blount, Edward Walker, and David Baker. The presidents, in order, were Nathan Coleman, R. S. King, George Burnett, Thomas B. Targee, Isaac S. Smyth, Thomas B. Hudson, and William W. Branson. Its secretaries were Joseph Rowe, John W. Allen, R. S. King, George Burnett, William L. Kid, J. H. Alexander, John H. Simpson, Isaac S. Smyth, and William Bright; and its treasurers, William A. Lynch, B. W. Alexander, D. R. Risley, and S. H. Laflin. Among the leading members of the company were the following:

L. D. Baker, Joseph C. Edgar, Thomas Dresser, John Finney, George W. Rucker, E. H. and William M. Simpson, Jason Holbrook, John B. Gibson, J. R. Hammond, John Hancock, M. R. Cunniffe, Charles Legurriere, A. L. Carson, L. S. Bassett, Charles Keemle, Charles Pickering, Jesse and Flem. Calvert, W. W. Thompson, William Glenn, E. H. Farnsworth, Joseph Beakey, R. Beauvais, T. D. Connor, Benjamin Philibert, H. W. Winstanley, N. A. Watson, John T. and William H. Chappell, D. J. Dickey, A. J. Nicolet, William R. Singleton, Samuel Hager, E. S. Evans, William M. Harper, Frank Molair, S. Hibbard, V. J. Peers, D. Matlack, G. S. and T. A. Day, J. B. Coleman, F. S. Turnbull, William Coggswell, E. A. Manny, F. Mallett, C. R. Worrel, S. W. Boyce, A. L. Perret, M. N. Burchard, P. W. Freese, P. Dunn, J. M. Field, John and William Eyma, J. Gregory, A. Ryon, E. W. Blatchford, Enno Sander, Z. N. Roberts, J. R. Snyder, A. J. Noble, E. Adriance, John T. Martin, Wilkinson Bryan, O. W. Childs, Joel Utley, Joseph and Morgan Russell, Oliver Bennett, S. K. Wilson, F. A. Remis, Edward Colston, James A. Marsh, William Green, L. N. Nutz, James H. Remington, Vincent Yore, Samuel Speilman, R. Grinstead, John Knobbs, J. Sylvia, E. C. Blackburn, W. J. White, J. H. Volcker, George Wetzel, and Thomas Darnes.

In May, 1840, the company commenced active service, having located itself in the one-story frame building on the northwest corner of Fourth and Locust Streets, occupied by the St. Louis Fire Company, which shared its quarters with the Missouri. A year later the Missouri Company removed temporarily to a building on Third Street, below Olive. In 1842, under an ordinance of the mayor and City Council approved March 2d of that year, a lot of ground at the northwest corner of Third and Olive Streets was purchased by the city, and twenty-six feet of it fronting on Third Street was leased to the Missouri Fire Company at the nominal rent of one dollar per year, for the purpose of erecting an engine-house. At a cost of about two thousand five hundred dollars, a substantial brick engine-house was built two stories high, with dome, cupola, and bell. From this location the company removed in 1852 to a house on Seventh Street, below Olive, which had been erected for its use, where it remained until 1858, when it disbanded. The first engine owned by this company was built by Farnham & Co., of New York, and was known as the "Old Bull." It was considered the best in the city until 1847, when it was defeated by the "Emperor," and in 1850 was sold to the Belcher Sugar Refinery. Subsequently it was repurchased by the company. In the mean time another engine was purchased, but it did not prove satisfactory. The last engine was the "Little Missouri," built by Button & Co., Waterford, N. Y., which at the dissolution of the company was sold to the city. The motto of the company was "Press on." In 1858, W. W. Branson and William Bright were appointed trustees to dispose of the property to the city, which they did, the city paying fifteen hundred dollars and assuming a debt of four hundred and fifty dollars upon the apparatus. About seventeen hundred dollars was received from all sources, of which one thousand dollars was expended upon a picnic, and the balance applied to the payment of the debt of the company.

Capt. Thomas B. Targee, who was one of the incorporators of the company, and who had held the positions of engineer, secretary, director, and president, was the only member who lost his life while in

the performance of duty. He was killed, as heretofore stated, by the premature explosure of a keg of powder which he had thrown into a building, during the "great fire" of May, 1849.

LIBERTY FIRE COMPANY, No. 6, was instituted April 23, 1841, and incorporated Feb. 17, 1843, by James McDonough, Samuel Gaty, John M. Wimer, William Piggott, Thomas O. Duncan, and others. Its successive presidents were John M. Wimer, T. O. Duncan, Adolph Philibert, and James Wiseman, and its secretaries, T. O. Duncan, William Piggott, Adolph Philibert, John F. Jennings, John Wise, and William A. Thornburgh. Its only treasurer was John F. Darby, and its engineers were James McDonough, Davis Moore, John Evill, Daniel Crouse, Nicholas Kitchen, and James Wiseman.

The original members of the company were the employés of Gratz, McCune & Co.'s foundry, but during its existence its roll of membership contained the names of many prominent citizens of St. Louis, among whom were,—

Richard J. and John Howard, John C. Evans, John E. D. Cousins, George A. Hyde, George and Philip Kingsland, James H. Locke, A. R. McNair, Peter Brookes, A. H. Glasby, Charles Todd, D. K. Ferguson, William H. Lightner, John T. Dowdall, William Mulhall, John C. Vogel, J. J. Drake, William H. Brantner, Bernard Crickard, E. H. Kellogg, D. S. Condit, S. S. Lewis, Joseph and James Kennedy, Henry M. Snyder, Theo. Sunderland, William Corby, William Caw, W. A. Walt, John O'Brien, Hiram and James Ogden, D. Ford, Joseph Margo, Vance Ware, Robert Lawson, Michael Belden, John Kupferle, Ed. Dunn, Michael Fitzpatrick, Alexander Boyd, William Patchell, T. Rogers, James McBride, J. A. S. and George R. Rice, B. J. Dailey, Robert Lindsay, William and George Wolf, Nat. and Robert Warren, William McCann, Ed. Dietz, Alfred Smyth, James Garrenghty, J. P. Robinson, John E. Woods, Charles and James Deal, Patrick McCauley, Conrad Bonikum, J. Walker, Henry Williams, William Condran, George Pelsch, John Looney, George Biederman, J. V. Lichtenstein, A. L. Whitley, John Butts, Nicholas Coglan, Patrick Donnellan, W. S. Blackman, and Rufus Kayser.

A lot of ground on the southwest corner of Broadway and Franklin Avenue was presented to the company by the city authorities for the site of an engine-house, and on this lot was erected a two-story brick building with cupola. It had a handsomely furnished hall and other conveniences. The building was occupied until Feb. 11, 1858, when it was destroyed by fire, and the apparatus rendered unfit for service. At different times the company owned three engines, the first built by Gaty, McCune & Co., the second by Agnew, of Philadelphia, and the third also by Agnew, which was called "Adolph Philibert" after a former president.

The motto of the organization was "We Conquer to Save." The last act of the company was the presentation to Hon. John F. Darby of a gold-headed cane as a token of his service as its lifelong treasurer.

PHŒNIX FIRE COMPANY, No. 7, was organized in 1843, with James G. Soulard, John Withnell, Charles Huth, D. D. Davis, James C. Lynch, and John Dunn as incorporators. Its presidents from time to time were Daniel H. Donovan, Richard Collins, Henry Pitcher, George Mayhart, and Daniel H. Donovan, who, being re-elected, continued to serve until the dissolution of the company. The secretary and treasurer were James Lemen and Charles F. Blatteau, respectively. Among the leading members were,—

John H. Fisse, Henry and Samuel Pilkington, William Stoops, Stephen Stock, John C. Degenhart, Richard Mawdsley, John W. Bame, John and Joseph Hercules, Jacob Trice, Jacob Kruess, Alexander Trickler, Francis Brinckman, [illegible]ry Meyers, Jacob Decker, William O'Brien, Henry Clacker, [illegible]. Harvey, Thomas Wake, William Kerr, John and Richard Collins, G. W. Ayres, George W. Campbell, J. D. Taylor, John F. Mitchell, Charles F. Taussig, and Jacob Freivogel.

The company first occupied a frame building at the junction of Second and Fifth Streets and Carondelet Avenue, but in 1846 removed to a two-story brick engine-house which had been erected for it on Fifth Street, north of Park Avenue. At different periods the company owned two engines, the first a first-class forcing-engine, built by John Kern, of St. Louis, and the second a second-class suction engine, built by Rogers, of Baltimore. The Phœnix was located farther south than any of the other companies, in a large and sparsely-settled territory, and had to rely almost entirely upon wells, cisterns, and ponds for water, but it was usually successful in subduing the flames. The organization dissolved Sept. 11, 1858, and sold its property to the city. At the time it possessed a small but choice library, which was presented to the Mercantile Library Association, in return for which the Mercantile Library gave a ten years' membership to such of the members as desired it.

FRANKLIN FIRE COMPANY, No. 8, was organized in 1844, and incorporated during the same year, by William H. Roberts, S. S. Carlisle, Frederick Laumann, T. R. Moore, C. Harrold, F. W. Engle, Philip Plitt, and F. Kenning. Its presidents were elected in the following order: William H. Roberts, S. S. Carlisle, F. Laumann, William H. Brant, George Kyler, Richard Beggs, and Henry Ungermann, and its secretaries were G. H. Hazzard, F. Engel, Willis R. Pritchard, Louis Laumann, and Earl Matlack. The treasurers were John Moore, F. Laumann, John McNamee, and Alfred Humphreys.

Among the members at different times were the following:

John R. Seisle, Johnston Beggs, Daniel and William Hazard, R. W. Cleary, Conrad Long, Timothy Whelan, Aug. Haper, David Goodfellow, Matthew Buchanan, James Carton, Francis Grannan, Carstan Hoffmann, William Braumsch, Elliot and James McLean, Barney and Louis Spelbrinck, John Dinan, Henry Glitz, George Kilpatrick, George Chambers, C. Steinmeyer, Joseph Bruce, Michael Hunt, Christ. Hamilton, John Jones, John Doyle, Francis Rogers, Thomas Fitzpatrick, John McCarron, Michael Pickett, Patrick Begley, Benjamin Jones, James Carlisle, Jacob Brant, Aug. Bottles, Frank Hopper, Adam Newman, William Howard, John Logan, John Bollman, John Martin, John Walsh, John Reed, Michael Belsen, H. Wolfenstein, James McCausland, Al. Matlack, James Barnidge, James Keefe, William Warden, Philip and John Scott, William Dieckmann.

The company's first quarters were a shed on the northwest corner of Eleventh Street and Franklin Avenue, and in 1847 it removed to a frame building on the west side of Eleventh Street, between Wash and Carr Streets. Upon this site a three-story brick building was erected in 1848, the City Council having appropriated two thousand five hundred dollars for the purpose. A life-size figure of Franklin flying his kite surmounted the building.

Two engines were owned by the company at different times, one made by Agnew, of Philadelphia, and the other by Button, of Waterford, N. Y. The motto of the Franklin was, "We have met the enemy and they are ours." In 1857 the city of St. Louis paid the company five thousand five hundred dollars for its property, and assumed its liabilities, amounting to four thousand dollars. With the five thousand five hundred dollars thus secured the "Franklin Library," on the northwest corner of Eleventh and Wash Streets, was established. The library did not prosper, however, and in 1866 its books, numbering two thousand five hundred volumes, and its shelves and furniture, were presented to the Public School Library. The surviving members of the Franklin Company received, each, an honorary life-membership in the Public School Library.

Mound Fire Company, No. 9, was incorporated during the winter of 1847, with James Gordon, G. E. Labeaume, S. Robinson, Wm. G. Clark, M. Brotherton, and Charles Guarcie, incorporators. Its presidents, in the order of their succession, were Dominick Childs, Charles R. Annis, F. Meyer, B. Jennings, William Pallis, and H. Clay Sexton; and the secretaries, C. R. Annis, Joseph Hull, A. Lemon, and A. C. Durdy.

Among its members were,—

Thomas A. Dryden, Hugh and Jefferson Sexton, John R. Dobyns, Charles Case, Levi Ashbrook, Sr. and Jr., John Sexton, Henry and Francis Overstolz, Joseph Hull, John W. Thornburgh, Ellis N. Leeds, Peter Wiles, James McKee, James A. Rogers, Nath. and Charles Chiles, John Davis, Jacob Bixler, Richard James, William Cluxton, Edward E. Allen, James Sloan, William A. Thompson, Frederick Stewart, John McNabb, Michael Dressel, James Doyle, William McCaw, William Fulton, E. Z. C. Judson ("Ned Buntline"), Mannus Rawle, John M. Wimer, Jr., Newton Brazelton, John Stevens, B. Wetzels, Michael Carey, A. Predoc, and Henry D. Young.

The company began active operations on the 22d of February, 1848. The first fire which it attended was the burning of Scott's Hotel, on the southeast corner of Second and Green Streets (now Christy Avenue), on which occasion the Union Fire Company rendered it substantial assistance, loaning it hose, supplying it with water, etc. The incident was never forgotten by the Mound Company, and the warmest friendship sprang up between the two organizations.

The first engine-house of the Mound Company was a frame building on the south side of Howard Street, east of Broadway. In 1852 the company removed to a two-story brick engine-house, erected on a lot presented by the city for the purpose, on the west side of Broadway, south of Brooklyn Street. The building had all the (then) modern improvements, with a cupola and bell; the bell, together with an immense golden spread eagle which crowned the pediment, having been obtained from the wreck of the "James Robb," one of the most palatial steamboats that ever ran on Western waters. The company never owned more than one engine, which was built by Agnew, of Philadelphia. In 1851 a "four-wheeler" reel was purchased, and was known as the "St. Louis Belle." It was wrecked in 1856, and its place was supplied by another four-wheeler, the "Shakrag." The plug-catcher was known as the "Peytona."

In 1852, through some oversight or inadvertence upon the part of its officers, the Mound failed to comply with the city ordinance of 1850, "establishing and regulating the fire department," by neglecting to file a statement of its condition within the time specified by notice. Edward Brooks, the inspector, suspended the company, and refused to allow it the regular quarterly allowance of two hundred and fifty dollars until it should be reinstated by the mayor and City Council. This was afterwards done, and on the 10th of December of that year the company was reorganized and the following officers elected:

D. J. Childs, president; C. L. Annis, vice-president; M. R. Roll, secretary; William S. Stamps, treasurer; R. D. Goodfellow, superintendent of hose; William Clark, J. Shoub, P. Goodfellow, Sr., R. Stevens, directors; J. Chaytor, chief engineer; J. Sexton, F. Myers, assistant engineers; William G. Clark, W. D. Leavitt, B. F. Jennings, J. W. Thornburg, A. Lemmon, standing committee; S. Treadway, T. Grant, W. Cronk, J. Bixler, L. B. Grafton, J. Henkins, auditing committee; H. Overstolz, D. A. Rawlings, L. Perkins, firemen's association committee; James W. Sloan, steward.

The motto of the organization was: "We fly to succor and to save."

The company dissolved in February, 1858, and conveyed all its property to the city of St. Louis for the sum of one dollar, upon condition that its house and fixtures should remain intact; that there should always be a company stationed in its district, and that the old name "Mound" should be perpetuated in the new department. Mound Fire Company, No. 9, of the paid department now occupies the old location. Many of the members joined the new department, among them being H. Clay Sexton, the present chief of the fire department.

LACLEDE FIRE COMPANY, No. 10, was incorporated in 1848, by Thomas A. Buckland, John J. Boswell, William H. Carroll, Charles Robb, Joseph Caldwell, August Guelbreth, John Knapp, J. B. McKown, Joseph T. M. Jilton, Michael Powers, J. Schroer, Thomas B. Targee, and Peter Wonderly. Its successive presidents were William H. Carroll, Peter Thomas, and James Luthy; captains, John J. Boswell, Jacob Scheer, D. Peterman, John Dempsey, Henry Cross, and John McCullough; secretaries, Barton Bates, Thomas R. Allen, J. M. Downey, and R. Dunn; treasurers, August Guelbreth, T. A. Buckland, M. Powers, and D. D. Lynch. The membership averaged one hundred, and upon its roll, among others, were the following names:

John N. Legg, J. H. Boswell, John Z. Miller, Charles G. Greene, E. M. Powers, Henry Wagner, William Long, William Flanigan, John Peterson, Jacob Scheer, Theodore M. Hunt, James Caldwell, P. B. Mock, Frank Dugal, Joseph Vasques, D. J. Gordon, Eph. Shirley, A. Dickson, L. B. Chapman, Edward King, John S. Taylor, Richard Ivers, J. M. Saunders, Andrew Dietz, D. Powers, Thomas J. Barrett, George Matthews, M. Forster, Jackson White, Thomas Dale, Patrick Murphy, Con. Lynch, H. P. Farber, Conrad Ittner, William Dillon, George P. Curtis, F. P. Doneho, T. M. Barron, James F. Small, Michael Dillon, William Tobin, D. D. Hunt, and J. Loan.

The company's headquarters at first were a frame building on the west side of Sixteenth Street, north of Chestnut, but in 1850 they were removed to a two-story brick engine-house on the north side of Market Street, east of Fifteenth, which had been built on a lot of land presented for the purpose by James H. Lucas. The first engine was a second-class forcing-engine, called the "James Gulick," built by Rogers, of Baltimore. In 1855 the company purchased its second and last engine, which was known as the "Laclede," from the same manufacturer.

In 1858 a committee, composed of James Luthy, D. D. Lynch, John McCullough, and P. Murphy, was appointed to take into consideration the best means of disbanding the company. This committee recommended the sale of the property to the city of St Louis for one thousand five hundred dollars, exclusive of all claims of the city or others. In September the recommendation was adopted, and the cash proceeds were ordered to be divided equally between the Polytechnic Institute and the Protestant and Catholic Orphan Asylums. The O'Fallon Polytechnic Institute in consideration of this donation offered memberships to the members of the company, many of whom availed themselves of the privilege.

LAFAYETTE HOOK-AND-LADDER COMPANY, No. 1.—On the 23d of July, 1855, a meeting was held at the Central engine-house to take into consideration the propriety of forming a hook-and-ladder company. Mayor King presided, and L. Dorsheimer was appointed secretary. The sentiment of the meeting was found to be in favor of the formation of such a company, and a committee, consisting of L. Dorsheimer, Capt. Couzins, George N. Stevens, John Dunn, David J. Dickey, and A. C. Hull, was appointed to procure the apparatus. At the same meeting David J. Dickey was authorized to purchase a truck. Mr. Dickey executed the commission, and in November following a handsome truck, built by Pyne & Hartshorn of New York, at a cost of one thousand dollars, arrived in St. Louis and was placed in active service. In 1855 the company was incorporated, with Charles P. Chouteau, D. J. Dickey, E. M. Joel, and Edward E. Allen as incorporators. The president was Charles P. Chouteau; Vice-President, Edward E. Allen; Secretaries, Edward E. Allen and S. S. Robeson; Treasurer, James Sweeney; and Foremen, D. J. Dickey, E. M. Joel, Lewis Fuller, and Wm. Mackey.

Among the members were the following: L. Dorsheimer, John Shore, J. A. Price, C. Robeson, James O. Alter, S. Hendel, James Oates, William Oates, S. C. Moore, S. Lambert, William Mallett, T. Wetmore, T. J. Greenfield, C. E. Allen, Hugh McDermott, James Oaney, and C. Fredericks.

At first the truck was housed in a shed on the east side of Eighth Street, between Washington Avenue and St. Charles Street, but was afterwards removed to a two-story brick engine-house erected by the city authorities on the south side of Washington Avenue, west of Seventh Street, which the company shared in common with "Union Company, No. 2," until October, 1857, when it was compelled to remove because of its refusal to join the paid department. The Missouri Fire Company offered it quarters in their building, and the offer was accepted, but on May 20, 1858, the company disbanded, and its truck was sold to the city of Alton, Ill. After the debts of the company had been paid, there remained a

balance of thirty-five dollars and ten cents, which was presented to the "Benton Monument Fund."

The motto of the company was, "Public Servants, not Hirelings," and its uniform consisted of red shirts trimmed with silver, black pantaloons, belts with the word "Lafayette" in raised letters, and black regulation New York fire-hats.

The Fire Wardens.—By an ordinance of the City Council approved June 17, 1841, the mayor of St. Louis was authorized and required to select from the able-bodied citizens of the different wards in the city, not members of a fire company, any number not exceeding twenty-five from each ward, who should serve for one year and be known and designated as "fire wardens and property guards." Their duty was to attend all fires, and remove or cause to be removed, under the direction of the mayor, or, in his absence, of such officer or officers as they should elect, all goods, wares, and merchandise in the vicinity of a fire, whenever they should deem it necessary, and take charge of the same when so removed.

From this body the mayor was required to select five persons from each ward, to be designated as "fire wardens," who were authorized and empowered to place a chain across the street in the vicinity of a fire at such a distance as to allow sufficient space to the fire companies and property guards. They were also empowered to remove all spectators from within the said limits, and to prevent any person from entering the same unless entitled to do so. The fire wardens had also the power to compel obedience to their orders and to arrest any one refusing to obey, who, upon conviction, was liable to a fine of ten dollars and costs. Each member was to be furnished by the city with a badge and staff designating his station, the badge to be worn on the hat at all fires; each property guard was also furnished with a canvas bag, and each fire warden with a suitable chain fifteen feet in length, with a ring at one end and a hook at the other, to enable them to form a chain of sufficient length to inclose the street, all of which were to be carried to every fire by those having them in charge.

The mayor was authorized to accept the services of any number of citizens not exceeding one hundred, who should form themselves into a volunteer association for the object designated. If no such association should be formed, the mayor was required to appoint the wardens and guards. An effort was at once made to form a volunteer company, and on Jan. 22, 1842, at a meeting held in the town-hall, at which the mayor presided, with N. E. Janney, secretary, a committee of five was appointed to prepare a constitution and by-laws and report to an adjourned meeting to be held January 27th. On that date the committee reported a constitution, which was adopted and the following were elected officers: N. E. Janney, captain; William Risley, lieutenant; James G. Soulard, first director; John Pitcher, second director; George Henderson, third director; Wayman Crow, fourth director; John Whitehill, fifth director; E. Klein, secretary and treasurer.

At a subsequent meeting of the directors (on January 31st), the following were appointed fire wardens:

First Ward.—D. S. Donovan, —— Townsend, James Ritchie, James Parker, David D. Carter.

Second Ward.—J. R. Stanford, W. Primm, David Shepherd, John H. Gay, L. Howard.

Third Ward.—Charles Mullikin, W. J. Leaman, D. H. Hill, Peter Powell, A. B. Chambers.

Fourth Ward.—E. Price, F. Jones, S. V. Farnsworth, J. C. Atkinson, W. W. Amos.

Fifth Ward.—George K. Budd, George Bushy, Dennis Marks, S. P. Ketchum, P. G. Camden.

At a meeting of the fire wardens and property guards, held Oct. 22, 1842, the following persons were elected officers for the ensuing year:

William Riley, captain; E. H. Robbins, lieutenant; Nathan D. Allen, secretary and treasurer; Samuel Townsend, first director; John Pitcher, second director; A. B. Chambers, third director; Charles R. Hall, fourth director; John Whitehill, fifth director.

At a meeting of the directors held Oct. 28, 1842, the following were appointed fire wardens for the ensuing year:

First Ward.—D. W. Donovan, David Cartan, James Ritchie, James Parker, Joseph Lurtz.

Second Ward.—J. R. Stanford, J. H. Gay, George W. Davis, Lewis Howard, Thomas J. King.

Third Ward.—Henry B. Belt, W. J. Leaman, George Henderson, Charles Fillman, Duke Ransom.

Fourth Ward.—Francis Jones, S. V. Farnsworth, N. E. Janney, Rudolph Bircher, Moses Stout.

Fifth Ward.—S. P. Ketchum, M. Simpson, J. L. Louderman, L. F. Rucker, R. P. Clarke.

The association was incorporated by an act of the Legislature, Feb. 20, 1845, with the name and style of the "Fire Wardens of the City of St. Louis;" and on March 13th an act was passed granting them the same immunity from militia and jury duty as the regular firemen enjoyed. The incorporators were,—

William Risley, H. Von Phul, E. Klein, N. Ranney, John D. Daggett, Edward Walsh, George Collier, Nathan D. Allen, H. Shurlds, Isaac B. Thomas, Louis T. Labeaume, John Whitehill, D. Hough, J. G. Lindell, L. A. Benoist, Thomas J. Meier, John Leach, A. H. Evans, P. Chouteau, Jr., Robert P. Clark, J. B. Brant, Daniel D. Page, John B. Sarpy, N. E. Janney, William Renshaw, A. Christy, Ferdinand Kennett, Lyman Farwell, John Simonds, J. R. Stanford, John Cavender, William M. Morrison, G. K. McGunnegle, William Bayliss, Augustus Kerr, Edward Tracy, Francis Jones, Martin Simpson, John Pitcher, A. M. Swart, William Vandeventer, C. M. Vallee, Peter L. Vandeventer, S. V. Farnsworth, and A. R. Everest.

On Dec. 5, 1845, the City Council passed an ordinance directing that all fines collected from persons arrested for resisting the wardens, etc., should be paid over to the captain of the said wardens for their use and benefit. The officers of the company were a captain, first and second lieutenants, and secretary and treasurer combined.

The captains were, successively, F. L. Ridgely, William Risley, John W. Luke, and D. N. Burgoyne; and the secretaries and treasurers, Robert Scott, F. R. Alexander, and D. J. Mange.

In September, 1868, the company supplied itself with a one-horse wagon, with the necessary tarpaulins, extinguishers, etc., and at the first fire attended subsequently property to the value of three thousand dollars was saved by it. This sum was several times the cost of the equipment. The wagon was first housed in the engine-house on Seventh Street, near Olive, and afterwards removed to the "Franklin," on Eleventh Street, near Wash. John Shea and Morgan Russell were its drivers, and G. Hoper and T. Whelan assistants.

In May, 1871, the board of underwriters sent to Chicago and obtained the services of Charles Evans, the present captain of the Salvage Corps, who organized and took charge of the Salvage Corps, and to whom is due its present great efficiency. The Salvage Corps supplanted the fire wardens, and they have done no active duty since that time. The organization is still, however, in existence, but no new members have been admitted since 1876. The present membership numbers one hundred and twenty persons, who pay an annual fee of five dollars. Four-fifths of the receipts are paid into the treasury of the "Firemen's Fund."

The Firemen's Fund Association.—On the 28th of January, 1841, a number of leading firemen belonging to the different companies founded the Firemen's Fund Association, the object of which was set forth in the preamble to the constitution, which declared that "whereas, the members of fire companies in the city of St. Louis are liable, in the discharge of their duties as such, to many casualties from which citizens generally are exempt; and whereas, they are frequently very injurious and sometimes ruinous to the health, comfort, and pecuniary circumstances of those on whom they fall," the association had been formed to afford the requisite relief, and any able-bodied member of the department might become a member on the payment of the initiation fee of five dollars, and a further sum of one dollar quarterly in advance; also, any citizen might become an honorary member by the payment of five dollars annually.

By a city ordinance approved Dec. 1, 1841, all fines that should accrue to the city of St. Louis for violations of the ordinance regulating the keeping and storage of gunpowder were appropriated and given to the Firemen's Fund Association. The association was incorporated by act of the Legislature in 1843. The dues first established were found to be very onerous, and were altered so that firemen were only required to pay one dollar per year. All the companies adopted a rule to admit no new member without the payment of the fee. The management originally consisted of a board of delegates, composed of one member from each company and two from the fire wardens; but this was changed to two delegates from each, and again to three from each company. The by-law which designated and provided for the relief of members was as follows:

"Relief shall be granted by this association under the following regulations, viz.: Any member who may receive an injury to life or limb or health, or who may become sick so as to incapacitate him from active duty, may receive aid not to exceed six dollars per week. In cases where application is made for funeral expenses, the amount allowed shall not exceed the sum of seventy-five dollars. The widow and children of a deceased member in good standing may receive such sums from the association as the board may determine." Such sum was generally twenty-five dollars a month.

The presidents of the association in successi[on] were Edward Brooks, Hiram Shaw, George A. Hyde, William A. Lynch, Thomas A. Buckland, Edward Brooks, George N. Stevens, and D. N. Burgoyne (since 1867); and the secretaries, George A. Hyde, E. M. Buckingham, V. Staley, John G. Priest, William F. Ferguson, M. Mooney, S. Stevens, D. R. Risley, C. F. Hendry, P. H. Branson, Robert Scott, J. C. Bury, D. N. Burgoyne, John W. Bame, W. H. Dangler, and John Lindsay (since 1871). The treasurers have been William A. Lynch, L. S. Bassett, William Risley, and John W. Luke (since 1861). The original life-members were William Chambers, J. V. Prather, C. H. Ruggles, Elizabeth Mullanphy, David Ranken, S. Labbadie, Joseph M. Field, A. Vinton, and James Clemens, Jr. Almost all who were ever members of either the volunteer or paid department belonged to this association. In 1869 the association purchased a circular lot in Bellefontaine cemetery, and dedicated it as a last resting-place for its members. William Buttons was the first member interred there, in April, 1870. The association was transferred to the paid department Aug. 13, 1864, and is now in a very flourishing condition.

The Fire Association, organized May 31, 1849, was composed of three delegates from each company, and its object was set forth in a clause of the constitution then adopted, which reads as follows:

"WHEREAS, various questions arise which concern the general interest of the fire department of St. Louis, the settlement of which under the present organization is liable to be attended with inconvenience and delay; therefore the several companies composing said department, in order to establish a body in which their views and interests in reference to all subjects of a general character connected with their duties may be suitably represented and promoted, have formed an association to be known as the Fire Association."

The first meeting was held on the above date, and the following were present as delegates:

C. C. Simmons, John Mullery, W. J. Austin, from No. 1; Samuel Hawken, Patrick Gorman, R. E. Bolton, No. 2; John Kern, Hiram Shaw, John Warren, No. 3; A. Sprague, S. Stevens, J. H. Bryan, No. 4; D. R. Risley, J. H. Alexander, George Burnett, No. 5; Joseph Margo, A. Philibert, J. P. Robinson, No. 6; J. D. Taylor, J. Lemon, John Dunn, No. 7; W. H. Brant, W. R. Pritchard, James McLean, No. 8; D. J. Childs, W. S. Stamps, James McKee, No. 9; W. H. Carroll, T. R. Allen, John Knapp, No. 10; Robert Scott, William Risley, E. A. Johnson, fire wardens. Hiram Shaw, of No. 3, was elected president; Patrick Gorman, of No. 2, vice-president; and S. Stevens, of No. 4, secretary.

The subsequent officers were: Presidents, Edward Brooks, A. Philibert, George Kyler, T. A. Buckland, G. N. Stevens, P. H. Branson.

Vice-presidents, W. R. Pritchard, D. H. Donovan, F. Laumann, George Kyler, A. Sprague, John E. Dunn, P. H. Branson, and James Luthy.

Secretary and Treasurer, S. Stevens, J. H. Alexander, D. R. Risley, William Bright.

The delegates were elected in March of each year, and were always representative firemen. Among their first acts was the adoption of a set of rules for the government of the companies while on duty. These rules bear upon their face evidence of the difficulties that lay in the way of a successful administration of the volunteer department. They were as follows:

"*First.* Any company or part thereof, going to or coming from a fire, shall not in any way obstruct or put themselves or apparatus in the way of another overtaking them, but shall in all cases give a chance for them to pass by, inclining to either side of the street as circumstances permit.

"*Second.* No company is to run their apparatus or any part of it thereof on the sidewalk, except when absolutely necessary.

"*Third.* No person having control of a pipe is to knowingly direct it so as to throw the water upon a member of another company; should he accidentally do so, he must change its direction immediately upon notification of the fact.

"*Fourth.* Members of companies who may be at a fire without their badge and wish to pass the lines, are to give the name of the company to which they belong, otherwise the guards may be justified in detaining him.

"*Fifth.* Members violating the constitution and by-laws of this association are to be reported to the officers of their respective companies, and upon complaint being made, it shall be the duty of said company to investigate the charges and award such punishment as may be necessary; and if not corrected by them, complaint may then be made to this association, which shall have power to make inquiry, and subject the offender to such censure as it may see fit."

An address was also circulated by the association censuring the city authorities for not more liberally sustaining the companies, and at the annual meeting in March, 1850, the following resolution, offered by D. R. Risley, was unanimously adopted:

"*Resolved*, That a committee of three be appointed to memorialize the Council for the relief of the fire department; that the indebtedness of each company be embodied therein and required to be paid; that the sum of one thousand five hundred dollars be required annually to sustain each company; that two thousand feet of hose be made up to each one; and that every engine-house be furnished as far as practicable with gas. That in the event of the foregoing being granted, we pledge ourselves not to call upon the city for money or hose, unless from destruction of apparatus by fire or other unavoidable accident, and that we recommend to all companies never to go before the public with a subscription-paper."

The City Council refused to do this, but passed a modified ordinance reducing the amount to one thousand dollars per year and the hose to one thousand feet, and insisted upon the appointment of an inspector. It also refused to pay the companies' debts, but subsequently consented to do so.

In May, 1851, Edward Brooks was appointed inspector, and served for three years; he was succeeded by George N. Stevens, who served until the dissolution of the department.

The association, while ostensibly having the government of the companies in its own hands, was powerless to carry out its decrees. It suspended and fined company after company, and reported its action to the City Council, but with no results, as that body always reinstated the offending company. The association finally resolved to investigate no further charges brought before it. In 1855 the Union Fire Company withdrew from the association, and was followed by the Franklin, Mound, Liberty, Washington, Missouri, Phœnix, Laclede, St. Louis, and Central. In 1857 the fire companies then remaining rejected the provisions of the ordinance establishing the paid department, and the association elected a chief engineer and three assistants of its own, who were respectively J. E. D. Cousins, A. C. Hull, A. Sprague, and Joseph Gregory. Before the term of these officers expired, however, the companies had nearly all disbanded, and they were practically officers without a department.

The last meeting of the association was held March 15, 1859, at which William Bright, secretary and treasurer, reported a balance in the treasury of twenty-eight dollars and ninety-five cents, which was ordered to be turned over to the Central Fire Company, the only volunteer organization then in existence.

LARGE FIRES.—1829. November 3.—The extensive brewery of John Mullanphy, situated in the upper part of the city, was wholly destroyed by fire, together with all the buildings attached to it. This was the first serious loss from fire in the city.

1832. April 23.—The steamboat "Talisman" was burned while in port. None of her furniture or cargo was saved.

1833. April 18.—The frame buildings occupied by A. L. Smith & Co. as a confectionery-store, and owned by L. Dever, together with their contents, were entirely consumed.

July 15.—The building containing the engine of the city water-works was burnt down, and the machinery of the engine destroyed.

1837. February 3.—The old theatre was destroyed by fire, and a tenement adjoining, occupied by Mr. Godfrey as a blacksmith-shop, was also burnt down. The theatre was unoccupied.

1838. December 10.—A new brick tenement, owned by E. Bredell, on the south side of Market Street, between Main and Second Streets, with the contents, was entirely consumed. The first floor was occupied by Henry Wieman & Co. as a family grocery-store, and the upper rooms by C. D. Osterloh & Co. as a dry-goods store.

1839. September 2.—The warehouse of Messrs. Blaine, Tompkins & Barrett, on Water Street, between Laurel and Vine Streets, was destroyed. The flames spread to the adjoining buildings. On the south a number of wooden buildings (a grocery- and drug-store, among them,—Alleyne & Co.'s and O. Cobb's) were also destroyed; on the north the adjoining store of Messrs. Stettinius & January shared the same fate. The first frame building adjoining Blaine, Tompkins & Barrett was occupied by G. M. Willing & Co. In this house several persons were employed removing the goods, when the gable end of Blaine, Tompkins & Barrett's building, which had previously been injured by an explosion of gunpowder in the store, fell upon it and crushed to death B. L. Turnbull, book merchant, James Hayden, son of Elijah Hayden, Matthew Medley, and a young man named Brewer, son of Charles Brewer. The losses of G. M. Willing & Co., Blaine, Tompkins & Barrett, Stettinius & January, Alleyne & Co., O. Cobb, J. Rice, and Z. N. Roberts, and the other occupants of the frame buildings amounted to about thirty thousand dollars. The whole loss did not fall short of one hundred and thirty thousand dollars.

1841. May 3.—The sub-treasury building and the stores of D. Levison, S. W. Meech, Thomas G. Settle, W. H. McKinstry, Messrs. Kimm & Tewes, and Wolff & Hoppe, on Main and Market Streets, and a number of small wooden stables, coal-houses, etc., in the rear were entirely destroyed. The stock of all was more or less injured. The loss on buildings amounted to between sixty and seventy thousand dollars.

December 4.—A row of six tenements, belonging to the estate of Mr. Mullanphy, was entirely destroyed.

1844. June 25.—The upper story of the United States Hotel, corner of Vine and Second Streets, was almost entirely destroyed.

October 30.—The Hope Mills, corner Fifth and Hazel Streets, owned by James G. Sutton, Mr. Black, and Dr. Culver, together with two hundred and fifty barrels of flour, were destroyed. The mills had been recently purchased for ten thousand dollars.

1846. September 26.—The hemp warehouse of G. W. Jenks, on Main Street, with its contents, was destroyed; loss, seventy thousand dollars; insurance, fifty thousand dollars. The William Tell tavern adjoining on the north was considerably damaged by fire and water.

1848. March 11.—The steamers "Avalanche," "Hibernian," "John J. Hardin," and "Laclede," lying at the Levee, near the foot of Washington Avenue, with nearly everything on board, were entirely consumed. Two barges lying above the "Hardin" were also destroyed.

1849. May 17.—About ten o'clock at night an alarm from the steamboat bells was sounded, which was the precursor of the most disastrous calamity that had yet befallen St. Louis. A fleet of boats was lying at the Levee, and the alarm was caused by the discovery of fire on board the "White Cloud," lying between Wash and Cherry Streets. The "Eudora" was lying above, and the "Edward Bates" below the "White Cloud," and the "Belle Isle" and "Julia" below the "Bates." At the time of the commencement of the fire the wind was blowing stiffly from the northeast, forcing the boats directly in shore, and contributing greatly to the extension of the conflagration. The "Eudora" was soon on fire from the "White Cloud," and the "Edward Bates" caught almost at the same time. The hawsers of this vessel were either cut or parted while on fire, and she drifted into the current, carrying destruction to almost all the boats south of her. Although the cables of all the boats were hauled in and the vessels drifted out into the current, the flaming vessel outstripped them all in the speed with which she traveled down-stream. She seemed intent upon getting in among and destroying the fleet now loosened from their fastenings and driven about, the sport of the wind and the waves, with no one on board to control them.

In a very short time, perhaps in thirty minutes after the conflagration commenced, the whole length of the wharf, from Cherry Street to the head of Duncan's Island, a distance of at least a mile, presented one almost unbroken line of either lurid light or brilliant blaze, and thus was sealed the destiny of twenty-three boats, nearly four hundred and forty thousand dollars' worth of property being destroyed. Following are the names of the steamers, together with the estimated marine loss and insurance:

Boats.	Valuation.	Insurance.	Where Insured.	Cargo.
American Eagle.	$14,000	$3,500	Pittsburgh.....	.....
Alice.....	18,000	12,000	St. Louis and East..	$1,000

	$339,000	$225,500		$97,000

Total number of steamers destroyed, 23.

Estimated value.....	$339,000
Estimated value of cargoes burnt.....	97,000
	$436,000
Estimated value of three barges burnt.....	2,500
Estimated value of one canal boat.....	1,000
Total value of boats and cargoes.....	$439,500

Many of the steamers were among the best and largest engaged in the St. Louis trade. Some had just arrived with full cargoes on board, some were in like condition ready to depart, and others partially loaded, either in the act of receiving or discharging cargo.

The destruction of property, though very great, was only the

forerunner of a much more serious calamity. On the Levee there were considerable quantities of freight of a combustible nature, which had been discharged from boats during the day. This freight soon ignited and burned for a long time. The fire began in a row of frame shanties on the river between Vine and Locust Streets, and spread very rapidly. Labeaume's building, about midway of the block, on the north side of Locust Street, was saved, but the whole of the block south of Locust, with the exception of Mr. Collier's house on Olive Street, and the whole of the next block south to Pine Street, and thence through to Chestnut Street, and south on Market Street until the flames reached the building belonging to the representatives of Pratte, on the corner of Market and Front Streets, were entirely destroyed. The buildings on Water Street, between Chestnut and Market, were saved. The intervention of the Market Square, although the market-house was in imminent danger, put a stop to the fire in this direction. Going back to Locust Street, in tracing the course of the fire, the corner house, owned by George Collier, was burned. The Pratte buildings were fire-proof, and offered successful resistance to the flames. Passing from this row of buildings, the fire swept down to Olive Street, taking nearly one-half of the block in its course; crossed that street, consuming nearly three-fourths of the block, including the *Reveille* office; passed over the whole of the blocks from Vine Street to Market, and terminated with the destruction of the row of buildings belonging to Mrs. S. Perry and E. Bredell, on the south side of Market Street, between Main and Second.

The *New Era*, the *Organ*, and the *Republican* offices, on Chestnut Street, were burned. The further progress of the fire was stayed on Market Street by the blowing up of several buildings in its path. During the explosion, by the premature bursting of a keg of gunpowder, T. B. Targee, a well-known citizen and leading volunteer fireman, was instantly killed and his body blown in every direction, and Wells Colton and Russell Prentiss were seriously injured.

Almost at the same time as the beginning of the fire in this section of the city, the flames from one of the burning boats communicated to the house at the corner of Elm and Front Streets, and swept away almost the whole block. The entire block between Main and Second and Elm and Myrtle Streets was destroyed, and fractional portions of the block north of the one just described and those south of Myrtle running to Third were also destroyed. The flames raged from 10 o'clock P.M. to 7 o'clock the next morning, aided during the whole time by a strong wind, which sometimes veered a little, threatening the whole city with destruction. The whole or parts of fifteen blocks were destroyed. At an early hour the water gave out, and the fire companies were unable to offer any effective resistance to the progress of the fire. Fifty-seven persons were arrested by the police in the act of feloniously carrying off the property of sufferers.

The aggregate loss of property, in buildings, steamboats, and merchandise, was estimated as follows by the city assessor:

Stock and merchandise in store and on wharf	$5,000,000
Steamboats, and merchandise on board	600,000
Buildings burned	2,290
Total	$6,102,290

The burning of the "White Cloud" was believed to be the act of an incendiary. On the 22d of May a meeting of property-holders and others interested was held at the Planters' House, to take into consideration the expediency of widening the streets, extending the wharf, etc. I. C. Meier was called to the chair, and Thomas Allen was appointed secretary. It was resolved that, provided in rebuilding the burnt district it was practicable and expedient to improve its appearance and guard against a like calamity by widening the streets, etc., the carriage-way on Main Street from Locust to Market should be widened to thirty-two feet, the sidewalks to fourteen feet; that the carriage-way and sidewalks of the cross streets from Locust to Plum should be widened; that Commercial Street should be opened to forty feet in width and declared a public highway; that the alley between Main and Second streets, from Locust to Elm, should be opened to twenty-five feet; that the wharf should be extended by depositing the rubbish from the fire, etc., upon the wrecks of steamboats lying in the river, and erecting a wall at a proper distance out to meet the grade to Second Street; that Main Street should be lowered two feet at the crossings, in order to effect a proper drainage; that fire-proof buildings only should be erected in certain districts; that no lumber-yards should be permitted east of Seventh street; and that the above propositions should be submitted to the City Council for its serious consideration, etc.

This disaster, in addition to the direct pecuniary loss inflicted upon owners of property, threw thousands out of employment, and the damage indirectly caused by it could not be calculated. Among the principal sufferers were Brown & King, Charles Allinger, James Bissell, Pierre Chouteau, Jr., Michael Robidoux, J. H. Gay, R. H. Miller, R. Rankin, A. Newberry, J. W. King, Abraham Jacobs, H. Von Phul, Isaacs & Brooks, B. Berthold's estate, Isaac Isaacs, A. Wickersham, Sublette & Campbell, Lewis M. Levy, L. V. Bogy, Julien Nicolet & Co., Theo. Gautrie, P. C. Havaker, Aimé Blaine, Patterson & Dorsheimer, Samuel Gensler, B. Pratte, Wm. H. Jennings, Harvey Beard, Simon Lewis, Samuel McNeilly & Co., Raborg & Shaffner, S. H. Herrick, Wm. L. Chatterwood, E. M. Sell, Greeley & Gale, Runyan, Hillman & Co., George Collier, Charles Semple, Peake & Baker, S. G. Blanchard, Smith Brothers, J. Wood, R. P. Hall, Bullock & Lawrence, Heiskell, Dudley & Thompson, John W. Eyre, L. M. Kennett, J. C. Barlow, Wm. Anderson, A. R. Jones & Co., G. W. Gosnell, Reid & Morgan, W. T. Reynolds, Bryan & Miltenberger, Matteson & Preston, Cabanné, Rasin & Co., John G. Priest, J. C. Grierson, Edward Brooks, Adolphus Meier, F. B. Chamberlain, Helfenstein & Co., Maginis estate, Charles Fredericks, John Mulliken, Robert Rankin, Peter Wilson & Co., Fred. Dings, P. A. Sarpy, Joseph Charless, T. Grimsley, Burd, Rucker & Co., Thos. Andrews, G. C. Robbins, N. H. Ridgeley, Brownlee & Homer, R. B. Mason, Wiel & Bros., Chamber of Commerce, Edwards & Nolte, E. C. Sloan, W. C. & R. Taylor, George Presbury, C. B. Fitch, R. M. Funkhouser, M. Jerome, L. Newman, James Clemens, Charles Roderman, Murdock & Dixon, Joseph Eck, Tewes & Haves, Chiles Brothers & Co., M. B. Mann, T. W. Ustick, S. V. Farnsworth & Co., J. F. Darby, Scott, Otis & Co., L. W. & L. E. Dupuy, L. A. Benoist & Co., S. Nidelet, J. E. Woodruff, B. H. Randolph, Keith, Ray & Co., E. Matthews & Brother, James Wood, J. C. Reynolds, John Simonds, Ferd. Kennett, H. Chouteau, Helfenstein, Gore & Co., Alf. Rogers, A. P. Johnson, J. B. S. Lemoine, H. S. & J. H. Lester, G. R. Clark, Riggs & Levering, Humphreys & Thatcher, Chas. Dana, Henry Shaw, Berthold & Ewing, John S. Thomson, Thos. G. Reyburn, Wade, Still & Co., Col. O'Fallon, A. Paul, Goodwin & Murray, F. Andrews, John Moss, Wood & Shaw, B. Weitkamp, David Dill, Geo. R. Taylor, A. A. & E. N. Parker, Woods, Christy & Co., Tevis, Scott & Tevis, Wilson & Brothers, Mary Harney, Crow, McCreery & Barksdale, Wm. S. Homas, Chas. Chambers, Mrs. Boyce, Page & Bacon, Charles & Hammond, C. Remington, R. P. Perry & Co., Hugh O'Neil, Wm. Robb & Co., John Bunding & Co., John & M. Michael, Levy & Brothers, Amadee Valle, Larkin Deaver, H. J. Reed, H. Cohen, J. B. Carson, S. B. Nourse & Co., Wm. Lightcap, George Baume, S. Blood, Felix Vallé, M. Rausch, Bowen & Hurlburt, Edward Mead, John Shaw, Wood & Violett, H. Papin, Rutherford & Day, George Baum, Samuel Turner, Knapp & Shea, C. Connery, S. Papin,

D. D. Page, I. A. Hedges & Co., Settle & Sherwood, *Missouri Republican* printing-office, W. T. Knapp, Geo. A. Miller, Breed & Cowles, American Tract Society, K. McKenzie, E. A. Johnson, Morgan, Reid & Co., S. W. Meech & Co., Elliott & Cauchois, D'Oench & Pelloux, C. & F. Jacobi, Warren & Joy, N. Philips, Wm. Russell, E. J. Gay, Hamill, McMech & Co., Thomas Andrews, Simon Abells, C. Dolman, D. V. Papin, F. P. Burke, and many others.

July 29.—The steamboats "Algoma," "San Francisco," "Mary," "Phœnix," and "Dubuque" were consumed by fire at the Levee. The following is a statement of the value of the boats, the amount for which they were respectively insured, and the value of their cargoes:

"Algoma,"	value, $10,000,	insured at	$7,500,	value of cargo,		$22,000
"San Francisco,"	18,000,	"	14,000,	"	"	20,000
"Mary,"	19,000,	"	13,000,	"	"	30,000
"Dubuque,"	10,000,	"	8,000,	"	"	3,000
"Phœnix,"	8,000,	"	6,000,	"	"	4,000
	$65,000		$48,500			$79,000

September 28.—The Old Scott Hotel, occupied by Messrs. Lewis as a tobacco-store, and a lot of lumber of the Union Lumber Company were destroyed, and the Virginia Hotel was slightly damaged.

November 15.—The extensive white lead, castor and linseed oil and vinegar manufactory of Henry T. Blow, on the corner of Tenth Street and Clark Avenue, was almost entirely consumed. The loss was one hundred thousand dollars; insured for forty-eight thousand dollars.

December 16.—A disastrous fire occurred in Lewis A. Labeaume's building on Locust Street, between Water and Main Streets.

1850. October 23.—The Missouri Mills, on the corner of St. Charles and Eighth Streets, owned by Joseph Powell, were totally destroyed; loss, fifteen thousand dollars.

October 26.—A fire occurred in the block of buildings occupied as the town hall, and the building occupied by S. H. Bailey and Joseph Neidner was destroyed. The books and papers in the offices of the city register and engineer were slightly injured.

1851. May 1.—Z. F. Wetzell & Co.'s drug-store on Main Street, between Pine and Chestnut Streets, and the adjoining building were destroyed. They belonged to Messrs. Bridges & Brothers and Thos. Andrews; loss, seventy thousand dollars.

June 12.—The steamer "Sultana" was totally destroyed at the foot of Mullanphy Street, and several lives were lost. Sparks from the "Sultana" set fire to the Missouri Sugar Refinery of F. Angelbeck, and inflicted a loss of twenty-five thousand dollars. The loss on the "Sultana" and cargo amounted to seventy-five thousand dollars.

1853. February 23.—The Broadway House, on Broadway, between Wash and Carr Streets, east side, kept by Mrs. Clemens Nomte, was consumed; loss, eighteen thousand dollars.

November 10.—Two buildings at the corner of Spruce Street and the Levee, occupied by Lafourette & Co. as an oil manufactory, were totally destroyed.

1856. October 31.—The cabinet manufactory of Mr. Prange, situated upon the block between Tenth and Broadway and Angelrodt and Mallinkrodt Streets, was destroyed. Seven of the employés of the establishment—John Mueller, Wm. Giesecker, Herman Obenhaus, Herman Allert, Henry Remment, and two brothers named Heneiman—perished in the flames.

November 20.—The block known as the City Buildings, situated on the Levee, between Market and Walnut Streets, was consumed. Morris Punch was killed by the falling of a wall. The owners of the property were S. B. Wiggins, Robert Campbell, John Kern's estate, James H. Lucas, Dr. Joseph Clark, Dr. George Johnson, Edward Haren, F. Coste, R. Barth, and Mrs. Dr. J. B. Johnson. The loss was estimated at three hundred thousand dollars.

December 13.—Johnson & Gillum's scale-factory, on the east side of Second Street, between Morgan and Cherry Streets, was destroyed; loss, twenty-eight thousand dollars.

December 23.—The large soap and candle factory of N. Schaeffer & Co., near the corner of St. Charles and Twenty-first Streets, was burned; loss, one hundred and twenty-five thousand dollars.

1857. March 24.—The large cotton manufactory of Adolphus Meier & Co., on the corner of Lafayette and Eleventh Streets, was destroyed.

June 29.—Barnard, Adams & Co.'s drug-store, on the northeast corner of Second Street and Washington Avenue, was destroyed; loss, one hundred and ninety thousand dollars; insurance, one hundred and fifty thousand dollars.

September 16.—Fire broke out in the carpenter-shop of Mr. Robb, on Eleventh Street, south of Market, swept the entire block, crossed Market Street, and destroyed the greater part of the lumber in D. F. Wright & Co.'s lumber-yard, amounting to between two and three million feet.

1858. February 20.—The Pacific Hotel, corner of Poplar and Seventh Streets, was discovered to be on fire in the lower part of the structure between two and three o'clock A.M. About one hundred persons were sleeping in the building, and before they were aroused all the stairways were on fire. The outside means of escape were insufficient, and the inmates were driven to the alternative of leaping to the ground from the windows or of being burned to death in their rooms. Many escaped by jumping, with more or less injury, but between twenty and thirty were either killed by the fall or met a horrible death in the flames. The exact loss of life was never known to a certainty, the books of the hotel having been destroyed, but twenty bodies were recovered, and others were supposed to have been lost. Contributions for the sufferers by the fire were raised, and a public funeral service, attended by military and civic societies and an immense throng of people, was held for a number of the victims who were buried together.

1859. April 16.—The store of L. & C. Speck & Co., dealers in hosiery, fancy goods, etc., No. 60 Main Street, was burned. The contents of the adjoining stores, belonging to William F. Enders & Co. and McDowell & Co., were seriously damaged by water; total loss, about one hundred thousand dollars.

June 30.—The planing-mill of Ladd, Patrick & Co., on the corner of Smith and Main Streets, and the grocery-store and dwelling of Henry Damer were consumed; loss, twenty five thousand dollars.

September 7.—The "Pilot Knob Flouring-Mill," situated at the corner of Main and Ashley Streets, was destroyed. The building was owned by Thomas A. West, and occupied by Goodwin, Miller & Co.; loss, eighteen thousand dollars.

September 10.—No. 101 North Fourth Street, occupied by James Spore, Wallace & Co., and Boggs & Leathe, was destroyed; loss, nearly eighty thousand dollars.

November 3.—A row of about twenty-five tenements on Green Street, between Fifth and Sixth Streets, was destroyed. The fire-engine "John M. Wimer," in making a sudden turn, ran upon the curbstone, and upsetting, fell upon and killed a son of S. S. Brainerd.

1860. July 31.—The manufactory and agricultural foundry of McMurray, Winkelmeier & Co., on the corner of Chestnut and Ninth Streets, was destroyed; loss, forty-five thousand dollars.

September 22.—More than twenty frame tenements on

Twenty-third Street, between Wash and Carr Streets, were destroyed. A little child was burned to death.

October 10.—Thomas Allen's rolling-mill, between Allen and Russell Avenues and Carondelet Avenue and Second Street, was partially consumed; loss, twenty-five thousand dollars.

1861. November 8.—The hemp-factory on the Levee at the foot of Mullanphy Street, formerly known as Blaine's hemp-factory, was destroyed; loss, one hundred thousand dollars.

1862. July 13.—The East St. Louis Hotel, the Belleville House, and six small houses were consumed.

August 27.—The drug-store of Z. T. Wetzell & Co., No. 30 Main Street, was destroyed; loss, fifty thousand dollars.

October 27.—The steamers "L. L. McGill," "H. D. Bacon," "Estella," "A. McDowell," and "W. H. Russell," with a large quantity of hemp and cotton, were destroyed; loss, about two hundred thousand dollars.

1865. January 22.—Trinity Church, corner of Eleventh Street and Washington Avenue, was burned; loss, thirty-five thousand dollars.

February 14.—The House of Refuge was partially destroyed, the damage being estimated at one hundred thousand dollars. It was supposed to be the act of an incendiary.

February 17.—Woodburn & Scott's spoke-factory, on the southeast corner of Broadway and Ashley Street, together with a large quantity of stock and machinery, was totally destroyed; loss, about two hundred thousand dollars.

1866. February 27.—The steam-flouring mill of C. W. Meier & Co., on the northwest corner of Franklin Avenue and Twenty-third Street, was destroyed. The flames spread to a Baptist Church on the opposite corner, which was also consumed. The loss on the mill was seventy thousand dollars.

May 4.—The car-house and stables of the Southern Division of the St. Louis or Fifth Street Railroad Company, on Carondelet Avenue, opposite the United States arsenal, together with one hundred and fifty horses and mules, sixteen street railway cars and other stock, was burned; total loss, about fifty-seven thousand dollars.

May 26.—Peter E. Blow's drug-store, Nos. 66 and 68 Main Street, was destroyed, and several adjoining buildings were badly injured; loss, two hundred thousand dollars.

May 30.—D. C. Freeman & Co.'s warehouse, corner of Elm and Third Streets, was burned; loss, one hundred thousand dollars.

May 31.—The Metropolitan Theatre, or Wyman's Hall, on the south side of Market Street near Fourth, with several of the adjoining buildings, was destroyed. The theatre was the property of Gen. T. L. Price, and was insured. The loss in buildings and property was about one hundred and forty thousand dollars.

August 23.—The Union Stables of Collins & Gillespie and the lumber-yard of Chapman & Thompson, on Broadway, between Bates Street and Cass Avenue, were destroyed. Serious damage was also done to the lumber-yard of Chapman & Thorp. The total value of the property destroyed amounted to about fifty thousand dollars.

1867. October 28.—The St. Vincent German Orphan Asylum, on Twentieth Street, between O'Fallon and Cass Avenues, was badly damaged by fire. The furniture was saved, the damage to the building amounting to about ten thousand dollars.

1868. March 2.—The steamers "M. S. Mepham" and "Fanny Scott," belonging to M. S. Mepham & Brother, were destroyed while lying at the wharf immediately below the Carr Street ferry landing, the loss being about eighty-five thousand dollars. The steamer "Kate Kinney" was also slightly damaged.

April 23.—The large wholesale stores of Blow, Curd & Co., Grimsley & Co., and De Greek & Co., on the west side of Main Street near Olive, were completely destroyed, together with their contents. The adjoining stores of L. & C. Speck and Clark & Brothers were badly damaged, and several others slightly. The office of the *St. Louis Price-Current* was also burned. The total loss in property and stock amounted to not less than one million dollars.

November 30.—The warehouse of Bloomfield & Co., commission merchants, with its contents was destroyed; loss, about one hundred thousand dollars.

1869. May 8.—Fire broke out in H. B. Milk's stables, corner of Sixth and Myrtle Streets, and extended to the O'Fallon Dispensary, which contained the Museum of the Academy of Sciences. The stables were destroyed, and the contents of the Museum damaged to the extent of fifteen thousand dollars.

1873. June 26.—Fagin & McQueen's pork-packing establishment, Second and O'Fallon Streets, was destroyed. There were two hundred and fifty live hogs in the building, besides large quantities of ham and many barrels of pork, which were also consumed. The loss amounted to four hundred thousand dollars.

1874. May 9.—An extensive fire occurred at Ellcardsville, on the north side of the St. Charles Rock road, between Belle Glade and Glendale Avenues. Several stores and dwellings with their contents were destroyed, entailing a loss of ten thousand dollars.

May 10.—McKittrick & Co.'s printing and book-binding establishment, No. 522 North Main Street, was burned, together with the stock and machinery, which were valued at sixty thousand dollars. The adjoining store of Westerman & Meier, dealers in crockery, glass and queensware, was slightly injured, and the stock damaged to the extent of forty-five thousand dollars, mostly insured. The stock of Henry Bell & Son, wholesale dry-goods, adjoining on the north, was also injured, their loss being about ten thousand dollars.

1875. September 28.—Several manufacturing establishments and a lumber-yard, situated on the block bounded by Poplar and Spruce Streets and Sixteenth Street and Tayon Avenue, were burned, the estimated loss amounting to fifty thousand dollars.

1877. March 4.—Gerard B. Allen's new building, on the corner of Washington Avenue and Seventh Street, occupied by H. T. Simon & Gregory as a wholesale dry-goods and notion-store and Claflin, Allen & Co. as a wholesale shoe-store, was destroyed. The building cost sixty thousand dollars, and the stock of Simon & Gregory was valued at two hundred and fifty thousand dollars. The tobacco-factory of Leggat, Hudson & Butler, in the southern portion of St. Louis, together with all the machinery and stock, was destroyed on the same day, the loss amounting to about sixty thousand dollars, partly covered by insurance.

1879. April 4.—The block bounded by Washington Avenue and St. Charles Street and Fourth and Fifth Streets was almost entirely destroyed. William Ruetz and Fred. Niesson, belonging to the pompier corps of Hook-and-Ladder Company No. 3, and George W. Farant, agent of the National Guard Association, were killed by falling walls. The loss was estimated at three hundred and fifty thousand dollars. Among the principal losers by the fire were the Mercantile and Real Estate Association, Appleton, Noyes & Maude, Hamilton & Co., Mack & Co., Jacobs Brothers & Hoffman, Dodd, Brown & Co., J. M. Randall, Morgan estate, Miss S. H. Lackey, W. H. Klein, J. H. Myer & Brother, B. Monti, White, Altheimer & Co., Miller, Grant & Co., Skinner & Co., Armory Hall building. The loss was partly covered by insurance.

May 10.—The warehouses of Gauss, Hunicke & Co., R. & W. Goldstein, and A. Frankenthal, Chase & Calbot, 401 to 409 North Fifth Street, together with the stock in them, were partially destroyed. The loss amounted to three hundred thousand dollars, mostly covered by insurance. On the same day,

in East St. Louis, the Union Warehouse, Yokum & Co.'s warehouse, and the freight depot of the Ohio and Mississippi Railroad, with their contents, together with thirty-six cars filled with freight, entailing a loss of about sixty thousand dollars.

August 15.—Elevator B, located on the west side of the Levee, between Lombard Street and Chouteau Avenue, together with a large quantity of grain, was destroyed. The building belonged to the Central Elevator Company, and was valued at about sixty thousand dollars.

1880. August 17.—The Yaeger Mills, on the east side of Mercer Street, near Clark Avenue, were totally destroyed. A large piece of burning timber from the mills fell upon the roof of the St. Louis Riding School, or the Old Rink, at Nineteenth and Pine Streets, and ignited it, causing the destruction of the building. The St. Louis Light Guard and Battery A, St. Louis Light Artillery, lost many of their carbines, sabres, uniforms, etc., which were in the building, the loss to the companies and the adjutant-general's department aggregating about five thousand dollars. The total loss upon the Yaeger Mills and the Rink was not far short of half a million dollars.

August 25.—J. G. Cameron & Co.'s planing-mill and the lumber offices and yards of Knapp, Stout & Co., on the corner of Bremen Avenue and Main Street, together with about three million feet of lumber belonging to John Myers, were destroyed. The loss was estimated at one hundred and fifteen thousand dollars.

September 13.—Scarritt's furniture-store, Moeller's notion-store, and the establishments of T. J. Merritt and Hamilton & Co. were burned. The stock of J. & T. Swallow and Leonard Roos was badly damaged by water, the total loss being estimated at one hundred and thirty-one thousand dollars.

December 23.—Kehlor's Pacific Flouring-Mills were destroyed. One fireman was killed and others injured by the falling walls. The loss amounted to one hundred thousand dollars; covered by insurance to the extent of forty-six thousand dollars.

The destruction by fire this year was larger than during any previous year subsequent to the organization of the paid department.

1881. January 9.—The Broadway Foundry and Machine-Shops and a number of small stores were burned to the ground; loss, about seventy-five thousand dollars.

July 13.—The foundry of the Excelsior Manufactory, corner of Smith and Lewis Streets, was burned; loss, about ninety thousand dollars.

February 5.—The building and stock of the Greeley-Burnham Grocer Company, the establishment of Peckham & Co., confectioners, and S. B. Sale & Co.'s grocery-house were destroyed. Three firemen were injured by the falling walls.

May 28.—The Collier White-Lead Works, on Tenth Street and Clark Avenue, were destroyed by fire for the third time.

August 12.—The Atlantic Mills, on the corner of Plum and Main Streets, were struck by lightning and completely destroyed. Almost in an instant the entire building was in flames, and its destruction was inevitable from the start. Many of the adjoining tenements were also consumed. There were many narrow escapes from death. The loss amounted to about two hundred thousand dollars. During the storm, Anheuser's brewery, corner of Eighth and Pestalozzi Streets, was also struck by lightning, and sustained a damage of about ten thousand dollars.

September 21.—The Collier White-Lead Works, in the block between Ninth and Tenth Streets and Clark Avenue and Walnut Street, together with many surrounding buildings, were burned. The corroding sheds of the works were totally destroyed. The loss was estimated at one hundred and seventy-five thousand dollars.

CHAPTER XXI.

EDUCATION.

In almost every community the public school is of comparatively recent origin and was preceded by the private school. The humble pedagogue was the forerunner of the modern educator, and upon the foundations of the log school-house were erected those splendid institutions now the pride and ornaments of our cities. The early settlers of St. Louis were too busily occupied with the necessities of their physical welfare to devote the time and attention to mental culture which were even then bestowed in the older communities of the New World. The fur-trading post of Laclede, from its selection in 1764, was without any school, as far as appears from the records, until the arrival from New Orleans of John Baptiste Trudeau, in 1774. "He is the only instructor whose name is mentioned in the French records. His education entitled him to the patronage which he received. The sons of the principal men of the town were confided to his tuition, and the children of his cousin, Lieutenant-Governor Trudeau, were educated by him. According to Paxton's Directory, Mr. Trudeau was in 1821 still pursuing his vocation, his school being then located on the south side of Pine Street, between Main and Second Streets. He taught school in St. Louis about half a century[1] and died in poverty, the profession to which he had devoted his life having barely afforded him the means of subsistence.[2]

"The second school of which there is any record was kept by Madame Marie Payant Rigauche. This school was opened in the beginning of 1797, in Joseph Mainville's old log house, on the east side of Main Street, just south of Locust. Madame Rigauche taught for about two years. It is probable that she retired in 1799, for after that year no record mentions the existence of her school.

"Under French and Spanish rule, the language used in the schools of St. Louis was French. It may

[1] In 1825, J. B. Trudeau, Sr., stated that "he has resided in St. Louis fifty-one years."—*Hunt's Minutes*, vol. iii. p. 62.

[2] John B. Trudeau was born in 1748 in Canada, son of Joseph Trudeau and Caroline Menard, and married in 1781 Madelaine Le Roy, widow of Francis Hebert (Belhomme), daughter of Julien Roy and Barbara Saucier. Their children were: 1. John Baptiste, born in 1782, died 1783. A child in 1785. 2. Euphrosine, in 1787, married to Louis Bissette in 1803, secondly to Joseph Leblond in 1812, and thirdly to John B. Bercier in 1829. 3. Louis, in 1794, married Archange Du Mouchet in 1814. 4. John B., in 1800. 5. Aspasie, in 1803, died 1804. 6. Adrienne, married Antoine Citoleur, 1813. Trudeau died in 1827, aged seventy-nine years.

naturally be presumed that the instruction was very superficial. The school-books were of the most elementary character. Even in the case of the richer families the teaching was confined to a few of the principal branches, while the poorer children, from the inability of their parents to do better, either received no instruction or were taught only the simplest rudiments. The course of study then comprised only reading, writing, spelling, and possibly the elements of arithmetic. It is quite doubtful if grammar and geography were ever included in the instruction of that period.

"The schools kept by Trudeau and Madame Rigauche are probably the only ones that existed under the French and Spanish *régime*.

"The first English school in St. Louis was established in 1804, by a man named Rotchford. His successor was George Tompkins, of Virginia, who became chief justice of the Supreme Court of Missouri. The debating society instituted in connection with Mr. Tompkins' school became famous for the ability of its members and the brilliancy of its discussions. It was in this training-school that Joshua Barton and Edward Bates developed and disciplined forensic powers which at a later day achieved distinction in the councils of the nation.

"After the transfer of Louisiana to the United States, in 1804, intercourse between the different sections of the country became more general, and the young men of St. Louis began to be sent away from home to be educated. The seminaries established in Lexington, Bardstown, and Springfield, Ky., had already attained a reputation for their excellence. To these institutions many St. Louis youth were sent. Gabriel S. Chouteau spent a part of his school days in the academy at Lexington.

"In 1804–5 several young men went from St. Louis to West Point and graduated with distinction. Of this number was Charles Gratiot, Jr., who in 1836 became chief of the United States Engineer Corps. Robert Lucas, the eldest son of Judge John B. C. Lucas, Baronet Vasquez, and, later, Pharamond Chouteau, son of Pierre Chouteau, Sr., were members of West Point."[1]

As St. Louis grew in population, the subject of education at home naturally received attention; and in the files of the *Missouri Gazette*, beginning with the simple announcement on the 17th of October, 1808, of "a number of school-books for sale at the printing-office of this paper," the advertisements of schools show the gradual development of public interest in this important subject. On the 11th of January, 1809, Christopher Friederich Schewe, formerly professor in the Lycée Academy of Paris, lately minister of the gospel at Pittsburgh, informed "the respectable inhabitants of St. Louis that he intends to establish a school in town, in which will be taught the French and English languages grammatically, both the French to the English and the English to the French. On request, the subscriber will likewise teach arithmetic, geography, geometry, and any other branch of the mathematics; likewise drawing, as well from free hand as architecture, civil, and military. He will immediately open an evening school, from seven to nine o'clock, for grown persons whose occupations may prevent their attendance at the day school. He would be willing to employ his leisure hours in giving particular lessons. He lodges at present at John Coons', Esq., coppersmith." Professsor Waterhouse locates Mr. Schewe's school "at the house of Mr. Alvarez, Market Street," and adds that he "subsequently became a painter and glazier." In 1810 we find C. F. Schewe advertising that he "will continue to give lessons in the French language, as well at his lodgings as at the dwellings of those who may favor him with their employment. He gives notice to the public at large that he has a quantity of candles, moulded from the best deer's tallow, on hand, which he will sell cheap for cash."

While Mr. Schewe was thus eking out an humble livelihood by teaching French and moulding deer-tallow candles, Pierre St. Martin (Sept. 20, 1809) offered the accomplishments of "dancing, fencing, and the use of the broadsword to the citizens of St. Louis at Mr. Yosti's, where he hopes to receive the patronage of the public, and where all the new European dances (particularly the waltz) are taught in the handsomest style; lessons in fencing and the use of the broadsword will be given at the same place; every exertion will be made to perfect his scholars in each science. Private lessons in either branch will be given to those who wish it. For terms (which shall be moderate) apply to the subscriber at Mr. Yosti's." On Nov. 16, 1809, Isaac Septlivres proposed to teach drawing, geography, mathematics, and French grammar at Vincent Bouis'; and on May 1, 1810, George Tompkins advertised that he "will open a school in St. Louis, in the house of Mr. Alverez, on Monday, May 7, 1810.' The following unique advertisement in the *Missouri Gazette* of May 9, 1812, shows the mixed nature of education in the early days of the city. "Young Ladies' Academy. Encouraged by the friendly advice of several ladies of this place, I will open an academy for the instruc-

[1] From Professor Sylvester Waterhouse.

tion of young ladies. I will teach young ladies reading, writing, the French grammar, arithmetic, and geography. Should any parents wish their children to learn the English grammar grammatically, I will have an assistant capable to teach it. Select reading, either ancient or modern history or morality, will enlighten their minds as well as form their hearts. Sewing, embroidery, etc., will fill up the intervals of their lessons. Those who will come in the morning after breakfast will dine and pass the day, and return in the evening. Seventy-two dollars per annum for the class expenses, as above, accepted. Those who will board entirely at home, and will only come to take their lessons, thirty-five dollars per annum for the class expenses, same conditions. Finally, for those who are younger, and not susceptible of the same instructions, twenty-four dollars per annum, the same expenses as above excepted. Teachers of the different branches of the fine arts, such as drawing, dancing, etc., shall be paid separately; for drawing, nine dollars a quarter for one lesson every day, pencils, paper, etc., excepted; for dancing, the same price, three lessons every week. I shall begin on the 20th of this month, at Mr. Sanguinet's house, Second Street. Ve. Pescay." On Aug. 7, 1812, I. Septlivres and G. Tompkins associated their schools, and on May 8, 1813, Mrs. Jane Richards advertised to "commence school at the house of Manuel Lisa, Second Street, formerly occupied by Doctor Simpson." George Tompkins gave up his school June 11, 1814, and studied law. On the 5th of July, 1814, N. B. Nichols respectfully informed the public that "he proposes opening a school for the art of writing on a new elementary and systematic plan, which, by the use of the thirteen lessons of two hours each, persons at a proper age and common capacity may acquire with a little practice a fair, regular, and elegant handwriting with ease and dispatch, as capitals, figures, large and small Roman hands, running and mercantile hands, and the art of making an elegant pen in the best and most approved manner. The room lately occupied as a sheriff's office, on the street leading to the court-house, opposite Col. Chouteau's lot, will be ready on Monday next to receive pupils."

On Jan. 1, 1815, C. Stewart began a night school at the house of E. Beebe; Aug. 5, 1815, James Sawyer opened a school on the Lancastrian system at Mr. Beebe's; Jan. 23, 1816, "A. C. Vanhurtune has the honor to inform the ladies and gentlemen of St. Louis that he has an excellent piano for teaching upon that instrument at the corner house adjoining the office of the *Gazette*, where the clarionet will also be taught. The room is intended for a musical academy only, and where a large collection of music and musical instruments are expected shortly." June 1, 1816, Timothy Flint and James Sawyer associated "for the purpose of continuing to teach the first principles of education upon the Lancastrian system, and the higher branches, as grammar, geography, with the use of maps and globes, composition, rhetoric, the Latin and Greek languages, mathematics, and philosophy. They propose to pay particular attention to letter-writing, a branch of education the most indispensable, and at the same time most neglected. They will strive to teach their pupils a correct elocution and to deliver with propriety, while no principles of religion will be taught that militate with any form of Christian worship. They pledge themselves to parents that they will watch over the manners, the morals, the improvement and happiness of their pupils with undeviating strictness and fidelity." On the 14th of September, 1816, Michael Cusahe established a day and night school, adding to the ordinary branches those of surveying, including trigonometry, heights and distances; Oct. 12, 1816, the Rev. Mr. Giddings opened school; May 27, 1817, Robert S. Letts commenced a school on Main Street, next below Wilt's store; Oct. 25, 1817, Mr. Durocher opened a dancing-school; Dec. 27, 1817, the Revs. Messrs. Peck and Welch, Baptist missionaries, announced that on Jan. 1, 1818, they would open an academy for teaching reading, writing, arithmetic, etc.; Jan. 23, 1818, it was announced that "almost every denomination of Christian—Catholic, Presbyterian, Baptist, and Methodist—have now their teachers, and it requires only a benign sentiment and a zealous regard for the welfare of the rising generation to contribute generously to the erection of temples dedicated to worship and halls of learning." Jan. 3, 1818, the Rev. Salmon Giddings established his school for young ladies, on the southwest side of Market Street, above Fourth; Oct. 23, 1818, the Rev. Mr. Neil, assisted by three other Catholic priests, under the auspices and superintendence of the Right Rev. Bishop Dubourg, opened an academy for young gentlemen in the house of Mrs. Alvarez, Church Street; terms, twelve dollars per quarter, payable in advance; books and stationery at the expense of the parents, each pupil must have a bag to bring and carry out his books, for the eventual loss of which the masters do not hold themselves answerable."

On Sept. 8, 1818, Mrs. Perdreauville opened her young ladies' school, and on June 2, 1819, Mr. and Mrs. Hinckley began their young ladies' academy, "at the house lately occupied by Mr. Guest, one door north of William C. Carr's, Esq." P. Sullivan

established a school at Mrs. Bennet's, on Main Street, commencing on Jan. 19, 1820, and on Jan. 26, 1820, Miss P. Lefevre opened her young ladies' academy at Michel Tesson's house on Main Street; April 12, 1820, Edward McManus commenced his juvenile school at Papin's stone house, up-stairs, on Main Street. "In the fall of 1820 the college established by Bishop Dubourg was opened. The edifice was built of brick, and situated on the site of the first old log church, on Second Street below Market. The following are the names of the faculty at the opening of the institution: the Rev. Francis Neil, curate of the cathedral, President; Rev. Leon Deys, Professor of Languages; Rev. Andreas Ferrari, Professor of Ancient Languages; Rev. Aristides Anduze, Professor of Mathemathics; Rev. Michael Saulnier, Professor of Languages; Mr. Samuel Smith, Professor of Languages; Mr. Patrick Sullivan, Professor of Ancient Languages; Mr. Francis M. Guyot, Professor of Writing and Drawing; Mr. John Martin, Prefect of the Studies. The St. Louis University sprang from this parentage."[1]

The private schools in 1821 were those of Mrs. Agnes Gay, ladies' seminary, Third Street above Market Street; Mrs. Lucinda Snow, ladies' seminary, southwest corner Main and Pine Streets; Miss Lefevre, French seminary, northwest corner Main and Elm Streets; Rev. Salmon Giddings, school for boys, south side of Market west of Fourth; Zebulon Pendleton, school for boys, southwest corner Third and Spruce; Francis Rochford, school for boys, north side of St. Charles Street above Fifth Street; William Machlin, school for boys, southwest corner of Second and Prune Streets; Moses E. Wilson, school for boys, North Third Street above the Bastion; Maurice Laurent, writing-school, 46 South Main; Francis Regnier, French school, northwest corner of Second and Poplar Streets; John B. Trudeau, south side of Pine Street above Main. On April 2, 1823, Mrs. Mary Lewis Elliott, "lately from Ste. Genevieve, formerly of Connecticut," succeeded Mrs. Gay at the Female Academy of St. Louis, at the house formerly occupied as the Episcopal Church, and on April 19, 1824, Mrs. Francis Carr opened her seminary for young ladies, with the following prices of tuition: Higher branches, per quarter, five dollars; lower, four dollars; music, ten dollars.

The advertisements of private schools after 1823 grow less in number each year, and though many of the old-established schools and seminaries withstood the gradual growth of the public schools and continued to prosper, but few new schools are announced. On Jan. 11, 1827, was opened the St. Louis Philanthropic School for one hundred and twenty scholars, conducted by Edward Baker, with terms at six dollars per annum.

At a meeting of the citizens of St. Louis, held at the Episcopal Church on Tuesday, 16th, and Thursday, 18th of February, 1830, a society was formed for the purpose of establishing an infant school in the city. Joseph C. Brown was chairman and William S. Olmstead secretary of the meeting. A constitution was adopted, which included the following articles:

"ART. 1. This society shall be denominated the Infant School Society of St. Louis.

"ART. 2. The object shall be the gratuitous education of children under six years of age, but they shall also admit to the school pay-children, provided the number of pay-scholars shall at no time exceed one hundred in any one school."

The following persons were elected officers of the society:

President, Col. John O'Fallon; Vice-Presidents, Dr. William Carr Lane, George Collier; Secretary, Dr. George W. Call; Treasurer, J. V. Garnier; Executive Committee, Thomas Cohen, Dr. H. L. Hoffman, Matthew Kerr.

Managers, Mrs. John Smith, Mrs. Glasgow, Mrs. Gay, Mrs. Spalding, Mrs. Hough, Mrs. Hoffman, Mrs. William Carr Lane, Mrs. Collier, Mrs. McNair, Mrs. Robinson, Mrs. P. Chouteau, Mrs. Matthew Kerr, Mrs. Call, Mrs. Shackford, Mrs. Wahrendorff.

The first report of the board of managers of the Infant School Society of St. Louis was made on June 1, 1831. The Infant School Society was the first effort which the community made towards securing that most desirable object,—equal advantages of education to all. By the liberality of the subscribers it was enabled to open the doors of its school to the whole community.

Directly after the organization of the society, correspondence was opened with a lady in Philadelphia relative to a teacher and the requisite apparatus for a school, which resulted in obtaining the services of Mrs. Mary Eastburn, who was brought to St. Louis from Philadelphia by David B. Ayers, of Jacksonville. The school went into operation on the 14th of June, 1830, with twenty-one pupils. The managers admitted pay-scholars to the institution at fifty cents per month. The school continued gradually to increase from that time up to the making of the first annual report. The whole number of pupils that were received during the year was one hundred and sixty-seven. The number at the time of making the first annual report was ninety-six, which was the highest number that had been in the school at one time.

[1] Professor Waterhouse.

"The whole number of pupils that were presented to the school for gratuitous instruction during the year," says the report, "has been but twenty-two, and the number now in the school upon this foundation is only eight. Still it is proper, to avoid misconception on this subject, to state that the actual number of pay-scholars in the school is not more than sixty. In many cases of delinquency the money will probably be paid, but in others the board feels satisfied that delicacy is the only reason that prevents the families from availing themselves profitably of the benevolent views of the constitution in extending aid to them, and that their circumstances are such as to preclude the expectation of the payment, at least with any regularity. During the last year two hundred and fifty dollars were raised by subscription, as will be seen by the report of the treasurer, which has all been paid out, together with the whole sum from tuition from the pay-scholars. The expenses would, of course, be heavier than in those succeeding, on account of the furniture and other expenses for materials not perishable which remain on hand. But the income from pay-scholars will fall considerably short of supporting the establishment."

The above report was rendered at an anniversary celebration of the society, held at the Presbyterian Church on the 1st of June. In the absence of the president and vice-president, Alexander Douglass was called to the chair, and W. S. Olmstead was appointed secretary *pro tem.* The meeting having been opened with prayer, the report was read by Rev. W. S. Potts, in the absence of the secretary, and the following officers were elected for the ensuing year: Joseph C. Brown, president; Silas Drake, treasurer; George Collier, John Shackford, vice-presidents; Matthew Kerr, Hezekiah King, executive committee; Dr. George W. Call, secretary; Board of Managers, Mrs. Matthew Kerr, Mrs. Shackford, Mrs. Drake, Mrs. C. Skinner, Mrs. Blood, Mrs. E. Charless, Mrs. Peck, Mrs. King, Mrs. Sibonds, Mrs. Ranney, Miss Mary Hopkins, Mrs. William Wiggins, Mrs. Giddings, Miss Eliza Collins, Mrs. Beverly Allen.

Subscription-cards were circulated, and the sum of twenty-seven dollars and twenty-five cents was subscribed by individuals present at the meeting. The receipts during the year amounted to four hundred and seventy-nine dollars and seventy-two cents, all of which sum was expended.

On Sept. 16, 1833, J. B. Tucker, a graduate of Yale University, opened his classical school for boys, and on Aug. 29, 1844, the Missouri Literary, Scientific and Military Institute, under Maj. A. J. Dorn and Prof. James V. A. Shields, A.B., commenced operation at the corner of Seventh and Elm Streets.

"We learn with much pleasure," says the *Republican* of March 12, 1846, "that an institution of learning of very high order is about to be established in this city. The college building, we understood, to be located on property donated by Mr. John O'Fallon, who is also a liberal contributor in money. Other subscriptions have also been made, and the whole undertaking has a most cheering aspect. The officers of this institution have been already selected, and consist of the following gentlemen: Col. John O'Fallon, president of the board; Rev. T. Horrell, Gen. W. Milburn, H. S. Geyer, Esq., James Russell, Esq., James E. Yeatman, Esq., Dr. J. W. Hall.

"The *Era* says that at a meeting of the board the Rev. E. Carter Hutchinson, A.M., was appointed president of the institution and Professor of Moral and Intellectual Science. Mr. J. W. Sunderland, A.M., was elected to the chair of mathematics and natural philosophy, and Mr. Edward Barry to the chair of modern languages. The acting faculty will fill the department of ancient languages until a professor be appointed. Temporary accommodations have been procured at the corner of Fourth and Olive Streets, and the exercises of the institution will commence on Monday next, the 16th instant."

On May 2, 1851, the same paper announced that an effort was being made to organize the Missouri Reform School, and said,—

"It is proposed to organize a 'house of refuge' for juvenile offenders, and by the act, when a certain amount is raised for the purpose by private subscription, the State is to give an equal sum towards the erection and support of the institution. Several generous citizens have already proffered liberal subscriptions to the object, and others stand ready to do the same.

"Our purpose now is to remind the corporators named in the act that a meeting will be held this evening at four o'clock, in the mayor's office, to take measures for an organization. It is important that all should be present, that incipient steps may be taken with such caution and zeal as will secure successful results.

"The following are the names of the corporators mentioned in the act, viz.: Col. John O'Fallon, L. M. Kennett, John Cavender, Asa Wilgus, John G. Shelton, David Prince, Charles H. Haven, John B. Camden, George K. Budd, Edward F. Pittman, Wayman Crow, J. B. Crockett, A. B. Chambers."

On Oct. 22, 1852, it added,—

"The Legislature at its last session passed an act incorporating an institution with the title Missouri Juvenile Reform School, with the following-named persons as a board of directors:

"John O'Fallon, Luther M. Kennett, John Cavander, Asa Wilgus, John G. Shelton, David Prince, Charles H. Haven, John B. Camden, George K. Budd, George Trask, Edward F. Pittman, Wayman Crow, Joseph B. Crockett, and A. B. Chambers.

"The act authorizes the city of St. Louis to subscribe thirty thousand dollars to the institution, and authorizes the board to organize when ten thousand dollars is subscribed by individuals."

The *Republican* on the 27th of February, 1853, again referring to this subject, says that,—

"It was mentioned a few days since that the county court had authorized a subscription of ten thousand dollars to the Juvenile Reform School. A proposition for additional subscriptions and donations is now pending in the City Council. The bill introduced in the Board of Aldermen on Friday provides as follows, to wit: That block No. 80, in the city common, containing thirty-eight acres, being the block known as the poor-house or old county farm, and now occupied in part as a smallpox hospital, be donated with all its buildings and appurtenances to the board of managers of the Juvenile Reformed School and their successors, and the mayor be directed to execute a deed for the same to the said board, reserving, however, such claim as the St. Louis Board of Public Schools may have therein.

"Also that possession of these grounds and buildings shall be given to the board of managers as soon as a suitable place can be prepared for the reception of smallpox patients, on Arsenal Island or elsewhere, and that the Board of Health be empowered and instructed to erect immediately the buildings necessary for a hospital.

"Also that the mayor be directed to issue ten bonds for one thousand dollars each, having no more than twenty-five years to run, and bearing six per cent. per annum interest, payable semi-annually, for the benefit of the said Reform School; provided, however, that this issue of city bonds shall be submitted to and authorized by the people at an election to be held for this purpose."

The Public Schools of St. Louis are among the most efficient educational institutions in this country. Munificently endowed by the Federal government, they have also been most liberally sustained by public taxation, and as the city has grown in population and wealth, the scheme of instruction has been widened until the system equals, if it does not surpass, that of any city in the Union. The principal source of this prosperity is to be found in the early liberality with which Congress provided for carrying into effect the treaty of cession of Louisiana. The third article of this treaty reads as follows:

"The inhabitants of the ceded territory shall be incorporated in the Union of the United States, and admitted as soon as possible, according to the principles of the Federal Constitution, to the enjoyment of all the rights, advantages, and immunities of citizens of the United States, and in the mean time they shall be maintained and protected in the free enjoyment of their liberty, property, and the religion which they profess."

In pursuance of this article Congress passed the following acts for ascertaining and adjusting titles and claims to land in Louisiana: Act of March 26, 1804; act of March 2, 1805; act of Feb. 26, 1806; act of April 21, 1806; act of March 3, 1807, and act of June 13, 1812.[1]

In these acts of Congress will be found the origin of that rich grant of land to the public schools which has been growing in value and increasing in annual revenue, year by year, as the city has extended its area of wealth and business. The act of Congress of the 13th of June, 1812, provides,—

"That the rights, titles, and claims to town or village lots, common field lots, and commons in, adjoining, and belonging to the several towns or villages of Portage des Sioux, St. Charles, St. Louis, St. Ferdinand, Ville à Robert, Carondelet, Ste. Genevieve, New Madrid, New Bourbon, Little Prairie, and Arkansas, in the Territory of Missouri, which lots have been inhabited, cultivated, or possessed prior to the twentieth day of December, one thousand eight hundred and three, shall be, and the same are hereby, confirmed to the inhabitants of the respective towns or villages aforesaid, according to their several right or rights in common thereto; *Provided*, That nothing herein contained shall be construed to affect the rights of any person claiming the said lands, or any part thereof, whose claims have been confirmed by the board of commissioners for adjusting and settling claims to lands in the said Territory. And it shall be the duty of the principal deputy surveyor of the said Territory, as soon as may be, to survey, or cause to be surveyed, and marked (where the same has not been already done according to law) the out-boundary lines of the said several towns or villages, so as to include the out-lots, common field lots, and commons thereto respectively belonging. And he shall make out plots of the surveys, which he shall transmit to the surveyor-general, who shall forward copies of the same plats to the commissioner of the general land office, and to the recorder of land titles. The expense of surveying the said out-boundary lines shall be paid by the United States out of any moneys appropriated for surveying the public lands: *Provided*, That the whole expense shall not exceed three dollars for every mile that shall be actually surveyed and marked.

"SEC. 2. That all town or village lots, out-lots, or common field lots included in such surveys, which are not rightfully owned or claimed by any private individuals, or held as commons belonging to such towns or villages, or that the President of the United States may not think proper to reserve for military purposes, shall be, and the same are hereby, reserved for the support of schools in the respective towns or villages aforesaid; *Provided*, That the whole quantity of land contained in the lots reserved for the support of schools in any one town or village shall not exceed one-twentieth part of the whole land included in the general survey of such town or village."

On the 12th of July, 1813, C. B. Penrose, chairman of the town trustees, called the subject of the school property, as reserved in the act of Congress, to the attention of the trustees; upon which the board took action, instructing the chairman, Mr. Penrose, to ascertain, so far as in his power lay, what lots had been vacant prior to the act of Congress of the year 1812, and which lots were then by said act the property of the town of St. Louis; and he was further empowered to lease said lots to individuals for a term not exceeding three years, particularly such lots as had been intruded on. On the 20th of August, Chairman Penrose reported to the board a correspondence with the Governor on the subject of the lots which the President of the United States had the power of reserving for military purposes, and also recited in detail that there were vacant lots amounting to one hundred and forty-seven and a half arpens, and that the number of lots in and adjoining the town could not be ascertained except without a survey, but that there would not in all the quantity granted by the act of Congress, viz., the twentieth part of the whole.

At a meeting of the trustees of the town,[2] at which

[1] Committee Report of the Board of President and Directors of the St. Louis Public Schools relative to the Real Estate of the Board, 1858.

[2] Among those who held seats in the board of town trustees we find the names of the following: Elijah Beebe, Thomas Brady, Pierre Didier, Manuel Lisa, Alexander McNair, John Norvell, Clement B. Penrose, Réné Paul, Risdon H. Price, Thomas F. Riddick, Charles Sanguinette, Robert Simpson, Moses Scott, and Henry Von Phul.

C. B. Penrose, chairman, and Messrs. Price, McNair, M. Lisa, and P. Didier were present, the chairman presented his correspondence with the Governor, as well as his action under the resolution as to leasing the lots, and recommended a survey as necessary, which recommendation was on the 25th of December adopted, and authority given to the chairman to employ a surveyor for "the purpose of regulating the streets, and to lay out such lots as may be vacant and now, by act of Congress, the property of the town of St. Louis." At a meeting of the board of trustees, May 13, 1814, the chairman, Mr. Penrose, stated that he had been unable to carry into effect the resolution respecting the town surveys. It does not appear that in the year 1815 any material progress was made towards procuring the survey of the vacant lots, although in March of that year the board of trustees "*Resolved*, That the chairman of the board of trustees cause a survey of the town of St. Louis, under his superintendence." And on December 16th it was further "*Resolved*, By the board of trustees for the incorporation of St. Louis, that Mr. William Rector be and he is hereby requested forthwith to complete the survey of the town of St. Louis, and to make out three fair plots of the same, and lay them before the trustees of said town." Again, Saturday, Jan. 3, 1818, the board of trustees "*Resolved*, *unanimously*, That the chairman of the board of trustees be authorized to have made a survey of the town of St. Louis, such as it stood in the year 1803, and that he cause a plat of the said survey to be taken by the surveyor of the county of St. Louis, to be made out for the use of the board." The difficulty of ascertaining what lands were "rightfully owned or claimed by individuals" prior to the 20th day of December, 1803 (the day the French commander gave possession to the United States), was one not easy to overcome. To determine what were the lands actually "inhabited, cultivated, or possessed" on that day, and which were confirmed to the owners, was the work entrusted to the board of commissioners under the act of 1812. The decision of this board as to who were entitled to lands did not give satisfaction either to the claimants or to the board of trustees of the town of St. Louis. The claimants' "representatives," not heirs, kept the matter of lands belonging to the town unsettled, and by the use of "influence" shaped the legislation of Congress in their interest rather than in that of the schools of St. Louis. The act of Congress of March 3, 1813, and of the 12th of April, 1814, were wholly in the interests of the "claimants," and the act of April 29, 1816, confirmed the decisions of the commissioners, which were "in favor of the claimants."

Consequent upon these acts settling the village claims, and upon the petition of the town trustees of Jan. 8, 1815, the Legislature of the Territory of Missouri established a board of school trustees for the town of St. Louis, as follows:

"AN ACT *to incorporate a board of trustees for superintending schools in the town of St. Louis:*

"SEC. 1. Be it enacted by the General Assembly of the Territory of Missouri, that William Clark, William C. Carr, Thos. H. Benton, Bernard Pratte, Auguste Chouteau, Alex. McNair, and John P. Cabanné, and such other persons as shall be appointed in manner and to the number hereinafter directed, shall form and constitute a board of trustees for the regulation of schools in the town of St. Louis, and the said corporation, and their successors, are constituted and declared a body corporate and politic, and shall have full power to take and hold, by gift, grant, or otherwise, any estate, real or personal, which may be given for the use of schools; and to lease, rent, and dispose of to the best advantage all lands and other property which hath been or may be given by Congress to said town for the support of schools, and appropriate the same, with the avails of what is rented or leased, as by law directed; and by themselves or by attorneys to institute, maintain, or defend any suit or suits which shall be sued or prosecuted, either in law or equity, for the recovery or defense of said property, as they shall find necessary; to employ teachers to direct the studies of the youth; to make and establish all necessary rules, regulations, and by-laws for the government of said schools; *Provided, however*, that the rules, regulations, and by-laws shall not be repugnant to the laws of this Territory; *and Provided, also*, that the said by-laws shall not tend to give a preference to any religious denomination whatever.

"SEC. 2. *And be it further enacted*, That the said trustees shall have power to fill all vacancies which may happen by death, removal, or otherwise; and where and as often as they may deem it necessary to promote the interest of said schools, to appoint other persons in addition to their number.

SEC. 3. *And be it further enacted*, That the person first named in the board of trustees be empowered to call the first meeting of the board of trustees, at such time and place as he may think proper; and when convened the said trustees shall appoint a chairman, and adopt regulations for their own proceedings; shall take into consideration the grants and donations for the use of schools, and devise means for securing the same and of putting them in a state of profit; and as soon as the state of the funds which may be appropriated will justify, shall erect or procure suitable buildings, and provide the necessary apparatus for instruction, and transact such other business as they shall find necessary and proper to be done towards establishing schools in the town of St. Louis.

SEC. 4. *And be it further enacted*, That the trustees shall keep records of their proceedings, and when required, shall lay them, with the state of the funds and the appropriations by them made, before the Legislature of the Territory.

SEC. 5. *And be it further enacted*, That this act shall take effect and be in force from and after the passage thereof.

"EDWARD HEMPSTEAD,
"*Speaker of the House of Representatives.*
"JOHN WARD,
"*President of the Legislative Council.*

"Approved January 30, 1817.

"WILLIAM CLARK,
"*Governor of Missouri Territory.*"

Agreeably to the provisions of this act, Governor

Clark called a meeting of the board of trustees at his office in St. Louis on the 4th day of April, 1817, at which were present Governor Clark, Auguste Chouteau, Alexander McNair, William C. Carr, and Thomas H. Benton. Governor Clark was chosen chairman, and Thomas H. Benton secretary *pro tem.*[1]

The resolutions adopted at this meeting by the trustees for the regulation of their own proceedings are as follows:

"*Resolved*, That the chairman for the time being shall have power to call, at such time and place as he shall think proper, in the town of St. Louis, all future meetings of this board, by notice in a public paper or by writing under his hand, or by an order through the secretary of the board.

"*Resolved*, That all questions submitted for the determination of the board shall be decided by a majority of voices, the votes to be called for and delivered *viva voce*; but the *yeas* and *nays* shall be taken and entered of record upon the decision of any question, when the same shall be called for by any one member and seconded by another, and any person voting in the minority shall have the right to enter the reasons of his dissent upon the records of the board.

"*Resolved*, That the chairman of this board instruct the secretary *pro tempore* to obtain from the surveyor-general's office, kept by Gen. William Rector, a plat of the survey of the town of St. Louis, showing the town lots, the out-lots, if any, included in the said survey, and such or so many thereof as may be vacant, or not rightfully owned or claimed by any individuals, or held as commons by the said town of St. Louis, and lay the same before a meeting of this board as soon as possible.

"*Resolved*, That the secretary procure a blank-book in which to record the proceedings of this board, and that he enter therein the act of the General Assembly of the Territory of Missouri incorporating this board, and so much of the act of Congress of the United States as may have made any donation of lots or lands for the benefit of schools in the town of St. Louis.

"*Resolved*, That the proceedings of the present meeting of the board of trustees be authenticated by the signature of the chairman and each member present, and that all future proceedings of the board be authenticated by the signature of the chairman and the attestation of the secretary.

"And the board adjourned, to meet again at the office of Governor Clark on Thursday, the 19th instant, at three o'clock in the afternoon.

(Signed by) "WILLIAM CLARK.
"THOMAS H. BENTON.
"WILLIAM C. CARR.
"AUG. CHOUTEAU.
"A. MCNAIR."

The loss of the records of this board renders it impossible to present a connected narrative of its efforts in behalf of the early public schools, but letters found in the school archives from Josiah Meigs, of the general land office, of dates 26th August, 1817, and 3d of November, 1817, addressed to "His Excellency William Clark, Chairman Board of Trustees of Schools, St. Louis," show that the board succeeded in performing a most valuable service in protecting the school lands from the entry of New Madrid certificates.[2]

The survey of Gen. Rector, though mentioned in a note by Bishop Dubourg, Sept. 4, 1822, as "promised to them" (Bishop Dubourg and Col. Benton) with the statement that in the space of three or four weeks, at most, the committee should be furnished with a plat of all the vacant lands in and about St. Louis, was not received from the surveyor until 184[illegible].

While waiting for the surveys of the out-boundaries, the board of trustees proceeded to lease the lots inside the town, and in the *Missouri Gazette* of April 17, 1817, is to be found the following advertisement:

"PUBLIC NOTICE is hereby given that the undersigned, chairman of the board of trustees for supporting schools in the town of St. Louis, will on the 3d day of May next rent to the highest bidder, until Christmas next, the houses and other tenements on the vacant lots and vacant grounds within the survey of the town of St. Louis, and which belong, by a law of Congress, to the schools which may be established in said town. All persons who may be in possession of any part of said property will immediately make known to Joseph V. Garnier, secretary of the board, the nature and extent of their possessions, and from whom derived. Those persons actually in possession of any part of the aforesaid property may, prior to the said 3d day of May next, obtain preference in leasing by application to the undersigned. Bond and approved security for the payment of the rent, and the performance of such covenant as may be agreed on, will be expected from those who lease.

"Portions of land intended to offer for lease:

"1st. Jail, and ten feet around; and 2d. Court-house, so as to parallel with street, to the ditch and north to the old ditch at intersection of Fourth and Walnut Streets, in blocks 103 and 104.

"3d. The land between the gully and town lots, bounded by Cross Street, and passes by Cerre's (blocks 160, 158, etc.).

"4th. The log house and all the land between Chouteau's line and the town line east (same blocks as No. 4).

"5th. The lands back of Mrs. Alvarez's (block 85).

"6th. Back of Capt. Brady's (block 85).

"7th. Round-tower or jail, and lands back of Capt. Pratte (presumed block 87).

"8th. Land back of next square (presumed block 88).

"9th. Back of next square (presumed block 89).

"10th. Back of Gen. Rector's and round-tower (presumed block 90).

[1] The original manuscript of the proceedings of this first meeting, in the handwriting of Thomas H. Benton, is on file in the office of the public schools.

[2] These were certificates issued by special act of Congress of February, 1813, for the relief of sufferers by the earthquake of 1811, for lands destroyed by said earthquake, or submerged on what is known as the Big Earthquake Swamp, in Southern Missouri. Under these certificates any public lands subject to entry could be entered and patents obtained therefor. But this law of Congress was subsequent to the law donating lands to schools, of course these certificates could not be located upon school lands, which were not subject to private entry. Yet nearly all the school lands in St. Louis were covered by them, and Superintendent John H. Tice, in his first annual report, adds, "And a large portion is still held adversely to the schools under them."

"11th. Lands back of same, below Col. Easton's.
"12th. Back of theatre (presumed block 80).
"13th. Back of Jeffrey's (presumed block 79).
"14th. Back of Corré's (block 77).
"15th. Capt. Wherry's slaughter-house, and between Chouteau's line and Riddick's claim, and west of house.
"16th. Old block-house, and lands from Chouteau's line and Riddick's claim to Bagley's shop.
"17th. Bagley's shop, and the public lands between Chouteau, Riddick, and town lands.
"18th. Lands between Chouteau, the river road, and Cailloux (block 43, also another lot in block 45).
"19th. Market-house lot."[1]

Governor Clark addressed letters to President Monroe, under date of June 20, 1817, and April 19, 1818, asking that the selections for military reservations be made of the lands donated by Congress for the purpose of establishing schools in the town of St. Louis; to which C. Vandeventer, in the absence of the Secretary of War, to whom the letter of the 20th of June was referred, replied "that the chief engineer had been ordered to cause the lands required for military purposes in St. Louis to be set apart as early as practicable." Hon. J. C. Calhoun, Secretary of War, wrote to Governor Clark, Aug. 17, 1818, that "Maj. Long, of the topographical engineers, will be charged with this duty upon his return to Missouri." Maj. Long, under date of St. Louis, May 1, 1820, reported to Col. Walker D. Armistead, United States chief engineer, Washington, D. C., that on his

arrival in the summer of 1819," he "could not procure the instruments requisite for the survey, and accordingly apprised the chief engineer by report. On further inquiry this spring, I have been informed by the surveyor-general that no regular survey of the town and the out-lots belonging to it has ever been made in any manner calculated to show the extent or exact situation of the lots or tracts to which the United States government have a claim, and that no such survey can be effected till the proprietors of grants or concessions situated within or about the town are compelled to give publicity to their titles by having them recorded."

Maj. Long added that the lots were of "inconsiderable dimensions," with the exception of "a commodious landing" on the river, and also a tract sufficient for a street between the Bastion and the semicircular tower, which tracts he recommended be reserved for military purposes; notwithstanding, he felt "some uncertainty whether the government have a rightful claim to the entire tracts here specified, but it is highly probable that they have." On that supposition he recommended the reservation of those tracts, and stated that the residue of the out-lots, etc., belonging to the government, immediately in this vicinity, might, without detriment to the military service, be applied to the support of schools, as contemplated by an act of the general government. On Jan. 25, 1821, Brig.-Gen. H. Atkinson, commanding the Ninth Military Department, informed Governor Clark that, "agreeably to instructions from the Secretary of War," he had selected for military purposes "the lot on which the stone Bastion stands, and another lying on the river below, and near McKnight & Brady's stone warehouse, together with the narrow strip of vacant public land running down the river-bank before the town," and that "the other vacant lots in town are subject to the operation of the act of Congress of the 13th June, 1812." Governor Clark, on the 6th of January, 1824, called the attention of Gen. Atkinson to the impracticability of adapting the stone Bastion to military purposes, and Gen. Atkinson, upon review agreeing with Governor Clark, the lot and Bastion were relinquished to the board of school trustees. The last paper among the old archives of the board of trustees is the application of Eliakim Redfield, dated Oct. 14, 1828, for the lease of a lot and agreement thereto, signed by John O'Fallon and Gabriel Paul.

The military reservations having been determined, the board of trustees had now to deal with the "inhabitants, possessors, and cultivators," or such representatives as came within the laws and claimed adversely to the board of trustees. Up to the 26th of May, 1824, none of the "representatives" had proved their claims under the *Livres Terriens*, which on the 28th of November, 1812, were made records by a note to Frederick Bates, signed by Thomas F. Riddick, Pierre Chouteau, Alexander McNair, William C. Carr, Charles Gratiot, Auguste Chouteau, M. P. Leduc, Gregoire Sarpy, Julius de Mun, Bernard Pratte, B. G. Farrar, John McKnight, and Cabanné. From this date to that of the act of Congress approved May 26, 1824, these "representatives," though failing to establish their claims, had nevertheless kept them alive. This act of Congress extended to those claiming "on the ground of inhabitation, cultivation, or possession," eighteen months from the passage of the act, "to designate their said lots by proving before the recorder of land titles for said State and Territory the fact of such inhabitation, cultivation, or possession, and the boundaries and extent of such claim, so as to enable

[1] There are also among the archives of the board applications from William and C. L. Jones for the lease of a "lot of ground situated in the western part of the lower end of the town of St. Louis, adjoining the line of Col. Auguste Chouteau, and to include a kiln by them made some years since for the purpose of affording the necessary supply of water to a brick-yard." An application was also received from Mackey Wherry for "one acre" at the south end of St. Louis" for a "butcher-shop;" and also an application from Paul Primeau for the house occupied by himself and family.

the surveyor-general to distinguish the private from the vacant lots appertaining to said town and village." The act also made it the duty of the surveyor-general, immediately after the expiration of the eighteen months, to proceed "to survey, designate, and set apart to the said towns and villages respectively . . . said vacant town lots or village lots, out-lots, and common field lots for the support of schools in said towns and villages respectively."

The report of Recorder Hunt of testimony taken under this act has never been published, but the confirmations of title made by him are to be found in "Hunt's Minutes," at the land office in Jefferson City. Congress again came to the relief of the "claimants" of the school lands, and by another act on the 26th of May, 1824, and again by an act of the 24th of May, 1828, relieved the claimants from the necessity of bringing forward the distant representatives of any of the names of those on the *Livres Terriens*. But little that is now discernible was done under these acts. The few claims that were allowed under them by the District Court involved those acts in connection with which the impeachment of Judge Peck took place, and the discussing of them threw much light upon the prosecution of Spanish claims in Missouri.

The efforts of the board of school trustees to lease the lands within the city had been defeated, owing to the want of a proper title in them, and their attention therefore was chiefly directed to the settlement of the military reservations, and to their protection from intruders. The act of Congress of 1824 kept the town lands unsettled, and the board closed their records on the 5th of April, 1828, and awaited the result. By the act of Congress of Jan. 27, 1831, the United States relinquished to the inhabitants of the several towns or villages of Portage des Sioux, St. Charles, St. Louis, St. Ferdinand, Ville à Robert, Carondelet, Ste. Genevieve, New Madrid, New Bourbon, and Little Prairie, in the State of Missouri, all right, title, and interest in and to all the lots, out-lots, . . . and directed that the same "be sold or disposed of, or regulated for the same purpose, in such a manner as may be directed by the Legislature of said State."

The amount of land which the board, as at present constituted, took possession of through their bailiff was as follows:

150 front feet at corner Market and Fourth Streets.

220 front feet on Chestnut Street, south side.

32 front feet on Chestnut Street, north side.

Portions of blocks 106, 107, and 108, fronting on Fourth Street, from Myrtle to Poplar. Portions of block 109, and all of 158 and 160, from Poplar to Lombard, between Fourth and Fifth Streets.

123½ feet on east side of Fourth north of Mulberry Street (block 76).[1]

Portions of block 68, on Broadway. Assignment by the surveyor of these lands did not follow until 1840.

In that year, William Milburn, then surveyor-general, established an out-boundary for St. Louis, by which it was found that the city contained an area of $7701\frac{66}{100}$ acres, one-twentieth of which is $385\frac{8}{10}$ acres.

The area actually designated and set apart to the schools was two hundred and ninety and five-hundredths acres; and notwithstanding this area fell ninety-five and three-hundredths acres short of what the one-twentieth would have given, it is nevertheless a magnificent endowment. In the first annual report (1854) of the St. Louis public schools, Superintendent John H. Tice says, "The value of the whole amount of property acquired through congressional bounty in the possession of the board is probably about $400,000, and yields an annual rent of about $14,500." In 1876 the landed property donated by the general government was estimated in the school reports at $1,252,895.72, yielding an income of $52,855.75.

To whom is due the honor and credit of having secured this magnificent gift? John F. Darby, under date of Nov. 15, 1876, thus answers this question:

"The value of these lands now owned by the schools, in round numbers, may be stated to be to-day a million and a half of dollars. The second section of this law, giving the lands to the public schools, was inserted in the act by Mr. Hempstead, at the special and earnest request of Thomas H. Riddick (Col. Riddick had lived here in St. Louis before that who knew all about the town, and knew that there were certain lots of ground in the town for which no rightful owner or claimants could be found, and with him originated the idea of giving these lots not rightfully claimed to the public schools. And for this purpose Col. Riddick started on horseback and rode all the way to Washington City, and at his own individual expense, to have this desirable object consummated and carried out, which was done. Of these things I have heard from Col. Riddick himself; and afterwards Archibald Gamble, Esq., long the efficient and active agent of the public schools in looking after their interest in these lands, informed me that to Riddick was due the credit of having this grant of lands made and which Mr. Hempstead carried through Congress.

"For this great and valuable inheritance now enjoyed by the schools, Col. Riddick deserves to have a monument erected to his memory. It was my good fortune to know Col. Riddick intimately and well. I had visited his house, and have shared the generous hospitality of his domicile, and have received

[1] These parcels, constituting the most valuable portions of the real estate for revenue belonging to the schools, the board proceeded to lease for *fifty* years, at rates which were calculated at six *per cent.* on valuation. The fact that the board leased these lands for fifty years would seem to indicate that that body did not anticipate any very rapid increase in the value of St. Louis real estate.

warm, friendly greetings of his friendship and that of the whole family. Col. Riddick was among the very first trustees of the public schools. He was a member of the convention that formed the first Constitution of the State of Missouri, being elected on the same ticket from the County of St. Louis with such men as Edward Bates, Governor McNair, Gen. Bernard Pratte, and Pierre Chouteau, Jr. When he embarked in any measure, he was one of the most enthusiastic men that have ever lived in this town. He died at the Sulphur Springs, in Jefferson County, Mo., about the year 1830 or 1831, beloved, honored, and respected by all who knew him. It is with the most becoming deference and respect toward the members of the board of the St. Louis public schools, and certainly in no spirit of officious or offensive obtrusiveness, that I may be permitted to express the hope that the very intelligent and worthy gentlemen who compose the board will, before long, take some suitable action to erect a proper monument to the memory of one who has conferred upon them the means of doing so much good, and from which there under their charge have been blessed with and have derived such lasting benefits. In fact, so far as the St. Louis public schools are concerned, Col. Thomas F. Riddick was the creator and originator of that noble system of instruction in St. Louis.

"Of Edward Hempstead, the delegate in Congress who introduced and had passed this act, a word should be said. I did not know him personally. But I did know his father, Stephen Hempstead, who rode in the carriage with Lafayette when he came; and I knew all his brothers, William, Lewis, and Charles; in fact, I knew the whole family, who were amongst my earliest and best friends. Charles S. Hempstead died about a year ago, at the advanced age of more than eighty years. For more than forty years he had been a practicing lawyer of Galena, Ill., where he died. He was for many years the law partner at Galena of Mr. Washburne, the present minister of the United States in Paris.

"Edward Bates informed me that when Edward Hempstead first came to St. Louis, he came all the way from Vincennes, Ind. on foot with a little bundle on his back. He was a man of ability, pure and without reproach, and his loss was deeply lamented by all who knew him. He died in St. Louis, 10th August, 1817, a little over thirty-seven years of age.

"This short notice is due to one who did so much for his country, and especially who had rendered such lasting and valuable services to the St. Louis public schools."

The act of Congress of Jan. 27, 1831, having granted over to the State all the vacant lots, and authorized them under the control of the Legislature, the board as now constituted was organized under an act of the Legislature approved Feb. 13, 1833. This act provided that all free white persons residing within the limits of the city of St. Louis should be constituted a body politic and corporate by the name and style of the "Board of President and Directors of the St. Louis Public Schools," whose powers should be vested in a president and board of directors, consisting of two persons to be elected in each ward of the city, no mayor or alderman at the same time to be a member of the board. The board of directors was empowered to elect its president, to make rules for the government of its own proceedings, to have charge and control of the public schools and all the property appropriated to the use of public schools within the city of St. Louis, and to "make all rules, ordinances, and statutes proper for the government and management of such schools and property, so that the same shall not be inconsistent with the laws of the land, and generally to do all lawful acts which may be proper or convenient to carry into effect the objects of this corporation." The members were to be elected for three years, and until their successors were duly elected and qualified; one-third to go out of office at the end of every year, for which purpose the board was directed to cause its members to be divided by lot into three classes, the first class to go out of office at the end of one year, the second at the end of two, and the third at the end of three years, so that one-third of the board should be elected every year. When the establishment of new wards in the city required the election of new members of the board, such newly-elected members were to be classed accordingly. It was further provided that there should be four stated meetings of the board in every year, and the president, or any three members of the board, was authorized to call special meetings by giving one week's notice in writing to the other members. In all meetings a majority of the whole number elected was to constitute a quorum to transact business, but any smaller number might adjourn from day to day and compel the attendance of absent members. All vacancies were to be filled by an election in the proper ward as prescribed by the board. The latter was also empowered to appoint a treasurer and secretary, "and such other servants and agents as to them shall seem necessary to accomplish the great objects of the corporation, and prescribe their powers, duties, obligations, and compensation." The board was further directed to cause a true and faithful record to be kept of all its proceedings, and lay them before the General Assembly or either house thereof when required, or before a general meeting of the inhabitants of the city whenever one hundred qualified electors of the board should by written application require the same to be done; also at least once in every year to cause to be printed and published a true statement of the condition of the public schools and of all the money concerns of the corporation. "As soon as conveniently may be," the board was "to take possession, charge, and control of all the lands or lots in or near the city of St. Louis which have been either received for or granted to the inhabitants of St. Louis for school purposes by an act of the Congress of the United States, and to dispose of and apply the same to the purposes of education under the provisions of

this act; and to that end the title to all such lands and lots (as far as this General Assembly can control the same) is hereby vested in the corporation hereby created." It was further enacted that it should be lawful for the board "to cause the depositions of witnesses to be taken touching the title, locality, boundaries, or extension of any of the lands, lots, or real estate aforesaid. And the manner of taking such depositions shall be conformable to the provisions of the act entitled 'An Act directing the mode of perpetuating testimony in this State,' passed Jan. 22, 1825, except that the application for the commission or dedimus need not be supported by any oath or affidavit; *Provided*, that any person or persons claiming property in any of the said lands, lots, or real estate may, upon complying with requirements of the last-mentioned act, proceed to take depositions in relation thereto. And all such depositions taken on either side, as aforesaid, shall be filed in the office of the clerk of the Circuit Court of St. Louis County, and the same or authentic copies thereof shall be legal evidence and may be read in testimony in any suit in which they shall be relevant in any court in this State." The act "to incorporate a board of trustees for superintending schools in the town of St. Louis," approved Jan. 30, 1817, was repealed by the act of 1833.

At an election held on the first Monday in April, 1833, the following persons were elected directors: Hon. Edward Bates and John P. Reilly, for the South Ward; Josiah Spalding and Judge Marie P. Leduc, of the Middle Ward; and Dr. Cornelius Campbell and Hugh O'Neil, Sr., of the North Ward. On the 18th of the same month these gentlemen met and organized by the election of Judge Marie P. Leduc as president. Immediately upon organization, the board initiated action for obtaining "knowledge of school lands" by inviting all persons having information relative thereto to communicate the same to the board, and on May 11, 1833, Dr. Cornelius Campbell reported "that, in compliance with the resolution directing him as a committee to call upon such persons as may be proper, to request a delivery to the board of all books, papers, and evidences relating to school lands in or near this city, he had called upon Joseph V. Garnier, secretary[1] of the late board of trustees for superintending schools in the town of St. Louis, who had delivered to him a book entitled 'Record of the Proceedings of the Board of Trustees for Superintending Schools in St. Louis, beginning April 4, 1817, and ending April 5, 1828.'" This record was delivered to Wilson Primm, then secretary, but has been lost. The investigation into the school lands thus immediately undertaken by the new board was continued by a committee appointed to call upon Col. René Paul, city engineer, for a plat of all lands in his office known to be school lands, and upon E. T. Langham, surveyor-general, to ascertain if the out-boundary line had been run so as to include the Grand Prairie field, the Cul de Sac field, and the common field of Prairie des Noyers, as contemplated by the act of Congress of June 13, 1812. The committee reported April 27, 1833, that Gen. Langham had informed the committee that the line had *not* been run as they indicated, but he assured them that it should be speedily corrected. However much Gen. Langham may have desired and intended to correct this important error, the speculators in lands exercised too much influence at Washington, and the Secretary of the Interior and commissioner of the general land office, before whom the matter was brought upon appeal, decided adversely to the interest of the schools, and New Madrid locations and old French and Spanish concessions were allowed to more than equally divide the land intended by the act of Congress for school purposes. Had the out-boundary line been run as indicated by the committee, the area of St. Louis would have been over fifteen thousand acres, or twentieth of which would have been over seven hundred and fifty acres. Thus the schools of St. Louis lost $385\frac{6}{100}$ acres of the land which they rightfully owned by the clear title of the act of Congress.

In consequence of public complaint as to the proper management of the school lands during the first twelve years of the new board, the Legislature of Missouri, by the act of March 17, 1845, provided that "no member of the board of aldermen, or of the board of delegates, or person holding office under the city of St. Louis, whether elected or appointed, shall be a member of the board of school directors of the city of St. Louis"; that "no person shall be eligible as a director in said board who has not been

[1] Col. Thomas H. Benton acted as secretary until Feb. 15, 1827, as appears by his resignation, now on file in the office, as follows:

"WASHINGTON, Feb. 15, 1827.

"GENTLEMEN,—The probability that I shall be absent from St. Louis for two-thirds of every year for six years to come, renders it proper that I should resign the place at your board, the duties of which I shall not be able to fulfil. In doing this I beg to add the assurance of my best wishes for the success of the object committed to you, and to offer my services in any other way in which I can be available to you.

"Very respectfully, your obedient servant,

"THOMAS H. BENTON.

"TRUSTEES OF THE SCHOOL LANDS IN ST. LOUIS."

resident of the ward in which he is elected at least twelve months prior to his election; and if any person who shall have been elected from one ward shall move from said ward, he shall vacate his seat in said board, and an election shall be ordered and held as soon as may be to fill said vacancy, and the said director shall, moreover, possess all the qualifications required in the act to which this is amendatory and supplementary"; that "no director shall, directly or indirectly, borrow any money belonging to said corporation, either as principal or indorser"; that "it shall be the duty of the president and directors of this corporation to carry out and enforce all the provisions of the eighth section of the act referred to in the second section of this act"; that "if any director or officer of this corporation shall violate any of the provisions of this act, and of the act to which this is amendatory and supplementary, approved Feb. 13, 1833, he shall be guilty of a misdemeanor in office, and shall be punished for such misdemeanor, as provided for by law, and shall, moreover, be disqualified from holding any seat in said board or acting as one of its officers"; and that "no director shall receive compensation for any services as director."

On the 26th of March, 1845, the Legislature further enacted that "no person shall be eligible as a director in the corporation established by said act who may be interested in any property held by lease from said corporation, or who is interested, directly or indirectly, in any title adverse to the title of said corporation to any property which is claimed by said corporation; that no person who is or hereafter may become a director, or who shall hold any office in or under said corporation, shall purchase or lease from said corporation any property claimed by said corporation, nor shall any such person be interested, directly or indirectly, in any purchase or lease of any such property, and any such purchase or lease in which any such director or other person is so interested, shall be utterly null and void." These acts closed the doors of the board to the speculators and claimants who, prior to the passage of these laws, had taken an active interest in the election of directors, and by moving into wards where vacancies would soon occur, secured the election of themselves or their representatives, and thus obtained an influence if not a control of, the board for the accomplishment of purposes by no means in the interest of the schools, and too often most injurious and detrimental to them. The effect of these laws was most salutary, for great and irreparable mischief had already been done under the manipulation of the board by the "squatters" and "claimants."

Notwithstanding the new board was organized in 1833, there does not seem to have been any material progress made in the establishment of schools even as late as 1837, for in the *Republican* of April 10th of that year it was stated that,—

"There is not at this time a single common-school under public patronage. After all the legislation upon the subject no system has been formed, nor one step taken that is likely to result in securing anything to the cause of education. The practice is to employ a teacher for three or six months at the lowest possible rate at which his services can be procured, and this is at such a price that he feels bound to seek other employment as soon as anything else can be had. The school is continued about three months, and then closed till another man, driven by want, or because not qualified for any other situation, is called to resume it; hence a large part of our population are growing up without even knowing how to read."

This complaint does not appear to be without foundation, for the board, in its memorial to the Legislature of Dec. 30, 1834, stated that, "owing to several causes not necessary to be enumerated, this board cannot at present employ the money raised or to be raised in support of schools, or the erection of school-houses;" and as no mention is made in the records of that date of any appropriation for the support of schools, it is very evident that the *Republican* voiced the sentiment of disappointment which the community entertained. On Nov. 29, 1834, Messrs. Campbell, O'Neil, and Dumaine were appointed a committee of the board to prepare a plan for a public school-house, and reported on the 8th of December; but the report was laid on the table and never acted upon. At a meeting of the board in February, 1835, a committee was appointed to take the census of educable children, but the number ascertained is not now to be found in the record. Messrs. Campbell, Hoffman, and Finney were appointed May 7, 1836, a committee to confer with the board of aldermen on the subject of erecting school-houses in the city. The results of this conference cannot now be ascertained, as the records furnish no information, nor is there on file any report from the committee.

On the 3d of December, 1836, Mr. McLaughlin, from the "committee on the erection of school-houses," reported that the committee "had selected a lot on the corner of Spruce and Fourth Streets as the site for a school-house for the First and Second Wards, and a lot on Federal Avenue and Hickory Street[1] as a site for a school-house for the Third and Fourth Wards." The report was adopted, and two thousand dollars appropriated for the erection of each house. Messrs. Campbell and Hoffman were appointed a committee to report upon a plan, but failing to agree were discharged

[1] The present northeast corner of Cherry and Broadway.

on the 25th of February, 1837, and Messrs. Campbell and Gamble were appointed, who reported on the 4th of March, recommending "that a committee of three be appointed, with power to contract for the erection of two school-houses on the sites heretofore selected, and that the plan of the building submitted by Elihu H. Shepard be adopted, as far as practicable; the cost of each, including fencing, furniture, and outhouses, &c., not to exceed three thousand five hundred dollars." The committee subsequently, on the 18th of July, 1837, reported that the lots were too small, and recommended that two-story buildings be erected instead of one-story, which having been adopted by the board, Messrs. Whitehill and Weston were contracted with for building the North school-house, and John H. Ferguson for building the South school-house, each at a cost of three thousand one hundred and seventy dollars. The North school-house, being near the Centre Market, was early abandoned, and after being known as "Liberty Hall," was destroyed by fire about 1850–51. The Hon. Edward H. Armstrong, afterward United States Senator, was the first public school teacher in St. Louis, and opened the school at the corner of Fourth and Spruce Streets in April, 1838.

In its issue of Nov. 2, 1837, a local journal remarked,—

"Our readers in the city are probably not aware of the fact that there are now two school-houses erecting in the city, which will shortly be ready for scholars. These houses are built by the school commissioners from the city school fund, and we regret to observe that but little interest seems to be taken in the progress of the building, save by the builders."

On the 14th of December the same paper called attention to

"An advertisement in the city papers of a recent date, that the president and directors of the St. Louis public schools have advertised that they will receive proposals for teachers in the two school-houses lately erected."

At the meeting held on the 3d of December, 1837, at which the board decided to advertise for teachers, the purchase of "four unlettered maps of the world" was ordered for the schools about to be opened, and at an adjourned meeting two weeks later the applications from teachers were opened. There were ten male and two female applicants, who were referred to a board of school inspectors composed of William Carr Lane, mayor; Bryan Mullanphy, Beverly Allen, Wilson Primm, George K. Budd, Dr. John M. Green, Elihu H. Shepard, and William Garvey. At a meeting of the inspectors on December 22d, William Carr Lane was chosen president, and Wilson Primm, secretary. This board was authorized to examine and appoint teachers, and fix their compensation, which was, for male teachers, nine hundred dollars per annum, and for female teachers, five hundred dollars per annum.[1]

The board was also authorized to fix the tuition fee, to admit free all that were unable to pay the tuition fee, and to provide "that teachers should enter into a written contract with the board faithfully to discharge the duties assigned them for the space of one year," conditioned, however, upon the provision

[1] The following regulations for the government of the St. Louis public schools were adopted by the Board of Directors:

"First. The lower rooms in each of the school-houses shall be appropriated to the boys, and the upper ones to the girls. As each room can conveniently accommodate —— scholars, that number and no more will be received.

Second. There shall be a competent teacher, and an assistant teacher, if necessary, assigned for each school, male and female. The female schools shall be taught by female teachers. No teacher shall be employed who cannot produce satisfactory evidence of good moral character and correct habits. And in order to prevent any sectarian jealousy from arising between the Protestant and Catholic population, by putting the schools under the influence of the clergy of either denomination, we do ordain that no priest, clergyman, preacher, or other religious teacher shall be received as a teacher in either the male or female schools. The best qualified teachers shall be chosen without reference to which denomination they belong. And as we are anxious, in putting our school system into operation, to guard against collision or jealousy among our fellow-citizens upon the subject of sectarian influence, we ordain that no religious instruction be given, other than to enforce moral obligation under the sanction of accountability to God.

"Third. The board shall appoint yearly four school inspectors for the schools in each house, who shall be persons qualified by education to examine teachers, and judge correctly of the proficiency of the scholars. They shall not be clergymen, but two of each board of school inspectors, and no more, shall be chosen from the body of Catholics. The inspectors of each school shall form themselves into separate boards, to be called the board of inspectors for school No. 1 North and school No. 2 South. The inspectors shall have the management and direction of the schools under the regulations of the board. It shall be their duty to examine such teachers as shall be referred to them by the board, and communicate to the president their opinion of their qualifications. No teacher shall be received without such examination, to be by him submitted to the board. They shall once a month, and oftener, if they see fit, visit the schools and make such examinations as to them may seem necessary. They shall make quarterly reports to the board of the state of the schools. Children shall be received into the schools only through the inspectors; and as it is the desire of the board of directors that these schools should afford the means of education to all as would otherwise go uninstructed, they ordain that no application from parents, unable to pay for the tuition of their children, be rejected whilst there is a vacancy in the school. No scholar under the age of six years shall be received.

"Fourth. Education in these schools shall commence with the rudiments, and shall embrace all that properly comes under the denomination of an English education. The choice of teachers and the fixing their salary, also the rates of tuition, shall rest with the board of directors."

that the board had the right to dismiss at any time teachers found negligent, unfaithful, or incompetent. Edward Leavy and Miss Mary H. Salisbury were elected, Feb. 24, 1828, teachers for "School No. 2, South," corner Spruce and Fourth Streets, but Mr. Leavy withdrawing his application, David H. Armstrong was on March 3, 1838, elected, and the school opened on the 1st of April.[1] An effort made by the board to elect teachers for school No. 1 failed on March 17th by the disagreement of the board, but on April 17th, Edward Leavy was unanimously elected male principal and Miss Mary Hardy female principal, and the numbers of the schools changed, the South School being known as No. 1, and the North School as No. 2. Thus were the first two schools organized in 1838, twenty-one years after the appointment of the board of trustees for superintending schools in the town of St. Louis by the Territorial Legislature, twenty-six years after Congress had donated the public lands, and five years after the organization of the new board under State legislation. These schools were public, but not wholly free schools, a tuition fee of two dollars and fifty cents per quarter being charged, and this notwithstanding the fact that a revenue from rentals of public lots was received by the board. The *Republican* of Oct. 16, 1839, noticed the fact that on

"the 12th inst. the president and board of directors of the St. Louis public schools leased out at public auction the whole of block No. 160, having sub-divided the same into thirty-two lots, sixteen of which front twenty-five feet on Fifth Street, and sixteen twenty-five feet five inches on Fourth Street. It will be recollected that this is the same block which the city had proposed to lease and set apart as a public square. The board of public schools offered it to the city at the annual rent of two thousand five hundred dollars, but this sum was considered entirely too high, and the city declined any further negotiations respecting it. The following are the prices at which the lots respectively were leased per front foot:

"Lot No. 1, corner of Gratiot and Fifth, $4.50; lot 2, $3.94; 3, $3.62½; 4, $3.62½; 5, $2.87½; 6, $2.87½; 7, $3.25; 8, $3.75; 9, $4.00; 10, $4.00; 11, $4.12½; 12, $4.25; 13, $4.25; 14, $4.12½; 15, $4.25; 16, $6.25.

"Lot No. 17, corner of Cerré and Fourth Streets, $6.06½; 18, $4.12½; 19, $3.62½; 20, $3.25; 21, $3.25; 22, $3.68¾; 23, $3.50; 24, $3.87½; 25, $3.62½; 26, $3.50; 27, $3.43¾; 28, $3.37½; 29, $3.31¼; 30, $3.44; 31, $3.37½; 32, $3.75. Making an aggregate annual rent to the schools of about three thousand dollars, being five hundred more per annum than the sum for which the same ground was offered to the city, and making a difference of about twenty-five thousand dollars for fifty years, the term for which the ground is leased."

Benton School, school-house No. 3, was built in 1841, at, one authority says, a cost of "about ten thousand six hundred and twenty-five dollars," and another, eight thousand dollars, the contractors being Messrs. Dresser & Gibson. The school was opened in January, 1842. "Admission fee, $2.50 per quarter, and salary of male principal nine hundred dollars; female, five hundred dollars."

On Dec. 11, 1841, the committee appointed by the board of public school directors to report a suitable address to the citizens of St. Louis submitted the following:

"To the Public.

"The great object of public schools is that elementary education be so free as not to exclude the indigent from its benefits; and it is with this view, as is well known, that the Federal government has, in the disposition of public lands, made provision for common schools.

"Heretofore the public schools in our city have been conducted entirely upon the free system, and it is the wish of the present directory so to continue them; but at this time the school fund is so low as to compel them to charge a small tuition fee, to enable them to meet the current expenses of all the schools, and pay what they now owe.

"There has lately been a spacious school-house built on Sixth Street, at a very considerable expense, which must remain closed if the public will pay nothing towards the education of the children admitted as scholars. The board, then, believing that this small sum will be paid, and conceiving it more judicious to open the new school, charging for tuition, than to let it remain as it now is, for want of means to pay teachers, etc., have, at a late meeting, adopted sundry resolutions, by which it will be seen that this house will be opened on the 1st of January, 1842, for the reception of children, and that the public schools in this city will hereafter be conducted on different principles, at least for some time.

"At the meeting referred to it was resolved that all the schools be opened for the reception of scholars on the 1st of January, 1842, upon the following conditions: That children be admitted, and taught reading, writing, etc., at two and a half dollars per quarter, stationery furnished by the school, and two dollars per quarter only for those who do not write, payable in advance, as it is distinctly understood that no name will be entered until the money is paid.

"At said meeting the city was divided into three school districts, viz.: All that part of the city south of Myrtle Street for school No. 1, situated on Fourth Street; all north of Morgan

[1] A newspaper of Feb. 26, 1860, said, "On Friday, the 24th inst. at 4 o'clock P.M., the Laclede Primary School, situated on the corner of Fourth and Spruce Streets, adjourned *sine die*. This was the first school established by the board of directors of the city of St. Louis, the house having been erected in 1837–8. The school went into operation on the 2d day of April, 1838. The building of this house, which, including furniture, cost about three thousand five hundred dollars, was regarded at the time as a great triumph in the cause of public education. It was designed to accommodate about one hundred and seventy-five pupils, and supposing it to have been full all the time, and that the average attendance of the scholars was two years each, it follows that about two thousand children have received instruction in the school. From first to last about thirty different teachers have been employed in this building.

"The scholars who have been in this building are now transferred to the Laclede School, on the corner of Fifth and Poplar Streets, the first story of which has been thoroughly repaired and seated with new furniture adapted to the use of primary scholars."

street for school No. 2, situated on Broadway; and the balance of the city for school No. 3, on Sixth Street.

"A committee of three have been appointed, whose duty it shall be to devote two hours each day, next week, from 3 to 5 o'clock P.M., commencing on Monday, the 13th inst., to receive applications for the admission of scholars and issue certificates to all who shall be admitted. One of said committee will be found at school-house No. 1, one at No. 2, and one at No. 3.

"The board, wishing to give all the advantages of a plain English education to as many as their limited means will allow, have resolved that twenty-five scholars be admitted to school No. 1 free of charge, and twenty-five to school No. 2, and 50 to school No. 3, making in all one hundred free scholars, who are not to be known as such by those who pay.

"All papers friendly to the cause of education will confer a favor by giving this an insertion for one week.

"JOHN FINNEY,
"JOSEPH TABOR,
"JOHN MCEVOY,
"*Committee.*"

This address created the fear that there was something wrong in the management of the school funds, and drew forth criticisms in the newspapers which throw considerable light upon the condition of affairs at that time. A writer, over the signature "W. P.," thus arraigns the address:

"By a vote of the citizens of St. Louis, in 1835, in pursuance of an act of the General Assembly of our State, ten per cent. of the net proceeds of the sale of the St. Louis common is set apart for the support of public schools in St. Louis. Such are the resources of our schools, which, we are now informed by the board of directors, have been exhausted, while only two schools have been kept in operation, and these only since 1838, instructing two hundred and sixty children out of two thousand eight hundred who want instruction, as appears from the report of the committee of the board adopted in December, 1839, and published by order of the board. The same report states the means of the board as follows:

Due to the board by the city	$2481.24
Due to the board by individuals	2412.10
Together	$4893.34
From which deduct debts due by the board	890.00
Which leaves surplus means	$4003.34

besides a balance of $513.75 in the treasury. The annual revenue, from lots leased out and ten per cent. on sale of Common, is stated at $9299.27; the annual expenses for conducting two schools, and expenses of the board, at $3600.27, showing an annual surplus of income of $5699. The number of schools and teachers has not increased since then, nor have the salaries of the teachers been raised, consequently the expenses cannot vary much from what they were then. The resources also remain the same. There ought to be, then, at present a surplus of $15,915.09, to wit:

Balance in favor of board, December, 1839.	$4,003.34
Balance in treasury	513.75
Surplus revenue for two years	11,398.00
Total	$15,915.09

omitting the interest. There has been, however, a new school-house built last summer, at the enormous sum of $8000, as I have been informed. Still, according to their own statements, the board ought to have a balance of nearly $8000 in cash or its equivalent, and the revenue ought to be more than sufficient to conduct three schools, or even more. By comparing these results, drawn from the published statements of the board, with their present announcement, that *for want of means* they must raise money by charging tuition fees, '*to meet current expenses and pay what they now owe,*' we are inevitably led to the conclusion that either the statements and estimates published by the board in December, 1839, were grossly incorrect, or else culpable mismanagement must have taken place, by which our noble school fund, that sacred trust, for which we are responsible to our posterity, is, perhaps, threatened with a similar fate to that which has destroyed the Girard fund, for the education of orphans in Philadelphia. It is not my desire to injure innocent men with groundless suspicions. But, as an humble member of this community, interested in its present and future welfare, I demand the attention of all citizens to the subject. If no reason for alarm exists, there can be no harm done by inquiring into it. On the other hand, the sacred duty we owe to our posterity sternly rebukes tame indifference in regard to a subject which, of all others, ought to be nearest and dearest to a patriot's heart."

At a meeting of the board in June, 1842, a committee was appointed to report a plan for the re-organization of the schools, in order to increase their number and usefulness, and with instructions that "in the opinion of the board, no system of arrangement that does not embrace at least two grades of school can be to a high degree efficient." This committee reported June 27, 1843, that "they deem it expedient for the board to establish and locate in each ward of the city four public schools, to wit: one male and one female primary school, one male and one female elementary school; and that a high school should also be established in some central part of the city," with a recommendation that "if the views of this committee be adopted, the plan pointed out by them be strictly adhered to, and carried out from time to time as the finances of the board will justify." This report was signed by A. Renard, Edward Jones, B. Brown, and Elijah Hayden. In accordance with the recommendations of this report, the board decided "that, as a beginning of the system resolved upon at their meeting, to establish new schools, a primary male and female school be established in the First and Sixth Wards, provided the citizens donate to the board means sufficient to defray rent and fuel." And yet a newspaper of the 15th of February, 184 said,—

"It appears from the annual statement of the board of directors of the St. Louis public schools that the total amount of rents received for the years 1843–44 was $11,500.33, on which they paid taxes and various other claims amounting to $710.76. There was received on account of this fund from sales of school lands, city commons, claims compromised, and other sources other than for rents of 1843–44 the sum of $16,70[illegible] from which they paid liabilities of former board, agents, percentage for claims compromised, and for legal services $411[illegible] making the aggregate gross receipts, after deducting the

ments aforesaid, $23,388.30. The total expenditures for the same period amounted to $10,471.43. On the 1st of January, 1845, the total resources of the fund, including city bonds for $10,000 deposited in the bank, amounted to $12,916.87. The school property now in possession of the board is valued at $18,321.17. The rents accruing to the board for the year 1845 will amount to $6268.88. The amount of rent due on lots forfeited to the board during the last two years is $702.38."

From 1840 to 1844 the question of the salaries of teachers had agitated both the board and the teachers. In the fall of the latter year these salaries were fixed as follows: "All males, except principal of school No. 3, five hundred dollars; all females, except principal of school No. 3, four hundred dollars; assistants, both male and female, two hundred and fifty dollars per annum." The teaching of vocal music was first authorized during this year.

A primary school was opened in the Fifth Ward in April, 1845, under the charge of Miss Sophia Green.

Clark and Mound schools were built in 1845, the former on the lot, having a front of seventy-four feet, purchased from G. S. Chouteau for fifteen hundred dollars. The schools were opened in July, 1846.

Messrs. J. H. Tice, William S. Stamps, and Jeremiah Langton were appointed, Sept. 15, 1847, a committee to ascertain upon what terms a suitable lot for a school in the Fifth Ward could be obtained. The committee selected a lot on the corner of Ninth and Wash Streets, measuring eighty-two and one-half feet front on Wash by one hundred and nine feet on Ninth, and reported that for the fifty feet next the corner the price was fifty dollars per front foot, and for the remaining thirty-two and one-half feet forty dollars per front foot. Their recommendation that the property be purchased was adopted by the board. Messrs. Tice, Hall, and Stamps were on Nov. 2, 1847, appointed a building committee, and reported a plan for a building and a contract for erecting the same. The contract was made with Messrs. Greer & Stearns, and the building was completed in the summer of 1848, and the school opened in October of the same year. "A few weeks since," says a local journal of Aug. 19, 1848,—

"The directors of the St. Louis public schools very wisely authorized Mr. E. Wyman, of this city, to proceed to Massachusetts, and select a sufficient number of competent teachers for the public schools of St. Louis. He has performed this duty, and, we have no doubt, in a manner acceptable to the board, and, as we hope the result will prove, to the citizens who are most interested in the improvement and elevation of the character of these schools. The teachers thus selected were passengers in the 'Atlantis,' on Thursday evening, from the east, and will, we presume, soon enter upon their duties. We learn their names: Mr. C. Edwards, C. A. Putnam, N. D. Cornell, Mr. C. Kimball and lady, Miss N. Foster, Miss L. B. Cushing, Miss M. Butrick, Miss S. Wing, Miss E. Frothingham, J. Smith, Miss E. Brooks, Miss L. Stone, Miss E. H. Palmer, Miss C. Little, and Miss E. Hadley.

"Mr. Wyman was also a passenger in the 'Atlantis,' prepared to enter upon his duties as the principal of his excellent and successful institution for the education of youth in this city."

The following extracts from a St. Louis newspaper under date of Jan. 8, 1847, give a very clear idea of the condition of education in the State in that year:

"The system of common schools in this State may be said to be in its infancy. Although the law providing for the organization of schools was passed at the session of 1838–39, yet there is reason to believe that the failure for several years of the bank to declare dividends has materially retarded the extension of the system. But other causes have tended to produce the same result. Many of the counties are new and sparsely populated, and the organization of schools in some portions of them is impracticable. We believe that a large portion of the people possess but little information on the subject; they do not know the system by which the townships may be organized, or the benefits which would result to them from such an organization."

"In connection with the above report," said the same journal, "it may be well to apprise the reader that the 'State school fund' consists of all the money deposited with the State by the United States, under the act of Congress to regulate the deposit of public moneys, approved 23d of June, 1836, generally known as the *Distribution Act*, and the proceeds of sales in the saline lands in this State, and all lands which have passed to the State by escheat, purchase, or forfeiture. This fund is invested in the stock of the Bank of Missouri, and is dependent on the dividends of that institution for the amount of distribution. Fines and forfeitures for criminal offenses constitute a county school fund for the county where the offense was committed. The school system is founded on congressional townships and fractional townships, that is, every six miles square, as marked in the United States surveys, constitutes a school township. These are again sub-divided into as many districts as a majority of the inhabitants deem proper. The United States government has granted to each congressional township the sixteenth section—a mile square—for common school purposes. In many instances these sixteenth sections have been so prudently managed that they have become a source of large revenue to the township, but in others they have been badly managed. The proceeds from this source, added to the State's fund, in some instances are sufficient to pay the salaries of the teachers for all the children within the township."

From 1833 to 1849 the following gentlemen at different times held seats in the St. Louis board of school directors: John Altemus, Edward Bates, Edward Bredell, John Byrne, John H. Baldwin, Dr. B. B. Brown, Wait Barton, J. C. Beidman, Cornelius Campbell, Joseph Charless, J. C. Carpenter, J. C. Degenhart, T. B. Dutcher, Lucien Dumaine, Antoine Dubreuil, John Dunn, Patrick Deegan, William G. Eliot, T. B. Edgar, Joseph Eck, Du Bouffay Fremon, William P. Fisher, S. V. Farnsworth, John Finney, Dennis Galvin, Archibald Gamble, V. M. Garesché, Patrick Gorman, H. L. Hoffman, Charles Huth, Edward Haren, Elijah Hayden, Alexander Hamilton,

William Hare, Elijah Hall, E. A. Humphreys, Brannock Jones, Edward Jones, David Keith, Mathew Kerr, Marie P. Leduc, Peter Latour, Jeremiah Langton, —— McLaughlin, Isaac McHose, Stewart Matthews, James Maguire, John McEvoy, Samuel McCullough, Hugh O'Neil, J. W. Ormsbee, Wilson Primm, Daniel D. Page, Trusten Polk, Joseph Powell, T. P. Reilly, James Ritchie, A. Renard, Bartholomew Rice, Nathan Ranney, Josiah Spalding, John Shannon, Spencer Smith, William S. Stamps, John F. Thornton, John H. Tice, Henry Von Phul, Samuel Willi, Peter A. Walsh, Asa Wilgus, David Weston, and Thomas H. West.

In June, 1849, a mill tax was voted to build up and sustain the schools, and from that time the development of the system has been rapid and complete.[1]

The first tax under this law was collected in 1850, and amounted to about eighteen thousand dollars.

On the 19th of February, 1850, Messrs. Thornton & Eliott were appointed a committee of the board for the selection of a lot for a school in the Third Ward, and on the 15th of March reported that they had purchased a lot on the corner of Fifth and Poplar Streets from Isaac Walker, containing seventy feet front by one hundred and twenty-seven feet deep, at eighty-seven dollars and fifty cents per front foot. The plan submitted by Mr. Eliott for a building was adopted, and contracts were ordered to be entered into

---

[1] AN ACT *to authorize the levying and collecting of a tax in the city of St. Louis, for the purpose of education.*

"*Be it enacted by the General Assembly of the State of Missouri as follows:* SEC. 1. There shall be levied and collected annually, upon all real and personal property within the corporate limits of the city of St. Louis made taxable by law for State purposes, a tax not exceeding one-tenth of one per cent., which tax, when collected, shall be paid to the president and directors of the St. Louis public schools, and by them [to] be used and applied in the same manner and for the same purposes as other money belonging to the corporation of the president and directors of the St. Louis public schools, and in strict accordance with the provisions of the act or acts of the Legislature of the Territory and State of Missouri in relation to said corporation.

"SEC. 2. The collector of St. Louis County shall have authority, and it is hereby made his duty, to collect the tax in the first section of this act specified, and in the same manner, and under the same restrictions, penalties, and responsibilities, and with the same power as is provided in the third article of an act entitled 'An Act to provide for levying, assessing, and collecting the revenue,' approved March 27, 1845, and faithfully and punctually to pay over the same to the president and directors of the St. Louis public schools.

"SEC. 3. The collector of St. Louis County shall, before he enters upon the duties imposed upon him by this act, enter into bond to the president and directors of the St. Louis public schools, in such sum as they may require, with good and sufficient securities, to be approved by said president and directors, conditioned for the faithful performance of his duties as such collector of the tax in this act specified.

"SEC. 4. The said collector shall take the assessment made by the assessor of St. Louis County within the limits of the city of St. Louis, and from the said assessment is hereby authorized to make a tax-list in pursuance of and for the purpose in this act mentioned; and for his compensation for such collection shall receive the same per centum as is allowed him by law for the collection of the State and county revenue.

"SEC. 5. On the first Monday of June, in the year eighteen hundred and forty-nine, this act shall be submitted to the qualified voters of the city of St. Louis for their approval or rejection, and if the majority of such qualified voters, voting upon the day aforesaid, shall vote in favor of this act, the same shall become and be a valid and binding law from and after said day. But if a majority of such qualified voters, voting on the day aforesaid, shall not approve of this act, the same shall be null and void.

"SEC. 6. No person shall be qualified to vote for or against this act but such persons as are twenty-one years of age and residents of the city of St. Louis, and who at the time of such voting shall be owners of real or personal property, subject to taxation by the laws of the State for county and State purposes.

"SEC. 7. The justices of the peace within the city of St. Louis, or a majority of them, shall have power to appoint two or more persons to open polls and superintend the voting on this act as aforesaid in the several wards of the city of St. Louis, which voting shall be *viva voce*, and the said persons so appointed by the justices as aforesaid shall be the judges of the qualifications of voters, and shall make returns of the result of said voting to the clerk of the county court of the county of St. Louis, who shall certify said return, under the seal of said court, to the president and directors of said St. Louis public schools, who shall transmit the same to the Secretary of State, who shall file the same in his office, which shall be evidence whether this law is in force or not.

"SEC. 8. The polls for voting upon this act shall be opened in the respective wards of the city of St. Louis, at the places where the city elections are usually held; and it shall be the duty of the president and directors of the St. Louis public schools to publish this act in all the newspapers printed and published in the city of St. Louis three weeks successively before the day of said voting; they shall also put up printed notices of the said voting in five prominent places in each ward of the said city ten days before the said first Monday in June, 1849.

"APPROVED, Feb. 13, 1849.

"OFFICE OF
SECRETARY OF STATE OF MISSOURI.

"I, EPHRAIM B. EWING, Secretary of State of the State of Missouri, certify that, in compliance with the seventh section of an act authorizing the levying and collecting of tax in the city of St. Louis for purposes of education, approved Feb. 13, 1849, William G. Eliot, Jr., president of the board of directors of the St. Louis public schools, has transmitted to this office an abstract of the returns of an election held in the several wards of the city of St. Louis on the first Monday of June, A.D. 1849, in pursuance of the act aforesaid, and that said abstract is on file in this office.

"In testimony whereof, I have hereunto set my hand and affixed the seal of said office. Done at the city of Jefferson, this twenty-fifth day of June, A.D. 1849.

[L. S.]

"EPHRAIM B. EWING, *Secretary of State.*

This act was amended by the act of 1859, approved March [illegible], and by the act of 1863, approved December 17th.

for building two new school-houses, one on the corner of Fifteenth and Pine, and the other on the corner of Fifth and Poplar Streets. The contracts for both were awarded to Messrs. Sage & Warner. The former was completed so that school was opened in it early in December, and the latter about the middle of January, 1851.

The fine lot upon which Webster School stands was donated in the year 1817 by Col. William Chambers, Maj. Thomas Wright, and William T. Christy, who in sub-dividing their property, and laying out the same, presented a circular lot of three hundred feet in diameter to the inhabitants of North St. Louis forever for a seminary of learning. Charles W. Schaumburg, on the 9th of January, 1844, submitted a petition to the board praying them to take possession of the land and erect thereon a public school-house. The difficulty of title, which was involved in the fact that a legal conveyance from an unincorporated community could not be made, caused a petition to be presented to the Legislature praying for a law to appoint trustees to administer the trust and convey the property to the board. The act was passed by the Legislature in January, 1851, and the board became invested with a good title to the property. The Webster school-house was completed on the first Monday in February, 1853. The building was eighty feet by fifty-two, and three stories high. The first story was intended for the primary department, and contained two large class-rooms. The second story was devoted to the male grammar school. It was divided into three apartments, and accommodated one hundred and sixty-eight pupils. The female grammar school was assigned to the third story. This contained four rooms, and would comfortably seat one hundred and sixty-eight pupils.

The dedicatory services of the Webster school-house took place on the 2d of February, 1843. The exercises were opened with singing by the pupils from the several grammar schools in the city under Professor Hale, teacher of vocal music in the public schools, after which Mr. Tucker, the president of the school board, delivered the following historical address:

"In commemorating the opening of this building, the board of public schools feel gratified that their call has been so fully responded to, and recognize in your presence that sympathy with their cause and their labors which is their chief object and their sole reward.

"This being the first occasion of a public celebration of this kind, a short history of the beginning and progress of the public schools may not be unacceptable.

"You all know whence the system was derived and on what broad basis established, and we would not avoid remembering and acknowledging the wisdom of our forefathers in engrafting in our very being as a State ample and liberal provisions for public education to the children of all, poor and rich, and to them together, uniting them in sympathies on the threshold of life.

"These noble men knew well how essential are intelligence, law, and order to the permanency of government; their forefathers had been developing the rights of the individual and of the people from the days of Cromwell to our Revolution, and in guarding these they placed foremost the principle of universal public education, and provided liberally for it.

"Under these provisions, as early as 1812 reservations of vacant lands in this then town of St. Louis were made for the public schools by Congress; but not until 1833 was a charter from the State obtained enabling this present board to avail of these provisions, and in this interim much of the expected property had been claimed and taken by old slumbering titles, and none assigned to the schools, and no assignments of lands were obtained till May, 1843.

"The first possessions of the board were therefore such as were known as vacant lands, and were small, so small that the first rents—the rents of the year 1835—were only six hundred and forty-five dollars, and had not increased two hundred dollars up to the year 1840; and the sales of real estate amounted in 1838 to only four thousand two hundred and thirty-six dollars, and were not increased thereafter. With these limited funds two school-houses were started in 1836, but were not opened till the 1st of April, 1838. These were the present old Laclede School, on Fourth and Spruce Streets, and a school long disused, corner Cherry and Broadway, since destroyed by fire.

"These schools exhausted the available funds of the board, and languished for want of income to keep up free and full instruction, and the board was much embarrassed in legal expenses and exertions to obtain assignments of lands intended to be granted by the United States, which expenses and exertions have continued with indifferent and partial success only, up to the present time, and still continue.

"In 1842 the market on Broadway caused the renting of the building there, and the transposing of the school to the present Benton School on Sixth Street; but the school languished for want of means, and the crisis of 1843 caused a reduction of the school's rents of twenty-five per cent. for five years, to retain tenants and secure an income. With the assignments at last made in 1843, and compromise made on same in December, 1844, we find the funds and activity of the board improved, and in 1845 the present Clark School, in the First Ward, and Mound School, in the Sixth Ward, were commenced, and opened in 1846 early, the annual rents at this time amounting to $5571.52.

"In 1847 the Jefferson School, in the Fifth Ward, on Wash Street, was commenced, and opened in 1848, and from this time a new life in the public schools may be dated, they filling rapidly with pupils, and becoming of public interest. The cholera of 1849 clouded the schools temporarily, and in some cases the houses were devoted to public service for the sick.

"In 1850 the Eliot School, in the Third Ward, and the new Laclede School, in the Second Ward, were commenced, and opened in 1851, as also the primary school on Seventh Street, in the Fifth Ward; and in 1852 were commenced the Lafayette School, in the First Ward, and Webster School, in the Sixth Ward, the latter of which we have now the pleasure of opening to you, and with these two schools in operation, the board are able to accommodate four thousand pupils, and still see increase wanted, and are preparing for it.

"The income of the board is now... $14,500 from rents.
And this year..... 26,263 from taxes.

"Their expenses for instruction, repairs, fuel, legal and office services have been twenty-five thousand dollars in round num-

bers for the past year, and the remainder devoted to building. With the new high school now in progress, and instruction in these two new schools, their expenses will be increased, but we trust these explanations will show that our trust has not been slackly used and appropriated. Among the friends and supporters of our cause we can number many of our most valued citizens.

"The chairman of the town trustees in 1813, C. B. Penrose, Esq., with Governor William Clark, Bishop DuBourg, Hon. Thomas Benton, Col. John O'Fallon, and many others, was zealous in preserving cognizance of the lands for the object, and among the first members of the present board under the charter of 1833 were the Hon. Edward Bates and the late Josiah Spalding, Esq., to whom the origin of the valuable rules and provisions may be traced.

"The interest in the cause has not ceased, but has gone on, combining to it others, year after year, both in the board and out, and to this interest we should ascribe the noble donation of this noble site of land.

"We therefore present the public school cause to you, both as emanating from the fathers of the Constitution and since supported by well-known names, both past and present, statesmen and legislators, with private citizens innumerable.

"But your presence here, and the progress the schools have made under every difficulty, also proclaim the interest the people have in the public schools, and to these schools we welcome their children, who are to become the men and women of our land, and who will, we trust, appreciate and protect to their children the high heritage we now foster for them, not as a charity, but as a public right and duty."

After the address, the pupils sang a few stanzas appropriate to the occasion, which were followed by an eloquent address from John A. Kasson, the orator of the day.[1]

The Lafayette school-house was opened on the 28th of March, on which occasion an address in English was delivered by Hon. B. Gratz Brown, and one in German by Mr. Jaeger. The schools in St. George Market Hall were transferred to this building, and the schools in Mound School and Chambers Street primary were transferred to the Webster building. In April, 1850, a primary school was opened in the St. George Market Hall.

The schools in 1854, when Superintendent John H. Tice's report, the first annual report of the St. Louis public schools, was published, numbered twenty-seven, employing seventy-two teachers, and when full accommodating upwards of four thousand pupils. The daily average attendance at that time was three thousand seven hundred and ninety-one, the salaries of teachers varying from three hundred and twenty-five dollars to one thousand three hundred dollars per annum, the average expense of each pupil being nine dollars and seventy-five cents per annum.

The success and popularity of the public schools in St. Louis contributed to a very great degree toward establishing a system throughout the State, and the Legislature in 1856 passed a law appropriating *twenty-five per cent.* of the State revenue for the support of free schools, the same to be distributed to the different counties in proportion to the number of children between five and twenty-one years of age. From this source St. Louis received a revenue of twenty-seven thousand four hundred and fifty-six dollars and fifty-one cents, making the total income of the school over eighty-seven thousand dollars.

The board met with financial embarrassments from the time of its establishment until public taxation came to the assistance of its revenues derived from the leasing or sale of its lands. The law of Feb. 13, 1849, providing for "a tax not exceeding one-tenth of one per cent." upon all real and personal property within the corporate limits of St. Louis, was accepted by the qualified voters on the first Monday in June, 1849. This act was amended by the act of March 2, 1859, without altering the amount of tax.

The Legislature, by the act of the 17th of December, 1863, increased the tax provided for in both the preceding laws to "a tax of not more than one-half of one per cent." Under the Constitution of the State, the board is prohibited from creating any debt or expending in any year more than the *income* provided for that year; but for the purpose of paying the principal and interest of the indebtedness existing at the time of the adoption of the Constitution, Nov. 30, 1875, a special tax (not exceeding one mill annually) is permitted to be levied.

From 1849 to 1857 the board consisted of two members. The following is a list of the directors who served at different times:

Samuel H. Bailey, Joseph Baker, Benjamin Brix, J. C. Degenhart, T. B. Dutcher, W. G. Eliot, A. Erford, Louis Espenchied, Waldemar Fisher, Isa Forbes, Andrew Finley, George M. Fichtenkam Alexander Finley, Carlos S. Greeley, Ferdinand Gr chalk, Isaac T. Greene, Archibald Gamble, Will W. Greene, William Garwood, Patrick Gorman, ward Hale, John R. Hammond, Edward Jones, drew Krug, William C. Kennett, George W. Ly Adolph Levy, F. H. Milligan, William S. Mc Frederick Mosberger, P. T. McSherry, Arthur

[1] "At this time," says the *Republican*, "there were in the whole city ten public school-houses, scattered in the various wards, as follows: In the First Ward, 1; in the Second Ward, 3; in the Third, 1; in the Fourth, 1; in the Fifth, 2; in the Sixth, 2. These give facilities for the schooling of about 4000 pupils. The number of children now being educated in these schools, we learn, is 3400. The complement of teachers musters strong. There are now sixty, of whom about forty-five are females, and the remainder males. The most competent persons are employed, as all are required to undergo a thorough examination before a committee of the board of directors before they are admitted in the public schools."

hausen, Joseph O'Neil, William Patrick, George Partridge, Joseph S. Patton, Henry Pilkington, R. M. Parks, Charles A. Pope, Seth A. Ranlett, S. B. Shewey, William S. Stamps, Frederick Schulenberg, Solon Stark, Charles W. Stevens, Thomas Salisbury, John F. Thornton, Thomas M. Taylor, Charles L. Tucker, J. W. Thornburg, Edward Wyman, Louis Winkelmier.

The year 1861–62 is noted in the school reports "as *the year of calamity* to our public schools. The Rebellion has deprived us of all State aid and reduced our other revenues about one-half." At a meeting of the board of directors held on the 14th of May, 1861, the following preamble and resolution were adopted:

"*Whereas*, The Legislature of the State of Missouri has by its recent action prohibited the distribution of the school money, and diverted it to defray the expenses of arming the State, therefore depriving this board of a large amount of its customary revenues which are set apart by law to be exclusively used for the purpose of paying the teachers' salaries; and, *Whereas*, this board has no available means of supplying this deficiency and meeting the current expenses of the schools for the usual term-time; therefore,

"*Resolved*, That all the public schools be closed for the remainder of the present scholastic year on Friday, the 17th inst., at four o'clock P.M., and that a *pro rata* deduction of the teachers' salaries be made for the term-time hereby cut off."

Thus circumstanced, the board experienced great anxiety and embarrassment as to the reopening of the schools; but being determined to do everything in its power to meet the wants and expectations of the community, it appointed a special committee to examine the financial condition of the board and to report a feasible plan for the management of the schools during the year. This committee reported that "we find the total amount of revenue due the board last year, as shown by the books, was $173,-[illegible]8.01. Of this the board was able to collect less than fifty-seven per cent., say $98,344.26, leaving a deficit of over forty-three per cent.;" and "that it will be imperatively necessary to levy a tuition fee, which shall be sufficient to pay the teachers' salaries, but in such small amount *per capita* as will be easily borne by the parents of the scholars. In the high and normal schools, in particular, it is recommended that the annual tax be sufficient to meet the entire expenses of these schools." The board in adopting this plan felt compelled to cut down expenses, and, consequently, to reduce largely the salaries of teachers. Immediately after opening the schools, it was ascertained that a considerable portion of the children would be deprived of the benefit of the schools in consequence of the tuition fee. To obviate this difficulty the board

"*Resolved*, That orphans who are unable to pay, the children of indigent widows, and the children of indigent invalid parents be admitted to the public schools free of tuition charge, and that they be allowed free tuition throughout the present scholastic year, unless they forfeit their seats by misconduct or irregular attendance."

Under these circumstances and conditions the public schools were conducted in 1861–62, with 76 teachers and 5787 scholars. The total tuition fees amounted to $24,133.10. The same plan was continued for the year 1862–63, but with more satisfactory results, the average number of teachers employed being 111, the number of pupils 8105, and the amount of tuition fees $23,518.35, about 15 per cent. of the whole number of pupils being admitted free. In July, 1863, the board resolved unanimously to open all the schools free for the ensuing year of 1863–64, and from that year to the present no step backwards has been taken in the conduct of the public schools of St. Louis.

The reports of Ira Divoll, late superintendent of public schools, have mainly furnished the facts from which this sketch of the public school system of St. Louis has been prepared.

Mr. Divoll died after a long illness in June, 1871, at the residence of his brother-in-law, at Baraboo, Sauk Co., Wis. He was a native of Vermont, and was educated at Burlington University in that State. After his graduation he removed to New Orleans, where he held the position of principal of a public school for some time. His health failing, he removed to St. Louis and commenced the practice of law. In 1857 he was elected superintendent of public schools, which office he held for eleven years. The disease, consumption, which had attacked him in New Orleans, continued to make inroads upon his health, and became more severe from year to year, but his great strength of will seemed to keep it in check, and buoyed him up in the greatest trials. He was elected State superintendent of public schools in the fall of 1870, and continued to merit the high esteem in which he was held by members of all parties, and in every part of the State. During the last three years of his administration as superintendent of the St. Louis public schools, a large portion of his time was given to the founding of the public school library, in which he took a deep interest. The subject of making a good school law occupied much of his attention, and was a matter of earnest investigation with him. Mr. Divoll gave active attention to the duties of his office up to within a short time of his death, and his unwearied energy and industry won the golden opinions of a large circle of admirers, particularly among the friends of educational progress.

The following is a list of the directors who served at various times from 1857 to 1867:

John H. Andrews, Stephen D. Barlow, Benjamin Brison, James H. Britton, Joseph Baker, Samuel H. Bailey, Charles Bayha, Charles Blank, John H. Buenemann, Algernon S. Barnes, Henry Block, A. C. Cordes, Archibald Carr, John Clark, James M. Corbett, Felix Coste, John Conzelman, Julius Conrad, Samuel Copp, Jules Detchmendy, William D'Oench, Joseph Davis, James Duross, Timothy B. Edgar, Louis Espenschied, Conrad Fath, George M. Fichtenkamp, Isaiah Forbes, Josiah Fogg, Isaac L. Garrison, William Garwood, William W. Green, Isaac T. Greene, Adam Hammer, M. W. Hogan, Joseph Hodgmar, Robert Holmes, Samuel Hagar, John Hartman, Thomas Hayward, Theo. Hildebrandt, Charles W. Irwin, Mark C. Jennings, C. P. E. Johnson, Washington King, James R. Lake, John A. Leavy, James D. Leonard, Charles L. Lips, Morris I. Lippman, John F. Long, James D. Maguire, Andrew Miller, Daniel McAuliffe, Andrew Murrey, Francis Mols, Thos. McVicker, William P. Mullen, Fred. Mosberger, Charles F. Meyer, John Nicolay, Joseph O'Neil, Charles A. Pope, August Pasquier, Moses L. Pottle, Eben Peacock, Henry S. Parker, William Patrick, Fred. Partenheimer, James Richardson, Edward P. Rice, J. P. Davold, Julius Rapp, Samuel Robbins, I. P. Robison, Francis Sigel, James B. Sickles, F. A. H. Schneider, Charles Stevens, Caspar Stolle, Philip Stremmel, John A. Strait, Richard H. Spencer, Louis Spies, H. Schweickhardt, H. M. Thompson, John F. Thornton, Herman Tiefbrunn, Emil Ulrici, C. D. Wolf, D. T. Wright, and Edward Wyman.

The total bonded and floating debt of the board at the time of the adoption of the State Constitution, Nov. 30, 1875, was $754,000. This indebtedness had been reduced in 1881 to $175,000, payable as follows, in six per cent. bonds:

Jan. 1, 1882	$50,000
Jan. 1, 1883	50,000
Jan. 1, 1884	50,000
Jan. 1, 1885	25,000
Total	$175,000

The condition of the fund Aug. 1, 1875, was as follows:

Cash on hand, proceeds of bonded debt tax	$30,830.43
Nineteen Missouri State bonds	20,140.00
Total	$50,970.43

Leaving to be collected to pay off debt in full, $124,029.57.

Article XI., Section 8, of the State Constitution requires that "all moneys, stocks, bonds, and other property belonging to a county school fund, also the net proceeds from the sale of estrays, also the clear proceeds of all penalties and forfeitures, and of all fines collected in the several counties for any breach of the naval or military laws of the State, and all moneys which shall be paid by persons as an equivalent for exemption from military duty, shall belong to, and be securely invested and sacredly preserved in the several counties as a county public school fund, the income of which fund shall be faithfully appropriated for establishing and maintaining free public schools in the several counties of this State." And to further "preserve" this fund the Legislature enacted the law of May 16, 1879, which provides "that all school lands heretofore granted by the General Assembly to any city or town, or to any incorporated board for the benefit of any city or town, or the inhabitants thereof, for the purposes of public education, including all lands set apart or granted by the general government of the United States to this State, and lying within the limits of such city or town, for the support of schools, and granted to or placed in charge of such city or town or incorporated board as aforesaid, shall constitute the *per* *school fund* of such city or town, only the in[come] of which shall be used for the support of the public schools in such city or town." The second section, while permitting the sale of such property, required that "the proceeds be duly invested, and only the income thereof used for the support of schools." The funds arising from these provisions of law and the "county school capital fund," received by the board from the county of St. Louis under the scheme of separation, constitute the permanent school fund of St. Louis.

[1] From the "scheme for the government of the county and city of St. Louis, and charter for the city of St. Louis," as proposed by the board of freeholders, acting under and in pursuance of Section 20, Article IX., of the Constitution of the State of Missouri, and ratified by the qualified voters Aug. 22, 18[7]

"SEC. 36. In all cases where the [limits] of the city of St. Louis, as herein extended, includ[e] only of any school district, the following shall be [the] of adjustment as to property held by or for the use or benefit of such district:

First. Where the part of such district included within such extended limits contains any school-house or other real estate belonging to the district, the board of president and directors of the St. Louis public schools shall pay into the county treasury of St. Louis County, for the use of that part of the district not so included, such proportion of the valuation of said school property as the taxable value of property in the part of such district not so included bears to the taxable value of all property in such district as constituted before such extension. *Second.* Where the part of such district not included within such extended limits contains any school-house or other real estate belonging to the district, the inhabitants of the district not included shall pay to the board of president and directors of the St. Louis public schools such proportion of the valuation of said school property as the taxable value of property in that part of such district included within the city limits bears to the taxable value of all property in such district as constituted before such extension. The valuation of school property mentioned in this section shall be made by arbitrators, one of whom shall be selected by the board of president and directors of the St. Louis public schools, and one by the directors of the school district affected, who, if disagreeing, may select a third; or if unable to agree on the selection of such third arbitrator, any school director or member of the board of president and directors of the St. Louis public schools may apply to the Circuit Court of the Eighth Judicial Circuit to appoint one. A report of the valuation made by such arbitrators, or a majority of them, shall be filed, as soon as practicable, in the clerk's office

The great bulk of the permanent fund is invested in the real estate which was derived from the congressional grants under the law of 1813, in the outlots, common field lots, etc., and such of the original sixteenth section[1] lands as may be recovered from

the Circuit Court of the Eighth Judicial Circuit. Any money to be paid to the board of president and directors of the St. Louis public schools shall be provided for by the assessment, levy, and collection of a special tax on all taxable property within such districts not so included.

"SEC. 37. All property, real, personal, or mixed, of every kind and description, and the evidence of title thereto, now held by the county of St. Louis, or by the county court of St. Louis County, in trust or for the use of the inhabitants of township forty-five north of range seven east, for school purposes, and all such property, and the evidences of title thereto, held by any public officer for the use of any school district in said township, or held by or for the benefit of any such district, shall, as soon as this scheme goes into effect, pass and be delivered to the board of president and directors of the St. Louis public schools; and the title to any and all such property shall, upon operation hereof, vest in said board."

[1] AN ACT *in relation to the title to the sixteenth section in certain townships.*

"*Be it enacted by the General Assembly of the State of Missouri, as follows:* SEC. 1. Whenever any township in which the sixteenth section granted by the United States to the State of Missouri for the use of schools, or any part thereof, remains undisposed of lies wholly within the limits of any incorporated city, and the title to the sixteenth section of such township, or such portion thereof as now remains undisposed of, shall be, and the same is hereby, vested in the corporation having by law the management of the public schools in such city, by whatever name or title such corporation may be known or designated; *Provided*, That if, by any laws of the State now in force, commissioners have been appointed to take charge and dispose of any such sixteenth section, no action or proceeding commenced by such commissioners for the recovery of the same, or any part thereof, and no contract made with attorneys for the prosecution of such actions or proceedings, shall be in anywise affected by the change of title herein provided for, but all such actions and proceedings shall continue in the name of, and be carried to a final determination by such commissioners; and all the rights, claims, benefits, and interest acquired by said commissioners of the State of Missouri, by virtue of any such action or proceeding, shall, upon the determination thereof, vest in such corporation, and such corporation shall thereafter have full charge and control of the property and funds so acquired.

"SEC. 2. Said commissioners shall make report of their actions, proceedings, and expenditures to such corporation, and shall be entitled to a reasonable compensation for their services, to be fixed by three arbitrators, one of whom shall be chosen by said corporation, one by such commissioners, and the third by the two chosen by the parties. Said arbitrators, so selected, shall hear the evidence, and award such compensation as they may think such commissioners are justly and equitably entitled to, to be paid by such corporation; and such award shall be final and binding on all parties. All compromises agreed upon with such commissioners with any adverse claimant to the lands hereinbefore mentioned, or any portion thereof, shall be submitted to said corporation for approval, and if approved by said corporation, a deed shall be executed by such corporation to such adverse claimant.

"Approved May 16, 1879."

holders under adverse claims. This permanent fund at the close of the school year for 1881 consisted of the following:

Cash		$27,434.78
Missouri State bonds	$21,000.00	
Premium on same	1,260.00	
		22,260.00
Amount due from Rechtien fund		6,584.96
Bills receivable, face value		27,100.00
Estimated value of real estate		1,268,478.57
Total		$1,351,858.31

The permanent fund was not created by the act of May 16, 1879, but existed by virtue of the Constitution, and the only effect of the act of the General Assembly was to remove doubts as to the status of the government land grants, which constitute the greater part of this fund. During the school year of 1881 the board received over seventy thousand dollars from the rentals and interest of this fund.

The general revenue fund is the available source of all revenue for the current expenses of the schools, and is derived from the four mills tax and the income from the permanent fund. The account for 1881 was: Total receipts, $881,964.14; total expenditures, $770,789.06. Of the receipts, the sum of $48,919.10 was received from the tax for 1881 in advance, and therefore does not properly belong to the receipts for the year ending July 1, 1881; and the further sum of $11,584.40, received from sureties of a former treasurer of the board, properly belongs to the receipts of former years. Making these corrections, the ordinary income exceeded the current expenses in the sum of $50,670.58, and during that year the board appropriated from its surplus revenue the sum of $22,000 (excluding $202.50, proceeds of land sale, omitted from receipts) to the building fund for the purchase of school sites and erection of school build-

PUBLIC SCHOOLS—PERMANENT FUND.

"AN ACT *to preserve the public school funds of cities and towns of this State.*

"*Be it enacted by the General Assembly of the State of Missouri as follows:* SEC. 1. All school lands heretofore granted by the General Assembly to any city or town, or to any incorporated board for the benefit of any city or town, or the inhabitants thereof, for the purposes of public education, including all lands set apart or granted by the general government of the United States to this State, and lying within the limits of such city or town, for support of schools, and granted to or placed in charge of such city, town, or incorporated board as aforesaid, shall constitute the permanent school fund of such city or town, only the income of which shall be used for the support of the public schools in such city or town.

"SEC. 2. Nothing herein contained shall affect the existing right of any city or town or incorporated board to dispose of such lands; *Provided*, That the proceeds be duly invested, and only the income thereof used for the support of schools.

"Approved May 16, 1879."

ings, and also paid into the permanent fund the sum of $18,368.81, being the amount of the county school capital, erroneously paid into the revenue fund before.

The correct account of the fund for the year 1881 is therefore,—

Receipts	$905,198.36
Expenditures	811,157.87
Balance on hand Aug. 1, 1881	$94,040.49

A tabulated comparative statement is herewith submitted, giving the items of receipts and expenditures since 1877:

RECEIPTS.

	1877.	1878.	1879.	1880.	1881.
Four-mill tax	$655,995.73	$714,990.59	$676,074.50	$667,707.64	$720,043.59
Rents of real estate	47,006.28	47,427.10	50,285.65	51,819.54	52,086.13
State school fund	131,946.05[1]	85,117.07	71,268.85	74,725.80	76,063.29
Bills receivable[2]	42,003.59	46,907.65	42,427.04	18,217.87	7,987.85
Interest on bills receivable	5,227.80	10,300.12	10,165.70	7,475.56	4,224.03
Interest on current deposits	.....	.....	.....	2,778.63	5,863.37
Kindergarten sup. fees	3,228.00	5,097.80	.....	.....	5,374.10
Tuition non-residents	890.00	485.00	343.75	342.50	137.00
Miscellaneous	23,548.63	24,353.68	1,895.50	1,424.13	1,102.59
Total	$909,846.08	$934,679.01	$851,958.99	$824,491.67	$872,881.95

[1] Includes the amount appropriated to the city and county of St. Louis.
[2] For the years prior to 1881 the "bills receivable" include both principal and interest notes; since August, 1880, only "interest" notes are included.

EXPENDITURES.

	1877.	1878.	1879.	1880.	1881.

[1] Prior to 1881 included in supplies proper.

The building fund is the creation of the board and not of any law, its receipts being taken from the general revenues of the board. While under the Constitution of the State a special tax for the erection of new school buildings may be authorized by the vote of two-thirds of the qualified voters, the board has never availed itself of this provision, but has provided new school accommodations from its general revenues applicable to that purpose. This fund consists, *first*, of appropriations from the surplus current revenues of the board; *second*, of township bills receivable received under the scheme of separation on behalf of the school districts lying within the extended limits of the city which belong to the townships intersected by the new city line; *third*, the bills receivable representing deferred payments on all real estate sold by the board *prior* to the enactment of May 16, 18[illegible] and *fourth*, the proceeds of all sales of land not

longing to the permanent fund. The receipts and disbursements of this fund for the school year of 1881 were,—

Receipts	$42,859.91
Expenditures	11,953.00
Balance	$30,906.91

Including Missouri State bonds and premium amounting to $6360, the total cash and bonds in fund Aug. 1, 1881, were $37,266.91. The building fund for the year 1882 was increased from the above balance of $37,266.91 by an appropriation of $60,000 to $87,267.91, which is believed to be sufficient for the completion of all buildings now in progress.

Value of School Property.

Value of school lots	$777,777.00
Value of buildings and furniture	2,075,534.91
Total value of property used for school purposes	$2,853,311.91

German-English Instruction.—As early as [illegible] the German residents of St. Louis petitioned [illegible] board to establish schools wherein both the [illegible]man and English languages should be taught; [illegible] the State school law interdicted the establishment [illegible]ny schools except such as taught the English language *only*. The same question was repeatedly brought to the attention of the board, but no action was taken until, in 1864, it was presented in such shape as to be adopted by the board unanimously, and the German schools were accordingly established. The census of 1870 showed that out of every one

hundred persons in St. Louis twenty-eight were from parents born *in* the United States, and seventy-two from parents born *out* of the United States; of the seventy-two born of foreign parents, thirty-eight were from German parents, twenty-one were from Irish parents, five were from English parents, two were from Swiss parents, two were from Bohemian parents, two were from French parents, and two were from parents of other nationalities. Many of the twenty-eight whose parents were born in the United States had foreign grandparents. From these statistics it appeared to the board that the city was very nearly equally divided between nationalities whose home language is English and those who received some other language from their parents.

The *Republican* of April 5, 1860, gives the following statistics of the German schools in the city at that time, taken from a report by a committee acting under instructions from an association of German teachers:

"There are in all in St. Louis 38 German schools, at which 5524 pupils receive instruction; whole number of teachers employed, 98; of whom 76 are male and 22 female; average number of pupils to one teacher, 56; average yearly fee for each pupil, $9.60. Of the schools the great majority are Protestant, 6 are Catholic, 10 are not committed to any denomination, 1 is conducted by an association of 'Free-thinkers,' and 1 is Israelite.

"The committee also institute a comparison between these and the public schools in this city, from which we adduce the following public school statistics.

"There are in St. Louis 35 public schools, with an average number of 6253 pupils; number of teachers employed, 140, of whom 40 are male and 100 female; average number of pupils to one teacher, 45; average yearly expenses for one pupil, $17.17."

NUMERICAL CONDITION OF GERMAN PUBLIC SCHOOLS IN ST. LOUIS FROM 1864 TO 1881.

THE HIGH SCHOOL was established Feb. 11, 1853. Every well-devised and well-executed plan of public education necessarily implies this grade of school. Without it any system would be imperfect and inadequate to the wants of the community. The bringing together of the most advanced scholars of the elementary schools and furnishing them instruction in the higher English and classical studies is an arrangement both natural and philosophical, and one which has been adopted and sustained in every system of public schools in the Union. The St. Louis High School, under the charge of Jeremiah D. Low, A.M., went into operation in the Benton school-house, where it remained until the completion of the High School building, at the corner of Fifteenth and Olive Streets, in the Sixth Ward, which was dedicated on March 2, 1856.

The usefulness of this school and the wisdom of sustaining and enlarging its scope of instruction have become so apparent that a new High School building was recommended in the report of 1880–81. "The need," it was stated, "is dictated alike by considerations of economy and by the interests of the pupils in the first year of the course."

The following table shows the number of pupils enrolled for each year (excluding year in branches):

Year.	Second Year.			Third Year.			Senior Year.			Course

GRADED SCHOOLS.—In 1857, Ira Divoll, then appointed superintendent of public schools, visiting other cities and examining their public systems made a report to the board, and there the following general principles were agreed upo

"1. That it is the true policy of the board to build and own its school-houses rather than rent unsuitable tenements.

"2. That no more houses be built according to the old plan, but that *graded schools* be established in future.

"3. That the school-houses hereafter to be built be of uniform size throughout the city, as nearly as the demands of the different districts will permit; those in thinly-settled districts to be one-half or one-third the full size, and constructed with the view of receiving additions when required.

"4. That each first-class school-house, in order to secure good classification and economical management, contain twelve rooms, with seats for about seven hundred scholars, and be provided with separate play-grounds, doors, stairs, etc., for boys and girls.

"5. That the scholars be classified according to their respective attainments, so that those who may be allotted to any one teacher will be equally advanced and pursuing the same studies; the primary scholars to be seated on the *first* floor, the intermediate on the *second*, and the most advanced on the *third*.

"6. That there be one organization and one principal teacher for each building.

"7. That such of the old buildings as will admit of alteration be reconstructed and adapted to the graded system.

"8. That wherever there are several independent departments in the same building, these shall be consolidated under one principal as soon as circumstances may justify such action."

Financial difficulties prevented the immediate realization of this comprehensive system, but it has since been fully carried out.

During the year 1857–58 an inquiry established the fact that there were "at least eight thousand children in the city between six and sixteen years of age whose names had not been registered either in the public or private schools during the year." Efforts were immediately made to provide school-houses for this large number of children, the board authorizing the president to negotiate a loan of fifty thousand dollars for six years, said loan to be expended exclusively for purchasing sites and erecting buildings thereon. This loan could not be raised in St. Louis, but was placed in Philadelphia at an annual interest charge of ten per cent. Messrs. Bailey, Barlow, Fahrenkamp, Green, Leavy, Leonard, Hodgman, Meyer, O'Neil, Robbins, Robinson, and Divoll were appointed a special committee to examine and report (1) where school-houses should be erected; (2) the estimated cost of each; (3) the number of seats it should contain; (4) the annual expense of carrying on the same. This committee on March 8, 1859, reported in favor of building eight school-houses, which were subsequently named *Washington*, *Everett*, *Howard*, *Charless*, *Chouteau*, *Stoddard*, *Hamilton*, and *Jackson*.

EVENING SCHOOLS.—Prior to 1859 the evening schools were conducted under the auspices of Washington University. They were held in the public school buildings, and the expenses of their management were equally borne by the Washington University and the Board of Public Schools. In that year they were taken under the exclusive control of the school board. These schools, which now constitute an important feature of the educational system of St. Louis, originated with Ralph Sellew, who in 1853, after advising with others, offered to guarantee the money needed for the establishment of night schools for the benefit of the working boys of the city. The experiment was heartily seconded by the authorities of Washington University, who furnished facilities for instruction. The practical working of the project greatly exceeded expectations, for while an attendance of about thirty was anticipated and planned for, no less than three hundred young men presented themselves. So great was the interest excited by this venture, and such was the demand for more schools of the sort, that in a year or two the board of education was constrained to organize the system of night-schools which have been in vogue until the present time, and which have proved of inestimable benefit in affording a large number of persons the education which otherwise would have been denied them. The university gladly relinquished the night school to the board of education, and proceeded with the development of a scheme of mechanical education which culminated in the establishment of the existing Manual Training School. The progress of the latter has been watched by Mr. Sellew with the utmost interest, and he has demonstrated his sympathy with the movement by continuous contributions, aggregating a large sum.

Ralph Sellew was born in Connecticut, and prior to 1846 was engaged with his brothers in the metal trade in Cincinnati. In that year he removed to St. Louis to establish a branch house, and in 1849 became sole proprietor. Only about fifteen thousand dollars capital was at first invested, and the first year's sales amounted to only about thirty thousand dollars, but the growth of the business was rapid and steady, and the yearly sales now aggregate not far from two million dollars. In 1866, Mr. Sellew, feeling the need of assistance in managing so large a business, admitted two younger men as partners, and the firm has since been known as R. Sellew & Co. The house deals in metals and manufacturers' supplies, and occupies a large four-story building of its own, with basement, at 805 North Main Street. Its splendid business, which was woven out of the active and enterprising brain of its founder, has hardly any rival in St. Louis, and in its distinctive line is representative of the growth of St. Louis, and typical of her commercial spirit.

Mr. Sellew has always exhibited a warm affection for the city of his adoption, and it would be hard to select any one of her business men who has taken a deeper interest in every judicious scheme to advance her prosperity. The Vulcan Steel Company (now the St. Louis Ore and Steel Company) and the Harrison Wire Company are among the important enterprises with which he has been closely identified. For twenty-one years he has been a director in the Mechanics' Bank, in whose prosperity he has taken great pride, and has rendered the management invaluable service as a counselor of ripe experience and accurate judgment.

Mr. Sellew is a gentleman of retiring habits, and is seldom heard of outside of his chosen calling. He is known to not a few, however, as a person of warm sympathies for the unfortunate, and his name will always be associated with one of the most important features of the educational system of St. Louis. Himself once an apprentice and a journeyman, and having been for many years an employer, he comprehends perfectly the disadvantages under which most mechanics labor, and sympathizes intensely with their condition. Being especially interested in the boys in the shops and factories, who, compelled to labor for a living, were growing up without educational advantages and restraints, it seemed to him a duty to do something for them, and he devoted much of his time and money to the establishment of night schools, as stated above. Mr. Sellew has often been heard to express the regret that in his boyhood he was deprived of educational advantages such as are afforded by these schools and the Manual Training School.

The same large-hearted philanthropy has distinguished Mr. Sellew at every point in his career, but our limited space forbids more than a reference to his numberless charities, which have been bestowed with a graceful modesty which has characterized all that he has ever done. A self-made man, he cherishes a warm and ready sympathy with his young colleagues in business, and in his quiet way has extended practical encouragement to many beginners. He abhors dissimulation and hypocrisy, but those who gain his confidence may count upon the friendship of one of the most estimable citizens that St. Louis has ever possessed.

The following table of comparative statistics will show the growth and value of the schools:

Years.	No. Schools.	No. of Teachers.	No. of Pupils Enrolled.			Average No. Belonging.	Average No. Attending.	Per Cent. of Attendance.	Average No. Belonging to each Teacher.	Entire Cost of Evening Schools.	Average Cost per Pupil.	Average Age

KINDERGARTEN SCHOOLS.—The school age under the Constitution of Missouri is from six to twenty years. In his report for 1870–71 the superintendent called attention to the fact that "in certain sections of the city where influences are corrupting to the children, they being obliged to play on the street, it is decidedly better to have them in school at an early age, and to so far modify the tasks imposed upon them as to prevent overstraining their delicate organism. The Kindergarten culture for the young," he continued, "is justly receiving much attention from educators everywhere. To it we must look for valuable hints on the method of conducting our instruction in the lowest primary grades." The superintendent accordingly recommended the establishment of an experimental Kindergarten, but the project

no further than the experiment at the Everett Primary School. In November, 1871, Col. Rombauer introduced into the board a resolution appointing a committee to prepare a report on "play-schools." This committee, consisting of Robert J. Rombauer, W. D'Oench, and Thomas Richeson, reported March 12, 1872, recommending,—

"1. That one thousand dollars are hereby appropriated for the institution of a play-school, provided private citizens furnish a similar amount for the same purpose.

"2. That the institution and the funds created as above shall be under the control of the president, superintendent, and chairman of the teachers' committee of the board.

"3. That the object of that school shall be the same as expressed in this report.

"4. That admission to said play-school shall be free.

"5. That the citizens contributing to the establishment of the play-school may select its locality and elect an advisory committee for its management.

"6. That the superintendent of the public schools shall report from time to time upon its condition and progress."

This report was laid over. The subject was again favorably mentioned in the report of the superintendent of 1871–72, and again in his report of 1872–73. The offer of Miss Blow to undertake gratuitously the instruction of one teacher appointed by the board and to supervise and manage a Kindergarten, provided the board would furnish the rooms and a salaried teacher, was accepted; and in the report of the teachers' committee, Aug. 26, 1873, it was recommended,—

"That room No. 4 of the Des Peres School be devoted for the present year to the purpose of ascertaining, by a faithful experiment, what valuable features the Kindergarten may have that can be utilized in our primary schools; and for this purpose, that Miss Mary A. Timberlake be assigned to this room, with the rank of first assistant; and that Miss Susie E. Blow having proffered her services gratuitously, the same be accepted, and the school be placed under her control and supervision."

The Kindergarten reported in 1880–81, 178 paid and 53 unpaid teachers, a total of 231, with 8635 scholars.

School for Deaf Mutes.—A communication from Samuel Brant, Jacob S. Merrill, and others was presented to the school board Oct. 9, 1878, praying the establishment of a day-school for deaf mutes in the central portion of the city. This communication was referred to the teachers' committee, and at the meeting of November 12th that committee reported in favor of "the establishment of a school for the instruction of deaf mutes in one room in a centrally located school building, and that one teacher be employed." This report was referred to the joint legislative and teachers' committee, which on December 12th asked for further time for consideration. In the mean time a second petition had been presented to the teachers' committee, asking for the use of one room in one of the centrally located school buildings for a deaf mute school, the petitioners agreeing to bear the expenses of the same. This request was granted, and the petitioners were informed that they could have the use of one of the then vacant rooms in the Franklin Branch building (now No. 1), located on Lucas Avenue, between Thirteenth and Fourteenth Streets. On December 2d the school was opened by Delos A. Simpson with eight pupils. On the 8th of April, 1879, the joint legislative and teachers' committee recommended that "one teacher be employed for the remainder of the scholastic year, at a salary not to exceed fifty dollars per month, to instruct deaf mutes," it being at that time the opinion of the committee that this experiment would be "sufficient to determine what the action of the board should be in undertaking this branch of instruction permanently." This recommendation was adopted, and on the 13th of May Delos A. Simpson was appointed instructor of deaf mutes, at a salary of fifty dollars per month. The school was removed in September, 1879, to the old Jefferson building at Ninth and Wash Streets, and, since its establishment, there has been a gradual improvement in the method of instruction and an increased patronage. The number of pupils Dec. 1, 1880, had reached thirty-two. The school has proven of great value to those directly interested, providing suitable instruction for these unfortunate children without removing them from parental care and home influences, both of which are so essential to their future welfare. Two teachers are now employed, Delos A. Simpson and Miss Sylvia Chapin.

Normal School.—The difficulty experienced in procuring suitable teachers for the public schools was found to increase with the growth of the system. The reluctance of persons to engage in teaching compelled the board, as we have seen, to send to the East for teachers. It was in order to obviate this difficulty, as well as to furnish first-class teachers (those trained professionally for the work), that the board determined to establish the Normal School, which went into operation in October, 1857,[1] under the principalship of

[1] The *Republican* of Oct. 21, 1857, says, "The St. Louis Normal School, which is to go into operation on the 28th inst., has been established by the board of school directors to meet a pressing want,—that of a sufficient number of well-qualified teachers for the public schools. It is the first institution of the kind west of the Mississippi. As stated above, and in an advertisement in another column of this paper, the St. Louis Normal School will open on the 28th of this month, and the examination of candidates will take place on Monday, the 26th, at the High School building. The board have secured Mr. Richard Edwards

Richard Edwards, afterwards president of the Illinois State Normal University. From its organization to the present time the school has fully realized the expectations of its friends, and has supplied a desideratum which could be filled in no other way. It has furnished a large majority of the teachers employed in the public schools, and these teachers have proved themselves the equals in every respect of any others in the employ of the board.

An important feature of the work of the Normal School is the imparting of professional information, which is defined by the report of F. Louis Soldan, the principal, as "a knowledge of child-nature." "He" (the teacher), adds Mr. Soldan, "is not simply a teacher, but also the person who is to watch over the health of the children during the time they are under his care, and to teach them how to take care of themselves."

The following table shows the number of applicants for admission for each year, the number admitted, the number of pupils in each class, their ages, and the number of graduates:

Years.	Number of Applicants.	Number Admitted.	Whole Number enrolled during the Year.	Ages at the Close of Year.								No. of Graduates.

The O'Fallon Polytechnic Institute.—In its original plan the Washington University contemplated the organization of a practical or industrial department, looking to the education of members of the industrial classes with reference to fitting them for their pursuits in life. The object was to acquaint them with the principles and rules of science, so as to enable them to work to the best advantage in their chosen line of labor. With a view to the establishment of such an institution, several gentlemen who were engaged in mechanical and manufacturing enterprises began in 1855 the organization of a library and reading-room. In this connection, as well as every other movement designed to build up the institute, the name of Hon. John How deserves special mention. With him were associated other public spirited citizens, among whom were Giles F. Filley, Gerard B. Allen, and Capt. N. J. Eaton. The four—Messrs. How, Filley, Allen, and Eaton—were appointed by the university authorities the first managers, and the rooms were opened for use in the summer of 1855. The library started with a respectable number of volumes, the gifts of individuals, which grew to about seven thousand in 1867. The library and reading-rooms were soon supplemented by free evening schools, which were opened to apprentices, journeymen clerks, and other young men who could not attend school during the day. The schools, as previously stated, have been kept up with

as principal. Mr. Edwards was for several years associated with Mr. Tallinghast in the management and instruction of the State Normal School at Bridgewater, Mass. Mr. Edwards was afterwards for some time engaged as assistant to the secretary of the Massachusetts Board of Education."

great spirit, and their opportunities embraced by a large number of the class of persons for whose benefit they are intended. Many of the pupils have been adults, some of them over thirty years of age, who here acquired the first rudiments of learning. Seventy per cent. originally were apprentices and journeyman mechanics. In these schools, besides reading, writing, and arithmetic, are taught grammar, geometry, algebra, mensuration, physical geography, and industrial drawing.

The constitution of the institute declares its object to be the establishment of a library, of reading- and conversation-rooms, cabinet of models, etc., and a school of design, together with class-, exhibition-, and lecture-rooms.

At the first meeting of the board of managers, in 1855, Hon. John How was chosen president; G. B. Allen, vice-president; A. M. Anderson, librarian and secretary, and John Cavender, treasurer.

The institution has received from time to time a number of liberal gifts from public-spirited citizens of St. Louis, conspicuous among whom was Col. John O'Fallon, who presented two blocks of land "adjoining the new reservoir" containing nearly three thousand square feet, with an average depth of one hundred and fifty feet, the only condition being that the land should not be sold within ten years from the date of the deed. There was also a money endowment paid in or legally secured of forty-five thousand dollars, of which, however, fifteen thousand dollars was applicable only to the expenses of instruction, and not of building. The Benton Public School was granted by the public school directors for the use of the evening school, with lights and fire, free of charge.

In 1867 the institute removed from its original location to its new building, on the southwest corner of Seventh and Chestnut Streets. The lot covered by the building has a front on Chestnut Street of one hundred and thirty-five feet, with a depth on Seventh Street of one hundred and nine feet. The building is four stories in height, crowned by a Mansard roof, tastefully constructed and admirably suited to the architectural character of the edifice. The entire height from the sidewalk to the vertex of the roof is one hundred and twenty-two feet.

The material used in the construction of the principal façades is a species of magnesian limestone, known as "Nipper's stone," being of a cream color, somewhat unlike the Parisian stone, but more resembling travertine, used in the construction of the church of St. Peter's at Rome. The walls of the building are generally massive, and constructed in the most solid and imperishable manner, hard brick, iron, and stone being the sole constituents. The building was begun in 1858, and completed at a cost of three hundred and fifty thousand dollars. The architects and superintendents of the work were Messrs. Walsh & Smith.

The building was formally opened on June 12, 1867, and at the inauguration ceremonies addresses were made by Hon. John How, Rev. Dr. Post, Dr. Charles A. Pope, Chancellor Chauvent, and Rev. W. G. Eliot, D.D. In his address Mr. How paid the following well-deserved tribute to Col. John O'Fallon:

"The name given to our institute, that of Col. John O'Fallon, was and is so well known to our community that it hardly requires an explanation. Many who hear me claimed him as their friend; his liberal views, his willingness to aid in all endeavors to advance the interests of our loved city, would be sufficient to entitle him to any honor we could bestow; but, in addition to this, he was an early sympathizer in our movement, and though not the largest contributor to our funds, yet he was one of the largest. To him also the manufacturing interest of our city is largely indebted; some who hear me and many who will read this will remember that where a friend was needed to advance their plans, his purse was always open and his name indorsed them. It is not considered wise to indorse paper, and I shall not here justify the practice; still, this I may say, on the authority of Col. O'Fallon, that it is pleasant to look around you, as you descend into the vale of years, and see the good done, business created, families comfortable, city prospering, even if it has been brought about by the want of common prudence in indorsing. True, as Col. O'Fallon said, he had been often disappointed in those he had aided, yet, on the whole, he was satisfied with the result. So much for the name—O'Fallon."

In 1868 the Washington University made a proposition to the board of public schools to transfer the Polytechnic Institute building, together with the ground, the library, and a bequest of one hundred thousand dollars made by the late Henry Ames to the library of the Polytechnic Institute, to the board of public schools for two hundred and eighty thousand dollars. The board appointed Messrs. Coste, Meyer, Thompson, Duros, Peacock, and the superintendent, Mr. Harris, to consider the proposition. Upon the report of this committee, the board of public schools adopted the following resolution:

"*Resolved*, That the proposition of the Washington University for the sale of the O'Fallon Polytechnic Institute be and the same is hereby accepted, provided the same be modified in the following two particulars:

"First. By striking out the following sentence, 'The university will also agree to pay over to the public school board a sum

of money equal to that received from Henry Ames' estate so soon as the same shall be received thereupon, said bequest being one hundred thousand dollars,' and by inserting instead thereof the following sentence, viz.: 'The university also agrees to pay to the board of the St. Louis public schools the sum of one hundred thousand dollars on the first day of December, 1872; provided, however, that if by reason of the provisions of the thirteenth article of the last will of the late Mr. Henry Ames and the order of payment therein established, and for no other reason, the legacy to the Washington University named in said will shall be reduced in amount, then and in such case the sum of money to be paid by the university to the public schools shall be reduced to the same extent.'

"Secondly. The deferred payment of thirty thousand dollars is to be met in two years, instead of in eighteen months, and all deferred payments to be made to Washington University shall bear six per cent. interest per annum."

These modifications of the proposition were accepted by Washington University, and the transfer was effected. On Feb. 11, 1869, the building was publicly dedicated to school purposes with appropriate exercises. It now bears the fitting appellation of the Public School Polytechnic Building, and forms a striking and appropriate centre of the public school system of St. Louis.

In it are now located the public school library, the normal school, and the offices of the school board and superintendent. The Missouri Historical Society also holds its meetings in the same building.

St. Louis University.—Soon after his arrival in St. Louis (Jan. 5, 1818), Bishop Dubourg made strenuous efforts to procure the establishment of a college under Catholic auspices. With this end in view the bishop, in 1818, rented the Alvarez residence, a one-story stone building on the north side of Market Street, between Second and Third Streets, for a school, and in 1820 a two-story building of brick was erected for a college south of the old log church.[1] Rev. Father Niel, a French priest, was the president of the institution, and among the pupils were a few boarders. Bishop DeNecker, of New Orleans, and Fathers Saulnier and Dahmen, studied theology at the college, and Father Dahmen was the first priest ordained in St. Louis by Bishop Dubourg. Elihu H. Shepard was at one time Professor of Languages in the institution, which was attached to the cathedral, and conducted by five secular priests. Owing, however, to the fact that the pastoral duties of the priests were so onerous that they were unable to give sufficient time and attention to their classes, the enterprise did not prove successful, and in 1826 the college was discontinued. Two years later another effort was made to put the project of Bishop Dubourg into execution, and the foundation of the future St. Louis University was laid.

Father Van Quickenborne, superior of the Jesuit mission at Florissant, undertook the task of organizing the college, and issued the preliminary announcements to the public in September, 1828.[2] Accompanied by an assistant, Father Timmermans, and seven Jesuit novices, Father Van Quickenborne had settled at Florissant in June, 1823, with the view of teaching and civilizing the Indians; but becoming satisfied that he and his companions could accomplish more valuable results by the establishment of a school of higher education in St. Louis, he decided to remove to the city. Bishop Rosatti extended all possible encouragement to the enterprise, and John Mullanphy offered to present a desirable lot for the college. His proposition, however, was coupled with the condition that the college should support twenty orphan pupils; and Father Van Quickenborne, unwilling to accept the responsibility of so grave a charge and possibly onerous tax upon the college in the future, declined

[1] Another statement is that the building stood on the site of the old log church.

[2] In the *Republican* of Sept. 2, 1828, the following notice appears:

"College in St. Louis, Mo. Having been for several years earnestly solicited by the Right Rev. Dr. Dubourg, late bishop of this diocese, and the Right Rev. Dr. Rosatti, his successor, and his other respectable friends of all denominations . . . a college in this city, the Rev. Mr. Charles F. Van Quickenborne deems it his duty to inform the public at large that he will soon have it in his power to comply with the repeated entreaties that were made to him."

This was supplemented on the 23d of the same month by the following announcement:

"College at St. Louis, Mo. In a former publication I have acquainted the public with my desire of opening soon a college in this city. The expression of this desire, I have been assured, has met with the satisfaction and approbation of friends. The branches of literature that will be taught in the institution may be reduced to the following general heads: the Greek, Latin, English, and French languages, natural philosophy, mathematics, geography, and the use of the globes, to which will be added reading, writing, book-keeping, etc., and should it be desired by any parent lessons in music and drawing will be given. The education of youth being essentially linked with the study of religion, which is to form their hearts to virtue, while their minds are polished by arts and sciences, the learning of profane history will be interwoven with the study of sacred and divine objects. As to religious opinions, however, no undue influence shall be exercised on the mind of any pupil. A certain number of boarders will be received; these will have to pay a pension, and conform to the rules and conditions that will be specified in the prospectus. But as the primary view of the institution is to extend the benefit of a polite education as far as possible, day scholars will have a free access to the classes, and none shall be excluded but upon the reasonable grounds of a blemished character. The spot which has been pitched upon for the described establishment is known by the name of college lot, situate in Common addition to St. Louis."

Mr. Mullanphy's offer. Bishop Rosatti then made over to the Jesuit Fathers the lot on which the university now stands, on Ninth Street and Christy Avenue, which had been given by Jeremiah Conner, deceased, for a college in St. Louis. The remaining portion of the square west of Ninth Street, bounded by Washington Avenue and Christy Avenue, together with two-thirds of the next square immediately west, between Tenth and Eleventh Streets, was subsequently purchased for the college, the entire premises having a front on Washington Avenue of four hundred and seventy-five feet.[1]

At this time (1828) the Jesuit mission of Missouri comprised only eight priests, all of whom were busily employed at Florissant and elsewhere; but Father Van Quickenborne was a man of exceptional energy and tact, and through his strenuous exertions the college was speedily organized. St. Louis then contained a population of only about six thousand people, but subscriptions were soon obtained among them amounting to five thousand dollars in aid of the proposed institution. Subsequently the Jesuit Fathers were assisted in the erection of their second and third buildings by the Association for the Propagation of the Faith, then recently established at Lyons, France, and by friends in Belgium. The construction of the foundation for the first building was begun in the autumn of 1828, the structure to be fifty feet in length by forty feet in width and three stories high, besides a basement and attic. "It fronted south towards the public road leading out of the town to St. Charles. The site of the college was then surrounded by weedy ponds, groves of sorry oak, and suburban farms."[2]

The building was completed sufficiently for the use of the college on Monday, Nov. 2, 1829, and classes were organized on that day. There were then "about fifteen white boys, sons of respectable parents in St. Louis and some from other localities," at the Florissant Seminary, and these were transferred to the new St. Louis College. The first name recorded (June 12, 1829) was that of "Charles P. Chouteau, aged eight years." The register of the Florissant Seminary also bears the names of Francis Cabanné, Julius Cabanné, De Thil Cabanné, John Shannon, William Boilvin, Bryan Mullanphy, Francis Bosseron, Julius Clark, Edward Christy, Alexander La Force Papin, Edmond Paul, Edward Chouteau, Thomas Forsyth, and Paul F. Du Bouffay.

Rev. P. J. Verhægen was chosen to be the first "president of the St. Louis College," and among the professors were the Rev. Father De Smet, so well known throughout the literary world for his letters descriptive of his journeys to the Rocky Mountains, and his labors as a missionary among the Indians, and Rev. J. A. Elet, Brother James Yates, and Rev. Peter Walsh. Thomas B. Taylor, John Servary, Benjamin Eaton, Bartholomew McGowan, and Jeremiah Langton were employed in the early years of the college as teachers of mathematics and English. Ten boarders and thirty externs, as day scholars were then termed, entered on the first day, and in a short time the boarders had increased to thirty and the day scholars to one hundred and twenty, making a total of one hundred and fifty. There was but little variation in the number of scholars until the year 1831, when an additional building, forty by forty feet, was begun at the east end of the main building. The structure was completed in 1832, and was ready for occupancy at the beginning of the summer.

On the 24th of October, 1831, Rev. James Van de Velde arrived in St. Louis, preceded by Father Van Lommel and Mr. Van Sweevelt, all three of whom had been sent by the Jesuits of Maryland to act as professors in St. Louis College. Early in 1832, Father Van de Velde, who was an eloquent preacher and an accomplished scholar, visited Louisiana and Mississippi with the view of making the college better known to the people of those States, and succeeded so well that before the close of the session twenty-one additional boarders from Louisiana were registered on the college books.[3] At the beginning of the next session, Sept. 7, 1832, the number of boarders had increased to such an extent that the faculty became convinced that the permanent success of the institution was practically assured, and determined to apply to the Legislature for a charter, which was granted and signed by the Governor of the State on Dec. 28, 1832. The petition for the charter was signed by P. J. Verhægen, Theodore De Theux, P. W. Walsh, C. F. Van Quickenborne, and James Van de Velde, who constituted the first corporation. The charter provided that the institution should be known as the St. Louis University, and that the trustees named in the act should have power to fill vacancies in the board, to

[1] "Historical Sketch of the St. Louis University; the Celebration of its Fiftieth Anniversary, or Golden Jubilee, on June 9, 1879," by Walter H. Hill, S.J., to whom the author of this work is greatly indebted for valuable material in the preparation of the accompanying sketch of St. Louis University.

[2] Historical Sketch of the St. Louis University, p. 39.

[3] Peter Poursine, of New Orleans, was the first student from Louisiana, arriving Feb. 27, 1830, at which date, according to his own statement, "the college building was not yet finished, the students having to ascend to the different stories by means of ladders."

control and manage the property and affairs of the University, to award literary degrees, "and generally to have and enjoy all the powers, rights, and privileges usually exercised by literary institutions of the same rank."

In 1851 an act amendatory of the original charter was passed by the Legislature, empowering the university to hold, purchase, and convey any estate, real, personal, or mixed, for the use of the corporation for educational purposes, the General Assembly reserving the right to repeal or modify the act, and that of which it was amendatory, "whenever it believes said St. Louis University has failed to accomplish the beneficent purposes of its institution."[1]

The regular faculty was organized under the charter, with Rev. P. J. Verhægen as rector of the university.

The Asiatic cholera visited St. Louis in 1832, and again in 1833, and during its greatest prevalence the students were removed to the novitiate near Florissant. Notwithstanding the drawback which was caused by this calamity, and the destruction wrought by a tornado which swept over St. Louis during the period of the epidemic, the attendance of scholars became so large that the building completed in 1832 did not afford sufficient room for the boarders. Accordingly during that year the western wing was begun, and was completed in 1834.

The Philalethic Literary and Debating Society was organized in 1832.

In January, 1834, there were thirty-four Jesuits in the Missouri station, of whom twelve were priests, six scholastics, and six lay brothers. Of these ten were stationed at the St. Louis University. There were at that time fifteen professors and tutors engaged at the university, eight of whom were members of the Jesuit society and seven externs receiving compensation. The British government in 1834 presented to the library of the university nearly one hundred large folio volumes, containing the ancient statutes of the realm and various State papers, the famous Domesday Book, with its index, etc., all reprinted from the original by order of the government. Printed at the beginning of each volume is the following injunction: "This book is to be perpetually preserved in the Library of St. Louis University. C. P. Cooper, Sec. Com. Pub. Rec., March, 1834."

A visit to the south of the Rev. J. A. Elet in 1834 resulted in his returning in April of that year with thirty-three students, who were speedily followed by seventeen others, making a total increase of fifty students, nearly all of whom were from Louisiana, so that at the beginning of May there were at the university one hundred and forty boarders. At the annual commencement, July 31, 1834, the first graduates received their diplomas, and the degree of Bachelor of Arts was conferred on Paul Auguste Frémon Du Bouffay and Peter A. Walsh, and that of Master of Arts on John Servary, all three of whom were citizens of St. Louis. Messrs. M. Pin and J. B. Emig were added to the staff of professors in 1834, during which year the erection of a new building on Washington Avenue was commenced. The structure was completed by the summer of 1835, the first story being used as a chapel until the completion of St. Francis Xavier's Church, in 1843. On the 1st of September, 1835, the faculty petitioned the United States government, through the Hon. Thomas H. Benton, for a grant of land towards establishing the institution on a more solid and permanent basis. Their request was not acceded to, and indeed the university never received any public aid, nor an endowment from any source, but has been entirely dependent for its support on the fees of its students.

A medical department was established in connection with the university on the 5th of October, 1836, consisting of Drs. C. J. Carpenter, J. Johnson, William Beaumont, E. H. McCabe, H. Lane, and H. King, but the design was not perfected until 1842, when its first course of lectures was inaugurated in a building erected for its use on Washington Avenue, west of Tenth Street.

The Rev. P. J. Verhægen was made superior of the Jesuit mission in Missouri March 24, 1836, and removing from Florissant made the university his future home, which arrangement was continued after the mission was erected first into a vice-province and then into a province, and is still in force at the present time. The appointment of the Rev. M. Verhægen to the superiorship of the mission created a vacancy in the office of president or rector of the university, which was filled by the Rev. J. A. Elet, who became president at the opening of the new session, in September, 1836.

A new site for the university outside of St. Louis was determined upon at the meeting of the trustees May 3, 1836, and the Revs. P. J. Verhægen, J. A. Elet, and T. De Theux were appointed a committee to select it. The locality chosen for this purpose was a farm containing three hundred acres, situated on the Bellefontaine road, three and a half miles from St. Louis, which a short time before had been pur-

[1] The charter of the St. Louis University is to be found in the "Laws of Missouri from 1824 to 1836," vol. ii. page 298, and in Father Hill's "Historical Sketch of the St. Louis University," pp. 44, 45, 46, and 47.

chased by the university. The plan of the proposed building was prepared, its erection contracted for, and the foundations dug (which are still a conspicuous point on "College Hill," in North St. Louis); but the contractor dying, its construction was suspended, and all further work was postponed to a future year. Subsequently the project was abandoned. The purchase of the land, however, proved a fortunate investment, and the property becoming extremely valuable in after-years, the university was enabled to make costly improvements on its premises in the city, and to purchase valuable additions to its library, philosophical apparatus, and museum. In 1857–58 buildings were erected on a part of the farm, and on Sept. 11, 1858, a scholasticate or theological department was opened, with Rev. F. X. Wippern as superior, which flourished just two years, when it was transferred to Boston. More than half of the farm was sold prior to 1854. In 1855 a portion of the remainder was divided into lots and sold, the profits accruing from these sales serving materially to aid the university, and add to its collections of books, apparatus, etc. On May 25, 1867, a piece of property was bought for fifty-two thousand six hundred dollars, its dimensions being four hundred feet on Grand Avenue by three hundred and sixty feet on Lindell Avenue. In 1869 a farm of three hundred and seventy-six acres was purchased for seventy-six thousand dollars at "College View," nine miles from the city, on the St. Louis, Kansas City and Northern Railroad, and seven thousand five hundred dollars was expended in perfecting plans for the new college; but the enterprise was abandoned in consequence of a change in the railroad line which took it two miles away from the farm.

The Rev. George A. Carrell was a member of the faculty at the opening of the session in September, 1836, and, together with the Rev. James Van de Velde, became pre-eminent among the professors of the institution for superiority of literary attainments. The trustees of the university, on May 6, 1837, appointed a committee, with Rev. James Van de Velde chairman, to take time and considerately "to specify what studies and acquirements shall henceforth be deemed necessary for finishing the classical course and being found qualified for taking the degree of A.B. in the St. Louis University." The scope of the inquiry was afterwards enlarged so as to embrace the proper qualifications that should be required for the degree of A.M. The report as adopted by the board of trustees on July 28, 1838, was as follows:

"*First*, that the classical course shall comprehend a competent knowledge of the Greek, Latin, and English languages; of geography, use of globes, ancient and modern history, logic and principles of moral philosophy, including ethics and metaphysics; of rhetoric and mathematics, including arithmetic, algebra, plane and solid geometry, trigonometry, surveying, mensuration, conic sections, and the principles of natural philosophy." It was also further provided that "as to graduates of other colleges or universities that shall apply for the degree of A.M., it shall be required that they produce the diploma of A.B. and testimonials that after their graduation they have devoted at least two years to some literary pursuit."

In 1832 the Rev. P. J. De Smet was compelled by ill health to suspend his labors in St. Louis and make a trip to Europe. While abroad he procured many valuable instruments for the department of physics, and also many volumes for the library, and sent them as a donation to the university, for which he received the "special thanks" of the board and faculty in appropriate resolutions adopted March 7, 1835. The donation also included "a collection of minerals, classified according to the system of Dr. Hauy." They were brought over, together with the instruments, by M. Oakley and P. Verheyden. The "Philharmonic Society" was established in 1838.

More than half of the active students recorded in 1837 and 1838 were from Louisiana, and during the ten years beginning with 1829 twelve persons were graduated from the university.

The fifth building of the university consisted of a suite of class-rooms on Christy Avenue, erected in 1839. It was one and a half stories in height, the attic being used temporarily as a dormitory. The sixth was St. Xavier's Church, erected in 1840–43; the seventh, built for the Medical Department, on Washington Avenue, west of Tenth Street, and now used as a dormitory; the eighth, a three-story brick structure, built in 1846, on Christy Avenue, the first story of which was used for wardrobe and infirmary purposes, the second for the parochial school, and the third as a dormitory; the ninth, a Sodality Hall, at the southeast corner of Ninth Street and Christy Avenue, completed in 1855, and containing a hall, library and reading-rooms, etc.; and the tenth and principal structure, erected in 1853–55, on the corner of Washington Avenue and Ninth Street, as the east wing of a building intended to extend from Ninth Street to a point one hundred and thirty feet west of Tenth Street. The original plan, however, was abandoned, and the structure as completed fronts sixty feet on Ninth Street, with a depth of one hundred and thirty feet on Washington Avenue. It is divided into three stories, the first of which contains the

students' chapel and study hall, the second the library and museum, and the third a public exhibition hall (one of the finest in the West), one hundred and thirteen by fifty-five feet, and with a seating capacity of over twelve hundred. The eleventh and last building of the series closed up the remaining gap of eighty feet on Ninth Street, and made the front continuous; it is forty feet in depth, four stories high, and contains class-rooms, the Philalethic Hall in the third story, and dormitories in the fourth.

The removal of the Rev. J. A. Elet to Cincinnati in 1840 [1] created a vacancy in the presidency of the university, to which the Rev. James Van de Velde succeeded, who remained in office until appointed vice-provincial of the Jesuit society in Missouri in 1843.[2]

The financial crisis of 1842 compelled the board of trustees to reduce the board and tuition fee to one hundred and thirty dollars per session of ten months, but notwithstanding "hard times," the classes were all full, and the institution lost none of its prosperity. The medical department of the university, which was organized Oct. 5, 1836, did not begin its lectures until March 28, 1842, but subsequently, through the efforts of Drs. M. L. Linton and Charles Pope, it became very successful. It existed under a charter of its own, and removed to Seventh and Myrtle Streets in 1849, when the building it had occupied was purchased by the university for a dormitory. The medical faculty for the session of 1842–43 was composed of Drs. Daniel Brainard, Joseph W. Hall, H. Augustus Prout, James V. Prather, Moses L. Linton, Joseph J. Norwood, and Alvin Litton. The law department began its first session in October, 1843, but notwithstanding the efforts of the Hon. Richard A. Buckner to sustain it, it was soon dissolved.[3]

[1] The *Republican* of Oct. 9, 1840, says,—

"Yesterday the Right Rev. Father J. A. Elet, late president of St. Louis University, bid farewell to the institution, and left in the steamer 'Messenger' for Cincinnati, Ohio, whither he goes to establish another school. We understand that Bishop Purcell in that city has placed his large property, probably about one hundred and twenty thousand dollars, at the disposition of the Jesuit society, encumbered with only one condition, which is that it shall be forever applied to the purposes of education and the advancement and promotion of science. The property in part embraces what is known in Cincinnati as the Athenæum, a site sufficient for a large and well-appointed institution, and eligibly situated in the city, and is hereafter to be known as the St. Xavier College. The selection of Father Elet is of itself a guarantee that the institution must flourish, and if he is spared as its head, it must become one of the first in reputation in the West."

[2] The St. Louis University Free School was opened in October, 1842, for the benefit of the children in the neighborhood. The school was free for the children of all persons, without distinction as to religious belief. Three gentlemen of the university, says the *Republican* of March 9, 1843, "devote themselves to the duties of this school. About one hundred and twenty scholars have been in attendance since the organisation, and at least one hundred or more have been unavoidably denied admission for the reason hereinafter stated.

"When the school was opened it was rather an experiment, and of somewhat doubtful result, as one of the public schools of the city had been closed from want of pupils or money, and was necessarily opened in a small room, there being no larger at the disposal of the institution. The room in which the school was commenced and is now kept is in fact not large enough to accommodate more than sixty or eighty pupils; nevertheless, the one hundred and twenty have been crowded into it. It was the intention and expectation of the reverend gentlemen connected with the university to have the large basement-room of the new church completed and fitted up for the accommodation of this school, but the erection and completion of the church have absorbed the means of the institution. Sensible of the utility and moral advantages to the community of the continuance of the school and the placing it in an apartment where, instead of one hundred and twenty, at least three hundred pupils can be accommodated, the gentlemen having it in charge have resolved to appeal to the aid and contributions of the community to finish the room in the basement of the new church. Their applications have already been met in a very liberal spirit by several of the most wealthy of the citizens, and we trust that all will, in proportion to their means, contribute something. There is surely no movement of the day which appeals more directly and strongly to the moralist and politician than this. The gentlemen of the institution with a liberality which has no equal in this community, give their time, labor, and assiduous attention to the instruction and education of the youths sent to them; they give it without pecuniary reward, and to the children of parents of all and every sect; they devote their efforts to the mental and moral improvement of their pupils, but without any effort or intention to influence their belief for or against any particular creed. Three of them now devote themselves unremittingly to this labor, and as soon as they can procure a larger room the number of teachers will be increased in proportion to the increase of pupils."

The same paper of Sept. 8, 1845, speaking of this school, says, "Since the erection of the church adjoining the university buildings, the school has been kept in the basement of the church. The number of scholars in attendance since the school was opened in the basement . . . has averaged three hundred and fifty, and at times has been as high as four hundred. There are six teachers constantly engaged in instructing the classes, one of whom devotes his time exclusively to German children. Children of all denominations are admitted, none being excluded on account of religious opinions; neither is there any interference with the religious opinions of the pupils, further than to require a conformity to the rules and observances of the school during school hours. All the various branches of English education are taught, and hundreds are enabled to obtain this important desideratum who, but for this institution, would be compelled to live in ignorance and its attendant vices."

[3] The following notice appeared in the *Republican* of June 15, 1843:

"*Law Department of the St. Louis University.*—In consequence of the applications made by many alumni who wish to devote themselves to the regular study of law under compe-

The Rev. George A. Carrell succeeded the Rev. James Van de Velde as president upon the appointment of the latter, Sept. 17, 1843, vice-provincial of Missouri. As president he was "austere even unto severity,"[1] and there was a marked decline in the number of students during the first two years of the presidency, there being less than eighty for the scholastic year ending in the summer of 1845. In consequence of this decline the Rev. John Gleizal was sent to New Orleans in the early spring of 1846 to canvass the city for students. His visit was rewarded with the fullest success, and a large number of students returned with him. The college soon regained its former prosperity, and the number of scholars was increased by the transfer in 1843 of the scholasticate for the study of theology and philosophy from its location in the country, at what is now known as "College Hill," to the university. That portion of North St. Louis usually called Lowell is built on a part of the farm then belonging to the university. The Rev. John B. Druyts was appointed president at the close of the scholastic year in July, 1847. Father Druyts had been employed either as professor or disciplinarian in the university for twelve years preceding his promotion. His experience then acquired, together with his natural aptitude for such a position, made him one of the most popular and successful presidents that had thus far filled the position. In October, 1848, the medical faculty requested the trustees of the university to have the connection of the medical department with the university dissolved, and this request, though then declined, was repeated Jan. 24, 1849. The reason assigned for this request was "fear of injury to the medical department arising from religious prejudice among the people at large against Catholics and Catholic institutions." The trustees declined to permit the separation. When the "Know-Nothing" excitement arose in 1854 and 1855, it was again decided by the medical department that a separation from the university was expedient, and that it should be henceforth conducted under a distinct charter of its own; and this time, by mutual consent, its connection with the St. Louis University was dissolved.

The Rev. John S. Verdin, at the beginning of the session of 1854–55, succeeded the Rev. J. B. Druyts in the presidency of the university, but did not actually enter upon his duties until Oct. 2, 1854. His term of office lasted until 1859, and during this period the institution made rapid progress. In the autumn of 1855 there was the largest number of boarders at the university within any year of its existence, the number being one hundred and eighty-eight. In November, 1855, the "Student's Library Society" was instituted, with a view of collecting suitable works on branches of polite learning which could be made accessible to all classes on easy conditions. A small fee was required of members for the use of the books. The library was a success from the beginning, and has proved to be a great advantage, especially to the advanced classes.

At the opening of the session of 1858–59 the classical department was separated from the commercial department and assigned to distinct class-rooms, and distinct teachers appointed for it. The course of the former was made to comprise six years, and that of the latter four years.

The Rev. Ferdinand Coosemans succeeded Rev. Father Verdin in the presidency on March 19, 1859. The war between the States from 1861 to 1865 was attended with very serious effects upon the university. Most of the students being from the Southern States, the excitement of the times and their impatience to get to their homes before the movements of armies and military results rendered that impossible caused the suspension of all classes on May 24, 1861; and though the classes were re-

---

fessors, the board and faculty of the St. Louis University have at length taken measures to open a law school on the first Monday of next October.

"In the name of the faculty,

"J. VAN DE VELDE,

"*President.*"

The same paper on March 6, 1845, gives the following particulars of the commencement held at the university in that year:

"The annual commencement of the medical and law departments was held on Monday evening last at the medical hall. The audience was very large, and though the hall is very spacious, numbers who went there were unable even to find a place to stand, and were deprived of the pleasure of witnessing the ceremonies. President Carrell delivered to the graduates a most elegant and polished address. He then conferred the degree of Bachelor of Law upon two young gentlemen, and the degree of Doctor of Medicine upon fourteen graduates, and we say with truth say, never have we beheld a more intelligent and gentlemanly-looking class. The valedictory, by Dr. Pope, of the medical students more than fulfilled the high expectations of his numerous friends.

"The following are the names of the gentlemen admitted to the degree of Doctor of Medicine:

"William Browne, of Kentucky; H. W. Darnall, of Missouri; R. R. Davis, of Illinois; William B. Dews, of Wisconsin Territory; G. W. Hereford, of Missouri; B. Johnson, of Illinois; P. F. Knott, of Kentucky; B. F. Russell, of Indiana; R. R. Taylor, of Missouri; W. S. G. Walker, of Kentucky; J. W. Whittington, of Missouri; R. R. Wickersham, of Mississippi; C. F. Wilson, of Kentucky; Thomas L. Young, of Missouri.

"The honorary degree of Doctor of Medicine was conferred on Richard E. Lacy, of Savannah, Mo., and J. Lawrence Page, of Weston, Mo."

[1] Father Hill's Historical Sketch of St. Louis University, p. 65.

sumed in the following September, it was with a greatly reduced number of students. Rev. Thomas O'Neil succeeded Rev. Ferdinand Coosemans in the presidency on the 16th of July, 1862, and the session of 1862–63 began with an increased number of students, notwithstanding the evils and disasters incident to the existing war, which caused the institution the loss of all its Southern patronage. At the annual commencement, July 2, 1863, three students received the degree of A.B., four received honorary certificates, and the total number of students registered for the scholastic year was two hundred and ninety. In 1865, the "Drake Constitution" imposed a heavy burden of taxes on the churches, schools, hospitals, orphan asylums, and cemeteries of Catholics. The tax paid by the university for one year reached ten thousand dollars. The Legislature subsequently empowered the city to remit general municipal taxes on all such property, and the university was relieved of a burden under which it must have sunk. The Drake Constitution was finally abolished by popular vote on the 30th of October, 1875. Immediately after the war the university recovered its former prosperity, and the number of students during the scholastic year of 1865–66 was three hundred and seventy-six. The register for the scholastic year 1867–68 contained the names of three hundred and forty-six students.

The Rev. Francis H. Stuntebeck succeeded the Rev. Thomas O'Neil as president on the 2d of July, 1868. On the 8th of August, 1871, the Rev. Joseph Zealand was installed as president, and the register for that year shows that four hundred and two students attended the university. The Rev. L. Bushart succeeded Rev. Joseph Zealand as president on Nov. 22, 1874, and resigned on Aug. 2, 1877, when the Rev. Joseph E. Keller was installed. Father Keller was succeeded by Rev. R. J. Meyer, S.J. The scientific course was begun at the opening of the session of 1877–78.

The 6th of October, 1871, was the fiftieth anniversary of the entrance into the Jesuit society of the six young missionaries who accompanied the Rev. Charles Van Quickenborne to Missouri, viz., P. J. Verhægen, J. F. Van Assche, P. J. De Smet, J. A. Elet, J. B. Smedts, and F. L. Verreydt. The faculty of the university determined to celebrate the occurrence of their "golden jubilee," and to invite the survivors to meet for that purpose at the university. This tribute to their memory from the university was deemed appropriate, because they, with their novice-master, the Rev. C. Van Quickenborne, had established the institution. The only surviving members were the Rev. P. J. De Smet, then traveling in Europe, the Rev. J. F. Van Assche, and the Rev. F. L. Verreydt. The celebration was held on the 10th of October, and among those present were the Rev. Thomas O'Neil, provincial of Missouri; Rev. Joseph Zealand, president of the university; Rev. F. Coosemans; Rev. L. Bushart, president of St. Xavier College, Cincinnati; Rev. Isidore Boudreaux, Rev. F. H. Stuntebeck, Rev. J. De Blieck, Rev. J. Schultz, Rev. S. Lalumiere, Rev. J. Roes, Rev. P. Tscheider, Rev. D. Niederborn, and Rev. T. Braun.

St. Mark's Academy was organized in 1876, mostly by former students of the university, having for its object "the development of an active Catholic spirit by philosophical, literary, and scientific culture."

In 1879, fifty years after its establishment, the university had eleven buildings, whose combined length was about eight hundred feet, erected at a total cost of two hundred and fifty thousand dollars, though, as previously stated, possessing no endowment or other revenue except what it derived from the fees of students for board and tuition. It had also a select and valuable library of twenty-five thousand volumes, and a collection of instruments for all classes of physics and chemistry, including many curious and costly objects.

On Tuesday, June 24, 1879, was held another "golden jubilee," signalizing the fiftieth year since the establishment of St. Louis University. High mass was celebrated at St. Francis Xavier's Church, Bishop P. J. Ryan officiating, with Rev. Charles Ziegler as deacon, Rev. Michael McLoughlin as sub-deacon, and Rev. H. A. Schapman as master of ceremonies. The sermon was delivered by Right Rev. J. L. Spalding, of Peoria, Ill. At two o'clock in the afternoon the alumni dinner was held, Bishop Ryan presiding, with Bishop Spalding, of Peoria, on his right, and Father Damen on his left. In the evening a literary entertainment was given at the large hall of the university, next to the corner of Ninth Street and Washington Avenue. The exercises included poems by John C. Burke and Walter J. Blakely, and addresses by Dr. J. K. Bauduy and Governor Reynolds.

In 1881–82 the university had a faculty of nineteen professors and two hundred and ninety-one students. The total number of students registered since the beginning in 1829 is six thousand two hundred and fifty-three. It is related as a remarkable circumstance in the history of the university that during none of the three visitations of cholera in St. Louis (1832–33, 1849, and 1866) was one of the inmates of this institution attacked by the disease. The university has grown up with the city itself, and

one of its most useful as it is one of its most creditable institutions.

Washington University.[1]—In the year 1853, at the instance of the Hon. Wayman Crow, then a member of the State Senate, a charter, approved Feb. 22, 1853, was granted to an educational institution to be known as the Eliot Seminary. This was the beginning of Washington University, which has grown from a small grammar school with two teachers and about thirty scholars to an institution comprising seven distinct departments, in which are enrolled nearly fourteen hundred students. The names of the corporators and first board of directors will indicate how genuine was the interest in this new enterprise. They were as follows: Christopher Rhodes, Samuel Treat, John M. Krum, John Cavender, George Partridge, Phocion R. McCreery, John How, William Glasgow, Jr., George Pegram, N. J. Eaton, James Smith, Seth A. Ranlett, Mann Butler, William G. Eliot, Hudson E. Bridge, Samuel Russell, and Wayman Crow.

On the 22d of February, 1854, the directors organized under the charter and chose the following officers: William G. Eliot, president; Wayman Crow, vice-president; Seth A. Ranlett, secretary; John Cavender, treasurer. When Mr. Cavender resigned, six years later, Mr. Ranlett was made secretary and treasurer, and held the two offices until his death in October, 1881, when George M. Bartlett, a graduate of the college in 1876, was appointed to fill the vacancy. The offices of president and vice-president are now filled by the same gentlemen who were elected to those positions at the first meeting of the board.

At this meeting a constitution was adopted, in which the name Eliot Seminary was changed to Washington Institute. This change of name was suggested by Dr. Eliot. It had happened that the charter was granted on the 22d of February, and also that the meeting for organization in 1854 was held on the same date. This accidental circumstance suggested the new name. But this name, also, was a suggestion of the breadth of the foundation upon which these friends of education would build. The seminary had been changed to the institute, and it was not long before the word university was adopted as the only one sufficiently comprehensive to include all the plans that were made for its development.

At the very beginning a declaration was made of the purpose of the directors to keep the new institution forever free from sectarian or partisan government or instruction, for the eighth article of the constitution, adopted at this first meeting, declares that—

"No instruction either sectarian in religion or partisan in politics shall be allowed in any department of the university; and no sectarian or partisan test shall be used in the election of professors, teachers, or other officers of the university; nor shall any such test ever be used in said university for any purpose whatever. This article shall be understood as the fundamental condition on which all endowments of whatever kind are received."

Three years later, by act of the General Assembly, the charter was amended by fixing the name Washington University, and by incorporating the above-mentioned article. The university was thus made secure, both by constitution and charter, from the dangers of theological or political dissensions.

About eighty thousand dollars in money and land were given to the university at this first meeting of its board of directors, and never since that day has it wanted generous and devoted friends.

In the winter of 1854–55 an evening school was opened in the old Benton school-house on Sixth Street. This was the first work under the charter of the university, although a small school had been in operation the year previous to the granting of the charter. This evening school was called the O'Fallon Polytechnic Institute, in honor of Col. John O'Fallon. The whole number of pupils in the evening school, which was in charge of Nathan D. Tirrell, was two hundred and twenty. The school was continued for several years, sustained at first wholly by the university. After a while, as elsewhere stated, the expense was shared with the board of public schools; and finally by a special arrangement the entire burden of the evening schools was assumed by the public school board.

In September, 1856, the school now known as the Smith Academy was opened in a new building on Seventeenth Street, near Washington Avenue. During the first year one hundred and eight scholars were enrolled. The teachers were James D. Low and Nathan D. Tirrell.

The formal inauguration of Washington University took place on the 22d of April, 1857. Its chief feature was an oration by Hon. Edward Everett, in Mercantile Library Hall, upon academical education. There were also addresses by President Eliot; James D. Low, principal of the academy; Hon. John How, president of the board of managers of the O'Fallon Polytechnic Institute; Hon. Samuel Treat, one of the directors; and Rev. Dr. Truman M. Post.

[1] The author is indebted to Professor Marshall S. Snow for this sketch of Washington University, which he kindly prepared expressly for this work.

During the same year (1857) a building was erected for the chemical laboratory, and Professor Abram Litton was appointed to the chair of chemistry, which position he still holds. Professor J. J. Reynolds, now brevet major-general United States army, was also appointed to the chair of mechanics and engineering. In 1858, as heretofore stated, work was begun on the building intended for the O'Fallon Polytechnic Institute, on the corner of Chestnut and Seventh Streets, upon a lot of land given by Hon. John How. Progress was slow and difficult. The plans adopted proved very expensive; the breaking out of the war caused many suspensions of the work, and the building was not fully ready for use until nine years had elapsed. This magnificent building, erected at a cost of upwards of three hundred and fifty thousand dollars, was soon found to be entirely unsuited to the wants of the university. Its situation was bad, the arrangement of its rooms was inconvenient, it burdened the university with debt. It was therefore thought wise to accept an offer made for its purchase by the board of public schools, and the building and its furniture were sold during the summer of 1868. The board of public schools agreed, as one of the terms of the purchase, to maintain, according to the original intentions, the polytechnic evening schools.

But in the mean time the college had been organized, and a college building had been erected on the corner of Washington Avenue and Seventeenth Street, and on the 17th of December, 1858, Professor Joseph G. Hoyt, then holding the chair of mathematics in Phillips Academy, Exeter, N. H., had been elected chancellor. He entered upon the discharge of the duties of his new position in February, 1859, and was formally inaugurated in October of the same year.

A school for girls, called Mary Institute, was established May 11, 1859, and opened in September of the same year, with Professor Edwin D. Sanborn as principal.

On the 19th of March, 1860, by vote of the directors, the law department was established under the name of the St. Louis Law School. The opening of the law school was delayed, however, by the war, until October, 1867, when its organization was completed and its first classes taught.

The outbreak of the civil war in 1861 brought to Washington University, as well as to all educational institutions in the city and State, many trials and hardships, which it hardly seemed possible to survive. The number of students was greatly reduced, a corresponding lessening of the number of teachers was necessary, and it was with great difficulty that the various departments were sustained. It was during this period of struggle and discouragement that the first college class was graduated, in June, 1862. Chancellor Hoyt conferred the degrees, but was even then struggling with the disease which was in a few months to take him from a position of so much usefulness. In his death, on the 26th of November, 1862, the university suffered a loss which could hardly be repaired. A ripe scholar, an able and enthusiastic teacher, gifted with a rare tact and sound judgment, ready with his pen, and an eloquent speaker as well, a vigorous executive officer, he was a man peculiarly well suited to the needs of the young university, and his death was nothing short of a calamity.[1]

The vacant chancellorship was filled by the election of William Chauvenet, Professor of Mathematics, who was formally inaugurated in June, 1863.

[1] Joseph G. Hoyt was born in Dunbarton, N. H., Jan. 19, 1815. In early youth his opportunities for obtaining an education were limited. Until he was sixteen he was able to attend the public school only three months out of the year. He was fitted for college at Hopkinton, N. H., and at Andover, Mass., and was an assistant teacher in both institutions throughout his preparatory course. His varied and extraordinary capacities had already begun to exhibit themselves. While a student at Andover he took charge of Professor Barton's classes in mathematics during the four months that he was engaged for the government in the survey of the Northeastern boundary. In 1836 he entered Yale College without conditions. He was distinguished at Yale for superior scholarship, independence of character, and originality of thought and expression. During his collegiate course he took prizes for excellence in mathematical studies and in English composition. He was graduated sixth scholar in a class of one hundred. While in college he was chosen one of the editors of the *Yale Literary Magazine*, and was elected by an almost unanimous vote president of the Brothers in Unity. He was conspicuous among the members of Yale for powers of clear and original argument, and for the general influence which arises from the possession of forensic abilities and manly virtues. His genial nature, his singular simplicity and transparency of character, his cordiality, unalloyed with hypocrisy, and his native strength of mind, in which there was no element of pretension, secured for him general esteem and friendship.

In the spring of 1840 he took charge of an academy at Plymouth, N. H. His popularity in the management of this large institution was based upon true success. In 1841 he was appointed Professor of Mathematics and Natural Philosophy in Phillips Academy, Exeter, N. H., where he remained eight years. At Exeter, Professor Hoyt was foremost in every enterprise of public moment. Every measure for the improvement of the town, for the advancement of education, for the promotion of public interests received his efficient support. The beautiful school-houses, the public institutions and improved appearance of that quiet village, are largely due to his personal efforts.

In 1851 he was a member of the convention for the revision of the State Constitution. In 1858 he barely escaped a congressional nomination. In December, 1858, he accepted the appointment of chancellor and Professor of the Greek Language and Literature in Washington University. In 1859 he received from Dartmouth College the degree of Doctor of Laws.

The war at last came to an end, and with the increase of the city in wealth and population came greater prosperity to the university.

On Oct. 16, 1867, the law school, which, as has been said, was established in 1860, was fairly opened to students.

Under date of Feb. 22, 1868, the anniversary of the institution, the sum of twenty-five thousand dollars was presented to the university, as a part of its permanent endowment, by Messrs. John P. Collier, William B. Collier, M. Dwight Collier, and Thomas F. Collier. The disposition of the income of this sum was left to the directors, subject only to the request "that until the board of directors shall officially determine a different employment of it to be required for the well-being of the institution, it shall be applied to the university professorship of Greek, in grateful recognition, by his former pupils, of the fidelity, learning, and ability with which the present incumbent of that chair has for years past discharged its duties." The incumbent of the professorship referred to was Professor Sylvester Waterhouse.

In 1869 professional courses of study were adopted in civil and mechanical engineering and in chemistry. In 1870 a fourth year was added to these courses, and in 1871 a course in mining and metallurgy was arranged. The first professional degrees were conferred in June, 1871, viz., five degrees in civil engineering.

In the death of Chancellor Chauvenet, in December, 1870, the university suffered another severe loss. His reputation as a teacher and a writer upon mathematical subjects had made the university of which he was the head known not only in this country but in Europe, and regret at his death was universal. President Eliot became acting chancellor upon the death of Professor Chauvenet, and was inaugurated chancellor in February, 1872.

In the year 1871 a large addition was made to the building on Washington Avenue. An extension was made to the west end and a new roof with an additional story was added to the old building, thus more than doubling its capacity. Upwards of two hundred and fifty thousand dollars were given during this year (1871) for buildings, apparatus, and endowments. Since that time the career of the university has been one of uninterrupted prosperity.

WASHINGTON UNIVERSITY HALL.

In 1878 the need of more room and greater conveniences for the school for girls, Mary Institute, was met by the erection of a large, convenient, and well-furnished building, at a cost of more than seventy

thousand dollars, at the corner of Beaumont and Locust Streets. In 1879 a similar necessity caused the erection of a handsome and commodious building at the corner of Washington Avenue and Nineteenth Street, for the use of the Smith Academy. On May 22, 1879, was completed the organization of a department of the university known as the St. Louis School of Fine Arts. Instruction in art had always been provided in the courses of study, but the ever-increasing demand for more thorough and broader work led to the foundation of this separate department.

Through the generosity of the Hon. Wayman Crow, always a warm friend and benefactor of the university, a building for a museum and for class-rooms, containing also a fine lecture hall, was erected at a cost of one hundred and thirty-five thousand dollars in the year 1879–80, at the corner of Lucas Place and Nineteenth Street.

The year 1880 saw also the addition of still another department to those already organized in the establishment of the Manual Training School, and the erection of a building for its uses at the corner of Washington Avenue and Eighteenth Street. The ordinance establishing this school was adopted June 6, 1879. The object of the school is instruction in mathematics, drawing, and the English branches of a high school course, and instruction and practice in the use of tools. The building was paid for by Edwin Harrison, one of the directors of the university, and the endowment fund and furnishing were provided by Samuel Cupples, another director, and Gottlieb Conzelman, with contributions also from other public-spirited citizens. During the summer of 1882, the original building having become inadequate to its needs, an addition was made, chiefly through the liberality of Ralph Sellew and G. Conzelman, on the Washington Avenue front, doubling the capacity of the school.

Washington University now comprehends the following departments:

I. The Undergraduate Department.
II. The St. Louis School of Fine Arts.
III. The St. Louis Law School.
IV. Smith Academy.
V. Manual Training School.
VI. Mary Institute.

The Undergraduate Department includes:

I. The College.
II. The Polytechnic School.

The standard of admission to both branches of the Undergraduate Department has always been high, and is kept fully up to the demands made in the best of Eastern or other institutions. The college has two courses of study, one of which leads at the end of four years to the degree of Bachelor in Arts, and the other to that of Bachelor in Philosophy. In the second course no Greek is required for admission or after entrance, a somewhat more extended course in scientific studies being taken as a substitute; in other respects, however, the courses run in parallel lines. The college courses have been changed and broadened very much during the last six years to suit the demands of the times for a more truly liberal course of study. More latitude is allowed in the choice of studies, and greater prominence is given to the study of modern languages and literature, and to historical work. It is safe to say that no student takes his degree without a sufficient knowledge of French and German to read easily at sight any ordinary French or German book. Some historical work is required every term during the four years. The careful study of the English language and literature is a feature of the college work. At the same time the study of the classical tongues is not neglected, and those who desire can pursue such studies throughout the course. Excellent opportunity is also given for the study of general chemistry, physics, botany, and other branches of natural science, according to the taste and acquirements of the students. In short, the effort is made both in the arrangement of the courses of study and in the direction of the student's inclination, to give a broad and liberal education in the best sense of the term, to lay the foundation upon which high literary and professional scholarship may be reared. The college is under the special charge of Professor Marshall S. Snow, dean of the college faculty.

The courses of study in the Polytechnic School are five, as follows: civil engineering, mechanical engineering, chemistry, mining and metallurgy, building and architecture. The completion of the four years' course entitles the successful candidate to the degree of Bachelor of Science, the professional degrees being conferred only at the end of a fifth year devoted exclusively to professional work. The excellence of the work done in this school has been proved in the best and most satisfactory way,—by the success of its graduates who have actively engaged in professional work. The laboratories for the practical study of chemistry, physics, and metallurgy are very complete, and the collection of minerals for use in geological work is hardly surpassed in the country. The Polytechnic School is under the immediate supervision of the dean, Professor Calvin M. Woodward. In many of their studies the classes of the college and the Polytechnic School are combined, and in the students' societies no distinction is made between

them. An excellent gymnasium was erected in 1879 for the use of the students of the Undergraduate Department, and regular instruction is given in gymnastics and calisthenics. Both sexes are admitted upon equal terms to this department, and also in the law school. The following list includes the names of all who have at any time been members of the faculty and corps of instructors in this department. The names of the present faculty are printed in *italics:*

Truman M. Post, Professor of Ancient and Modern History from 1857 to 1869; since then University Professor of History.

Abram Litton, Eliot Professor of Chemistry, appointed 1857. This chair was named in honor of Chancellor William G. Eliot.

Joseph Jones Reynolds, now brevet major-general United States army, Professor of Mechanics and Civil Engineering, 1857–60.

George Engelmann, Professor of Botany and Natural History, 1857–76; University Professor since 1876.

Charles A. Pope, Professor of Anatomy and Comparative Physiology, 1857–67.

Joseph G. Hoyt, Chancellor, elected Dec. 17, 1858; died Nov. 26, 1862.

Ferdinand Bocher, Instructor in Modern Languages, 1859–61.

Carl C. C. Zeus, Instructor in German and Gymnastics, 1859–61.

Edwin D. Sanborn, Principal of Mary Institute, 1860–62, and Professor of Latin and History, 1860–64.

William Chauvenet, Professor of Mathematics and Astronomy, 1860 to December, 1869; Chancellor, elected 1863, died December, 1870.

John McAllister Schofield, now brevet major-general United States army, Professor of Physics and Civil Engineering, 1860–61.

Sylvester Waterhouse, Tutor in Greek, 1858–62; Adjunct Professor, 1862–64; University Professor of Greek, 1864–69; Collier Professor, 1869. This chair was named in honor of John P. and Thomas F. Collier, graduates of the college, who have since died, whom, with their two brothers, as heretofore stated, the endowment of this professorship was made.

Alfred S. Hartwell, Tutor in Latin, 1860–61.

Willard F. Bliss, Adjunct Professor of Latin, 1860–60.

Rudolph L. Tafel, Professor of Modern Languages and Comparative Philology, 1860–68.

John D. Crehore, Professor of Civil Engineering, 1861–62.

Paulus Roetter, Instructor in Modern Languages, 1860–61.

George B. Stone, Principal of the Academy and Professor of Rhetoric, 1862–74.

John E. Sinclair, Assistant Professor of Mathematics, 1861–62.

William G. Eliot, Acting Professor of Ethical and Political Science, 1862–64; Acting Tileston Professor of Political Economy, 1864–66; Chancellor, and Tileston Professor of Political Economy, 1871.

The name of this chair is in honor of Thomas Tileston, of New York City, by whose daughter, Mrs. Mary Hemenway, it was endowed.

Calvin S. Pennell, Principal of Mary Institute, and Professor of Intellectual and Moral Philosophy, 1862.

George W. C. Noble, Professor of Latin and Classical Literature, 1864–67.

Benjamin F. Tweed, Professor of English Literature, 1864–70.

William H. Clark, Tutor in Mathematics, 1863–64.

George H. Howison, Assistant Professor of Mathematics, 1864–66; Tileston Professor of Political Economy, 1866–69.

Regis Chauvenet, Tutor in Mathematics, 1864–65.

John Gast, Teacher of Drawing, 1864–68.

John L. Ewell, Professor of Latin, 1866–67.

Calvin M. Woodward, Instructor in Mathematics, 1866–67; Assistant Professor of Mathematics, 1867–69; Professor of Descriptive Geometry and Topographical Drawing, 1869–70; Thayer Professor of Mathematics and Applied Mechanics, 1870. This chair was named in honor of Nathaniel Thayer, of Boston, Mass.

Charles E. Illsley, Instructor in Engineering and Mathematics, 1867–68.

Marshall H. Holmes, Teacher of Drawing, 1867–68.

George E. Jackson, Teacher of Latin and Greek, 1867–68; Acting Professor of Latin, 1868–70; Professor of Latin, 1870.

Geoffroi Goepp, Professor of Modern Languages, 1868–70.

George W. Minns, Professor of Mathematics and Astronomy, 1869–70.

J. W. Pattison, Teacher of Drawing, 1869–73.

Marshall S. Snow, Professor of Belles-Lettres, 1870–74; of History, 1874.

Leopold Noa, Professor of Modern Languages, 1870–73.

Henry Pomeroy, Professor of Mathematics and Astronomy, 1870–75.

Denham Arnold, Assistant Professor of Physics, 1870–74; Professor of Physics, and Principal of Smith Academy, 1874.

Charles A. Smith, Assistant Professor of Civil and

Mechanical Engineering, 1870–73; Professor, 1873. This chair is named the William Palm Professorship of Civil and Mechanical Engineering, in honor of William Palm, who died in 1875.

Frederick M. Crunden, Instructor in Mathematics and Elocution, 1871–72; Professor of Elocution, 1872–75.

William Eimbeck, Professor of Practical Astronomy, 1871–75.

William B. Potter, Allen Professor of Mining and Metallurgy, 1871. This chair was named in honor of Hon. Thomas Allen.

F. William Raeder, Professor of Architecture, 1871–78.

R. Thompson Bond, Assistant Professor of Mathematics, 1873–75; Professor, 1875–76.

Rudolph C. Arndt, Instructor in Modern Languages, 1873–74.

Charles V. Riley, University Professor of Entomology, 1876.

Herman Meister, Assistant in Mining and Metallurgy, 1877–79.

John R. Scott, Instructor in Elocution, 1877.

Alexander Leonhardt, Instructor in Assaying, 1880–82.

Gustav Hambach, Instructor in Botany and Zoology, 1880.

Thomas B. Annan, Instructor in Architecture, 1880–81.

Howard Kretchmar, Instructor in Modeling.

Edmund A. Engler, Assistant Professor of Mathematics and Descriptive Geometry, 1881–82; Professor, 1882.

Henry S. Pritchett, Assistant Professor of Mathematics and Astronomy, 1881–82; Professor, 1882.

Charles E. Ludeking, Assistant in Chemistry, 1881

MUSEUM OF FINE ARTS.

John H. Jenks, Professor of Physiology, 1874.

James K. Hosmer, Professor of English and German Literature, 1874.

A. B. Copeland, Teacher of Drawing, 1873–74.

Francis E. Nipher, Assistant Professor of Physics, 1874–75; Wayman Crow Professor of Physics, 1875. This chair is named in honor of Hon. Wayman Crow.

Halsey C. Ives, Teacher of Free-Hand and Mechanical Drawing, 1874–76; Professor of Drawing and Design, 1876.

John K. Rees, Professor of Mathematics and Astronomy, 1876–81.

John T. Hodgen, University Professor of Anatomy and Physiology, 1876–82.

William T. Harris, Professor of the Philosophy of Education, 1876.

August Muegge, Instructor in Gymnastics, 1880.

THE ST. LOUIS SCHOOL OF FINE ARTS, although included in the proposed plan of the institution from the beginning, was not brought into any regular shape until its organization in 1879 as a separate department. Professor Halsey C. Ives has been the director since its organization. The school has the use of the fine collection of casts purchased in Europe for use in the art work of the university, which are placed in the museum and in the class-rooms of the school. Free admission is given all art students to the collections of sculpture and paintings in the museum, and the best opportunities are afforded for most thorough prosecution of art study. Evening and Saturday classes for the accommodation of those who cannot attend at other times are arranged every year.

hundred and sixty students are enrolled the present year. The school is under the direct control of a committee of the board of directors of the university, who with several gentlemen not otherwise connected with the university constitute the board of control of the School of Fine Arts. The following are the names of the board of control and of the teachers in this department:

Board of Control.—Daniel Catlin, Edwin C. Cushman, John B. Henderson, Ethan A. Hitchcock, Charles Parsons, Thomas E. Tutt.

Teachers.—Halsey C. Ives, director; Carl Gutherz, Paul E. Harney, Howard Kretchmar, Edmund A. Eogler, John H. Fry.

The founder of the School of Fine Arts was the Hon. Wayman Crow.[1] Mr. Crow was the youngest son of Joshua Crow. His father was born in Virginia, April 18, 1760, and March 27, 1787, married Mary Wayman, at Poplar Spring, Anne Arundel Co., Md. The issue of this union was twelve children, all of whom, except two boys who died in childhood, reached mature years.

The Crows came from North Irish stock; the Waymans were of English extraction.

Joshua Crow died in Hartford, Ky., April 20, 1830. He was a man of good abilities and sterling integrity, but somewhat deficient in vigor of character. His wife, who died near Hopkinsville, Ky., Sept. 27, 1827, was endowed with strong native sense and extraordinary energy. The subject of this sketch inherited his activity and executive capacity from his mother.

Shortly after his marriage, Joshua Crow invested his property in the manufacture of flour in the District of Columbia, but the business proved unsuccessful. Deeming it easier to re-establish his shattered fortune in a new country, Mr. Crow went to Kentucky and settled in Hartford, Ohio Co. The Indians were still numerous in that region, and of a temper so fickle and unfriendly that the existence of a fort at Hartford was a fact that had considerable weight with Mr. Crow in the selection of his new home. After his removal to Kentucky, Mr. Crow studied law and practiced his profession in the Green River counties.

Mrs. Crow was appointed postmistress of Hartford, and for several years acceptably discharged the duties of her office.

Wayman Crow was born in Hartford, Ky., March 3, 1808. When Wayman was six years old his father moved to Hopkinsville, Christian Co., Ky. At the age of seven Wayman was sent to the district school. The school-house, situated in the outskirts of the village, was a rude log cabin, whose chinks were imperfectly closed with mud. The floor was clay. It was here in this log cabin that Wayman, between the ages of seven and eleven, and under teachers whose system of instruction was as rude as the building in which they taught, acquired the elements of his imperfect education.

In 1819 his father removed to a farm six miles from Hopkinsville, and here Wayman spent one year, attending school in the winter and working on the farm in the summer. In February, 1820, he was, at the age of twelve, apprenticed to Strother J. Hawkins, who kept a store of assorted dry-goods, groceries, and hardware in Hopkinsville. The period of his apprenticeship was five years. By the terms of his indenture, he was to receive his "victuals and clothes" and to board in the family of his "master." He took his meals with the family, but slept on a cot in the counting-room. He made the fires, brought the water from a spring two hundred yards from the house, opened, swept, and closed the store. Mr. Hawkins was a thorough merchant, and under his careful instruction, Wayman easily mastered the difficulties of book-keeping by double entry, and became familiar with all the duties incident to the conduct of a country store. In the course of a year and a half Mr. Hawkins retired from business, and Wayman was transferred by agreement to the firm of Anderson & Alterbury. These merchants had previously been doing a wholesale business in Baltimore, and in consequence of their unfamiliarity with the details of a retail trade, Wayman, though not yet fifteen years old, was intrusted with the chief control of their business. To him was confided the responsible duty of making out the inventory for purchases and the lists of credits. After the expiration of his apprenticeship, he was employed by the firm at a salary of three hundred dollars per annum, and at the end of the first year Messrs. Anderson & Alterbury offered to establish a branch house, furnish it with three thousand dollars' worth of merchandise, and give Wayman one-quarter of the profits to manage the business. The young clerk accepted the offer, and in October, 1826, opened a store in Cadiz, Trigg Co., Kentucky. Although Cadiz is only twenty miles from Hopkinsville, six months elapsed before Wayman received a visit from either of his employers. Their confidence in his integrity and capacity did not need the reassurance of a frequent inspection of his books.

In December, 1828, Messrs. Anderson & Alterbury, in consequence of their determination to re-

[1] The accompanying sketch of Mr. Crow was prepared for this work by Professor S. Waterhouse.

move to Pittsburgh as a larger field for mercantile operations, voluntarily offered to sell to Wayman on credit their stock of goods at Cadiz. But Wayman was still in his non-age, and to his suggestion that the note of a minor is not legally binding, his employers replied that they were willing to assume the risk, feeling assured that he would never plead the statute of infancy in bar of a just claim.

During the twenty-six months Wayman had been engaged in business in Cadiz the firm had cleared four thousand five hundred dollars, but Wayman's share of the profits had been absorbed in the necessary expenses of living,—expenses that were materially increased by the fact that he was the sole representative of the firm at Cadiz. In his final settlement with his employers prior to going into business for himself, Wayman found that he owed the firm fifty-four dollars, but the payment was kindly deferred and the amount included in the sum which he was to pay for his stock of goods. Accepting the terms proposed by Messrs. Anderson & Alterbury, Mr. Crow started in business for himself Jan. 1, 1829, owing his former employers about three thousand dollars, on a credit of six, twelve, and fifteen months. He paid the notes before their maturity, and in July, 1835, sold out with a view of going elsewhere, having made in six years and a half, after deducting all his family expenses, the sum of twenty-one thousand dollars.

Nov. 5, 1829, Mr. Crow married Miss Isabella B. Conn, the third daughter of Capt. H. Conn, of Union County, Ky. Of this marriage nine children were born, of whom Alphonsine, Victor, Medora, and Alice died in childhood, while Cornelia, Emma, Mary, Isabel, and Wayman reached adult life.

In the fall of 1826, when he was only nineteen years old, Mr. Crow was appointed postmaster at Cadiz. He held this trust till the winter of 1832, when, in consequence of his support of Henry Clay for the Presidency, he was removed from office. But his dismissal was so unpopular that no citizen of Cadiz would accept the position, and the vacancy was filled by a man from Hopkinsville.

For some time Mr. Crow had been contemplating a removal to a larger field of commercial enterprise. In the spring of 1835 he set out in quest of a new home. Detained in St. Louis for several weeks by a severe illness, he used the opportunities of convalescence to examine the business features of the place, and deeply impressed with its commercial facilities, he determined to settle in St. Louis.

While he was lying sick in St. Louis, the Bank of Kentucky, without solicitation, appointed him a director for the purpose of organizing a branch bank at Hopkinsville. He was a member of the board until the following November, when, in view of his immediate removal to St. Louis, he resigned his place.

At this time Mr. Crow formed a partnership with his cousin, Joshua Tevis, of Philadelphia, and on the 18th of November, 1835, he landed at St. Louis, and began business under the style of "Crow & Tevis." Such was the humble beginning of one of the largest commercial houses in St. Louis. Under the later names of "Crow, McCreery & Co." and "Crow, Hargadine & Co." the firm has continued in business until the present time. From the date of its organization the house has never known a reverse or received a stain upon its commercial honor. From the beginning Mr. Crow has been the head of the firm, and it was chiefly owing to his practical wisdom and business foresight that the firm has been able safely to weather the financial storms that have from time to time swept so disastrously over the country. In 1837, '57, '61, and '73, when commercial confidence and credit were utterly unsettled, and when many of the strongest houses were sinking in ruin, this firm never failed to meet all its obligations at maturity. The panic of 1857 overtook the house when it was encumbered with a debt of several hundred thousand dollars. Ruin seemed inevitable. In this desperate emergency Mr. Crow borrowed money at two and a half per cent. a month, and secured the payment of funds used for the benefit of the firm by the pledge of his own private property. He also issued a circular which evinced great foresight and knowledge of human nature. By its candor of statement, exhibit of financial strength, and adroit appeal to the sympathies and interests of the debtors, this circular effectively relieved the embarrassment of the house.

One sentence is specially worthy of quotation:

"To us our commercial honor is as dear as our lives; to preserve it we are prepared to make any pecuniary sacrifice short of impairing our ability to pay ultimately every dollar we owe."

So manly an address met a generous response, and the moneys derived from collections and private loans were sufficient to rescue the firm from commercial danger. The house may well be proud of its noble founder, of the fine example of mercantile honor which he has set, and of a commercial career so distinguished for sagacity and unvarying success.

In 1840, Mr. Crow was unanimously elected president of the St. Louis Chamber of Commerce. He held this office for about ten years in succession.

In 1840 and again in 1850 he was elected to the State Senate on the Whig ticket. The second term of senatorial service was four years.

Clayman Crary

It was in 1850 that the present railroad policy of Missouri was inaugurated. Mr. Crow aided in procuring the charters of the Hannibal and St. Joseph and the Missouri Pacific Railroads. Of the latter road he was one of the original stockholders, and was a contributor on the eventful evening when the joint subscription of one hundred thousand dollars was raised. He was subsequently one of the directors of the road, and showed his faith in its future by retaining his stock for more than twenty years without any return of dividends.

In the last session of the State Senate in 1853, he was a member of the Committee of Ways and Means. While he was serving in this capacity, Governor Price, going beyond the limits of his own party and not expecting security for a trust involving two hundred thousand dollars, appointed him agent to sell a new issue of the State bonds. Mr. Crow disposed of the bonds in the New York market at a premium of nearly four and three-quarters per cent. Up to that date no sale of State securities had ever been made on terms so favorable. His commission of one-half of one per cent. amounted to about one thousand and fifty dollars. One-half of this sum he gave to New York bankers for aid in negotiating the loan, and out of the five hundred and twenty-five dollars that remained he paid his own expenses. For his success in this transaction he was highly complimented by Governor Price in a public message.

Mr. Crow obtained the charter of the St. Louis Asylum for the Blind and of the Mercantile Library Hall Company. With generous contributions he assisted in the erection of the library building, and was for many years a member of the board of directors.

In 1844 he was chosen president of the Marine Insurance Company. Five or six years later he resigned this position, and was elected president of the St. Louis Perpetual Insurance Company. He held this office till the outbreak of the civil war, when, at his suggestion, the stockholders closed up the affairs of the company.

Mr. Crow is a Unitarian, and has liberally supported the interests of his denomination. He has been for more than thirty years a trustee of the Church of the Messiah, and for many years president of the board of control. While in the Senate he procured the charter of the mission school connected with the Unitarian Church, and was several years a member of its board of managers.

Though a native of a Southern State, Mr. Crow early conceived a love of free institutions. The belief that Missouri would soon become a free State was one of the strongest motives that induced him to settle in St. Louis. In order that his daughters might be surrounded by the influences and imbued with the principles of freedom, he sent them to New England to be educated. It was while his daughter Cornelia was at school in Lenox, Mass., that Mr. Crow met her classmate, Harriet Hosmer. The young school-girl, who had already determined to devote her life to sculpture, was invited to St. Louis, and passed eight months in Mr. Crow's family, engaged in the study of anatomy, as an introduction to her more strictly technical education. Afterwards, when she was struggling in Rome under the discouragements which so often beset an artistic career, her patron sent her a check of two thousand five hundred dollars, and gave her an order to be executed at her pleasure. At a later period his influence as chairman of a committee to erect a statue in honor of Col. Benton enabled him to secure the commission for Miss Hosmer.

It was also at Lenox that Mr. Crow formed the acquaintance of Fanny Kemble and Charlotte Cushman, with whom he maintained a lifelong friendship.

Mr. Crow has always been an active supporter of the public schools, but his gifts to Washington University are his most important contributions to the cause of education. He may indeed be called the founder of that institution, inasmuch as he was the first to conceive the idea of a university and to embody that idea in an organic form. In the winter of 1853, during his last term of service in the Senate, without consultation with any one, he drafted, introduced, and secured the passage of the charter of Washington University. In the remarks which Mr. Crow made at the festival held on the 22d of April, 1882, in commemoration of the twenty-fifth anniversary of the foundation of Washington University, he used these words,—"Almost thirty years ago, near the close of my last senatorial term of office, without consultation with others, I drew up and introduced into the Senate the charter of this institution." The catholic provisions of that instrument, its clear recognition of the literary wants of St. Louis, its absolute prohibition of partisan politics or sectarian religion in the administration of the university, attest the liberality and practical sagacity of the mind that conceived it.[1] In June, 1875, he gave twenty-five thousand dollars to the university for the endowment of the professorship of physics. The total amount of his endowments is more than two hundred thousand dollars.

On the 21st of December, 1875, Mr. Crow, as the

[1] Mr. Crow has been vice-president of the university from its organization to the present time.

oldest surviving ex-president of the Merchants' Exchange, delivered the valedictory address in the old hall, prior to the inauguration of the new edifice on Third Street. His remarks on that occasion were pervaded by that lofty spirit of mercantile honor that should be the inspiration and guide of our commercial life.

On the 1st of March, 1878, Wayman Crow, Jr., died in Leamington, England. In the following summer his father, with the approval of his family, decided to erect a memorial art museum. A lot one hundred and fifty feet in front, and one hundred and fifty-five feet in depth, situated at the corner of Lucas Place and Nineteenth Street, was bought in February, 1879. The work of construction was at once begun. The edifice was formally dedicated on the 10th of May, 1881, and conveyed by deed to Washington University on the sole condition that twenty-five thousand dollars should be raised as a permanent fund, the interest of which should be expended for works of art for the museum.

The total cost of the ground and building was about one hundred and thirty-five thousand dollars. The St. Louis Museum of Fine Arts is a superb structure. Tasteful, well built, and admirably adapted to the uses of an art gallery, it is at once a beautiful memorial of a beloved son and a lasting monument of the beneficent public spirit of the father.

Through the lapse of ages, this noble gift will foster the culture of æsthetic art and develop new sources of refined enjoyment. Mr. Crow is a man of great generosity. When his old employers were overtaken by business reverses, he showed his gratitude for the encouraging confidence which they reposed in his youthful honesty. The declining years of one of them were brightened by a generosity as delicate as it was constant, while the son of the other was placed in a position which enabled him to maintain his widowed mother in comparative ease. Many a man, disheartened by adversity, has been relieved by Mr. Crow; but the charity was often given in the considerate disguise of payment for services which he did not need. His encouraging words and helpful hand have aided many young men to rise in the world, and enabled many older ones who have stumbled in the arduous paths of business to regain their footing. During his life, the aggregate of Mr. Crow's gifts to his church, to Washington University, to the support of the Union during the civil war, to private charities and public enterprises, must have amounted to three hundred thousand dollars. Though a man of wealth, Mr. Crow is not a millionaire. That he, while yet living and still exposed to the hazards of business, should from a comparatively moderate fortune devote so large a sum to public munificence is proof of a liberality as rare as it is noble. To give away money which the owner can no longer use is not the highest exercise of benevolence; but to forestall death and become the executor of his own legacies is the act of an enlightened and self-denying benefactor.

The domestic life of Mr. Crow has been singularly pleasant. He has spent his happiest hours at home in the endeared companionship of his wife and children. He has always sought to make that home the scene of cultivated pleasure and the centre of tender associations. He has filled it with objects of art to please the eye and educate the taste. He has gathered in his drawing-rooms men and women of culture, in order that he might enjoy the rich and varied results of study which the circumstances of his own early life prevented him from attaining. His generous hospitality will be long and kindly remembered by the guests who have been so fortunate as to share it. His sprightliness of mind and his large fund of information, derived from observation and travel, contribute much to the pleasure and profit of his social entertainments.

Mr. Crow is essentially a self-made man, and his example is full of suggestive encouragement to young men. Three-quarters of a century ago the processes of teaching were everywhere throughout the country far less perfect than they are to-day, but in a frontier State both the methods and subject-matter of instruction were singularly defective. It was under these conditions, in a Kentucky log cabin, that Mr. Crow obtained in less than six years all the school education which his circumstances permitted him to acquire. Yet by reading and reflection, by home and foreign travel, and by extensive intercourse with mankind he has become a man of large views and varied information. Beginning his business life at twelve with the humble duty of sweeping a small country store, he rose step by step, without a single reverse throughout his long career, until he has become one of the merchant-princes of the land.

Mr. Crow is a man of eminent usefulness. For his honorable services in mercantile life, in political trusts, in public enterprises, in educational work, and in private charity, St. Louis will long cherish the memory of its distinguished benefactor.

The St. Louis Law School, after its formal opening in 1867, had its rooms and its lectures were given in the Polytechnic building, corner of Seventh and Chestnut Streets. On the completion of the new wing of University Hall, on Washington Avenue, in 1872, the Law School removed to eligible rooms there

but the growth of the Undergraduate Department and the need of much more room for the rapidly increasing collections made it necessary to seek new quarters for this important department. When, therefore, Mary Institute was removed to its new building, the Law School was transferred to the old institute building, No. 1417 Lucas Place, where it has since remained, and where it has ample room for growth. The character of its faculty and the high standard required for graduation which is rigidly adhered to have made the Law School well and most favorably known, and it stands among the first institutions of the kind in the country. A diploma from this school admits its owner to practice in the courts of the State and United States without examination, upon simple motion. These diplomas are conferred only upon those who successfully pass the severe written examinations of the school.

The chancellor of the university is *ex officio* the official head of the law department, but the control and management of the department has always been vested in the law faculty. At its organization in 1867, Henry Hitchcock was appointed dean of the law faculty, and was executive officer thereof until October, 1870, when he resigned in consequence of ill health. George M. Stewart was then appointed dean of the law faculty, and remained such until May, 1878. But Mr. Hitchcock, having returned home with renewed health in December, 1871, was reappointed a member of the faculty and made provost, and as such resumed the executive management of the Law School, and continued to exercise the same until May, 1878. At that time the entire faculty resigned and the law faculty was reorganized, Henry Hitchcock being reappointed dean and the number of the faculty being reduced, though the course of study was enlarged. In June, 1881, Henry Hitchcock having resigned, William G. Hammond, LL.D., was appointed dean of the law faculty, which office he now holds with the executive management and control of the Law School. Professor Hammond entered upon his duties in October, 1880, after many years of successful work in a similar position in the Iowa State University. To Henry Hitchcock, however, more than to any other man must be ascribed the successful establishment of the school. He was, as we have seen, for several years the dean, then provost, and dean again, and still holds an important chair among the faculty.

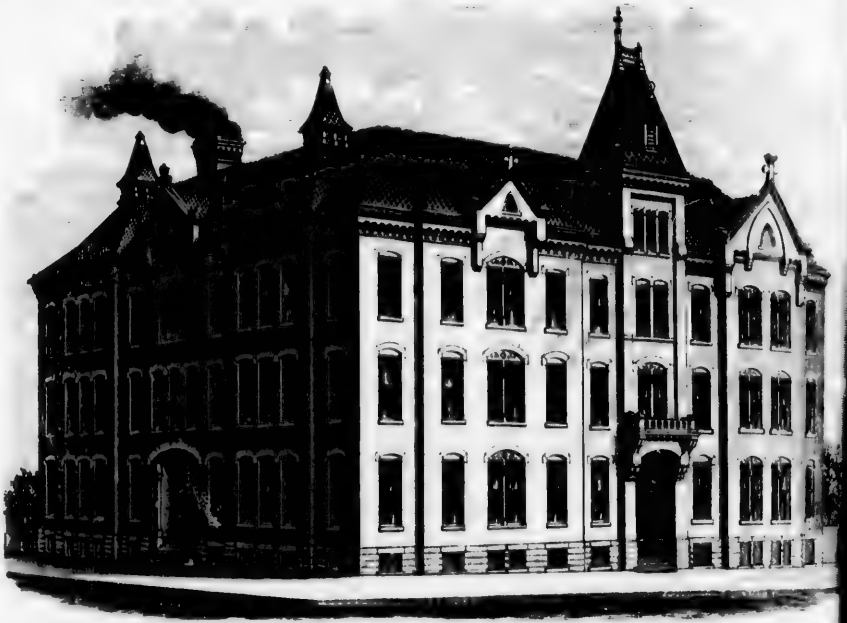
The following list includes the names of all who have at any time been members of the faculty of the Law School. Those in *italics* are the present members: *Samuel Treat*, 1867; Nathaniel Holmes, 1867–68; *Albert Todd*, 1867; John D. S. Dryden, 1867–68; *Henry Hitchcock*, 1867; Alexander Martin, 1867–78; Samuel Reber, 1868–79; John M. Krum, 1868–78; *George A. Madill*, 1868; George M. Stewart, 1868–78; Roderick E. Rombauer, 1872–73; Chester H. Krum, 1873–82; *Gustavus A. Finkelnburg*, 1878; George W. Cline, 1879–82; *William G. Hammond*, dean, 1881.

SMITH ACADEMY, which was the real beginning of the university, passed from the hands of Messrs. Low and Tirrell in the year 1862 into the care of Professor George B. Stone. Under his vigorous administration the academy grew and prospered, even throughout the trying days of civil war, and its reputation for thoroughness and general excellence, so well established by Professor Stone, is maintained and strengthened by his successor, Professor Denham Arnold, who became principal at the resignation of the former in 1874. Recent improvements have been made in the courses of study which make the academy a good fitting school for any college or polytechnic school in the country. It has a large corps of teachers and an attendance of nearly four hundred pupils. The following are the names of those now constituting the body of government and instruction:

Denham Arnold, principal; George E. Jackson, John H. Jenks, James A. Lanius, William S. Curtis, Eli R. Offut, Charles P. Curd, Henry E. Seaver, Horace A. Brown, Asa E. Goddard, John R. Scott, Richard D. Swain, Charles P. Morrison, Anna C. Hillman, Inez Borden, Mary B. Cushman, Amanda Ford, Isabel H. Noyes, Charlotte M. Martling.

MARY INSTITUTE, the university's school for girls, has been under the charge of Professor Calvin S. Pennell since the year 1862, when he succeeded Professor Sanborn. The first building was on Lucas Place, No. 1417. This becoming inadequate for the uses of the rapidly growing school, the building at the corner of Locust and Beaumont Streets was erected and occupied in 1878. The school has a large corps of teachers and more than four hundred pupils on its rolls. Mary Institute has always enjoyed a well-deserved reputation for the thoroughness with which its work is done and the admirable spirit which pervades the whole school. Those of its graduates who so desire have free admission to either branch of the Undergraduate Department of the university. The teachers of the institute are as follows: Calvin S. Pennell, principal; Caroline E. Pendleton, Henrietta Sawyer, Margaret T. Wallace, Sophie Desloge, Flora L. Whitney, Sarah E. Cole, Annie Wall, Mary J. Rychlicki, Jennie R. Greene, Annie L. McCargo, Sallie B. Dunnica, Emily A. Nelson, Emma G. Noyes, Kate J. Brainerd, Sarah M. Mills, Lizzie Butler, S.

D. Hayden, Jessie Elliot, Lily Irwin, Theo. Hagen, Emma L. Taussig, Ada Johnson.



In the year 1875, William Henry Smith and his wife, Ellen Smith, gave to the university a sum of money which has since increased to thirty thousand dollars for the beginning of a lecture foundation. Lectures known as the Smith lectures are given every year, either in the large lecture-room or in class-rooms, upon all subjects which are suited to the needs of the public. The sum of five thousand dollars has also been given by Mrs. Mary Hemenway, of Boston, Mass., for the encouragement of the study of Ameri-

Woodward, dean of the Polytechnic School, is the director of the Training School, and is assisted by the following teachers:

John W. Spargo, Charles F. White, George W. Krall, W. Henry Vaughn, Charles E. Jones, Harry M. Newington, Oscar W. Raeder, George B. Woodward, B. S. Newland, Charles C. Swafford.

The property of the university, including buildings and furniture, is estimated to be worth more than one million dollars, all of which has been given by public-spirited men and women, most of them residents of St. Louis. No aid from the State has ever been received, nor has any money been obtained from any denominational source, for the university is in the strictest sense of the term non-sectarian and non-partisan, and desires no connection with either church or State. The following list includes the names of some of the benefactors of the university, now deceased, with a few of those who are still alive to see the fruit of their generosity, and the sums given by each as nearly as can be ascertained. Much has been given frequently in large sums, as the immediate need required, and without publicity:

Nathaniel Thayer, of Boston, Mass., $42,000

MANUAL TRAINING SCHOOL.

can history. The people of St. Louis now look to the university every year with confidence that the demand for instruction in this form will be regularly met.

THE MANUAL TRAINING SCHOOL, as has been before stated, is a school for the instruction of boys in English branches and the use of tools, the purpose being not to teach particular trades, but to give such an education in the use of tools as will be a good preparation for those wishing to be skilled mechanics. The course of study is also so arranged as to fit the pupils for the Polytechnic School of the university. Professor

Mrs. Mary Hemenway, of Boston, Mass., $35,000; James Smith, of St. Louis, $250,000; Hudson E. Bridge, of St. Louis, $179,000; John O'Fallon, of St. Louis, $62,000; William Palm, of St. Louis, $55,000; Wayman Crow, of St. Louis, $170,000; James H. Lucas, of St. Louis, $10,000; George Partridge, of St. Louis, $100,000; the Collier brothers, of St. Louis, $25,000.

We have given not accurate statements of amounts contributed, but such approximately correct statements as have been made from time to time in published reports and documents.

James Smith, who, as indicated above, was the largest single contributor to the funds of the university, was born at Peterborough, N. H., on the 28th of October, 1804. His father, John Smith, was a man of note and consequence. He had very limited opportunities of education, but possessed great natural vigor and activity of intellect, and made himself felt as a potent factor in the affairs of the town. For twelve annual terms consecutively he served the town as its representative in the State Legislature, and filled the office of local magistrate with great acceptability for many years. One who knew him well said of him, "He was a man of vast proportions, great in body, mind, and heart." He belonged to a family of stalwart men, and his brothers were also gifted with uncommon natural endowments. One of them, Jeremiah Smith, rose to the highest distinction by sheer force of his own native talents, energy, and ambition. After having, by dint of hard struggle, obtained a collegiate education, he entered the profession of the law, which he soon abandoned for the field of politics. He was elected a representative in the State Legislature, in which position he served with honor to himself and acceptability to his constituents. He was then chosen a member of Congress, where he served his native State during the whole period of Washington's two administrations. Subsequently he held in succession the offices of judge of the United States District Court, and of chief justice and Governor of New Hampshire, shedding in all of them new lustre on the family name.

James Smith inherited from his father a powerful frame, an active intellect, an iron will, and the ambition to excel. His mother was a woman of fine intelligence, a daughter of David Steele, of Peterborough, and of a family which gave to the State one of its early Governors, and has always been noted for mental and bodily vigor. It was from her chiefly that he learned those habits of industry, economy, and thrift that formed the basis of all his business prosperity. His youth was spent amid very trying conditions, for he was one of a family of eight children, with only scanty means of support, and lived in an obscure country village, with but little schooling and that at irregular intervals; but the discouragements and trials he was called upon to endure served only to temper and develop his natural strength of character. By the death of his father, who was accidentally killed in 1821, new and heavy responsibilities were laid upon him. His three brothers being absent and engaged elsewhere, the whole care of the family devolved upon James, who was then only seventeen years of age. At length, after three years of courageous and arduous effort to win a livelihood from the sterile soil, it was decided to give up the farm at Peterborough and remove to Franklin, where his brothers and a sister had already taken up their abode, and where a business opening for him presented itself. The change was accordingly made, and with his mother and sisters he took up his residence in Franklin in 1824, and at once obtained employment as a clerk in the store connected with the new mill at that place, which had recently been built by his brother-in-law, John Cavender, and others.

Four years were spent in Franklin, but his ambition was not satisfied with the slender promise afforded by the business of a small village, and he accordingly removed to the city of New York, where he also remained four years engaged in business. He then returned to New Hampshire, and was married on the 16th of May, 1832, to Persis, daughter of James Garland, of Franklin. The newly-wedded pair went to New York City, but the outlook not being satisfactory to the young merchant, he turned his face in the following year to the great West. In the spring of 1833, Mr. and Mrs. Smith started on their journey, and after four weeks of wearisome travel reached the spot on the west bank of the Mississippi which was destined to be their future home. St. Louis was then little more than a frontier town, but the influx of the New England element, with such representative names as those of Greeley, Gale, Filley, and Bridge, soon began to be felt in its commercial and industrial life. Shortly after his arrival Mr. Smith entered into a copartnership in the wholesale grocery trade with his brother, William H. Smith, and John Cavender, under the style of Smith Brothers & Co. All the partners went to work with a will, each playing the part of porter, book-keeper, and salesman indifferently, and it was not long before the sterling qualities of these thrifty, hard-working Yankees came to be known and appreciated, the new firm soon achieving an enviable reputation for fair dealing and integrity among the merchants of the city.

In Mr. Smith's family circle the habits of industry

and thrift that had been learned among the hills of the Granite State were transplanted to the soil of Missouri. Every dollar saved was added to the capital which was one day to build and endow institutions of learning and philanthropy.

As the years passed by the firm of Smith Brothers & Co. continued to develop and extend their business, keeping pace with the rapid growth of the city and surrounding country, and experiencing the usual vicissitudes of good and bad fortune. The great fire of 1849 inflicted the first and only serious loss that Smith Brothers & Co. ever suffered. It destroyed their store and stock of goods, and temporarily gave a check to their business. It was also the occasion of the retirement of Mr. Cavender from the firm. With fresh ardor and undiminished confidence the Smith brothers again resumed business as soon as a new store and new goods could be obtained, admitting as a partner Levi Parsons, who had been in their employ. The death of Mr. Parsons within a year led to the formation in 1851 of another partnership, to which George Partridge was admitted as a member. The new firm took the name of Partridge & Co., and prospered as the old one had done, James Smith being again, as before, the master spirit. At length, in 1862, weary of the cares and responsibilities of a business life which had lasted for more than a third of a century, Mr. Smith withdrew from the firm of Partridge & Co., and never again engaged in mercantile pursuits. He did not, however, retire from business pursuits, and the large interests which he had acquired in some of the leading banks and business corporations of the city continued to receive his constant attention. For many years he had held the position of director in the Boatmen's Savings-Bank, Provident Savings Institution, Belcher Sugar Refining Company, St. Louis Gas-Light Company, and the Missouri State Mutual Insurance Company, and during the remainder of his active life continued to give them a large share of his time and strength.

As his activity in affairs of business lessened, Mr. Smith's thoughts turned more and more towards works of charity and philanthropy. For many years the Washington University had been a special object of his benefactions. One of the original incorporators, and always a member of the board of directors, he had from the first taken a deep interest in its welfare, and given largely of his means for its support, and for the promotion of its growth and development. These gifts had previously been made as the current needs of the institution from year to year required, and aggregated a large sum; but in 1873 he signalized his devotion to its interests by placing at the disposal of the university, without conditions, bank stock valued at seventy thousand dollars. In these larger benefactions he always regarded his wife as an equal partner, and it was at her suggestion that the last-mentioned gift was made. The purpose to make final disposition of one-half of his property for educational, charitable, and religious uses had been definitely settled in Mr. Smith's mind for years, and in fulfillment of this purpose a will had been executed as early as 1855. When the matter came up for consideration, however, at a later day, it was thought that certain provisions of the will might prove inoperative, being in conflict with the new Constitution of the State. Accordingly Mr. Smith had a new will prepared, in which, after bequeathing one-half of his estate to his wife, and declaring certain minor specific legacies, he devised to the Rev. William G. Eliot, without express conditions or instructions as to its use, the residue of his estate, and named him as his executor. Thus was laid upon the trusted friend the burden of carrying out the charitable purposes which had been cherished so long by Mr. Smith.

In February, 1876, an attack of paralysis prostrated Mr. Smith, but he rallied and was enabled to resume in some degree his old interest in the world and its affairs. In the following summer he sought a renewal of health and strength at the seashore, in Hampton, N. H., and returned in the autumn much refreshed. Towards the close of his life his mind reverted to the old home among the granite hills of New Hampshire, and, animated by the desire to leave something as a memorial of gratitude to the place that had given him birth, he created a trust fund of three thousand dollars, the income of which in perpetuity should be devoted to the purchase of books for the town library of Peterborough, N. H. The summer of 1877 was spent by Mr. Smith at the home of his friend, Josiah C. Palmer, at Hampton, N. H., and on the 15th of October of that year his death occurred. His body, in accordance with his wishes, was taken to Franklin, N. H., and laid beside the remains of his mother and oldest brother. His devoted wife and their adopted son, George, for many years a resident of New York City, still survive him.

It was as a man of business that Mr. Smith was best known to the men of his own time. As a merchant, he had a high sense of commercial honor and integrity, and was scrupulously exact in all his business transactions, both giving and asking what he thought was justly due. He was cautious and conservative in temperament, preferring moderate profits with safety to greater speculative gains; was a good judge of men, rarely making mistakes in his estimates

of them, and possessed that rare quality of mind popularly known as "common sense," which when successfully applied to the management of great enterprises the world calls genius. Money-making he regarded in the light of a duty, as George Peabody is reputed to have done; and, like Peabody, he valued wealth only for its power to benefit mankind. Washington University was the largest recipient of his bounty, and he was its largest single benefactor. His munificent liberality toward that institution sprang from his conviction that the education of the people is the only sure foundation of our form of government, and that the establishment of a great institution of learning in St. Louis would be the best guarantee of the city's future prosperity. Confidently believing that Washington University would one day realize this ideal, he was led to devote to that institution directly or indirectly nearly one-half of all he possessed.

Mr. Smith was a Unitarian in his religious belief, and one of the original members of the congregation afterwards known as the Church of the Messiah. He was conspicuous for his devotion to the interests of the society, and was one of the largest contributors towards the erection of its first two churches and its current expenses. During his lifetime he was a generous giver to the Mission Free School, a charity devoted to the succor of destitute children, and an outgrowth of the Church of the Messiah, a liberal share of its present endowment in real estate having been received from him, as also by his will a further sum of five thousand dollars. Mr. Smith's generosity, however, was by no means limited to the few objects indicated. His sympathies were broad and catholic, and no worthy enterprise was undertaken in St. Louis for the general good during the active period of his long life which did not receive his substantial support.

Although he always took a deep interest in public affairs he never sought or accepted any public office, but was always prompt as a citizen to discharge every duty. In politics he was a stanch Republican, and during the civil war never faltered in his devotion to the Union. Upon great questions of public policy his views were broad and liberal, and it was not in his nature to be a partisan. His manners were genial and kindly, and throughout his conversation ran a vein of wit and humor which made him a delightful companion. Although tolerant of the opinions of others, he was tenacious of his own convictions and frank and outspoken in their expression. In his friendships he was strong and devoted, and always during himself upon the plane of perfect sincerity, he had no toleration for whatever was dishonest or insincere. His mode of life was plain and simple, and temperance and moderation characterized all his habits. Domestic in his tastes, he found his chief enjoyment in the quiet pleasures of his own fireside. Notwithstanding the fact that his early school education had been extremely limited, he was a great reader and keenly enjoyed the society of the best books, of which his library contained a goodly store. Charles Dickens was his favorite among the novelists, and he never wearied of quoting from that author's pages.

No child was born to him, but he took to his heart and home the children of others and cherished them with a father's affection. Still others, whose names cannot be mentioned here, to whom he extended the helping hand, and whose sense of grateful obligation no words could express, will never cease to hold his name in blessed memory.

In March, 1871, Hudson E. Bridge presented the university with $130,000 of the $179,000 stated above as the amount of his contribution, divided as follows: $100,000 for the endowment of the chancellorship and for a library fund, $15,000 towards the erection of a building for the Polytechnic School, and $15,000 for providing it with furniture and apparatus. In recognition of this liberality the board of directors voted that the office of chancellor should receive the title of "the Bridge chancellorship." At the annual meeting of the alumni, March 2, 1872, Hon. Thomas Allen offered the interest for five years at seven per cent. of the sum of $40,000, for the purpose of endowing a chair of mining and metallurgy. His offer was accepted, and a complete School of Mines was organized.

In the following list will be found the names of all who have served the university as directors since its organization, those in *italics* indicating names of the members of the present board of directors:

William G. Eliot, *Wayman Crow*, Seth A. Ranlett, John Cavender, Christopher Rhodes, *Samuel Treat*, *John M. Krum*, *George Partridge*, Phocion R. McCreery, John How, William Glasgow, Jr., George Pegram, N. J. Eaton, James Smith, Mann Butler, Hudson E. Bridge, Samuel Russell, Thomas T. Gantt, John O'Fallon, James H. Lucas, *Henry Hitchcock*, Charles A. Pope, D. A. January, *James E. Yeatman*, Robert Campbell, *Carlos S. Greeley*, *John R. Shepley*, *Albert Todd*, John P. Collier, *John T. Davis*, *George E. Leighton*, *Edwin Harrison*, *Henry W. Eliot*, *M. Dwight Collier*, *William A. Hargadine*, *Samuel Cupples*.

Miscellaneous Schools.—In addition to the public and private schools of St. Louis which are con-

ducted on a non-sectarian basis, there are a number of schools maintained and controlled by religious denominations. The earliest of these and the most important in point of numbers are those established by the Catholic Church. As will be seen in another portion of this work, the Society of Jesus early addressed itself to the task of supplying educational facilities of a superior character to the youth of St. Louis, and it is to be presumed there were already in existence when they arrived on the field several parish schools under the direction of the resident clergy. In 1852 over three thousand children were being educated at the Catholic free schools, which then numbered thirteen in all. Of these, St. Xavier School, at Ninth and Green Streets, numbered 376 pupils; Tenth Street School, 340; the Cathedral School, 270; and the Biddle Street School, 370. In 1870 the total attendance of scholars had increased to between seven thousand and eight thousand. The largest of the schools then were St. Joseph's, SS. Peter and Paul's, and St. Patrick's. All the male schools are under the charge of the Christian Brothers, who when they arrived in St. Louis in 1849 numbered only three individuals. In 1870 their number had increased to fifty-seven, with a novitiate averaging thirty, and they then had in charge one college, with an attendance of 350 students; an academy, with an attendance of 250; eight parish schools,—one at St. Vincent's Church, four teachers, 350 pupils; one at St. John's, three teachers, 200 pupils; one at the Annunciation, two teachers, 130 pupils; one at St. Patrick's, three teachers, 300 pupils; one at St. Lawrence's, two teachers, 130 pupils; one at St. Bridget's, three teachers, 300 pupils; one at St. Michael's, two teachers, 120 pupils; and one at St. Mary's, Carondelet, two teachers, 130 pupils. In the parish schools, besides the elementary branches, reading, writing, and arithmetic, the pupils are taught geography, history, grammar, algebra, and linear drawing.

College of the Christian Brothers.—It is not generally known that Archbishop Kenrick, of St. Louis, was the first Catholic prelate to invite the Brothers of the Christian schools of France, who as a religious order had been founded in 1681 by the venerable J. B. de la Salle, to establish themselves in the United States. The first institution opened by them in this country, however, was in Baltimore, in 1846. They did not come to St. Louis until 1849, locating then in the Rider mansion, at the corner of Eighth and Cerré Streets, which has ever since served all the purposes of an excellently-conducted educational institution. The founders of the present college were three brothers, Gelisaire, Peter, and Dorothy. The corporation of the "Academy of the Christian Brothers" was organized in August, 1849, and chartered in 1855 by the State Legislature, the incorporators being Brothers Patrick, Paulian, Barbas, Dorothy, and Laurence. The first and successive presidents have been Brothers Patrick, Ambrose, Edward, and James, and the present board of officers is composed of Brother James, president; Brother Virgil, vice-president and secretary; and Brother Edward John, treasurer. On arriving in St. Louis the brothers opened (Sept. 11, 1849) a parish school at the Cathedral, and subsequently established schools in several other parishes of the city.

The Cathedral School at its opening consisted of two classes, and a third was added in November. The school prospered, and by the middle of March, 1850, scarcely more than half a year after its establishment, the patronage had grown so large that the number of brothers was increased to nine, and ere the end of May following had grown to twelve. In June, 1850, the brothers purchased the two-story brick residence at the corner of Eighth and Cerré Streets, and established themselves there, continuing, however, the schools as they then existed.

The closest economy was practiced, and within a year additions were being built to the brick residence. In 1852 the first improvements were completed, and the educational interests of the brothers were all consolidated under one roof. The college was founded in 1851, but not formally opened until 1852.

Brother Patrick was placed in active charge by the superior-general, and from that date, under the able management of his presidency, its success was onward and upward. For eight years Brother Patrick conducted its affairs with the highest success, until he was transferred by authority and placed in control of other important branches of the order.

Brother Patrick was succeeded in the presidency by Brother Ambrose, who filled the chair for three years, and he by Brother Edward, who served five years, until in 1870 the present incumbent, Brother James, was inducted into the office, which he has filled with such ability and fidelity as to cause the pressing demand for more facilities in the work to which he has dedicated his life.

The location in 1869 of the freight depot of the old Atlantic and Pacific Railroad Company on the square directly across the street from the college buildings, and the subsequent erection in the vicinity of the college of the Union Depot and other structures for railroad purposes, rendered the neighborhood extremely noisy, and the brothers began looking about for new quarters. It was not until 1871, however

that a suitable site was found. In that year Brother James, president of the college, purchased the Côte Brilliante property of the late James H. Lucas, comprising about twenty-one acres. The site was pointed out by Rev. Father Henry, of St. Lawrence O'Toole's Church. The deed was made out and the purchase-money, fifty thousand dollars, in part paid on the 17th of March, 1871. That he might never again be annoyed for want of room, Brother James also purchased about nine acres adjoining the Lucas tract on the north, making in all nearly thirty acres. The site chosen was the spot that Mr. Lucas once set apart for an observatory which he contemplated building and presenting to the city of St. Louis. Various causes prevented the commencement of work on the building until 1877. The corner-stone was laid amid appropriate ceremonies in the spring of that year.

The structure, which is in the shape of a cross, consists of a central edifice and four wings, and was designed by James McGrath. The total frontage of the building is three hundred and seventy feet. Some idea of its magnitude may be gathered by remembering that the total length on Walnut Street of the Southern Hotel is only three hundred feet. The total depth of the college building is two hundred feet. The southern wing of the building is eighty feet in length by fifty in depth. The total elevation is about one hundred and ten feet, divided into three stories. The first story, which is nearly twenty feet in height, contains a magnificent vestibule, finished in white marble and Philadelphia enameled brick, and four grand parlors and reception-rooms. The second story, which is about thirty feet from floor to ceiling, is intended solely for the purposes of a library. The collection of books belonging to the college numbers nearly forty thousand volumes and manuscripts. The apartment is fitted up with iron book-cases similar to those in the Mercantile Library, and contains the accessories, usual to such apartments, of pictures and statuary. The third story, about forty-five feet in height, contains the college hall. The dimensions of the hall are the same as those of the library, and it is capable of seating one thousand people.

The north, south, and east wings of the building are five stories each. The rooms on the second, third, and fifth floors of the south wing are given up for class purposes; those in the east and west wings are used for the college dormitories. Each of the four wings leads to the grand rotunda, which may be termed the architectural triumph of the whole edifice. The rotunda is sixty feet square, the same dimensions exactly as the court-house rotunda. The college rotunda, however, is free from the unsightly pillars which detract so much from the beauty of the court-house rotunda. The college rotunda is surmounted by a glass roof, so that it is a veritable well of light for the entire institution. The building is supplied with a steam passenger elevator. One admirable feature of the internal architecture of the building is the system of ventilation. Each room in the vast edifice is supplied with its own air shaft and hot-air register, so that a constant circulation of pure air is insured. The heating of the rooms is by steam, and the boilers for generating heat and power are situated in a separate building, located in the angle formed by the junction of the west and south wings. This building is about thirty feet from the walls of either of these wings, so that, save in the kitchen, there is not any fire in the whole building from year's end to year's end. The kitchen is located in the south wing. It is built altogether of iron and brick, so that in the contingency of a fire breaking out in this room it could not be communicated to any other part of the building. The dining-room is in the south wing immediately beneath the parlors. The other apartments in the basement are designed for chemical laboratories, store-rooms, pantry, and the like. Underneath the basement is a sub-cellar.

In the course of a few years the brothers will erect a separate building in some suitable part of the grounds for an astronomical observatory. The playground for students is at the southwestern corner of the college inclosure. It contains ten acres of ground, and is sufficiently remote from the college to prevent the noise of the players from disturbing the scholastic quiet within. The grounds attached to the college are bounded on the east by King's Highway, on the south by St. Charles Rock road (now Easton Avenue), on the west by Union Avenue, and on the north by Côte Brilliante Avenue. The principal entrance is at the corner of King's Highway and St. Charles Rock road. The site is on the summit of the hill, which is one hundred and sixty-eight feet above the city directrix.

From the summit the hill declines gradually to the St. Charles Rock road, and in the rear of the building is a beautiful grove of forest-trees covering several acres. That tract is now within the city limits, and is accessible by means of several good routes. The extension of the Franklin Avenue street cars passes immediately by the main entrance, the Union Avenue depot of the Narrow-Gauge Railroad is within a quarter of a mile of the grounds, and the Forest Park depot of the St. Louis, Kansas City and Northern Railroad is but one mile distant. The site has been beautifully favored by nature, and besides is suscep-

tible of great improvement, and the brothers have added art to nature's work. From the main entrance at the corner of King's Highway and the Rock road, a broad drive ascends the hill and circles around the building to the grove in the rear.

The new college is four miles from the court-house, and was opened at the beginning of October, 1882. The building was not quite completed, nor is it yet, but enough was made ready to answer present demands. It is large and commodious, a solid work, and with considerable pretensions to architectural beauty. The school is in a very flourishing condition, with the prospect of a highly successful future in its new career.

By authority of the superior-general, Brother James has founded a system of free scholarships. These scholarships are of two kinds, full scholarships and day scholarships. Five thousand dollars will establish a full scholarship, one thousand dollars a day scholarship. A full scholarship entitles the holder to board and tuition; a day scholarship to tuition only. Each founder of a scholarship reserves the right to educate one student for twenty years. After twenty years the college is allowed to throw it open to competition, or the founder may leave it so from the beginning. Several scholarships have already been established, and Brother James has assurances that a number of others will be taken.

THE CONVENT OF THE SACRED HEART, Maryville, is situated on Maramec Street, near Pennsylvania Avenue. On Aug. 22, 1818, five ladies of the Sacred Heart, with Madame Duchesne as superior, arrived in St. Louis, having come from France, by way of New Orleans, at the solicitation of Bishop Dubourg, and proceeded to St. Charles, where they opened a school. Meeting with insufficient encouragement, they removed to the bishop's farm, near Florissant, on Sept. 3, 1819, and on December 24th following occupied their own house in the town of Florissant, where they conducted a school and academy until they finally removed to St. Louis, selling their property in July, 1846, to the Sisters of Loretto, by whom this educational work has since been carried on. Madame Duchesne, who came in 1818, was made vicar of Upper and Lower Louisiana, and governed the province until 1840, when it was transferred to Madame (Princess) Galitzin, of the house at Grand Coteau, La., who died in 1842. Madame Cutts held the office till 1854, and Madame Jouve till 1865, when the vicariate was divided into two, Western and Southern, St. Louis being in the Western, with Madame Galway as vicar, who was followed in 1869 by Madame Gauthereaux, during whose administration Chicago was made the mother-house. Upon Madame Gauthereaux's death in 1872, and the completion of the convent at Maryville, the dignity was transferred back to St. Louis (where it will henceforth be maintained), with Madame Tucker as vicar. Madame Boudreaux became vicar in 1876, and at her death in 1880 the present vicar, Madame Niederkorn, succeeded. The work of the order in St. Louis began in 1827, when Judge John Mullanphy donated to the ladies a tract of twenty-six acres, of which the block on Fifth between Hickory and Labadie Streets is the remnant, on condition that they should perpetually support twenty orphan girls. On the property stood a house (considered palatial in those days), which has been the nucleus of the present cluster of buildings. In 1837 the chapel was built on the south side of the original structure; in 1844 class-rooms were added on the north, and in 1859 the last and large building was erected at the north end. The Maryville property, containing twenty-one acres, was bought of John Withnell in 1864, for forty thousand dollars, which price has since been swelled by interest to almost sixty thousand dollars. The construction of the convent building was begun in 1867, and it was opened in August, 1872. The structure has a front of two hundred and fifty feet, with a depth of sixty-five feet, and three rear wings (the southern one of which only is finished), the central one to be one hundred and twenty by eighty feet, and the others each one hundred by sixty feet. The central wing, when completed, will constitute the chapel, now temporarily located in the southern wing, and in which the services are conducted by the Franciscan Fathers of St. Anthony's Church close by. At this convent there are stationed seventy-two ladies, who conduct an academy for boarding pupils (of whom there are now one hundred and twenty) exclusively and the parochial school for the girls of St. Anthony's parish. At the old house on Fifth and Hickory Streets there are twenty-nine ladies, who conduct a day-school for girls and have charge of the orphans. The Western vicariate, of which this is the mother-house, has jurisdiction over the houses of Chicago, St. Charles, St. Joseph, Omaha, and Timaru, New Zealand (the first house of the order established in Australasia), and numbers in all two hundred and seventy-two ladies.

THE CONVENT OF THE NUNS OF THE VISITATION was originally established in Kaskaskia, Ill., in 183[illegible], being a branch of a house of the same order still existing in Georgetown, D. C. For nearly eleven years the convent prospered as one of the most popular seminaries for the education of young ladies in the West, but in the great freshet of 1844 the whole

town of Kaskaskia was laid under water, and the inhabitants compelled to take refuge on the bluffs beyond the Okaw River. The convent grounds extended to the banks of the Okaw, but as the location was elevated, it was thought secure. About the 1st of April the Mississippi River was very high and still rising. As this rise occurred every spring nothing serious was apprehended, but on the night of June 21st the water rushed into the convent cellar. Next morning the well caved in.[1] The greatest danger lay in the nature of the soil, for under the stratum of sand and clay lay one of quicksand, and it was apprehended that the whole would sink in the mighty flood.

The convent could now be approached only on horseback or in boats. Friends urged the nuns to desert the convent for their safety, and at six o'clock that evening Amedée Menard brought a flat-boat propelled by stout oarsmen, and taking on board Mother Isabella, with a number of nuns and pupils, conveyed them to his own residence on the neighboring bluffs. Next morning, Sunday, Father St. Cyr said mass in the convent chapel for the last time for those who remained. On going to breakfast the sisters found the water oozing in under the planks at one end. The bricks of the kitchen hearth sank when trodden upon, so that with all expedition, as soon as breakfast was over, the inmates began to remove tables, dishes, and kitchen furniture to the assembly-rooms on the next floor, where they passed the rest of the day. In the evening they bade adieu to the doomed convent and withdrew to the bluffs. During two days they were kindly entertained at the Menard mansion, and early Wednesday morning a steamboat came up the Okaw, and immediately after breakfast the sisters, with their sixteen pupils, went on board. The day was occupied in removing their furniture from the convent to the boat, and late in the afternoon they were under way for St. Louis. Here, by the kindness of Mrs. Ann Biddle, the refugees were installed in her elegant and spacious mansion on Broadway, which they occupied for two years.

In July, 1846, they rented the archbishop's newly-erected building on South Ninth Street, and continued to occupy it until 1858, when Mrs. Ann Biddle, having at her death bequeathed the sisters a handsome tract of land on Cass Avenue, above Twentieth Street, suitable buildings were erected for them. The foundations were laid in the autumn of 1854. On April 13, 1855, the institution was incorporated under the title of the Academy of the Visitation at St. Louis. In May, 1858, the sisters moved to the new location, and on Oct. 16, 1863, laid the corner-stone of the west wing, the convent proper, of which they took possession June 21, 1865.

The convent buildings are extensive and beautifully situated in large grounds well shaded and fitted for the recreation of young ladies. Mother Agnes Brent was the first mother superior, and her successors have been Sister Helen Flanigan, Sister Seraphina Wickham, Sister Isabella King, Sister Agatha Russle, Sister Aimée Brent, and Sister Vincentia Marotte, the present mother superior.

VIEW OF KASKASKIA IN 1840.

ST. JOSEPH'S CONVENT AND ACADEMY.—The congregation of the Sisters of St. Joseph was founded by Rev. P. J. Medaille, S.J., and had its first establishment in the town of Puy, in Velay, France, where Madame Lucretia de la Planche gave the sisters an abode in her house until on Oct. 15, 1650, the Bishop of Puy gave them charge of the orphan asylum of that city. In 1836, at the invitation of Bishop Rosatti, six sisters of this order came to St. Louis and established themselves at Cahokia, in Illinois, where they conducted for nearly eight years a flourishing school. On Sept. 12, 1836, the first novitiate of the order was founded in Carondelet, and was presided over for twenty years by Mother Celestine. It occupied at first a log cabin, fifteen feet square, and its one room served at once for oratory, dormitory, refectory, kitchen, and parlor. A frame shed was added and used for parochial school purposes.

[1] In this well a man afterwards perished, being swallowed up by the quicksand.

The great flood of 1844 compelled the sisters to abandon their establishment at Cahokia, and soon after the present grounds at Third and Kansas Streets, Carondelet, were given to them by Judge Bryan Mullanphy, and a large brick building was erected on them, which was burned down in 1858. The present spacious and stately structure was begun immediately afterwards, and opened with eighty boarders. It is the mother-house of the order for the United States, and has under its jurisdiction sixty-five subordinate establishments, including three provincial novitiates, five hospitals, ten orphan asylums, one deaf-mute institute, and several academies. The total number of sisters owning allegiance to this house is eight hundred.

THE URSULINE CONVENT AND ACADEMY was first organized in 1848 by seven Ursuline Sisters, who came over from Germany upon an invitation from the archbishop. The convent was founded under the direction of Very Rev. Joseph Melcher, V.G. Its first location was on Fifth Street, below the French market, in a house bought by the sisters. In 1849 the king of Bavaria donated a large sum of money to the Ursuline Sisters, which enabled them to build a convent. They purchased the ground on which the present building is located, and erected a building in 1850. In 1857 the chapel was built, and in 1866 the north wing was added. The buildings are now extensive, covering an entire block on State Street and Russell Avenue. Rev. Mother Johanna is the superior, and Very Rev. Henry Muhlsiepen, V.G., is the manager. Although this convent is one of the oldest and most extensive in the city, it has never been incorporated.

ST. ELIZABETH INSTITUTE, situated on Arsenal Street, between Gravois road and Grand Avenue, and conducted by the Sisters of the Precious Blood, was removed to St. Louis from O'Fallon, Mo., in the fall of 1882. This institution has for its special object the training of young ladies who already possess the usual knowledge of the elementary branches in all that is required to fit them for assuming the duties of housekeeping. Its present quarters are those formerly occupied by the convent and asylum of the Sisters of St. Mary.

ST. PHILOMENA'S ORPHAN ASYLUM AND SCHOOL, northwest corner of Summit and Clark Avenues, is conducted by the Sisters of Charity from Emmittsburg, Md., where the mother-house of the order for the United States is located. The institution was established about 1844, on the southwest corner of Fifth and Walnut Streets, where the St. James Hotel now stands; but the location grew to be unsuitable, owing to the encroachments of trade, and in 1867, Archbishop Kenrick gave to the sisters their present lot, which has a front on Clark Avenue of two hundred and thirty-five feet. The present building was at once commenced, and was finished and occupied in 1868. It is a handsome brick structure, three stories in height, the main building one hundred and sixty by fifty feet, and the two wings each sixty feet long. The property on Fifth Street was sold for seventy-eight thousand dollars, and the proceeds were applied to the erection of the present building. Here are conducted the girls' parish school of St. Malachi's Church, taught by four sisters, and attended by three hundred pupils, and a select school for young ladies, numbering eighty-five pupils, in charge of three of the sisterhood. But the most important work of the institution is the care and education of the orphans who, at a sufficient age, are sent hither from other Catholic orphan asylums, and who here receive an industrial education. Several of the sisters devote themselves exclusively to this mission; sewing is taken in, and some of the finest sewing done in the city is the handiwork of the sisters and of their pupils in the sewing classes. Only female orphans are received, and for those who are proficient in their avocations places elsewhere are found by the sisters, who never permit any of their pupils to roam the streets in search of places or work. Moreover, the asylum is made a home for its inmates, and to it they are welcomed back whenever, from no matter what cause, they find themselves out of a place. There are at present fifteen sisters in this asylum, and ninety-two orphans.

LORETTO ACADEMY, corner of Jefferson Avenue and Pine Street, is conducted by the Sisters of Loretto, of the same society as those who have charge of the institution of the same name at Florissant. It is included in the charter of Loretto Academy, Florissant being a branch of that institution, in which its property is vested. The title of the corporation is "Sisters of Loretto, Missouri."

The first school conducted in St. Louis by the Sisters of Loretto was situated on the corner of Tenth and Morgan Streets. This they subsequently discontinued, taking charge of the parochial school connected with St. Michael's Church on North Eleventh Street. The property on Jefferson Avenue and Pine Street was donated to the Sisters of Loretto by Mrs. Anne L. Hunt in 1868 for educational purposes. The foundation for an academy and boarding-school for young ladies was laid during the same year, but the projected building was not finished, and the property was offered for sale with the consent of Mrs. Hunt. No acceptable offer was made for the lot, and in 187[illegible] Mother Ann Joseph Mattingly, of the academy

Florissant, began, with the approval of the general superior, at Loretto, Ky., the erection of a superstructure on the foundation already laid, but the plan was so modified as to adapt it to an academy exclusively for day scholars. The building, a plain but commodious and substantial structure, was finally made ready for occupancy Sept. 7, 1874.

Its chapel was dedicated to divine worship on Dec. 8, 1874, under the title of "The Seven Dolors." Mother Simeon James was appointed the first superior, and still retains that office. The first corps of teachers consisted of Sisters Mary Austin Gough, Macrina Hayden, Clotilde Bertant, M[illegible] Oda Smith, Octavia Robertson. Those who compose the present faculty are Sisters Mary Austin Gough, Beatrice Doyle, Dositheus Madigan, Clotilde Bertant, Mary Stephen Duffy, Marie Louise O'Connor, Bernadette Forbes, Mary Denis Abell, Clarasina Walsh, Odila Bishoff, Christina Dacey, Pauline Reed.

The Loretto Academy is well patronized, there being a regular increase of pupils every succeeding term. The total number of scholars registered for the session ending June 21, 1875, was 50; the total number registered for the session ending June 21, 1882, was 148; the number registered for the session of 1882–83 up to Jan. 22, 1883, was 156.

KEMPER COLLEGE, named after Right Rev. Jackson Kemper, D.D., Bishop of Missouri, was organized under the auspices of the Protestant Episcopal Church in 1836, in which year one hundred and twenty-five acres of land were purchased and buildings erected with twenty thousand dollars that had been secured in the Eastern States. The institution, which was located about four miles from St. Louis in a southwestwardly direction, on a healthful site surrounded by beautiful scenery, was opened under the charge of Rev. P. R. Minard, Oct. 15, 1838. The following gentlemen were the first trustees of the college: Bishop Kemper, Robert Wash, William P. Clark, J. L. English, Charles Juline, Rev. P. R. Minard, Col. J. C. Laveille, Augustus Kerr, N. P. Taylor, Edward Tracy, J. P. Doane, W. P. Hunt, H. L. Hoffman, J. Spaulding, Daniel Hough, Henry Von Phul, H. S. Coxe, and Capt. J. Symington. In 1840 a medical department, of which a full sketch is given elsewhere, was established by Dr. J. N. McDowell, and in the winter of 1846 was established as an independent organization under the title of the Missouri Medical College. The literary department of Kemper College continued in existence until 1845, when it became financially embarrassed, and the property was sold. The insane asylum now stands on a portion of the grounds.

THE CITY UNIVERSITY, at one time a popular and flourishing school, enjoyed a comparatively brief existence. The building, which was situated at the corner of Sixteenth and Pine Streets, was completed and made ready for occupancy in 1858, but was not opened as an institution of learning until the fall of 1859. The officers of the corporation at that time were Hamilton R. Gamble, president; Edward Bredell, vice-president; Daniel H. Bishop, secretary;

LORETTO ACADEMY.

faculty, Rev. E. C. Wines, D.D., president; David B. Tower, John W. Atcheson, Edward Keller. The money which had been raised prior to the opening was just sufficient, it seems, to pay for the building and purchase only a meagre and inadequate supply of furniture, apparatus, and the other usual paraphernalia of a well-furnished school. At the expiration of two years the board of trustees, upon an inspection of their finances, found that they had conducted their experiment at a net loss of thirteen thousand dollars. Accordingly, in the summer of 1861, they dismissed the faculty, suspended their school, funded their floating

debt, mortgaged their property, and, to secure payment of the debt, leased the building to Edward Wyman for a series of years, to conduct the school as a private enterprise under their appointment as president, and upon a rent expressed by a percentage of tuition fees. Mr. Wyman, who had previously been a highly popular educator, tided the institution over the shoals and quicksands of the civil war, and for some years subsequently conducted it with marked success.

DENOMINATIONAL SCHOOLS.—The following is a list of the educational institutions, in addition to those already given, which are conducted by religious denominations in St. Louis: School of the Good Shepherd, 2029 Park Avenue, conducted by the Sisters of the Good Shepherd of the Protestant Episcopal Church; St. Francis College, Church Street, N. W. corner of Clay Avenue; St. Vincent's Academy, Grand Avenue, corner of Locust Street, conducted by the Sisters of Charity.

PAROCHIAL SCHOOLS.—Annunciation, Chouteau Avenue, cor. Seventh; Assumption, Sidney, cor. 8th; Benton Street M. E., 13th, N. W. cor. Benton; Bethania, 24th, N. W. cor. Wash; Bethania German Lutheran, Natural Bridge plank-road near Prairie Avenue; Cathedral, Walnut Street between 2d and 3d; Evangelical Lutheran, Victor, N. E. cor. Easton; Bethlehem Evangelical Lutheran, 13th, S. E. cor. Salisbury; German Evangelical Lutheran High School, Barry, cor. Fulton; German Lutheran, Beckville, Gravois road; German Protestant Evangelical, 13th, cor. Webster; German Catholic, Bellefontaine road near College Avenue; German Evangelical Lutheran Zion's School, cor. Warren and 15th Street; German Friedens, Hall Avenue near 3d, Lowell; German Evangelical, 810 Decatur Street; German Lutheran Evangelical, Jefferson Avenue between Miami and Winnebago; German Protestant Evangelical, 1840 S. 9th St.; German Evangelical Friedens, 13th, cor. Newhouse Avenue; German Lutheran Grace School, St. Charles Rock road opposite St. Louis Avenue; Holy Ghost Evangelical, 1937 S. 9th; Holy Trinity, 1108 Mallinckrodt; Immaculate Conception, 1527 S. 8th St.; Immanuel's Evangelical Lutheran, 16th and Morgan; Industrial School for Girls, Morgan, S. E. cor. 23d; Mission Free School, 9th, S. W. cor. Wash; Northern School of the Church of the Holy Ghost, 1123 and 1125 N. 11th; Our Lady of Perpetual Succor, w. s. 14th near College Avenue; Sacred Heart, 18th, cor. Warren; Sisters of St. Joseph, Marion, N. W. cor. Fulton; St. Agatha's, 8th, cor. Utah; St. Anthony's, Maramec, N. W. cor. Stringtown road; St. Augustine's, w. s. W. 22d near Hebert; St. Bernard, Tesson Avenue near Sarpy Avenue; St. Boniface Convent School, 34 Street, cor. Schirmer, Carondelet; St. Bridget's, w. s. 25th Street between Carr and Biddle; St. Columbkille's, 4th near Hurck, Carondelet; St. Elizabeth's Catholic (Colored), 811 N. 15th; St. Francis de Sales, Gravois road, cor. Ohio Avenue; St. Francis Xavier, 10th, S. E. cor. Christy Avenue, and 922 Morgan; St. John's Evangelical, 14th, S. E. cor. Madison; St. John Nepomuck's, 1623 Rosatti; St. John's, 16th cor. Chestnut; St. John's Female, 1520 Walnut; St. Joseph's Convent School, Marion, cor. Fulton; St. Joseph's Free Academy, Clark Avenue, cor. 15th Street; St. Joseph's, 11th, between O'Fallon and Cass Ave.; St. Joseph's, e. s. 2d near Kansas, Carondelet; St. Kevins's, Compton Avenue, cor. Sarah; St. Lawrence O'Toole's, 1415 O'Fallon; St. Liborius, North Market, cor. 19th; St. Luke's Evangelical, Scott Avenue, cor. Jefferson Avenue; St. Malachi's, cor. Summit and Clark Avenues; St. Mark's Evangelical, cor. Soulard and Jackson; St. Mark's German School, 744 S. 3d; St. Mark's, 10th, cor. Biddle; St. Mary's, Help of Christians, 14th near College Avenue; St. Mary's, e. s. 3d near Illinois, Carondelet; St. Michael's Girls' School, 11th, cor. Benton; St. Nicholas's, Lucas Avenue near 20th; St. Patrick's, 1115 N. 7th; St. Paul's German Lutheran, Henry, near Bryan Avenue, Lowell; St. Paul's, 1814 Decatur; St. Peter's Evangelical, 1509 Carr; St. Teresa's, Grand Avenue near Parsons; St. Thomas's, Lowell; Trinity Evangelical Lutheran, 6th Street near Kirk, Carondelet; St. Vincent de Paul, Decatur, cor. Park Avenue; SS. Peter and Paul, cor. Allen Avenue and 8th; Zion Evangelical (German), Benton, cor. W. 29th; Zion Evangelical Lutheran, Benton, S. W. cor. 13th; Zion Heiligen Kreuz, Ohio Ave., cor. Potomac.

CHAPTER XXII.

LIBRARIES.

AT a very early period the citizens of St. Louis took action looking to the establishment of a public library. On the 14th of February, 1811, notice was given of a meeting to be held on the 16th of the same month, at the house of Henry Capron, to organize an association for that purpose. It was also proposed to establish in connection with the library "a museum for such natural curiosities as may be offered." In April of the same year mention is made of the fact that John Audubon and Ferdinand Rozier

of Ste. Genevieve, had dissolved partnership, Audubon having sold his interest to Rozier. This "John Audubon" was John James Audubon, the celebrated naturalist, who was born in Louisiana, May 4, 1780, and died in New York, Jan. 27, 1851. From earliest childhood he displayed great fondness for studying the habits of birds. Of those which he kept as pets he made careful sketches, which, considering his youth, were surprisingly accurate. When about twenty-seven years of age he removed to Henderson, Ky., and in 1810 made the acquaintance of Alexander Wilson, the celebrated Scotch ornithologist, whom he accompanied in his expeditions to the western country in search of specimens. In 1811, Audubon went to Florida, where he collected a number of subjects for his pen and pencil. From Florida he appears to have gone West, and to have established a trading-post at Ste. Genevieve. He did not remain long at this point, however, and in 1824 we find him in New York, endeavoring to arrange for the publication of his writings and drawings. Two years later he sailed for England. He was warmly welcomed by British and Continental naturalists, and speedily secured one hundred and seventy-five subscribers, at one thousand dollars each, for his famous work "The Birds of America." In 1829 he returned to the United States, where he collected material for another work, "Ornithological Biographies." In 1832 he made another visit to England, but returned in the following year. After completing a new and enlarged edition of the "Birds of America," he projected a work on the "Quadrupeds of America," but died before it was published. His sons, however, finished it, but they also died without writing a biography of their father, as they had hoped to do. In April, 1843, Audubon, the elder, again visited St. Louis. The notice of his arrival stated that he was registered at the Glasgow House, and that he intended starting in the boat of the American Fur Company for the mouth of the Yellowstone, whence he proposed to proceed to the Rocky Mountains with several gentlemen, among whom was Sir William Stewart, of Scotland. Mr. Audubon's object in undertaking this journey was to collect new specimens of animals and birds.

On March 1, 1819, the St. Louis Debating Society, through a committee, consisting of Thompson Douglass, Horatio Cozens, Jeremiah Conner, Henry W. Conway, and Arthur Nelson, submitted

"to the citizens of St. Louis the following constitution for a library to be established in this place:

"SEC. 1. The stockholders, or subscribers, and their successors shall be associated by the name and style of 'The St. Louis Library Company.'

"SEC. 2. The amount of stock of the said library shall be five thousand dollars, in two hundred shares of twenty-five dollars each.

"The undersigned, having been appointed commissioners by the St. Louis Debating Society, inform the public that the books of subscription will be opened on the tenth day of the present month, at ten o'clock A.M., at the store of Dr. Nelson and at Mr. Bennet's tavern."

Then followed the names of the committee as given above. This appears to have been the first movement looking towards the establishment of a public library, and there is no evidence showing that it was even partially successful.

On the 28th of January, 1824, a meeting of citizens favorable to the establishment of a circulating library was held at the mayor's office; William Carr Lane presided, and Archibald Gamble acted as secretary. A constitution was submitted by Charles S. Hempstead, and it was adopted. Rev. Solomon Giddings, Wilson P. Hunt, Josiah Spalding, Capt. Gabriel Paul, Horatio Cozens, Hon. James H. Peck, and Daniel D. Hough were appointed a committee to solicit subscriptions. Subsequently a permanent organization was effected under the name of the St. Louis Library Association, and early in February the committee reported that they had received books from about fifty persons, the number of copies amounting to about eight hundred. The price of a share in the corporation was five dollars, payable in money or books. Within the year eleven hundred and six books were collected, and one hundred and eighty-one shares sold.

At a meeting of the subscribers to the St. Louis Reading Association, held July 7, 1831, Henry S. Coxe chairman, and C. F. Randolph secretary, James Clemens was elected president for the ensuing year, John F. Darby secretary, James S. Thomas treasurer, and Henry S. Coxe, James L. Murray, and C. F. Randolph board of managers. In July, 1833, Dr. Garnier, Professor of Modern Languages, was elected librarian of the St. Louis Library, "Col. Delaunay, the late incumbent, having received a place in the New Orleans custom-house." In October of the same year Theodore L. McGill, Thomas Andrews, and James P. Spencer announced to the directors of the St. Louis Library Association the donation of two hundred and fifty dollars to the library by "the members of Missouri Lodge, No. 1."

On the 26th of January, 1839, Messrs. Fowzer & Woodward, proprietors of the "Literary Depot," advertised that they were making an effort to enlarge the circulating library which they had then recently established in St. Louis.

Mercantile Library.—On the 30th of December, 1845, eight gentlemen engaged in mercantile pursuits

met to form an organization whose object was the establishment of a permanent library. At a subsequent meeting at Concert Hall (Jan. 13, 1846) a constitution was adopted, and a board of directors chosen. On the 2d of February following collections were reported to the amount of eighteen hundred and nine dollars and twenty-five cents, and subscriptions aggregating four hundred and ninety-eight dollars. Rooms for the library were secured at the northeast corner of Pine and Main Streets. Josiah Dent was elected first librarian, and on the 9th of April, 1846, the new library was thrown open to the public. At the close of this year (1846) the library contained 1689 volumes, and its membership numbered 283. During the year it had issued 720 volumes; its cash receipts had been $2689.92, and the property acquired was valued at $1954.35. In September, 1846, the library was removed to roomier quarters at Nos. 110 and 112 Glasgow Row, Fourth Street, and on the 16th of February, 1847, the association was incorporated by an act of the Legislature. James E. Yeatman was the first president, and from the start was one of the most energetic and unflagging promoters of the enterprise. In 1848 he was succeeded by Alfred Vinton, who held the office two years. Mr. Vinton presented the library with many valuable books and other gifts. To Mr. Vinton is mainly due the creation of a building fund, which he suggested and promoted with characteristic energy and enthusiasm. At the annual meeting of the association held on the 11th of January, 1846, the president made the following report:

Number of members for 1846	261
" " " " 1847	360
Increase of members	99
The members for 1847 consisted of:	
Life members	20
Beneficiary members	41
Merchants	147
Clerks	152
The receipts into the treasury were:	
For 1846	$2664.44
For 1847	2541.67
Total	$5206.11
The expenditures for the same period were	5141.88
Leaving the treasurer	$54.23
Number of volumes purchased in 1846	1018
Presented	608
Number of volumes purchased in 1847	648
Presented	108
Total number	2282

There were twenty-four periodicals subscribed for and received, of which twelve were foreign and twelve American publications. The number of members who took books from the library for perusal was only one hundred and twenty-five, out of a total of four hundred and thirty-three members. The number taken out from the origin of the association to the date of the report was stated to be two thousand one hundred and fifty.

The library-rooms were greatly enlarged during the year. The two houses adjoining the Odd-Fellows' Hall were thrown together and used by the association. Gas-light was also introduced into the room.

During 1850 one thousand and twelve dollars was secured for the building fund, and in January of the following year H. E. Bridge, the president, proposed the organization of a stock company distinct from the library association in order to expedite the raising of the funds needed for the construction of the new building. The company was formed at once, and was incorporated Feb. 17, 1851, under the title of the Mercantile Library Hall Company of St. Louis, with authority to issue stock in shares of ten dollars each, to purchase a lot and erect thereon a building for the library, the library association to be permitted to occupy such building free of rent, upon their defraying all expenses for taxes, insurance, and repairs, and further paying to the hall company six per cent. annual interest on all the stock held by the latter. The company was required to transfer the premises in fee-simple to the library association as soon as the latter should have become possessed, by purchase or otherwise, of the entire amount of stock issued by the former. Stock was issued by the company to the amount of one hundred thousand dollars.

At the annual meeting of the stockholders of the Library Hall Company, held on the 19th of January, 1852, J. H. Lucas presiding and C. K. Dickson and S. Humphreys secretaries, the following were appointed a committee to solicit subscriptions to the stock of the company:

A. Vinton, A. Abeles, J. A. Allen, J. H. Alexander, C. P. Chouteau, Calvin McClurg, Hiram Shaw, J. E. Yeatman, H. E. Bridge, W. H. Belcher, Joseph Charless, Wayman Crow, John How, Charles K. Dickson, J. R. Hammond, J. B. Sickles, R. Campbell, A. B. Chambers, Morris Collins, J. E. Woodruff, William M. Morrison, Solon Humphreys, I. H. Sturgeon, John T. Douglas.

The following were elected directors: John A. Allen, George Collier, Alfred Vinton, Conrad R. Stein, J. E. Yeatman, Hudson E. Bridge, William M. Morrison, H. D. Bacon.

At this meeting the directors reported that they had purchased from Alexander Finley fifty-seven and a half feet of ground at the corner of Fifth and Locust Streets, for the sum of thirteen thousand five hundred dollars, and fifty-seven and a half feet next adjoining for twelve thousand dollars. This last-named lot was claimed by Col. Brant and also by Mr. Robertson, both of whom executed bonds to convey their title as soon as it should be established by law, the library

company paying the purchase-money to the successful litigant.

The board of directors offered premiums for plans for the proposed buildings, one hundred and fifty dollars for the best and fifty dollars for each of the three next best. Eleven plans were submitted by Messrs. Aldrich, Andrews, Barnett, Edgart, Walsh, Greenleaf, Johnston, Mitchell, Pond, Vogdes, and Wright, all of whom were or had been residents of St. Louis.

None of the plans, however, fully met the ideas of the board, and it was only after prolonged consideration, and with hesitancy, that the premium of one hundred and fifty dollars was awarded to Robert S. Mitchell, and the three premiums of fifty dollars each to Messrs. George I. Barnett, Charles H. Pond, and E. Greenleaf.

Unable to adopt entirely any one of the plans, the board appointed a committee of three of their own members, to whom all of the plans were referred, with instructions to prepare another which should unite, in a greater degree than any of those presented, all of the objects of the company. This committee had the subject in charge for several weeks, obtained the aid of architects and mechanics, and at length reported two plans, which underwent critical examination by the board at numerous meetings, extending through several weeks. On the 2d of December one of these plans was adopted by the board. It was drawn by Robert S. Mitchell, architect, and was for a building one hundred and five feet on Fifth Street by one hundred and twenty-seven feet on Locust Street, and four stories high, the principal front on Fifth Street.

The site occupied the entire space on which the "old carriage repository" and the Laclede saloon had previously stood. The building is of red brick with cut-stone facings, in the Italian style of architecture, and is one of the handsomest structures in the city. The first floor, fourteen feet high, is rented out for stores; the second floor, twenty feet six inches high, is entirely occupied by the library, the library-room being eighty by sixty-four feet, and the reading-room adjoining, which for many years was used as a lecture-room, being eighty by forty-four feet. The third story, used for a public hall, is one hundred and five by eighty feet, and thirty-three feet six inches high. The lot and building cost one hundred and forty thousand dollars. The library association some years ago absorbed the stock of the old company, a large portion of it having been purchased or exchanged for life memberships. Henry S. Bacon was one of the leading promoters of the enterprise, and it was mainly through his instrumentality that it was brought to a successful conclusion. Mr. Bacon took shares of stock to the amount of twenty thousand dollars, and at a crisis in the affairs of the company advanced ten thousand dollars additional, and thus tided it safely over. On the 23d of January, 1854, the building was sufficiently advanced to permit the removal of the library to the room set apart for its use.

On the 2d of March, 1854, the Illinois delegation were entertained at dinner at the library hall, this being the first time that it was used for an occasion of this sort. Early in September of the same year Louis Pomarede "gave the finishing touches to the grand hall of the Mercantile Library." The hall was richly and tastefully decorated by Mr. Pomarede with mouldings and figures and designs in fresco. In the following month, Oct. 17, 1854, it was formally opened with appropriate exercises and an address by the Rev. William Holmes. Several nights later an operatic concert was given by Madame Rosa Devries.

The report for the year ending Jan. 1, 1854, shows that the library contained 10,565 volumes; its membership for the year was 944; its issue of books, 9885 volumes; its receipts, $7693.27; the value of its property was $22,756.71. Josiah Dent, who was the first librarian, held office for one year, and was succeeded by William Allen, who retained the position for the same period. In 1848, William P. Curtis was elected librarian, and continued to fill the office until 1859. Mr. Curtis prepared the first catalogue of the library, published in 1850, and a supplement to it, published in 1851. This catalogue was arranged alphabetically, with titles in full, and an index classified under general heads, with sub-divisions, such as history, theology, jurisprudence, works of reference, etc. Edward W. Johnston, who became librarian in 1859, undertook the preparation of a second catalogue. At this time the library contained about fourteen thousand volumes. The classification was different from the method at first pursued. All the books were placed under the three great divisions of history, philosophy, and poetry. Books dealing with two or more subjects were assigned to a separate or "indeterminate" class. The first class was sub-divided into seventy-four sections, the second into one hundred and twenty, the third into thirty-one. In selecting books, Mr. Johnston endeavored to fill up one section at a time, with the view of making it as nearly complete as possible. He began with English history and literature, and procured for the library many of the best editions then obtainable of the early chroniclers and poets. In 1862, Mr. Johnston was succeeded as librarian by John N. Dyer, the present (1883) effi-

cient incumbent. During Mr. Johnston's term of office the library secured, at a cost of one thousand dollars (the original subscription price), a copy of Audubon's "Birds of America," with text and plates complete. The copy has a special interest and value, from the fact that it was the author's reserved copy. It bears in every volume of the plates his autograph attached to his bequest of it to his sister.

In June, 1872, the directors made the experiment of throwing open the library on Sunday from two P.M. until nine P.M., solely for reading and reference purposes, no books being issued, and none but members being admitted. The average attendance from June 9th to December 29th was 71¾, and at the annual meeting in January, 1873, it was decided that the experiment was a failure and should be discontinued. During 1874 the third general catalogue was published, at a cost of eight thousand one hundred and seventy dollars. It differs slightly in classification from Mr. Johnston's method, and its typography and general appearance are very handsome. According to the report of the directors for the year ending Dec. 31, 1874, the statistics of the library were:

Total number of volumes		42,013
Number of volumes added during the year:		
By purchase	1,225	
By donation	318	
		1,543
Number of new members enrolled		606
Total membership:		
Honorary	18	
Life	660	
Proprietors	727	
Clerks	1,511	
Beneficiaries	1,530	
		4,446
Volumes issued		132,175
Total cash receipts		$46,505.49
Total value of property		$278,608.68

A supplement to the catalogue, with an index of authors, containing four thousand five hundred titles in addition to those in the catalogue of 1874, was published in 1876. The terms of membership in the library are: for proprietors (merchants), five dollars initiation fee, five dollars annual dues; for clerks (in mercantile business), two dollars initiation fee, three dollars annual dues; for beneficiaries (persons not engaged in mercantile pursuits), five dollars annual dues, no initiation fee; life memberships, fifty dollars. The rooms are open every day from nine A.M. until ten P.M. Once in four years the library is closed for general examination.

The Mercantile Library is one of the most important and valuable institutions in St. Louis. It is admirably managed, and its influence as an educational agency is almost incalculable. Many valuable books and works of art have been presented to it, among which are the Peck collection of books and pamphlets relating to America, marble statues of Œnone and Beatrice Cenci, by Harriet Hosmer, marble busts of Burns and Walter Scott (presented by the Caledonian Society), a number of fine paintings and portraits, a large sculptured slab of marble from Nimroud, inscribed in cuneiform characters, and a number of other articles. The rooms are handsomely furnished, and very attractive in appearance. As the library is in need of more commodious quarters, the sale of the present property and the erection of a larger and more convenient structure are contemplated.

On the evening of the 13th of January, 1871, the twenty-fifth anniversary of the founding of the library was celebrated. Among those present were Mayor Cole, Hudson E. Bridge, Gerard B. Allen, Gen. Nathan Ranney, Judge Treat, Rev. Dr. Post, Judge Knight, Col. George Knapp, Henry Shaw, Charles Speck, Wayman Crow, J. B. S. Lemoine, Alfred Carr, Silas Bent, J. C. McAllister, Dr. Engelmann, Thomas Allen, Dr. Hodgen, Bishop Robertson, Gen. Louis B. Parsons, and others.

The proceedings were opened with an address by James E. Yeatman, first president of the association, who was introduced by John T. Douglas, chairman of the committee of arrangements. In the course of his remarks Mr. Yeatman said,—

"This institution had its birth in a most appropriate place, the merchant's counting-room. The paternity as ascribed by between two of our old and accomplished merchants, Peter Powell and John C. Tevis. The former has long since been gathered to his fathers; the latter has retired to the more quiet and peaceful pursuits of the country. These gentlemen were ably seconded by A. B. Chambers, the then editor of the *Missouri Republican*, one of the most public-spirited men that has ever graced our city. Those who remember him, and there are many who hear the sound of my voice who do, will bear me out in saying that he was foremost in every enterprise that had for its object the improvement and advancement of the city, to which he not only contributed with his pen, through the columns of his paper, then one of the leading commercial journals of the West, but by his personal efforts and private means.

"My own recollections are that the more especial honor of being the originators of the library belongs to John C. Tevis and Robert K. Woods. These recollections have been fully confirmed by a letter which has been placed in my hands by the president of the committee of arrangements within the past week from Mr. Tevis, in which he says, 'One afternoon in the fall of 1845, while standing chatting at our doors on Main Street, which were adjoining, the subject of forming a mercantile library was first broached between Mr. Robert K. Woods and myself. After some conversation, Mr. Woods and I resolved "to make an effort" at least by calling in person on a few active and enterprising citizens, who agreed to meet us and discuss the matter, which they did one night at the counting-room of Tevis, Scott & Tevis, on Main Street.' John C. Tevis was a Philadelphian by birth, and a man of liberal education and genial manners and habits, and at that time a prosperous merchant. The first meeting was held at his counting-room at night, on Dec. 30, 1845. There were eight gen-

men present,—Col. A. B. Chambers, Peter Powell, Robert K. Woods, John F. Franklin, R. P. Perry, William P. Scott, John Halsall, and John C. Tevis,—all of whom were merchants except Col. Chambers. All have since passed away save John C. Tevis and R. K. Woods, the latter of whom is present with us this evening, a witness of the success of the organization which he took so prominent a part in founding. Mr. Peter Powell was the chairman of this meeting, and the following resolutions were offered by Col. Chambers:

"'*Resolved*, That it is deemed expedient by the merchants of this city to found a Mercantile Library Association for their own mutual improvement, and for the improvement of those in their employ; and that in so doing they deem it expedient to form a library principally devoted to such subjects as are useful to men employed in commercial pursuits; but that whilst the primary object is mercantile, all other professions are respectfully invited to unite.

"'*Resolved*, That a committee of five be appointed at this meeting to select a committee of fifteen to report to a meeting of merchants and others a constitution and by-laws.'

"In compliance with the above, Messrs. Powell, Budd, Chambers, Kennett, Hall, Rust, Clark, Barnard, Richeson, Halsall, Dougherty, Peterson, Southack, Glasgow, and Yeatman were appointed to draft a constitution and by-laws."

Mr. Yeatman added that he was elected president, and that the other officers were Luther M. Kennett, vice-president; Robert K. Woods, treasurer; S. A. Ranlett, corresponding secretary; John A. Dougherty, recording secretary; William M. Thompson, John C. Tevis, Peter Powell, George K. Budd, Alexander Peterson, J. F. Franklin, and Robert Barth, directors; Josiah Dent, librarian.

In addition to the ordinary attractions of the library courses of lectures were given, but they did not prove financially remunerative.

Mr. Yeatman also stated that "in the designs of the library hall building there was to have been a fourth story, which was to have been used exclusively for a fine art gallery, but during its erection, from economical considerations, this story was dispensed with. No funds of this association have ever been used for the promotion of this object, unless some eighteen hundred dollars expended in procuring the portraits of Henry D. Bacon and Baron Von Humboldt be so considered. The large number of works of art now possessed by the association have been the gifts of its friends and patrons, the value of which now amounts to twenty thousand five hundred dollars."

At the close of the address the Liederkranz sang Beethoven's chorus, "Glory to God," after which T. J. Garrett recited an original "Ode to Progress." The poem was handsomely illustrated with a series of tableaux suggested by the narrative. They were prepared under the supervision of J. R. Meeker, artist, and Mrs. Edwina Dean Lowe. A portion of the third part of the poem was recited by Miss Gertrude, daughter of Gen. N. Ranney, who represented Columbia. Orchestral music was rendered at intervals. Following is a list of the presidents of the association up to and including 1871:

1846-47, James E. Yeatman; 1848-49, Alfred Vinton; 1850-51, H. E. Bridge; 1852, Henry D. Bacon; 1853, J. H. Alexander; 1854-55, J. T. Douglas; 1856, W. M. Morrison; 1857, John W. Luke; 1858, M. V. L. McClelland; 1859-60, J. B. S. Lemoine; 1861, Alfred Carr; 1862-63, John H. Beach; 1864-65, Charles Miller; 1866-67, George R. Robinson; 1868-69, Lafayette Wilson; 1870-71, Richard M. Scruggs.

The officers and directors at the time of the celebration were,—

President, Richard M. Scruggs; Vice-President, Charles Speck; Secretaries: Corresponding, M. N. Burchard; Recording, John H. Tracy; Treasurer, Henry H. Wernse; Directors, James P. Fiske, Frederick Hawes, James O. Carson, John S. J. Miller, Lorraine F. Jones, Henry T. Simon, Francis Carter; Actuary and Librarian, John N. Dyer; Assistant Librarians: First, W. H. H. Anderson; Second, J. M. H. Washington; Third, O. B. Webb.

The officers in 1882 were Robert E. Carr, president; R. S. Brookings, vice-president; Emil A. Meysenburg, corresponding secretary; William L. Scott, recording secretary; John R. Lionberger, treasurer; Gerard B. Allen, Robert S. Brookings, Samuel M. Kennard, J. W. Munson, B. F. Adams, Henry Stanley, Pierre Chouteau, directors; John N. Dyer, actuary and librarian.

Public School Library.—The St. Louis Public School Library, situated at the southwest corner of Seventh and Chestnut Streets, is another of the highly successful and useful institutions of St. Louis. On the 10th of January, 1860, Ira Divoll, superintendent of public schools, presented to the school board a report in favor of establishing a public school library. At the time of that report the then library consisted "of forty-two volumes of the annals of Congress and a collection of school and miscellaneous books, amounting altogether to about one hundred volumes, and worth perhaps one hundred dollars."

In his report Mr. Divoll recommended that the proposed library be established in connection with and as supplementary to the public schools, for the directors, officers, and teachers of which it was to be free, the pupils to pay a small fee for its use, and all other persons who wished to do so to become annual subscribers at low rates. He also recommended that the school board appropriate a sum sufficient to purchase the nucleus of a library, which was to be sustained by donations and membership fees. Mr. Divoll's proposition was favorably received, but owing to the unsettled state of affairs which intervened during the period of the civil war, it was not acted on until 1864, when the project was revived and efforts were

made to establish a library. Mr. Divoll's scheme was then discussed, but S. D. Barlow, president of the school board at that time, suggested in his annual report the formation of a separate library association. At the ensuing session of the Legislature, Feb. 3, 1865, an act of incorporation was passed, among the incorporators being S. D. Barlow, Ira Divoll, and C. F. Childs. The association was known as the "Public School Library Society of St. Louis," and its objects were stated to be "the establishment and maintenance of a public school library society and lyceum."

The charter provided that all the directors, officers, teachers, or pupils of the public schools might become life members by the payment of twelve dollars, and that there should be no other members; but there might be annual subscribers. The management was vested in a board of sixteen trustees, six of whom might be women, and who were empowered to assess all the life members "any amount not exceeding three dollars per annum." The board of public schools was authorized to appropriate out of its general fund a sum not exceeding five thousand dollars for the purchase of books.

The Library Society was organized in accordance with the provisions of the act, and in March, 1865, a series of regulations and by-laws were adopted providing the details of organization and management, and that the library should be open daily from ten A.M. until ten P.M., except on Sundays and holidays. On the 11th of March the secretary reported that one hundred and fifty persons had become life members of the society. The first board of trustees under the charter was composed of S. D. Barlow, president board of public schools; Ira Divoll, superintendent of public schools; Charles F. Childs, principal of the High School, and Miss Anna C. Brackett, principal of Normal School, all *ex officio;* W. G. Eliot, D.D., James Richardson, T. B. Edgar, C. S. Greeley, Dr. John Conzelman, Dr. Charles W. Stevens, Miss Kate T. Wilson, Mrs. E. C. Clement, Mrs. E. C. Dunham, William T. Harris, John A. Gilfillan, and Carlos W. Mills.

On the 1st of November, 1865, the treasury of the society contained five thousand seven hundred and twenty-six dollars and sixty-five cents, obtained from membership fees, donations, and an exhibition given by the pupils of the High School, which netted one thousand dollars. Of this the sum of five thousand dollars was appropriated for the purchase of books. When the library was first opened for the issue of books, Dec. 9, 1865, with John J. Bailey as librarian, it contained fifteen hundred volumes. The membership then numbered three hundred and four life members, and about two hundred who held certificates of partial payment. The location of the library was in Darby's building, corner of Olive and Fifth Streets. As soon as the books commenced circulating the pupils of the schools enrolled themselves as members, at the rate of one hundred and fifty per month, and at the close of the first year of the library's existence it had a membership of fourteen hundred and thirty-two. Its net cash receipts for that year amounted to eight thousand one hundred and thirty dollars. The number of volumes issued during 1866 was thirty-one thousand five hundred and seventy-two, and in the following year the collection of books numbered ten thousand five hundred and fifteen volumes, and the membership-list two thousand two hundred and twenty-seven persons, of whom eighteen hundred were or had been connected with the public schools. The amount of money expended up to Aug. 1, 1867, amounted to twenty thousand eight hundred and thirty-seven dollars and ninety-six cents, the whole of which sum had been obtained from membership fees, lectures, exhibitions, and donations varying in amount from fifty to one hundred and fifty dollars, for which, in a majority of cases, certificates of membership were issued, in accordance with the directions of the donors. The library was thus financially self-sustaining from the start. During the winter of 1866–67 the society furnished a course of thirteen lectures by distinguished speakers, which proved very popular, and were of great benefit to the institution. In 1868 the board of public schools, as authorized by the charter of the Library Society, contributed five thousand dollars for the purchase of books. Another provision in the charter of the Library Society gave authority to the school board to furnish rooms for the library, and to heat and light them. The library occupied the room in the Darby building for nearly three years, and when the school board purchased the O'Fallon Polytechnic building, the library was invited to occupy more spacious quarters there, and has since enjoyed remarkable prosperity. Besides the library-room proper it had a reading-room twenty-seven by thirty feet, arranged in the most convenient style for readers.

Subsequently the library outgrew its accommodations again, and the school board appropriated another and still larger hall for its use, one hundred by fifty feet, with a ceiling forty-two feet in height. The library now has one hundred and seventy linear feet of files for newspapers, and one hundred and forty-eight feet of reading-room at the tables. A large number of books were acquired by the absorption of other libraries. The St. Louis German Institute and the St. Louis High School Library Association gave all the

books in exchange for certificates of membership, and in 1869 the Henry Ames Library of the O'Fallon Polytechnic Institute, together with a legacy of one hundred thousand dollars, which had been transferred to the school board along with the Polytechnic building, was merged into the Public School Library. It contributed about six thousand volumes. In the same year were purchased the entire libraries of Dr. Shumard (geological) and Professor Rossmaessler, of Leipsic (natural history). Subsequently the Academy of Science, St. Louis Medical Society, Historical Society, Institute of Architects, Engineers' Club, Microscopical Society, Local Steam Engineers' Association, and Art Society enriched the library with their literary possessions.

The library was owned for three years and a half by the Library Society, but it was a part of the design of its founders that it should eventually be owned and controlled by the board of public schools. This branch of the design was consummated in April, 1869, by the transfer to the absolute ownership of the school board of the library and all its belongings. The conditions were that the board should keep it in operation under a board of sixteen managers, nine of whom should be appointed by the school board and seven elected by the life members of the library; also to appropriate not less than three thousand dollars annually, besides the revenues of the library itself, to its maintenance and increase. Should the board fail in its part of the contract, the library was to return to its original owners by the terms of the transfer. In five and a half years the board had, besides providing a large increase of room, contributed the sum of thirty thousand one hundred and forty-one dollars, principally for the purchase of books. Active membership in the library is now open to all, without regard to sex or occupation, at the same terms as provided by the original society. The Sunday opening of the library to the public, which was inaugurated June 9, 1872, has proved thoroughly successful and satisfactory. By an act of the Legislature, approved March 27, 1874, the school board was authorized to provide for all the wants of the library, which under its management continues to flourish. During the months of March and April, 1875, a classified record was kept of the reading in the library-rooms, with the following results: There were drawn on week-days, novels, 227 volumes; juveniles, 408; other books, 2026; on Sundays, novels, 91 volumes; juveniles, 799; other books, 607. In June, 1874, the school board appropriated to the library $6000 for the current year, and the annual revenues of the library became: School board appropriation, $6000; interest on Henry Ames' legacy, $5900; income from memberships, fines, etc., $5000; total, $16,900.

In June, 1874, the library was thrown open to the public free for reading and reference, the membership fees being retained unaltered for such as desired to borrow books for home use. On the 1st of May, 1875, the condition of the library was shown by the following statistics:

Volumes in library		38,758
Newspapers and periodicals in reading-room		251
Life members	2,276	
Perpetual memberships	30	
Temporary members	3,519	
		5,825
Issues:		
For home use	93,140	
For library use	28,061	
		121,201
Value of property (estimated)		$72,127.31

In 1880 the library contained 48,368 volumes and 141 unbound pamphlets, and the total issue of volumes for the year was 202,834. The membership on the 1st of August, 1881, numbered 4164 persons, and up to July 31, 1881, the total receipts and expenditures had amounted to $156,434.55.

In 1883 a movement has been begun to abolish all membership fees, and to recognize what is even now true in effect, that the library has developed into a public library. The small amount now received from membership fees, the possession of a collection of fifty-five thousand volumes so well selected that comparison with the great Eastern libraries is not to be feared, the strong and growing sentiment in favor of a public library, all render it probable that in the near future the library will undergo its last transformation, and wheel into line with the free libraries of Boston, Cincinnati, Chicago, San Francisco, and other large cities. The items of general interest are appended as copied from the last annual report:

During the year ending July 31, 1882, 84,380 volumes were drawn for home reading, 51,687 volumes were consulted in the library, 56,946 periodicals were read in the reading-room.

Besides the total issue of 193,013 books and periodicals, hundreds came daily to read the newspapers on file from the principal points of the United States and Europe.

The average week-day issue was 542 volumes; Sunday, 345 volumes. The librarian is Frederick M. Crunden.

Among those who assisted in the organization of the Public School Library, and who have since contributed to its successful management, none has been more zealous and efficient than the eminent merchant and philanthropist, James Richardson. Mr. Richardson was born in Hopkinton, N. H., July 14, 1817,

the son of a thrifty, well-to-do farmer. His father was a direct descendant of Ezekiel Richardson who came from the south of England, and who belonged to the celebrated "Winthrop Colony" which landed at Boston, Mass., in 1630, and who, as the country was sub-divided, became one of the original incorporators of Woburn, near Boston. James Richardson was the eighth in descent from Ezekiel Richardson.

James received a good district school education and enjoyed the advantages of an academy, one of the first in the whole country having been established in his neighborhood, which was attended by pupils from far and near. When about eighteen his school privileges terminated, and from eighteen to twenty-one he worked on the farm in summer and taught school in winter, faithfully bringing his wages home to his father in the spring. When he became of age, he continued to teach in the winter, while he worked at some mechanical employment in the summer; for his father, although in good circumstances, seems to have deemed it best that the boy should provide for himself, which, indeed, he appears to have been fully capable of doing. In 1843, James was married to Miss Laura Clifford, of New Hampshire, and in 1845 he removed to Pittsburgh, Pa., after the great fire there, with just one thousand dollars in his pocket, solely the fruit of his earnings since becoming of age. He was then twenty-eight years old. He successfully managed a grocery-store there for twelve years, which he sold for thirty thousand dollars, and in 1857 removed to St. Louis, where he engaged in the wholesale drug business, under the style of Richardson, Mellier & Co. Soon, however, Mr. Mellier withdrew, and the business was conducted by Richardson & Sons, the partners being his sons.

The establishment occupied a small store at 704 North Main Street, but the business rapidly increased and more room was from time to time taken, until at present the house of Richardson & Co. occupies six numbers on North Main Street and three large warehouses on Front Street, on the Levee, besides conducting a large chemical and pharmaceutical laboratory, embracing Nos. 1121, 1123, 1125, and 1127 North Second Street, and employing one hundred and twenty-five hands. In the aggregate the house employs over one hundred and fifty hands. It keeps stock on hand amounting to half a million dollars, and its yearly sales are in proportion. It enjoys the reputation of being the largest importing and jobbing drug house in the West, and there is but one in the country that does a larger business. Indeed, its reputation is world-wide, for there is hardly a quarter of the globe where it does not have correspondents, from whence it does not import goods, and whither it does not send its manufactured products. It everywhere enjoys the highest reputation, and in St. Louis, where it is thoroughly known, its founder and head possesses the fullest confidence and esteem of his fellow business men, who have watched the unvarying progress of his house, and have noted on what a solid foundation of integrity, prudence, and sagacity this immense business has been built up.

Mr. Richardson's success in the management of his growing and intricate affairs attracted the attention of his friends, and he was repeatedly solicited to take part in other enterprises, but being conservative, he usually declined. However, he has been a director in several banks, but recently has severed all connections of this kind, and has persistently refused to make new ones. He has been led to this course through no lack of public spirit, and whenever solicited to serve the public in a useful capacity he has seldom refused. Thus for many years he was a member of the board of education, and for some time was president of the body, but ultimately declined a re-election. During his administration the school system was placed on a more efficient basis, involving radical and extensive reforms; and in advocating and securing these Mr. Richardson was foremost as an inspiring and shaping mind. His name has long been associated in the public mind with that of the lamented Ira Divoll as one of the founders of the present excellent school system of St. Louis.

Upon retiring from the school board he was brought, as we have seen, into very close relations with the Public School Library, "an institution," he has been heard to say, "which I regard as of more wide-spread influence than anything in St. Louis except the public schools themselves." Again he is seen working with Divoll for the establishment of this great enterprise on a sure footing; and among the noble men whom Divoll gathered around him, none were more zealous than James Richardson. They labored during the war and amid many and peculiar embarrassments, yet Mr. Richardson and his brave associates never wavered in their expressions of courage and confidence, and finally succeeded in placing the enterprise upon its present substantial footing. Without disparagement to others who assisted in this enlightened work, it may be said that the chief burdens were borne by Mr. Divoll and Mr. Richardson. Their inspiring confidence and energy carried the cause along, and when Divoll died his mantle fell on Richardson, who pushed the work unflinchingly until success was accomplished.

In recognition of his share in this great educational

the son of a thrifty, well-to-do farmer. His father was

does not import goods, and whither it does not send

James S. Richardson

work, and as a further token of personal esteem, a large number of his friends joined in 1881 in presenting the library with a fine portrait of Mr. Richardson, painted by George Eichbaum, of St. Louis. The picture was presented to the board of managers of the library March 15, 1881, by the Hon. S. D. Barlow, in a felicitous address, and he was followed by others who appealed strongly to men of wealth and public spirit to follow Mr. Richardson's example and identify themselves with this great and useful institution.

Mr. Richardson is a prominent member of the First Presbyterian Church, and has been for many years president of that corporation and of its board of trustees. The church has frequently been in financial trouble, and it has been Mr. Richardson's privilege to render important and greatly-needed assistance on several occasions, and the congregation is now completely free from debt. Mr. Richardson is also director for two theological schools, Drury College, Springfield, Mo., and Lindenwood College, St. Charles, Mo. Both these institutions look up to him as a generous patron and sagacious counselor.

Mr. Richardson has four children,—two daughters (one married and one single) and two sons, J. Clifford Richardson and James Richardson, who are partners in the house, and have shown such business capacity that for some years Mr. Richardson has been relieved almost wholly of the active management of the firm's affairs, and has enjoyed his well-earned rest with a quiet and befitting dignity. Mr. Richardson has traveled extensively, and has made several trips to Europe, thus adding by observation to the stores of a well-stocked mind; for notwithstanding the fact that he has until late years been engrossed with business cares, he was always a student, and few business men of St. Louis possess a better fund of general information than he does, or can more readily or more interestingly impart it to others. He frequently writes for the press, especially on matters connected with his business, and is held by the trade in the highest esteem. When the Western Wholesale Drug Association was formed, he was made the first president.

Such is a brief outline of Mr. Richardson's active and highly successful career, which is full of instruction not only to the young and struggling, but also to those who have become rich and prosperous and yet have not learned what the poet declares to be the highest of pleasures, "the luxury of doing good."

Missouri Historical Society.—From an able and very interesting address delivered by Col. James O. Broadhead before the Missouri Historical Society we learn that the first effort looking towards the formation of a historical society in the State was made at Jefferson City in 1844. On the 18th of December of that year a meeting was held in the Senate chamber at Jefferson City, at which measures were taken to organize the Missouri Historical and Philosophical Society. A constitution was adopted for its government, fourteen gentlemen enrolled their names as members, and a committee was appointed to apply to the General Assembly for an act of incorporation. On the 27th of February, 1845, an act of the General Assembly was passed incorporating the society, and the following were named as incorporators, with such other persons as might afterwards be associated with them, viz.: George W. Hough, William Claude Jones, William M. Campbell, James L. Minor, Hiram B. Goodrich, George W. Waters, John I. Campbell, John H. Watson, Adam B. Chambers, John McNeil, Samuel Treat, Robert I. Boas, Erich Plump, John G. Walker, George W. Huston, Hiram H. Baber, John C. Edwards (then Governor of the State), Benjamin F. Stringfellow (then attorney-general), B. M. Hughes, Trusten Polk, Robert Wilson, John D. Colter, William Carson, George A. Carrell, Thomas G. Allen, William G. Eliot, William G. Minor, R. G. Smart, Mann Butler, S. H. Whipple, Robert T. Brown, and Harrison Hough.

At the first meeting the following were elected honorary members: Andrew Jackson, of Tennessee; George Bancroft, of Massachusetts; Albert Gallatin, of New York; Jared Sparks, of Massachusetts; P. A. Brown, of Philadelphia; Judge Hall, of Cincinnati; W. Gilmore Simms, of South Carolina; and Lewis Cass, of Michigan. Correspondence was afterwards kept up by the president with several of these honorary members.

At the first meeting the Rev. Dr. Goodrich presented to the society a volume entitled "Travels in North America in the Years 1780, '81, '82," by the Marquis de Chastelux, and also a *fac-simile* engraving of six brass plates found in a mound in the State of Illinois in the year 1843. These constituted the beginning of the library and cabinet of the society.

On the 6th of January, 1847, the General Assembly passed an act giving to the society the use and control of the semicircular room on the first floor of the capitol, afterwards occupied by the Governor as his office, for the purpose of keeping therein their library, museum, and cabinet, and providing that the Secretary of State should furnish the society with a copy of all publications that should be made by authority of the State. On the 16th of February following the General Assembly by a joint resolution directed the Secretary of State to have the room furnished

with shelves and other furniture suitable for the reception of books and specimens, and made an appropriation for putting the room in repair.

William M. Campbell, of St. Charles, was elected the first president of the society, James L. Minor, of Cole, secretary, and George W. Hough, treasurer. Mr. Campbell was re-elected president at every annual meeting thereafter until his death, which occurred Dec. 31, 1849.[1]

At the meeting at which Mr. Campbell was first elected the treasurer presented his annual report, showing the balance in the treasury on the 18th of January, 1847, to have been $6.90; amount received from members during and since that time $8.95, making a total of $15.85. Of this sum $1.05 was paid for the use of the society, showing a balance in the treasury of $14.80. At the same meeting a resolution was passed providing for the appointment of a committee to petition the General Assembly to provide by law for a thorough geological survey of the State. The following gentlemen were appointed on the committee: Falkland H. Martin, then Secretary of State, city of Jefferson; S. T. Glover, Marion County; Edward Bates, St. Louis; D. E. Ballou, Benton County; S. D. Caruthers, Madison County; John F. Ryland, Lafayette County; William G. Minor, city of Jefferson. Mr. Glover prepared the memorial to the Legislature on the subject, and this was the first step taken towards the passage of the law providing for a geological survey of the State, which has developed and brought to the knowledge of the world the inexhaustible mineral resources of Missouri.

At the annual meeting on the 15th of January, 1850, David Todd, of Columbia, was elected president, and Austin A. King, then Governor of the State, E. L. Edwards, James L. Minor, Robert W. Wells, E. B. Cordell, James Lusk, and S. D. Caruthers vice-presidents, and Ephraim B. Ewing secretary.

After the death of William M. Campbell, who may be considered the founder of the Missouri Historical and Philosophical Society, but little was done to preserve its organization or to continue its labors. It may be said to have died with him. The last meeting held was a called meeting, late in the winter of 1851, on the occasion of the death of its secretary, William G. Minor, at which Col. James O. Broadhead presided.

Col. Broadhead learned in 1878 that after the society ceased to hold its meetings, its books and other property had been removed into the basement of the capitol, where they remained uninjured until the late war, when, the capitol being occupied by a military force, the basement was used as a military prison, and during that time most of the records and property were destroyed. Col. Broadhead, however, found a collection of books and pamphlets, which were afterwards presented to the Missouri Historical Society.

The latter organization was formed in 1866, the initial movement being the following address, which was issued on the 1st of August of that year:

"The undersigned, old residents of St. Louis, who have spent the flower of their lives in advancing its interests, and still bear a conspicuous part in promoting its future greatness, respectfully address you on a subject of lasting interest to us and posterity.

"An authentic history of the city from its first settlement, written under the supervision of a directory selected from the best scholars, is a desideratum which should be immediately supplied.

"This would insure a carefully prepared record of its founding, progress, institutions, benefactors, prominent men, and events that mark its different epochs.

"We now have the means, the talent, and the time to secure

[1] Mr. Campbell was born at Lexington, Va., in the year 1804, and was a graduate of Washington College (now Washington and Lee University), and was licensed to practice law in 1827. He came to Missouri in 1829, and settled in the city and county of St. Charles, where he engaged in the practice of his profession. In 1830 he was elected to the lower branch of the Legislature from the county of St. Charles, which office he continued to hold until 1836, when he was elected to the Senate. From that time he held the office of senator till 1845. About the spring of 1845 he removed to St. Louis, and in August, 1845, was elected one of the delegates to the Constitutional Convention which assembled at Jefferson City in the winter of 1845–46 and framed a new Constitution for the State.

In many respects Mr. Campbell was one of the most remarkable men who have figured in the history of Missouri. His mind was well stored with knowledge upon all subjects. He was a man of great research and untiring energy, and had more to do with the legislation of the State from 1830 to 1849 than any other man in Missouri. He prepared a revised edition of the laws of Missouri of 1835. Perhaps no man in the State was more familiar with her early history than Mr. Campbell. He had collected many interesting facts in connection with the early French and Spanish settlements, voyageurs, Indian wars, alarms, and traditions, the ranging service, the Santa Fé and Rocky Mountain trade, incidents of heroism in the lives of the pioneers, and the minutest details of Territorial history. He had all the qualities of a historian,—love of truth, a discriminating mind, devotion to his subject, and a vigorous and graceful pen. He kept up a regular correspondence with scientific and professional men of other States, and had collected a vast amount of historical and scientific information. Mr. Campbell was prominent as a lawyer, and continued in the practice of his profession up to the time of his death. For a period of nearly twenty years, during which he was a member of one or the other branch of the State Legislature, it is said he drafted more than one-half of all the bills introduced into the Legislature. When he removed to St. Louis in 1845 he engaged with Charles G. Ramsey in the publication of *The New Era*. In politics he was a Whig, but so popular that no party discipline could defeat him when a candidate for office.

plish it, and we must improve the opportunity before it passes away.

"A century will elapse on the 11th day of August next (1866) since the first grant of land was made in St. Louis.

"We propose to celebrate the centenary anniversary of that event by meeting on that day at the court-house at two o'clock P.M., and forming a historical society worthy of our age.

"We cordially invite all who feel interested in the enterprise to attend and participate with their old friends in forming a society that, we flatter ourselves, will be more lasting and useful than any other we are now acquainted with, and most likely to do justice to the subjects on which they write.

"St. Louis, Aug. 1, 1866."

Among the signers were N. Paschall, James G. Soulard, William L. Ewing, Henry Shaw, Henry Von Phul, John D. Daggett, Frederick L. Billon, James H. Lucas, Pierre A. Berthold, Edward Bates, Daniel Hough, L. A. Benoist, John F. Darby, Sullivan Blood, Joseph H. Locke, J. Ridgely, Samuel Gaty, Charles D. Drake, Samuel B. Wiggins, John How, Elihu B. Shepard, John Withnell, M. Brotherton, George K. Budd, Daniel B. Gale, Charles P. Chouteau, Napoleon Mulliken, ex-Governor Archibald Gamble, Judge Primm, ex-Mayor James S. Thomas, Amedee Vallé, Nathan Ranney, James Clemens, Benjamin Stickney, Austin Piggot, D. B. Hill, Andrew Christy, E. Carter Hutchinson, Lewis Bissell, William M. McPherson, Samuel Willi, Hudson E. Bridge, James Smith, Richard Dowling, Daniel H. Donovan, Lewis V. Bogy, Henry C. Lynch, John Biggin, Joshua Cheever, Sol. Smith, Peter E. Blow.

On August 11th a number of the old residents met pursuant to this call at the court-house, in Circuit Court Room No. 1. Hon. John F. Darby called the meeting to order, and moved the appointment of James H. Lucas as chairman of the meeting. Mr. Lucas having been unanimously chosen, Hon. John F. Darby then proposed the following list of officers for the permanent organization of the society, which was unanimously agreed to: President, James H. Lucas; Vice-Presidents, Hon. Edward Bates, Hon. John F. Darby, J. C. Barlow, Henry Von Phul, George H. Kennerly, Daniel D. Page, Dr. Robert Simpson, Archibald Gamble, Daniel Hough, Lewis Bissell, James Clemens, Jr., Louis A. Benoist, James B. Thomas, James G. Barry, Edward Dobyns, William K. Rule, John D. Daggett, Bernard Pratte, John B. Hortiz, Henry Shaw, David B. Hill, James G. Soulard, Elkanah English, Nathan Ranney, Frederick L. Billon, A. Vallé, A. Christy; Secretaries, Elihu Shepard, William H. Cozens, George Knapp; Committee to Draft the Constitution and By-Laws, Rev. William G. Eliot, Hon. John F. Darby, Elihu H. Shepard, Capt. Edmund Paul, Wilson Primm, Charles P. Chouteau.

A second meeting was held October 27th at the same place, at which Hon. John F. Darby, on behalf of the committee, reported the draft of a constitution for the association, which after careful revision was accepted by the gentlemen present, and ordered to be submitted to the members for final adoption at a meeting to be held Saturday, November 3d, at the room corner of Fifth and Olive, proffered for the use of the society by Hon. J. F. Darby. The names of Henry O'Reilly, Dr. William Dickinson, and Frederick L. Billon were presented for membership and accepted.

James L. Butler moved that all those present come forward and enroll their names as members of the association, in order that a beginning might be made. The following names were then enrolled: James H. Lucas, Edward Bates, J. C. Barlow, E. Dobyns, J. F. Darby, W. G. Eliot, James B. Eads, George Knapp, William Lingo, John D. Daggett, Samuel Willi, Nathan Cole, R. Dowling, Robert P. Todd, Nicholas D. E. Menil, Austin Piggot, L. M. Kennett, Joseph C. Edgar, Howard Gray, D. B. Hilt, William K. Page, Elkanah English, William Fayet, Wilson Primm, Daniel H. Donovan, James G. Barry, T. A. Buckland, John D. Mackay, Bernard J. Riley, David Shepard, John J. Middleton, Charles F. Moeller, R. Beauvais, Adolph Paul, Joseph S. Pease, B. B. Minor, John Lee, H. D. Minor, James L. Butler, Elihu H. Shepard, W. H. Cozens, James S. Thomas, V. Hoeffner, Thomas Hopkins West, Gustavus W. Dryer, Peter Guerette, Abdiel Sherwood.

The society met again in its rooms in Darby's buildings, corner Fifth and Olive, Nov. 3, 1866.

In the absence of the president, Hon. James H. Lucas, on motion of Dr. W. G. Eliot, Hon. John F. Darby was elected to preside. Gen. N. Ranney moved that the constitution as accepted at the meeting held on Saturday, October 27th, should now be adopted in full.

The constitution was then read by Henry B. O'Reilly, after which, on motion of William W. Green, it was adopted. The society then proceeded to the election of officers to hold their positions until the annual meeting, Aug. 11, 1867, and Maj. Edward Dobyns and Gen. Nathan Ranney were appointed tellers.

The following officers were elected: James H. Lucas, president; W. G. Eliot, first vice-president; Wilson Primm, second vice-president; W. H. Cozens, corresponding secretary; Elihu H. Shepard, recording secretary; John F. Darby, treasurer.

The society did not, however, prosper. In 1872 a new act of incorporation was effected. In 1873, Albert Todd was elected president, and the association took

a fresh start, but matters dropped back into the old groove in 1874, and in 1875 a new constitution and set of rules were adopted, and a reincorporation effected. But it was not until 1878 that the society began to fulfill the objects for which it was created. At the beginning of that year it had no furniture, library, or cabinets, and scarcely any collections. The money value of its personal property was estimated at five hundred dollars, with debts amounting to one hundred and eighty dollars.

On the 13th of September, 1878, a meeting was held to merge the society into the older organization, founded at Jefferson City in 1844. Hon. Samuel T. Glover, vice-president, called the meeting to order. On motion, Hon. W. F. Switzler, of Boone, was appointed secretary. There were also present Col. Robert Campbell, Hon. James O. Broadhead, Capt. George C. Pratt, Andrew King, and Hon. Samuel Treat.

Judge Treat moved the adoption of the following as a by-law:

"*Resolved*, That five members shall constitute a quorum to elect members and transact any business of the corporation," which, being seconded by Capt. Pratt, was adopted.

Col. Broadhead proposed the following persons for membership: P. L. Foy, Albert Todd, O. W. Collett, John H. Terry, Silas Bent, Richard Dowling, M. L. Gray, and J. W. Herthel, all of whom, on motion of Andrew King, were admitted.

Judge Treat moved that the meeting proceed to elect officers, and the motion being carried, Judge Treat nominated Peter L. Foy for president, who was duly elected. William F. Switzler nominated Oscar W. Collett for secretary, and Mr. Collett was elected.

On motion of Judge Treat, the election of the other officers was adjourned to the next meeting. Judge Treat then moved the appointment of a committee of seven on membership, and the motion having been carried, the chair appointed W. F. Switzler, Albert Todd, O. W. Collett, J. H. Terry, Silas Bent, Capt. Pratt, and Andrew King.

Col. Broadhead moved the appointment of a committee of three to revise the constitution and by-laws, and the motion having been adopted, Messrs. Todd, Switzler, and Collett were appointed the committee.

After the reorganization of the society there was a large influx of new members. Among them it would seem were some capable and earnest workers. The new management had large and decided views, and resolved that the past should not be the measure for the future. It was soon perceived that the entire organization needed to be remodeled and placed upon a permanent basis, and its acquisitions guarded beyond peradventure. The reform was begun, and carried out in an earnest spirit. It was thorough and effective, and was finally consummated by a charter of incorporation. By this charter, and by the State law, the society has no further control over its possessions than is necessary in order to manage them. It cannot sell, it cannot mortgage, it cannot give away anything it acquires, nor can it contract a dollar of debt. Whatever it obtains, whether by gift, devise, or purchase, must be held by it simply as a trustee for the public. All other organizations are the real owners of their possessions, and can sell them if they wish. The Historical Society cannot, so that if some one gives it a lot of ground or a sum of money, the same cannot be alienated, but must be held for the purpose for which it was given.

The tree thus planted has continued to exhibit a vigor that betokens permanent vitality. In the field of local history it has done much good work, and in archæology has made substantial progress. Its accumulations towards the creation of a museum are already considerable. In 1880 it had in its library between four thousand and five thousand volumes, and possessed some six or seven cabinets, a large number of pictures, relics, and other objects classed under the general head of curiosities, and over eleven hundred archæological specimens.

Peter L. Foy was succeeded in the presidency by Edwin Harrison, who retained the position until 1883, when Col. George E. Leighton was elected. The secretary is Oscar W. Collett. It has been mainly through the earnest and unflagging zeal of Mr. Collett that the Historical Society has been kept alive during the last few years. Mr. Collett, at great personal sacrifice, has made for the society one of the finest collections of prehistoric remains—relics of the mound-builders and the ancient Indian tribes of the Mississippi Valley—to be found in the United States. Some of his specimens are unique, and the collection is highly valued by distinguished archæologists both in this country and in Europe.

The Western Academy of Natural Science was incorporated in 1837, the charter members being H. King, M.D., George Engelmann, M.D., B. [illegible] Brown, D.D.S., P. A. Pulte, M.D., and William Weber, Theodore Engelmann, and G. Schuetze. Of these, Dr. George Engelmann and Theodore Engelmann are the only ones now (1883) living. The society held regular semi-monthly meetings for about six years. A small library which had been gathered during these years is now held by the St. Louis Academy of Natural Science. This latter society also has such of the specimens from the museum

had not been lost or scattered in the period intervening between the discontinuance of the old academy and the organization of the new.

Of the twenty-four members who were received into the society during the period of its existence, only six are now (1883) living. These are, besides the two charter members already mentioned, Rev. W. G. Eliot, C. J. Carpenter, Hon. D. A. Armstrong, and Dr. A. Wislizenus.

The St. Louis Academy of Science was organized March 10, 1856, and incorporated Jan. 17, 1857. The original members were Drs. George Engelmann, H. A. Prout, M. M. Pallen, Benjamin F. Shumard, Charles A. Pope, William H. Tingley, William M. McPheeters, J. Pollak, C. W. Stevens, A. Wislizenus, M. L. Linton, and J. H. Walters, and Messrs. James B. Eads, N. Holmes, and Charles P. Chouteau. The officers for the first year were Dr. George Engelmann, president; Dr. H. A. Prout and N. Holmes, vice-presidents; Drs. B. F. Shumard and William H. Tingley, secretaries; and James B. Eads, treasurer. There was also a board of curators and a board of council.

In April, 1856, Dr. C. A. Pope offered "the free use of the cabinet hall and other rooms suitable for the purposes of the academy in the dispensary building of the St. Louis Medical College," which offer was accepted. The academy was incorporated by an act of the Legislature, Jan. 17, 1857. Through the exertions of its early presidents and secretaries it was soon placed on a prosperous footing, and valuable donations of books and transactions of other societies, together with gifts and exchanges of specimens, were secured.

In May, 1869, the library and museum were almost totally destroyed by fire. The library, which was said to be the most extensive of its kind west of the Alleghenies, comprised about three thousand two hundred volumes and pamphlets, and was particularly rich in the proceedings of foreign and home societies, as the academy was receiving regularly the transactions of one hundred and seventy foreign societies and seventy-five home societies. The library was saved, but in a very damaged condition, the books being saturated with water. They were afterwards removed to the adjoining room in Pope's College proper, under the superintendence of Dr. T. C. Baumgarten, the librarian. In the room next to the library were the publications of the society and a number of maps, which, together with the furniture, were destroyed. The records of the academy happening at the time to be in the possession of the secretary, Professor Spencer Smith, escaped injury. The museum, which occupied the third floor of the building, was destroyed. It contained Dr. Prout's collection of fossils, as originally arranged by Dr. B. F. Shumard, and a large collection of mammals, part of which belonged to the old Western Academy of Natural Sciences, which was dissolved about 1843. The collection embraced originally the mastodon bones discovered in Missouri, and the bones of the *elephas primœvensis*. Among the mammals destroyed were also the stuffed skin of a grizzly bear, the head of a buffalo, and specimens of deer from the Rocky Mountains, presented by Charles P. Chouteau, Col. Vaughn, and Dr. Stevens. The skull of the caviformis, an extinct race of the ox, found in Chouteau's Pond when the excavations for the gasometer were made and abandoned on account of the unfitness of the soil, was saved in a damaged condition. A fine collection of stuffed birds, amounting to several hundred, presented by the Smithsonian Institute and the Philadelphia Academy of Natural Sciences, were consumed, as were also specimens of meteoric iron, representing thirteen different localities, but the largest meteorite, from Dakota, twelve miles west of Fort Pierre, presented by Charles P. Chouteau, was saved, being among Dr. Shumard's mineralogical specimens at the Bonham Female Seminary. A number of valuable specimens were also saved, owing to the fact that at the time they were at the Washington University, having been used in illustrating Dr. Shumard's lectures before that institution. Six hundred specimens of marine shells, presented by the Smithsonian Institute, were consumed.

The museum was unusually rich in crania and skeletons of birds and reptiles, which were destroyed, together with Dr. Pope's mounted skeletons of mammals, about twelve hundred specimens of minerals, embracing a full suite of Missouri minerals and ores, a collection of the bones and teeth of extinct animals and fossil turtles, prepared by Professor Hayden, specimens of rock, illustrating various geological periods, Indian relics and curiosities, and specimens of porcelain from a porcelain tower in China, presented to the academy by Lieut. Clarke, U.S.A.

Shortly after the fire an agreement was entered into between the academy and the board of public schools, by which the former was permitted to hold its semi-monthly meetings in the session-room of the latter, and the library and remains of the academy were placed in the Public School Library. The cabinet of the academy was located in the reading-room of the library, and its library occupied an alcove in the same library-room, being accessible to users of the Public School Library for purposes of reference.

The academy holds regular semi-monthly meetings, and has published four large volumes of transactions (the first number having been issued in 1857), including a number of very valuable reports and papers on various scientific subjects.

The academy now has rooms and holds its meetings in the Washington University, where it is accumulating a large and valuable library. Correspondence is maintained and literary exchanges are made of transactions and other books between the academy and the scientific societies of all parts of the globe, some three hundred or more in number.

The present membership numbers over one hundred, and the present board of officers comprises Dr. George Engelmann, president, who has held that office during more than half of the academy's existence; Dr. James M. Lute, vice-president; Professor F. Nipher, recording secretary; Professor Pritchett, corresponding secretary; Enno Sander, treasurer.

The St. Louis University Library contains over seventeen thousand volumes, exclusive of students' society libraries, which number eight thousand volumes. The main library, which is intended for the use of the professors, but to which any inquirer is always made welcome, contains very complete collections of the early writings of the Catholic Church, such as the works of the Fathers, treatises on the canon law and ecclesiastical history. Several works in the collection are unique in our country. The library possesses some illuminated mediæval manuscripts, numerous rare and original editions of the Bible, and fine collections of the classic writers, as well as of the modern historians and theologians. It was begun in 1829 by the priests from Belgium who founded the university, and who brought a small collection of books with them, to which additions have been made from year to year from the funds of the university.

Washington University Libraries.—There are four distinct collections of books at Washington University,—the general library, containing four thousand five hundred volumes, chiefly books of reference; the scientific department library; the law library, of three thousand volumes; and the Mary Institute library, of five hundred reference books.

Gifts from prominent citizens have assisted in their increase. The professors of the law department gave their salaries for one year to add books to the law library, and Hudson E. Bridge bequeathed to the university the sum of one hundred thousand dollars, the interest on which is to be divided between the chancellorship and the libraries. The income of the latter is about fifteen hundred dollars a year. With the exception of the law library, no great effort has been made to build up the university's collections, the Mercantile Library and the Public School Library supplying to a great extent the wants of the university.

St. Louis Lyceum.—This organization was established in St. Louis in 1831 as a branch of the American Lyceum, which was instituted in New York in May of the same year, for "the advancement of education, especially in public schools, and the general diffusion of knowledge." The objects of the St. Louis branch were "the mutual improvement of its members and the general diffusion of knowledge." Its officers were: President, Beverly Allen; Vice-President, Joseph C. Laveille; Treasurer, A. Gamble; Corresponding Secretary, James A. Murray; Recording Secretary, J. C. Dennies; Curators, R. K. Richards, John F. Darby, Peter Ferguson.

In 1839 the following were elected officers of the St. Louis Lyceum for the ensuing year: President, Andrew J. Davis; Vice-President, Dr. J. N. McDowell; Second Vice-President, Philip Reilly; Recording Secretary, George W. Dent; Corresponding Secretary, Samuel Knox; Treasurer, Charles F. Henry; Directors, W. P. Darnes, J. H. Bayfield, J. B. Walker, Dr. T. J. White, Dr. E. T. Watson. The last-named lyceum we find, however, was not an outgrowth of the former, but was an association of young men formed for the purpose of mental culture. It was incorporated, and in 1844 had a membership of about one hundred and fifty, a library of two thousand volumes, and a lecture-room on the second floor of the building corner of Third and Pine Streets.

Library of the Academy of the Visitation.—This library was organized in 1832, by the Sisters of the Visitation. It contains over four thousand volumes, including every variety of literature. It is supported by the pupils, who pay a yearly fee of two dollars for the privilege of its use.

The Library of the Ursuline Academy was begun by the sisters in 1840, and now numbers about two thousand volumes. The pupils pay a fee of two dollars per annum, by means of which the library is sustained.

The Young Men's Sodality Library and Reading-Room, Ninth Street and Christy Avenue, dates from the commencement of the Sodality building which was erected under the directorship of the Rev. A. Damen, S.J., about the year 1855. Its object is to furnish sound moral literature in its various branches to the members of the sodality. About 1876, however, it became accessible to the friends of the society, who can become members by paying an initiation fee of one dollar, and afterwards fifty cents a quarter. The library and reading-rooms are

ported out of the general funds of the sodality. There are about fifteen hundred books in the library, and twenty-seven periodicals in the reading-room. The number of members is three hundred.

The Library of the College of the Christian Brothers was founded in 1860, and contains over twenty thousand volumes and about one hundred and fifty-six manuscripts. Its income is about sufficient for its support, and is derived from membership fees paid by pupils.

The German Evangelical Lutheran Concordia College Library was begun in 1840, and now numbers about five thousand volumes.

Missouri Medical College Library dates back from 1840, and contains one thousand volumes.

St. Louis Medical College Library numbers eleven hundred volumes. It was founded in 1844, is restricted in use to the faculty and students, and is maintained and increased solely by voluntary contributions. The library of Dr. Charles A. Pope (five hundred volumes) passed, in 1875, into the possession of the college, one-half by purchase, the other half being given by his widow.

The St. Louis Turnverein Library, located in Turner's Hall, Tenth Street between Market and Walnut, was begun in 1855. It contains over two thousand volumes, of which two hundred and fifty are in English, the remainder chiefly in German. The Turnverein appropriates twenty dollars per month for library purposes, and the fines collected amount to about ten dollars more. The reading-room is open two nights during the week, and is supplied with a number of newspapers and magazines.

Independent Order of Odd-Fellows' Library.—The order of Odd-Fellows in St. Louis has a library numbering four thousand volumes, which was begun in 1868. For its support ten lodges contribute twenty-five cents semi-annually for each of their members, and fifty cents for each new member initiated. This gives the library a yearly income of about fifteen hundred dollars. It subscribes to the leading popular American magazines, and has about six hundred volumes of German works, popular and standard. The room, located at Fourth and Locust Streets, is open daily from Monday until Friday, from seven to ten P.M., and on Saturday from two to ten P.M. It is accessible only to members of the contributing lodges and their families.

The St. Louis Law Library was founded in 1838, and incorporated in 1839, with Edward Bates, Josiah Spalding, John F. Darby, Montgomery Blair, Hamilton R. Gamble, Beverly Allen, Warwick Tunstall, Trusten Polk, and others as incorporators. At the time of its formation the bar of St. Louis numbered less than forty, and the population was about fifteen thousand.

The original number of members was twenty, each of whom agreed to pay twenty dollars on the 1st day of May, 1838, and five dollars every three months thereafter. Nothing was done towards the purchase of books until the following September, when a constitution and by-laws were adopted, officers elected, and the first order for books, principally standard treatises, forwarded to Boston. In forming its constitution the association took no model; there was no "stock" system, and the members acquired no individual property in the books or other effects of the association. In one particular the original by-laws were less fortunate,—in providing that no new member could be admitted except upon the payment of as great an amount as had been assessed upon the original members, including their first contribution. At the end of the first year, therefore, the cost of admission was forty dollars, and at the end of the second, sixty. Such a disproportion between the admission fee and the then advantages of the library was a serious barrier to an increase of members, without which vigorous growth or permanency could not be expected. The quarterly assessment of five dollars was likewise deemed unnecessarily large, particularly for the young members. It was, therefore, in 1840 resolved to substitute a semi-annual assessment of that sum; but how to establish the admission fee was, at various times during ten years, the subject of controversy and vacillating action. An effort was made in 1840 to fix it at twenty dollars, but without success. As a measure of compromise, an upward sliding scale was adopted, by which members admitted within the year ending the 1st of November, 1841, should pay twenty dollars, those admitted during the next year twenty-five dollars, and so on, adding five dollars each succeeding year. This rule continued until January, 1845, when it gave place to one fixing the fee at twenty dollars. This, in its turn, was supplanted in February, 1846, and a fee of forty dollars established. This had a brief existence of less than one month, and was superseded by a resort again to the upward sliding scale, fixing the fee at twenty dollars until Dec. 31, 1846, and thenceforward adding five dollars each year until it should reach forty dollars, at which it should be stationary. This held its place until December, 1850, when it gave way to the unanimous adoption at a large meeting of the association of a fee of twenty dollars. As an immediate result of the action of December, 1850, forty new members were admitted.

In November, 1842, the number of volumes was

only six hundred and forty. This is the earliest date at which reliable information on that point can be obtained. From that time until May, 1847, the progress made is indicated by the following statement of the number of volumes at different periods:

January, 1845	717	volumes.
February, 1846	932	"
November, 1846	1132	"
May, 1847	1285	"

Between 1851 and 1859 the progress of the library was as follows:

October, 1851	1957	volumes.
" 1852	2366	"
" 1853	2634	"
" 1854	3000	"
December, 1855	3211	"
" 1856	3664	"
" 1857	4125	"
" 1858	4457	"

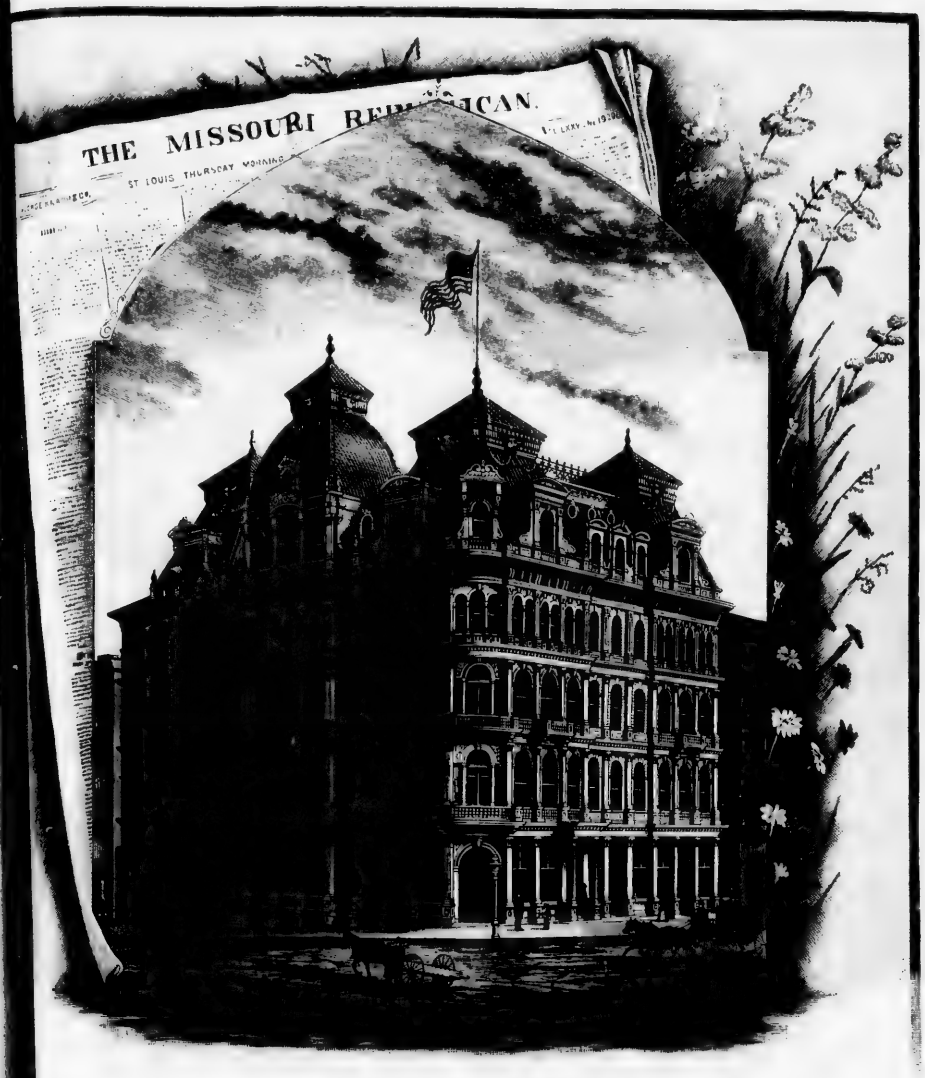
The expenditures of the association during these years were as follows:

Years.	For Books.	Other Expenses.
1851–52	$1229.90	$374.18
1852–53	785.45	481.67
1853–54	760.62	351.76
1854–55	894.23	544.83
1855–56	1144.59	410.90
1856–57	1307.70	638.59
1857–58	1414.72	739.24
	$7537.21	$3541.17

From 1842 to 1857 the library was kept in a small room in the court-house, which for several years before its abandonment afforded very insufficient accommodations. It was the best, however, that could be obtained until October, 1857, when, by the liberality of the St. Louis County Court, a new and elegant room, fifty feet in length, and partly thirty-three and partly thirty-six feet in width, was assigned to the association, and handsomely and conveniently fitted up with shelving, furniture, and gas fixtures by the county.

The benefits of the library are not confined to the members of the association. Any member of the legal profession residing anywhere outside of St. Louis County has the privilege of using the books. The library is much resorted to by members of the bar from the interior of the State during the sessions of the Supreme Court at St. Louis, and frequently professional gentlemen from Illinois, and sometimes from Iowa, visit St. Louis for the purpose of consulting it.

The books are not allowed to leave the room, except to be taken to some court of record for use in lawsuits. Without endowment or support from any public fund, this library has become one of great value. In 1876 it contained about eight thousand volumes, of which fifteen hundred were text-books, the best having been selected, fifteen hundred reports and digests of foreign cases, and five thousand reports and digests of United States courts, and was used by three hundred and eighty members. The library now contains ten thousand volumes, and is still located in the county court-house. The presidents of the association since its organization have been Josiah Spalding, 1838–40; Henry S. Geyer, 1840–41; Hamilton R. Gamble, 1841–43; Beverly Allen, 1843–46; Edward Bates, 1846; Joseph B. Crockett, 1846–47; Hamilton R. Gamble, 1849–50; Trusten Polk, 1847–49; Fletcher M. Haight, 1850–51; Benjamin B. Dayton, 1851–55; Samuel Reber, 1855–57; Charles D. Drake, 1857–66; Charles C. Whittlesey, 1866–67; John R. Shepley, 1867–70; Roderick E. Rombauer, 1870–73; Alexander Martin, 1873–74; Albert Todd, 1874–77; George A. Madill, 1877–78; John R. Shepley, 1878–79; Alonzo W. Slayback, 1879–81; Arba N. Crane, 1881–82. Frank W. Peebles is the librarian.



CHAPTER XXIII.

THE PRESS.

Missouri Republican.[1]—The history of the *Missouri Republican* is coincident with that of St. Louis from a period anterior to the creation of the Territory of Missouri down to the present day, and in its files is found a wonderfully full and accurate record of the growth of St. Louis from the proportions of an insignificant town to those of a great and commanding metropolis. The *Republican* was established with the name of the *Missouri Gazette*, by Joseph Charless in 1808. Mr. Charless was a native of Westmeath, Ireland, and was born on the 16th of July, 1772. He was the only son of Capt. Edward Charles, whose paternal ancestor, John Charles, was born in Wales, and emigrated to Ireland in 1663. Joseph Charles having been implicated in the Irish rebellion of 1795, fled from Ireland to France, and after remaining a short time in the latter country sailed for the United States, arriving at New York in 1796. On reaching this country he added

[1] The author is greatly indebted to the present proprietors of the *Republican*, Messrs. George Knapp & Co., for having generously placed at his disposal the files of the paper from its establishment to the present time. It is scarcely necessary to add that he found them of incalculable value in preparing this work, and that they furnished an immense mass of historical material much of which it would have been impossible to obtain from any other source.

S. E. COR. OF CHESTNUT AND THIRD STS.

the letter *s* to his name, making it Charless, in order to secure the Irish pronunciation of Charles. He settled in Philadelphia, where, being a printer by trade, he secured a situation with Matthew Carey, who at that time was the leading publisher of the town. Mr. Charless prided himself on having assisted in printing the first quarto edition of the Bible that was issued in the United States.[1] In 1800, accompanied by his family, he removed from Philadelphia to Lexington, Ky., and thence in 1806 to Louisville, from which place he proceeded in 1808 to St. Louis. Here he established the first newspaper printed west of the Mississippi, and continued in active charge until 1820. Subsequently he engaged in the drug business, and died in 1834, at the age of sixty-two years. Mr. Charless was a man of indomitable energy and courage, and labored for many years in the face of opposition and embarrassments which must have proved fatal to his enterprise—an undertaking audacious in the highest degree when we consider the fact that St. Louis was then a small frontier town with a population largely composed of French-speaking people—but for his wonderful tenacity of purpose, untiring industry, consummate ability and tact as an editor, and a strength of will which no disasters nor threats could shake. Personally, he is described by a member of his family as having been "a noble specimen of the Irish gentleman, impulsive warm-heartedness being his most characteristic trait. He was polite and hospitable, his countenance cheerful, his conversation sprightly and humorous. Sweet is the memory of the times when his children and friends gathered around his plentiful board."

The first number of the *Missouri Gazette*, published weekly, was issued on the 12th of July, 1808, and was gotten out by two men, one of whom presumably was Mr. Charless, and the other Jacob Hinkle, a printer, who had come at Mr. Charless' request from Louisville, Ky., to assist in establishing the *Gazette*. The publication office at first and for some years was situated on the east side of South Main Street, in the northern portion of the old Robidoux house of posts on Block 5, between the present Elm and Myrtle Streets, and next, on the south, to the old stone house on the same lot which was occupied subsequently (in 1817) by the old Territorial Bank of St. Louis. Mr. Charless afterwards removed the establishment to the southeast corner of Second and Walnut Streets, to a two-story frame house which he purchased from Abram Gallatin in 1816, and where his family had resided for some years. In 1820 he removed to the "hill" at the southeast corner of Fifth and Market Streets, where the paper continued to be published until several years later.

The first number was printed upon a sheet of foolscap paper, twelve and one-half inches by seven and three-fourths inches, in small pica type, and was worked off on an old-fashioned Ramage press, which is described as having been "a rude diminutive machine, made mostly of wood with a stone bed, and worked by hand."

At this time Missouri was still part of the Territory of Louisiana, and St. Louis was a village of about one thousand inhabitants, with a post-office, but a mail only once a week to Cahokia, on the Illinois side of the river, with no brick house, and a trade consisting only of "lead, furs, and peltries." The embargo act of 1807 and the non-intercourse act of 1809 "had produced a withering influence upon the prosperity of St. Louis," and it was under these discouraging circumstances that Mr. Charless commenced the publication of his newspaper. The subscription price was fixed at three dollars per annum, "paid in advance," while "advertisements not exceeding a square will be inserted one week for one dollar, and fifty cents for every continuance, those of a greater length in proportion." The first two numbers are missing, but the third number, published Tuesday, July 26, 1808, "by Joseph Charless, printer to the Territory," is extant. It was printed on fair white paper, and is of four pages, with three columns to a page. The first page is filled with foreign news under date of London, April 22d, descriptive of Admiral Duckworth's cruise after the French fleet in the West Indies, which is continued on the fourth page, and is followed by news from Amsterdam, Ramsgate, and Harwich. The second page contains news from Paris dated April 12th, Boston, June 16th; Baltimore, June 18th; Philadelphia, June 16th; and Norfolk, June 13th. In the foreign news mention is made of the case of the "Edward Madison," a Charleston packet, and another American vessel "boarded by British cruisers." The

[1] In 1798, Mr. Charless married Mrs. Sarah McCloud (a widow with one child), whose maiden name was Jordan. She was born Jan. 28, 1771, near Wilmington, Del., but during the Revolutionary war her parents, with their family, were driven by the Hessians from their home in Delaware, and thenceforward resided in Philadelphia. She accompanied her husband to Lexington and Louisville, Ky., and finally to St. Louis, where she continued to reside until her death, which occurred on the 3d of March, 1852. Mrs. Charless took a prominent part in the organization of the first Presbyterian Church established in St. Louis, and greatly assisted the pastor, Rev. Salmon Giddings, in that work. She was a woman of fervent piety, a generous friend to the needy, and a devoted wife and mother.

editorial and local departments are made up of seven short paragraphs, one of which is a notice of the election of Auguste Chouteau, Edward Hempstead, Bernard Pratte, Pierre Chouteau, and Alexander McNair as trustees for the town of St. Louis "on Saturday last." The paper contains but four advertisements. On the third page, under the heading "St. Louis," the *Gazette* announced that Samuel Solomon would "receive subscriptions and advertisements for this *Gazette* during the editor's absence to Kentucky." In August the day of publication was changed from Tuesday to Wednesday, the paper appearing for the first time after the change on Wednesday, August 10th. On the 21st of September, which would in the ordinary course have been the day of publication, no paper was issued owing to the illness of the editor, but in the following week, September 28th, the *Gazette* appeared in a slightly enlarged form, being two inches wider. Other improvements were added from time to time by the enterprising publisher, among which was a "Poet's Corner." In the issue of August 17th a poetical tale was printed entitled "Leonard and Rosa," and signed by E. S. J., which was two columns and a half in length. Advertisements were often printed in French. Among the many vexations with which Mr. Charless had to contend was the uncertainty of the mails. Thus, for instance, on the 25th of January, 1809, the *Gazette* announced that there had been no mails from the East, on which, of course, the editor depended for the greater portion of his news, for two months. On the 29th of March, 1809, the paper appeared in an enlarged form, four columns to a page, sixteen inches long by eleven inches broad, and printed on one sheet of two pages. Owing to the failure of the publisher to procure news paper, it was printed on letter-paper. A further increase was made in May, the paper appearing on the 24th of that month with four pages, eighteen by eleven inches, with four columns without rules to a page. In the issue of July 19th, Mr. Charless addressed his patrons, felicitating himself on the completion of the *Gazette's* first year, but regretting that his paper, under the untoward circumstances under which he had labored, had not "come up to his own calculations, and perhaps to the expectations" of the subscribers. He added, however, that having disposed of his office in Lexington, Ky., and brought his family to St. Louis, together with a supply of good paper, he trusted that he would "henceforth meet the expectations of his friends." Owing to the change of time in the arrival of the mail, the day of publication was changed Oct. 12, 1809, to Thursday.

The *Gazette* continued to thrive and prosper, and among the features introduced during the summer of 1809 was correspondence from Baltimore, then an important point for the distribution of news. The circulation of the paper was not restricted to St. Louis, for we find that in July of this year the following agents at other points had been selected: St. Charles, Capt. M. Wherry; Ste. Genevieve, Mr. Elliot; Cape Girardeau, Mr. McPherson; Cahokia, Mr. Hays; Kaskaskia, Mr. Finney; Harrisonville, Jacob A. Boyes; New Madrid, Mr. Michel.

In November, 1809, subscriptions to the *Gazette* were paid in flour, and on the 7th of December, 1809, the paper appeared as the *Louisiana* (instead of *Missouri*) *Gazette*, in order "to change the title from a local to a more general one," Missouri being then a part of the Territory of Louisiana. When, however, Missouri was erected into a Territory, the paper (July 11, 1812) resumed its original appellation of the *Missouri Gazette*. On the 19th of July, 1810, the completion of the second year of the *Gazette* was announced by the editor, who, on the 3d of October, gave notice that the day of publication had been changed to Saturday, and on the 9th of November called upon those of his subscribers who had given their notes or word of honor to pay in flour or corn "to bring it in directly," and upon others who had promised to pay in beef or pork to deliver it as soon as possible, or their accounts would be placed in the magistrate's hands. The responses would not appear to have been very prompt or liberal, for on the 19th of December, Mr. Charless made the following significant announcement:

"*To our Patrons:* The weekly expense of publishing the *Louisiana Gazette* is upwards of twenty dollars. When this is duly considered, our subscribers will see the propriety of our requiring of them payment in advance. Neither paper, types, nor ink can be had without cash, and that, too, before a single paper can be issued."

On Saturday, Oct. 9, 1813, the *Gazette* appeared on paper of a smaller size, measuring thirteen and a half by eight and a half inches, the reduction being caused, probably, not by any lack of support, but by the scarcity of suitable paper, as we find in the issue of December 17th a notice from the editor that "by the most cruel and unfortunate disappointment in the receipt of paper" he would be compelled to suspend the publication of the *Gazette* for a few weeks. He added that every Saturday a handbill would be printed and sent to the subscribers gratis, giving a summary of the news received by the mail. Mr. Charless was subjected to serious embarrassment for more than a month at least, for on the 22d

January, 1814, he was still without a supply of paper. In the issue of that date he said,—

"Although cut off by an immense space of country from a source of supply, the printer has hitherto been fortunate enough to procure a sufficiency of paper. In this instance he is blameless, inasmuch as ample funds were forwarded to Lexington; but in consequence of no regular trade being carried on with that place, his paper waits for an accidental trader coming this way."

In the conduct of his paper, Mr. Charless appears to have been outspoken, fearless, and aggressive from the start. He supported the administrations of Jefferson and Madison, and gave and took no quarter in dealing with his political antagonists. Early in 1814 an acrimonious controversy arose between Mr. Charless and certain leading citizens of St. Louis (among whom were Wm. C. Carr, C. B. Penrose, Maj. Wm. Christy, Robert Wash, and David V. Walker), growing out of communications published in the *Gazette* criticising Gen. (formerly Governor) Howard, and accompanied by editorial comments from Mr. Charless. The authorship of the original communication, which was signed "Q," was attributed by some to J. B. C. Lucas, and by others to Mr. Charless himself. In order to break down Charless, Messrs. Carr, Christy, Penrose, etc., raised one thousand dollars for the purpose of establishing a paper in opposition to the *Gazette*, and advertised in the *Lexington* (Ky.) *Reporter* as follows:

"*To Printers:* The people of St. Louis are desirous of procuring a printer at that place. A man of correct Republican principles with even moderate abilities would satisfy them, though it is unquestionable that the profits of a well-directed press would richly reward the labors of a man of genius and acquirements."

The attempt to procure a printer was not successful until May, 1815, when Joshua Norvell, from Nashville, Tenn., issued the *Western Journal*. He was succeeded in the management by Sergeant Hall, of Cincinnati, who issued the first number of his paper, the name having been changed to the *Western Emigrant*, May 17, 1817. In the summer of 1819 its proprietors were Isaac N. Henry and Evarist Maury, from Nashville, with Col. Thomas H. Benton as editor, and it was then known as the *St. Louis Enquirer*.

In the mean time the controversy between Mr. Charless and his opponents waxed more and more bitter, and seems to have been conducted with intense acrimony and extreme personalities by both parties.[1]

At length the feeling became so intense that it culminated on the 21st of July, 1814, in a personal encounter between Mr. Charless and W. C. Carr. The version of this affair published by Mr. Charless in the *Gazette* of July 22d is as follows:

"A medal for the brave: Yesterday evening, when I was conversing with some gentlemen near the post-office of St. Louis, William C. Carr approached close to me, without my observing him, and spit in my face, and at the same instant drew a pistol and presented it towards me. Being altogether unarmed, not even a stick in my hand, I had no other resort but stoning him, from which I was soon prevented by individuals, who interfered and laid hold of me, which gave Carr an opportunity of retreating to his house, no doubt exulting at his own brave and manly management of the affair, and at the strong proof he had given of his being a gentleman."

The efforts of Mr. Carr and his friends to conquer Charless with his own weapons by establishing a rival newspaper in St. Louis having thus far proved ineffectual, they seem to have determined to try intimidation, and waited upon him at his office in a body. Mr. Charless gives the following account of the interview:

"As soon as the *Gazette* was published containing the above criminal matter, William C. Carr called a cabinet meeting, where it was debated what kind of punishment the printer should receive for this offense to their High Mightinesses. After mature deliberation it was resolved that Maj. William C. Carr, Maj. Clement B. Penrose, Maj. William Christy, Dr. Farrar, and Dr. Walker should call on Charless and demand the author of 'Q.' Next morning, Sunday, the party opened the door and rudely entered the office, Christy armed with a large club and Penrose with a sword. Judge Christy, in an angry style, demanded (in behalf of a meeting held the evening before) the author of 'Q.,' to which I answered I was well informed that the meeting had denounced me as the author, and therefore I would give them no satisfaction on the subject; that if they had applied in a proper manner every satisfaction in my power would be given. Christy then said with much warmth and agitation that the paragraph was a lie, that they considered me as the author, and would publish me as a liar throughout the State of Kentucky, to which Penrose and Carr assented. I then ordered Christy out of the office, but as he declined to go I pushed him out of the door, when he raised his club to strike, and proposed to drag me into the street, and there perhaps assassinate me. At the same moment Penrose shifted his sword

[1] As a specimen of the political journalism of the day we append the following extract from the *Republican* of July 16, 1814:

"It is rumored that Robert Wash, Esq., is a *candidate* to represent his county in the General Assembly.

"Says Bob to Dave, as they bounced up,
Midst din of clitter-clatter,
'I feel so like a mongrel pup
My jaws goes chitter-chatter.'

"Dave answered Bob, 'Shake off base fear,
I'll lead you on to battle.'
Says Bob, 'Oh, dear, what's that I hear,
I—I—I augur things most fatal.'"

Robert Wash and David V. Walker, referred to above as 'Bob and 'Dave,' were afterwards sons-in-law of William Christy.

in the attitude of drawing it, and in a high tone of anger they told me they would not go out; that it was not my house, but a public office, in which they had a right to stay. Thus situated and unarmed, I directed my son to go for the constable, intending to collect a force to commit them to prison. However, before the constable came, or a sufficient force was collected, they retreated, bestowing upon me a torrent of abuse.

"The next week was spent by these great men in trotting up and down our streets to obtain signatures to an address to the printer, disapprobating the little paragraph, and after much labor and fatigue twelve names, including their own, were all that could be obtained."

The *Gazette* appears to have thriven on persecution, for on the 24th of June, 1815, it announced that it had "upwards of five hundred genuine patrons, who receive it regularly every week," the original number of subscribers having been one hundred and seventy-four. In the same issue it was stated that a new press of the largest size was "expected shortly by Mr. Moses Scott from Pittsburgh," and that when it arrived the *Gazette* would assume the "size of the Kentucky papers, super-royal."

In 1816 the *Gazette* published a number of paragraphs which proved offensive to John Scott, a leading citizen of St. Louis, who demanded the name of the author from Mr. Charless. A belligerent correspondence ensued, but oil was finally poured upon the troubled waters and a compromise effected. In his reply to Mr. Scott's warlike note, Mr. Charless said, with characteristic vigor, "I may be threatened, but I will continue an independent course. If I am attacked for exercising the honest duties of my profession, I know how to repel injury."

On the 19th of April, 1817, the *Gazette* appeared in "a new and beautiful" dress of type of American manufacture, an evidence of prosperity which must have been very irritating to its enemies. The day of publication was changed on the 9th of January to Friday, and on the 3d of July the paper was enlarged to such proportions as to be "equal in size and type to any six-column paper in the Union." In August, 1818, while Mr. Charless was walking in his garden, he was fired upon by some one unknown, "who had concealed himself in or behind the lot south of the garden," but he escaped unhurt. He was also threatened with incendiarism, for we find in the *Gazette* of Jan. 1, 1819, that "D. Kimball requests the incendiaries of St. Louis to defer burning Mr. Charless' establishment until his removal, which will be on the 20th of April next." The subscribers to the *Gazette* continued to increase in number, and on the 20th of October the editor announced that "the number of our patrons from one hundred and seventy-four has nearly reached one thousand actual subscribers." During the same year (January 27th) the publication-day was changed back to Wednesday, and it was announced September 11th that an extra half-sheet would be issued every Saturday without additional charge. The half-sheet was known as the *Mercantile Paper, or Gazette* extra, and contained "advertisements, prices current, marine memoranda, and commercial news." The subscription price was one dollar and a half per annum. On the 19th of January, 1820, the *Gazette* stated that "the commercial paper hitherto published on Saturday is discontinued until a supply of paper is obtained, when the *Gazette* will (if required) be published semi-weekly."

On the 13th of September, 1820, Joseph Charless retired from the editorship, having sold the paper to James C. Cummins. The latter retained the proprietorship until March 13, 1822, and during his control of the paper removed the office to the Sanguinet House, at the northeast corner of Main and Elm Streets. In March, 1822, Mr. Cummins sold the paper to Edward Charless, who engaged Josiah Spalding as editor, changed the name to the *Missouri Republican*, and issued his first number on the 20th of March, 1822, from the old location, his father's frame building at Walnut and Second Streets. The publishing firm was known as Edward Charless & Co., Josiah Spalding being the company. This style of partnership continued until Feb. 16, 1826, when Edward Charless became the sole proprietor, Mr. Spalding having retired.

The liberty of the press and its right to freely criticise the official acts of public officers was the subject of a long and earnest discussion in Congress, resulting from a publication in the *Republican* in 1826 relating to Judge James H. Peck, United States district judge for Missouri, who was afterwards impeached. The causes which led to this impeachment grew out of the trial of an action brought by the widow and heirs-at-law of Antoine Soulard against the United States concerning an old Spanish land grant. In December, 1825, the judge decided against the heirs, and they appealed. In March, 1826, Judge Peck printed in the *Republican* an elaborate opinion on the case, to which Luke Edward Lawless, the attorney for the heirs, published a respectful reply over the signature of "Citizen." Judge Peck considered this reply an act of contempt of his court. Mr. Lawless admitted the authorship of the article, and after various proceedings he was sentenced to twenty-four hours' imprisonment and suspended from practice as an attorney for eighteen months. For this the judge was impeached by the House of Representatives in May, 1830, and the trial commenced before the Senate in December. Judge Peck was defended by Mr. Mer-

dith, of Philadelphia, and William Wirt, of Virginia, the managers on the part of the House being McDuffie, of South Carolina, Buchanan, of Pennsylvania, Spencer, Storrs, and Wickliffe. It was shown that the opinion of the judge was published at the request of the members of the bar and of those persons who were interested in the case, and that such publications were usual in both England and the United States; that the case before Judge Peck was a select and test cause, and an adverse decision would produce dissatisfaction in all other claimants; that the respondent considered the publication by Lawless a gross and palpable misrepresentation of the opinion of the court; that Lawless had an opportunity offered him, on his defense, of clearing himself of intentional disrespect, but had refused to answer the interrogatories of the judge, and reasserted the allegations of his publication. At the close of the trial William Wirt delivered one of the most brilliant and eloquent arguments of his whole legal career, in which he defined with great force and clearness the distinction between the liberty and license of the press. The case, which attracted national attention, resulted in the acquittal of Judge Peck by a vote of twenty-four against impeachment and twenty-one in favor of it; but Congress at the same session passed a law limiting the authority of judges, in accordance with English common law doctrine, in punishing for contempt, to cases of misbehavior in the presence of courts, or so near them as to obstruct the administration of justice, and to the official misbehavior of officers of the courts. In 1836, Luke Edward Lawless himself appeared as plaintiff in a libel suit against the *Republican*. He was then judge of the Second Judicial Circuit of Missouri, and brought suit for ten thousand dollars damages against the *Republican* for defamation of character in publishing a communication which complained of the short sittings of the court over which Judge Lawless presided. A verdict was rendered in favor of the *Republican*.

In the mean time the paper had continued to prosper and to grow in character and influence. On the 8th of January, 1827, George Knapp, who was destined to become the head of the establishment, and one of the leading citizens of St. Louis, entered the office as an apprentice to learn the trade of printing.

George Knapp was born in Montgomery, Orange Co., N. Y., on the 25th of September, 1814. In 1820 his father, accompanied by his family, removed to St. Louis, and when twelve years of age George was, as previously indicated, bound to Edward Charless, proprietor of the *Missouri Republican*, as an apprentice "to learn the art and mystery of printing." At that time Elihu H. Shepard was his guardian, and the indentures were prepared with the conditions that he was to be taught the trade of a printer, to receive "three months' day schooling or nine months' night schooling," and at the end of his apprenticeship to be given a Bible and a new suit of clothes. His apprenticeship terminated in 1834, after which he worked as a journeyman printer for nearly two years, part of the time at nine dollars per week and part at ten dollars. For many years Mr. Knapp also served as carrier of the paper, delivering it weekly and afterwards semi-weekly to the subscribers in the town, and at different periods worked as pressman and general manager of the printing department. In 1836 he was made part proprietor of the book and jobbing department, and in 1837, on the purchase of the *Republican* from Charless & Paschall, became one of the proprietors of the paper, as a member of the firm of Chambers, Harris & Knapp. In 1854, on the death of Col. Chambers, he was associated with Mrs. Chambers in the publication of the *Republican*, but in the following year purchased her interest, and having taken his brother, John Knapp, and Nathaniel Paschall into partnership, established the firm of George Knapp & Co., which still continues to publish the *Republican*.

In 1835, Col. Knapp entered the volunteer military service, in which he took a prominent part, and on the breaking out of the war with Mexico was among the first to offer his services to the government. As a lieutenant in the St. Louis Grays of the St. Louis Legion, he went to Mexico in 1846, and upon the return of the regiment to St. Louis was promoted to a captaincy, and subsequently was made lieutenant-colonel of the First Battalion of the St. Louis Legion. During the civil war (in 1862) he organized the Missouri Republican Guards, composed of *Republican* employés, and became their captain.

In December, 1840, he was married to Miss Eleanor McCartan, daughter of Thomas McCartan, of St. Louis. In 1867, 1870, and 1879, Col. Knapp and family visited Europe and spent several years in foreign travel. On the occasion of the opening of the new *Republican* building, Jan. 8, 1873, Col. Knapp delivered an address, in which he briefly reviewed the forty-six years of his connection with the paper, and received the cordial congratulations of his friends. The fiftieth anniversary of his entrance into the *Republican* office (up to 1822 the *Missouri Gazette*) was celebrated on the 8th of January, 1877, by a meeting of the Merchants' Exchange, at which a portrait of Col. Knapp, painted by Maj. Conant, was presented to the Exchange. On this occasion addresses were delivered by Col. Broadhead, Governor

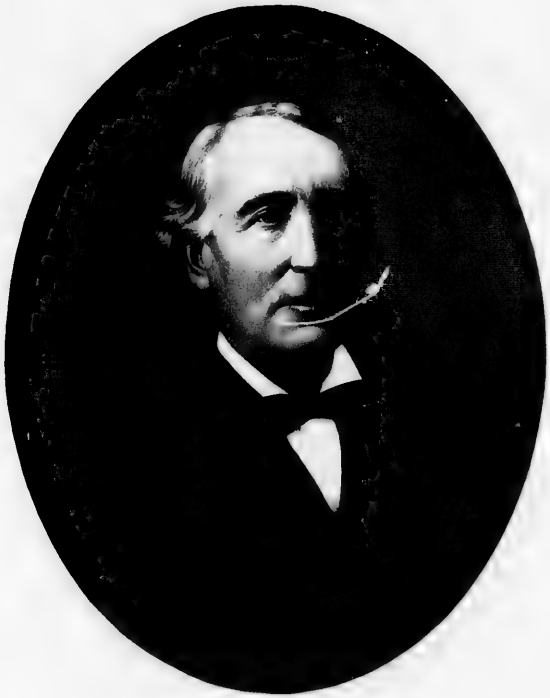
Stanard, Capt. Eads, and others. In the course of his address, Col. Broadhead said,—

"The career of the distinguished citizen whose portrait is before us presents an appropriate example of what may be achieved by honest industry under the benign influence of our institutions. It is a career of which any one might be proud. I have known Col. George Knapp and have enjoyed his intimate friendship for more than twenty years, and it may not be inappropriate on such an occasion as this to refer briefly to his early history. Without any adventitious aid he has attained the exalted position he now holds in this community. . . . To his ability and energy is mainly to be attributed the fact that the *Missouri Republican* is one of the best and most influential papers in America. . . . That he should take a just pride in its growing popularity and influence is not at all astonishing, and belonging as it does to the highest type of American journalism, it is a fitting monument to his ability and energy. But his connection with this journal and the signal ability he has displayed in its management does not by any means constitute the only title he has to our respect and admiration. From his early boyhood he has grown up with this city of his adoption, and there was scarcely one single enterprise which was calculated to expand her growth, to add to her wealth, to spread her commerce, which has not received an impetus from his indomitable energy in its support. He was one of those who aided more than all others in the erection of the magnificent building in which we now stand, and he has been ever ready to give a helping hand to every work which was calculated to advance the interests of this great city. Such men are public benefactors, and it is to such that the imperishable finger of art should point for the admiration and emulation of the generations that are to come after us. To say that this has been done with a master's skill in the work of genius which has just been presented to the Merchants' Exchange, is but doing simple justice to the eminent artist who produced it. As a likeness it is perfect, as a work of art it is unsurpassed, worthy alike of the author and the subject."

To Col. Broadhead's eulogium Governor Stanard added a warm indorsement of the public and private career of Col. Knapp.

"That gentleman," he said, "had been connected with the leading interests of the city for more than fifty years. For forty years he had been in a position to do as much for the weal or woe of the city as any other man. His influence as the manager of a great newspaper had always been in the right direction. He could think of no great enterprise that had not had the influence of his great newspaper and business tact. This grand Merchants' Exchange would have been ten years later in its construction had it not been for the energy and patriotism of Col. George Knapp. The construction of the great hotels had been assisted by Col. Knapp with voice and purse. He was glad that it had been in the mind of the unknown donor of this picture to make such a present during the life of Col. Knapp."

The columns of the *Republican* have been controlled by Col. Knapp, in association with Col. Chambers, Mr. Paschall, his brother Col. John Knapp, and others, since 1837, a period of more than forty-five years, and the uniform prosperity of that great journal and the steady expansion of its influence for good have been in large measure due to the wisdom and energy of the man who entered the office an humble printer-lad in January, 182[illegible]. As apprentice, compositor, carrier, editor, and proprietor, Mr. Knapp displayed an industry and a versatility of talent which must have won success in any walk of business life. In the political management of the paper his course has been marked by a manly independence and just moderation which have kept the *Republican* free from those "entangling alliances" which invariably precede the creation of a servile party or "personal" organ. Positive in his convictions, and emphatic in their expression, he thinks for himself, and never hesitates to utter his thoughts, but at the same time he always exhibits a respectful consideration for the honest opinions of others, and practices the liberal views which he has always inculcated. His almost judicial equipoise in dealing with the great questions of the day was never better illustrated than in his course during the civil war; for, while strenuously opposing the march of secession and supporting the Union with all his strength, he was none the less pronounced in his hostility to every measure which he considered an encroachment on the reserved rights of the States or the political liberties of his countrymen. The interests of St. Louis and of the State at large—material, moral, social, and educational—have uniformly commanded his earnest and enthusiastic support, and during the long period of his incumbency as senior proprietor of the *Republican*, no public enterprise that seemed worthy of it has failed to receive his liberal encouragement and aid. His large fortune, the result of many years of honest toil in various capacities, has been freely used for the promotion of the business and other interests and for the adornment of St. Louis; and now in his ripe old age, in the cheering presence of the multiplied evidences and memorials of a well-spent life, Col. Knapp continues to watch over the destinies of the great journal whose fortunes he has shared from its early youth.



On the 28th of March, 1828, the *Republican* appeared in an enlarged form, and during the same month Nathaniel Paschall was associated with Edward Charless, the firm-name being Charless & Paschall.

The spirit of modern journalistic enterprise had existed in the office, as we have shown, from the establishment of the paper by Joseph Charless, who would have proved a formidable rival for the most energetic and aggressive editors of our own day. A strong within him was the eagerness to secure the fullest and freshest news, which is the first requisite to success in journalism. His successors, one of whom,

own son, Edward Charless, had been trained by himself, were no less enterprising, as appears from the celerity with which President Jackson's message to Congress in 1829 was received and printed. On the 15th of December the *Republican* said,—

"Through the unexampled exertions of Messrs. Mills & Wetzell and other contractors on the route from Washington, the public have been put in possession of the President's message. It was conveyed from Washington to Cincinnati in less than fifty hours, and from Louisville to this place in forty-eight hours."

The establishment of the opposition paper had naturally caused a keen journalistic rivalry, and as Senator Benton was for some time editor of the *Enquirer*, the vials of the *Republican's* wrath were poured upon him. In February, 1828, the paper charged him with having deserted Henry Clay, for whom he had professed the warmest friendship and admiration, and with having from motives of self-interest transferred his allegiance to Gen. Jackson, of whom he had previously been "the bitter, eternal, and avowed enemy," and whom he had traduced "on every occasion, both as a gentleman and a public man." Subsequently it denounced "Benton, Birch & Co." as "vile excrescences upon the community."

No essential change was made in the paper from March, 1828, to April, 1833. On the 9th of the latter month it was announced that the *Republican* would henceforth be issued twice a week, on Tuesdays and Fridays, at five dollars per annum. In May, 1835, the paper was enlarged to a sheet measuring twenty-four by thirty-four inches, and on the 18th of August, 1836, it was announced that as soon as the requisite arrangements could be made the *Republican* would be issued daily except Sunday. The first number of the *Daily Republican* made its appearance on the 20th of September following. It was the same size as the tri-weekly, and the subscription price was ten dollars per annum. The publication of the tri-weekly and weekly were still continued, the subscription price of the former being five dollars, and of the latter three dollars. Of the twenty-eight columns of the daily on its first appearance twenty-five were filled with advertisements. Fortunately for the success of the experiment, the Harrison Presidential campaign of that year created a ferment of popular excitement, causing a constant demand for political news, and consequently steady sales of the *Daily Republican* for a considerable period. The paper thus became rooted in the confidence and support of the St. Louis public, and from that day to this has continued to enjoy a career of uninterrupted prosperity.

In the winter of 1837 negotiations were opened with Col. A. B. Chambers, proprietor of the *Salt River Journal*, published at Bowling Green, Mo., for the sale of the *Republican*, and soon afterwards the sale was consummated, the purchasers being A. B. Chambers, Oliver Harris, and George Knapp. The new proprietors, however, did not take charge until the 1st of July, and in the mean time (Thursday, April 20th) a new "power press" had been received. The first issue of the paper under the new management (the firm being known as Chambers, Harris & Knapp) appeared on the 3d of July, 1837. In the same number of the paper Edward Charless announced his retirement from editorial life.

"We appear before the public," wrote Charless and Paschall, "in a new character, that of visitors making a morning call, to shake hands with our friends and bid them 'good-by.' The proprietorship of this journal, and of course all interest or concern in it, passed from us, in accordance with an arrangement some time since announced, on the 1st of July. Now that we have nothing to do but to make our bow and retire, it were useless to say in parting with the tried and valued friends who have sustained and cherished us through so many years of labor and in a time of excited and tumultuous political feeling that we do so with regret." The announcement was signed by both Mr. Charless and Mr. Paschall, but the latter subsequently renewed his connection with the paper.[1]

Under the direction of the new proprietors, all three of whom were trained and practiced journalists, the *Republican* continued to thrive, and on the 2d of October an advertisement for a "local editor" appeared, indicating an expansion of editorial labor which is significant not only of the paper's growth, but of a marked development of journalistic enterprise in St. Louis. The desired local editor appears to have been secured, for on the following day were printed the

[1] Edward Charless was the son of Joseph Charless, founder of the *Republican*, and was born about 1799, in Philadelphia. He served an apprenticeship as printer in the office of the *Missouri Gazette*, and was subsequently associated with his father in the management of that paper. In March, 1822, he purchased the *Gazette* from the then proprietor, James C. Cummins, and changed the name to the *Missouri Republican*, continuing as proprietor (in company with Nathaniel Paschall from March, 1828) until July 1, 1837, when he transferred it to Chambers, Harris & Knapp. It was during Mr. Charless' management that the *Republican* became a daily, and his course as editor was uniformly marked by sagacity, enterprise, and vigor. He filled several municipal offices with credit, and was in his day one of the leading men among the public-spirited citizens of St. Louis, contributing largely, not only by the influence of his newspaper, but also by his personal exertions, to the city's industrial, social, and moral development. He died in the latter part of July, 1848, in the fiftieth year of his age.

first regular report of the proceedings of the St. Louis Court, and a full account of the running races on the previous day at the St. Louis race-course. On the 23d of December following the paper stated that "the newspaper and the book and job office of the *Missouri Republican* have been removed to the rooms over the store of Mr. P. E. Blow, 45 Main Street, adjoining the drug-store of Messrs. Charless & Blow."

The partnership of Chambers, Harris & Knapp was dissolved on the 9th of August, 1839, Oliver Harris withdrawing, and it was announced that the business would be continued by A. B. Chambers and George Knapp, under the firm-name of Chambers & Knapp.[1] This partnership continued until the 1st of January, 1840, when it was announced that Joseph W. Dougherty having become a member of the firm, the business would in future be conducted under the name and style of Chambers, Knapp & Co. At the same time the sheet was enlarged to twenty-six by thirty-eight inches. Mr. Dougherty did not long remain in the firm, and upon his retirement the name reverted to that of Chambers & Knapp.

The proprietors of the *Republican* announced on the 24th of November, 1841, that in connection with A. J. Noble, they were preparing "a complete directory of the city of St. Louis." On the 20th of November, 1843, the paper was again enlarged, its dimensions being twenty-seven by forty-six inches.

Nathaniel Paschall, who for four years had been editing the *New Era*, renewed his connection with the *Republican*, Jan. 1, 1844, and continued in charge of the editorial management until his death in 1866.

Nathaniel Paschall was born at Knoxville, Tenn., on the 4th of April, 1802. His father removed to St. Louis when Nathaniel was not quite twelve years of age, and being poor apprenticed his son to Joseph Charless, of the *Missouri Gazette*, to learn the trade of a printer. The lad applied himself to his new occupation with great industry and perseverance, and with a determination not merely to excel in the mechanical details of his craft, but to educate himself for the higher walks of journalistic life. He had attended the village school at Ste. Genevieve, where his father had been located prior to his removal to St. Louis, but his opportunities for acquiring knowledge had been very limited. To remedy this deficiency he devoted all his spare time to study, and gradually acquired such proficiency in writing that he was enabled to furnish contributions for the *Gazette*, which were accepted and printed by Mr. Charless. Before his apprenticeship had expired he had become a valued coadjutor in the general management of the paper. Gradually, step by step, he rose to the journalistic level of the proprietor, Edward Charless, who in March, 1828, associated him with himself in the ownership of the paper, the firm-name being Charless & Paschall. Besides working as a compositor and writing for the paper, Mr. Paschall operated the hand-press on which the *Republican* was printed, being assisted in his labors by George Knapp, now the senior proprietor, part of whose duty it was to ink the forms.

With practice Mr. Paschall developed into an easy and forcible writer, and the burden of his editorials was the development of the natural resources of St. Louis and the surrounding country. With an accurate perception of the conditions which are necessary to the expansion of a community in commerce and manufactures, he foresaw at a very early period that the city of his adoption was destined to become a great centre of industrial activity, and labored strenuously to impress the readers of the *Republican* with the vastness of the opportunities before them. In 1837, having secured a pecuniary competence, Mr. Paschall sold his interest in the *Republican* to Chambers, Harris & Knapp, who also purchased that of the senior partner, Edward Charless, and the firm of Charless & Paschall ceased to exist. Some years later, however, having met with pecuniary reverses, he again entered the field of journalism, and in company with Charles G. Ramsey commenced, in 1840, the publication of the *New Era*, the firm being known as Paschall & Ramsey. In 1842, Mr. Paschall, having been urged by his friends, consented to become a candidate for clerk of the Court of Common Pleas, and was elected. This was the only public office which he ever held, and it was only after much persuasion that he was induced to appear before the public as a candidate for the clerkship. In 1843 he was invited by the proprietors to return to the *Republican*, and on the 1st of January, 1844, it was announced by that paper that he had assumed the duties of associate editor; Col. A. B. Chambers being the editor-in-chief. His relations with Col. Chambers were of the most cordial and intimate character, and as an evidence of the respect which the senior editor entertained for his judgment, it is stated that Col.

[1] Oliver Harris was one of the leading journalists of St. Louis. In 1837 he removed to St. Louis from Pike County, and was associated for two years with A. B. Chambers and George Knapp in the management of the *Republican*. Subsequently he became interested in various newspaper enterprises in St. Louis, and filled the positions of clerk of one of the St. Louis courts, justice of the peace, and other offices. He then removed to Ste. Genevieve, where he published a paper and served as postmaster and magistrate. He died at Ste. Genevieve in the latter part of August, 1863.

Chambers was always in the habit of submitting his articles for the revision of his associate before putting them in type. Upon the death of Col. Chambers, in May, 1854, Mr. Paschall became chief editor, and in 1855 was admitted by the surviving partner, George Knapp, to an interest in the business, the firm becoming George Knapp & Co. Until 1866, Mr. Paschall continued to direct the columns of the *Republican*, and much of the paper's great success and popularity were due to his energetic management of its affairs, and to the wise discretion which he exhibited not only in admitting but in omitting matter. One of the chief qualities of a successful editor is the power of discriminating between what should and what should not be published, and this quality was possessed by Mr. Paschall to a pre-eminent degree. He was a born editor, keen in his appreciation of the relative value of news, and nearly always correct in his judgment as to the wisdom of a contemplated line of policy. His memory was extraordinarily retentive, and was stored with an inexhaustible fund of information. He was regarded as a living chronological table, and was consulted in the office as an index to everything that had been published in the paper. It has been asserted of him that "he was not only accurate as to dates but in respect to particular articles, whether communicated or selected, and frequently could tell not only the page and column wherein they were printed, but the kind of type they were in." There were weeks together, it is said, when he "wrote all the editorials, read, paragraphed, and punctuated the correspondence, made all the selections from the exchanges, and read the proof of his own articles." He never used spectacles, and it was only after his health had begun to fail that he could be induced to wear an overcoat.

In politics, Mr. Paschall was an earnest Whig, but never an extreme partisan, and after the dissolution of the Whig party in 1856 he supported James Buchanan, the Democratic candidate for the presidency. During the troublous period of the civil war he guided the fortunes of the *Republican* safely through the storm of internecine strife, and with a firm and unerring hand steered clear of the Scylla of extreme anti-Southern views on one side and the Charybdis of secessionist partisanship on the other. As an editor, he was the relentless foe of corruption, demagogism, and trickery in every form, and scorned to countenance, much less to advocate, a mean or ignoble act. He hated scandal, and never indulged in personalities, except where he considered it imperatively necessary. "In argument," says the *Republican* of Dec. 13, 1866, in an obituary notice of Mr. Paschall, "he hewed his path through with heavy, ponderous blows, without stopping to cull the flower of language by the wayside. He always plunged at once into the heart of the subject, and the keen blade struck home. Eminently practical in his views, he habitually looked to results. In politics he may have occasionally varied from his chosen line as the front of his antagonists changed, but this was incidental, for he was consistent as to the point aimed at and entirely faithful as to principle."

Personally, Mr. Paschall was of a kind and genial temperament, devoted to his family and friends, lenient to his subordinates, and generous to the poor. In 1864 his health began to fail, and by the advice of his friends he sought relief at different periods in visits to more Northern climates. He returned greatly benefited on every occasion, but in the autumn of 1866 he contracted a serious dropsical affection, which resulted in his death on the 12th of December, 1866. At a meeting of the Merchants' Exchange of St. Louis, held for the purpose of taking suitable action with reference to the death of Mr. Paschall, an eminent member of the bar paid the following eloquent tribute to his character:

"It is eminently fit that the merchants and others engaged in the commerce and other business centred in this city should pay a proper tribute of respect to the worth and memory of Nathaniel Paschall, a citizen of the Territory and State of Missouri for a half-century, and during nearly forty years of that time associated in the management and editorial conduct of one of the oldest and most widely circulated newspapers in the city and the great West. Mr. Paschall early became intimately and closely identified with all the great interests of commerce, manufactures, and other enterprises in which the people of this city and State have been concerned. His career of manhood, it may be said, commenced about the time of the organization of our State government. Possessed of a vigorous and active intellect, with habits of rare industry and stubborn perseverance, he seemed to have nerved himself in early life to the task of developing by his pen the material resources and wealth of the great West, and of pointing out in particular the advantages of the local situation and commercial facilities of St. Louis. In all that tended to promote the growth and prosperity of his adopted State, in all that tended to enlighten and elevate the character and promote the interests of its people, in all that tended to inculcate learning and to extend its influence to the masses, in all that tended to improve and strengthen the moral and social condition of his fellow-citizens, and especially in all that tended to promote the immediate interests, whether of trade, manufactures, or what not, of the people of St. Louis, Nathaniel Paschall, 'in season and out of season,' was, during nearly the whole of his active life, an earnest, enlightened, diligent, and faithful worker; therefore the tribute of respect, the expression of regard, and the words of sympathy and consolation expressed in your resolutions emanate with peculiar fitness from this chamber.

"Thirty-two years since I became acquainted with Mr. Paschall, and in those thirty years I learned much of his character, of his principles, and of his habits of thought; in short, we often came in contact in the political strifes of the day, as well as in the social circle, in such a way as to become well acquainted with each other.

"The respect which I entertained for the deceased, which grew up and strengthened as time passed on, prompts me on this occasion to unite my personal tribute with yours to his memory. There are others surviving Mr. Paschall in this city who knew him longer and more intimately than myself. There are a few—alas! how small the number—venerable men in our midst, some of these merchants who have lived in St. Louis during the whole period that the deceased made this city his home and field of duty. To such of my fellow-citizens, and to others who have been residents here even twenty or twenty-five years, many pleasant memories will spring up in connection with your acquaintance with the deceased, and your sympathies and sorrows, I feel assured, are this day in unison. Doubtless in due time the life and character of the deceased will by fit eulogy be carried down to posterity. This duty will not be expected of me on this occasion, nor am I competent for it. I may, however, with propriety speak of some few of the prominent characteristics of our deceased friend. To say he was a remarkable man is but a feeble expression, and no expression at all of his real character and merit. The mention of the prominent traits of his character, of his habits of thought, and of his practical life will develop the thought to which, in a few words, I desire to direct your attention. I think I do not misstate the fact when I say that Mr. Paschall did not in early life have the advantage of academical and collegiate study and discipline, but he supplied the place of these by an assiduous, earnest, and patient self-culture. He was truly a student, and a faithful one, from early youth to old age. Few men there are within the circle of my acquaintance who have studied and read books to better or as good profit and advantage as he. But with him it was not much reading that he sought to accomplish. He reflected upon and mastered his reading, and treasured up in memory the rich fruits of his study and labor. His memory was a vast store-house, not of frivolous or useless lumber, but of substantial, useful, and valuable facts, gathered from books, newspapers, and from observation. As a writer, and especially as a writer for a leading business as well as political news journal, Mr. Paschall had few equals and probably no superior in this country. The evidence of this was seen in the editorial columns of the *Missouri Republican* during the last quarter of a century. To the business men of this community I need not say that whenever he discussed any question touching the commerce, the manufacturing interests, or any subject connected with the prosperity or material interests of this city, Mr. Paschall was always comprehensive, clear, vigorous, and pointed. He was never misinterpreted, but always understood. He possessed peculiar aptness to grasp subjects connected with the business interests of the community. So too it was in his discussions of political topics. Though an earnest partisan the greater portion of his editorial life, he was nevertheless capable of sinking the mere partisan and dealing with political subjects with the open dignity of a far-seeing statesman. This made him, as he undoubtedly was during the last twenty-five years, a leader in political journalism. His varied resources, garnered in his vast store-house of memory, enabled him to take the lead in the discussion of subjects, and to develop and illustrate them before his readers with rare ability, and the productions from his pen rarely failed to command the attention of the reading public. Passing from these considerations, I desire, in conclusion, to say a word in respect to the social qualities and relations of the deceased. That he was unselfish, generous, and magnanimous all will bear witness who knew him well and had intercourse with him. Unostentatious in his demeanor, retired and domestic in his habits, he moved evenly and quietly in his course of life, and day after day and year after year he returned to his accustomed task and labored with untiring zeal that never flagged, not to enrich himself, not for personal aggrandizement, not for political emoluments or the honors of office, but for the great industries of the State of Missouri, for the advancement of commerce, of science and literature, and above all for the great interests and good of his fellow-citizens of St. Louis."

In 1832, Mr. Paschall was married at Springfield, Ill., to Mrs. Martha E. Edgar (widow of Gen. Edgar), who died about 1859, leaving a family of four daughters and two sons.

At the time of Mr. Paschall's return to the office the paper was increased in size to twenty-eight by forty-eight inches.

Another signal exhibition of the *Republican*'s enterprise was given in December, 1844, in printing the President's message. In its issue of December 10th it stated that the message was delivered on Tuesday, reached Cincinnati on Friday afternoon by special express to the *Cincinnati Gazette*, was put in type there, and copies dispatched to Louisville by steamboat. Thence it was conveyed to St. Louis "by Mr. Frost, of the Eastern Stage-Coach Line, by express," and delivered at one o'clock Monday, the whole distance between Washington and St. Louis being performed, including stoppages, in a little over six days. Taking into consideration the difficulties and uncertainties of Western travel at that time, the feat was one on which the *Republican* might well congratulate those who were concerned in its execution. The first number of the twenty fourth volume of the daily issue appeared on the 1st of July, 1845, on which occasion the editors remarked with pardonable pride that "it" (the *Republican*) "may claim to be one of the monuments of the past, as it has 'grown with the growth and strengthened with the strength' of the city, and is in every way identified with its history." It also congratulated itself upon the fact that for nearly twenty years it had been neither the recipient of the patronage nor the favorite of the United States government, yet nevertheless had won its way "to a position which we have no disposition to exchange or relinquish for any other." On the 26th of January, 1846, the public was informed that the *Republican* printing-office had been removed to "Chestnut Street, No. 16, southwest corner of the alley between Main and Second," and that the counting-room was situated on the ground-floor fronting on Chestnut Street.

Steam was introduced as the motive-power of the *Republican* press in February, 1846. In the issue of the 9th the editors said, "We present the readers of this morning's *Republican* a paper printed by the agency of the steam-engine," and added, "This is the first instance in the city, and we believe the first

west of the Mississippi, of the application of the steam-engine to printing purposes."

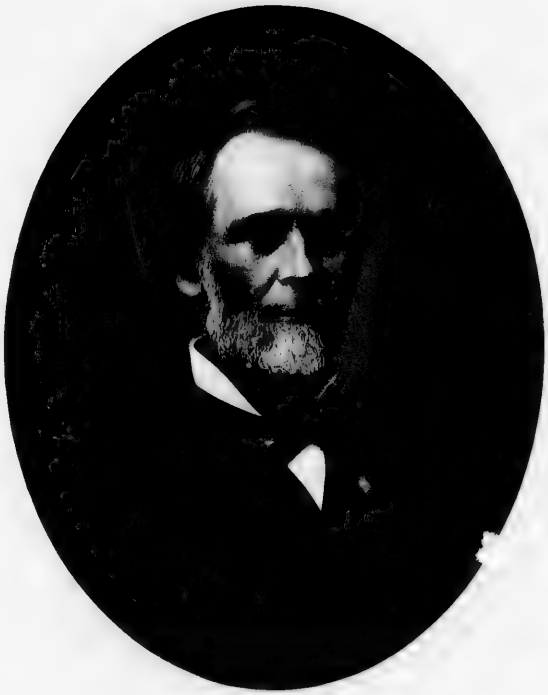
By means of a "special and extraordinary express for the *St. Louis Republican*," the President's message of December, 1846, was received in four days from Baltimore, and printed in the issue of December 14th, the time consumed being less by half a day than that of any previous performance of the kind. This feat, however, on which the *Republican* plumed itself at the time, was cast into the shade by the transmission and publication of the message in December of the following year. The message was telegraphed from Philadelphia (whither it had been conveyed by government express) to Vincennes, Ind., and was conveyed from that point to St. Louis by express, specially arranged for by the *Republican* with Eastman's line of stages. The time occupied in its transmission from Washington to St. Louis was three days, and the *Republican* declared the performance to be "the most magnificent enterprise of the age." On its arrival in St. Louis the message was placed in the hands of the compositors, and in two hours and a half was in type. A few minutes later it was printed and in circulation. On the same night it was "forwarded to subscribers all over Missouri and Illinois, and extras were printed for offices in both States, and sent off in like manner during the night." The *Republican's* success naturally aroused the jealousy of its contemporaries, and compliments of a doubtful character were promptly exchanged between the rival journals. The completion of the telegraph to the east bank of the Mississippi, in the latter part of December, 1847, did away with the advantage secured by organizing special expresses, and placed the newspapers of St. Louis more nearly on a par with respect to the facilities for procuring news. The competition between the *Republican* and its rivals was very keen about this time, and the *Union* having claimed a larger circulation, the proprietors of the former paper offered (in March, 1847) bets of fifty dollars each that the daily, tri-weekly, weekly, and combined subscriptions of the *Republican* were greater respectively than those of the *Union;* also fifty dollars more that the *Republican* subscription doubled that of the *Union*. Three days later the *Republican* demanded the verdict of the public in its favor, as "our neighbors of the *Union* have very handsomely backed out from our proposed bet as to the circulation of our respective papers."

The first regular issue of the *Sunday Republican* appeared on the 3d of September, 1848. It was "sent forth as a sample, without charge, and as only an imperfect earnest of what the Sunday morning edition will be." The subscription price was two dollars per annum, and single copies were sold for five cents. The publication of the Sunday edition elicited an earnest protest addressed to the publishers against its continuance, in which the subscribers expressed their deep regret "that a journal of such deservedly high standing should lend its influence, not by arguments, but something far more powerful, its example, against the proper keeping of that holy day," and requested a discontinuance of the Sunday paper. The protest was signed by "Very respectfully, your friends and patrons," John Simonds, John S. Thomson, T. B. Butcher, D. J. Hancock, Burtis & Brother, G. A. Humrickhouse, William Finney, Archibald Gamble, J. S. McCune, J. Spalding, R. P. Perry, George Myers, S. M. Tibbits, J. W. Hall, D. T. Wheeler, Sinclair Curtley, James E. Yeatman, Doan, King & Co., Edward J. Gay, George K. Budd, B. B. Hanenkamp, Asa Wilgus, H. D. Bacon, B. H. Randolph, E. F. Pittman, A. M. Rucker, William T. Christy.

Messrs. Chambers & Knapp replied, thanking them "for the kindness manifested" in their communication, but declining to comply with their request.

On the 17th of May, 1849, the office and fixtures of the *Republican* were destroyed in the great conflagration of that year, but on the 21st a sheet somewhat reduced in size was printed, and on the 10th of June the paper reappeared in its former shape. The building thus destroyed occupied a front of eighteen feet on Chestnut Street, with a depth of one hundred and twenty-seven feet. The front or corner room on the ground-floor was occupied as the counting-room, in which were kept the files of the paper. The latter, fortunately, were rescued from the flames, together with the books and accounts of the firm. The office of the *Republican*, after the fire, was temporarily established in the buildings afterwards occupied by the *Leader*, "where the cholera shortly after raging, our editor was forced to remove his desk to the adjoining billiard saloon." On the 5th of August the *Republican* announced that its office had been removed to the new four-story building on the corner of Chestnut and Third Streets, the counting-room being "the first door on Chestnut below the corner," and the editor's quarters "the corner room up-stairs." Immediately after the fire, one of the proprietors being in the East at the time, a new press from the manufactory of R. Hoe & Co. was purchased and shipped to St. Louis, where it arrived on the 5th of June. Owing to the derangement of the new machinery, no paper was issued for city circulation on the 9th, but on the 10th the *Republican* appeared, as stated, in an enlarged form, with new type from the St. Louis foundry of A. P. Ladew & Co.

At different periods the *Republican* published evening editions. On the 15th of April, 1849, it informed its readers that "on Monday evening, and thereafter so long as the river remains open," it would issue an evening edition, which would contain, in addition to the news published in the morning, all the important news that might arrive by mail or otherwise up to the hour of publication. Similar notice was given March 16, 1851, the *Republican* stating that it would issue an evening edition every day in the week, Sundays excepted, during the season of navigation, "in time for the packet and other boats leaving for the upper and lower river." On the 16th of July, 1861, the *Republican*, to satisfy the popular thirst for war news, announced that it would thenceforward issue an afternoon edition.



A new building five stories high was erected on the site of the burned structure, "on Chestnut Street between Main and Second, on the alley," and was occupied on the 1st of January, 1851. Its dimensions were forty-six feet eleven inches front on Chestnut Street by seventy feet deep on a twenty-foot alley. The basement was occupied as a press-room, and contained two Hoe presses, and the ground-floor was used for a store and the counting-room of the paper, business offices, etc. The second story was used, the eastern half for law offices, and the western half for editors and reporters and for an engraving establishment. On the third floor were the *Republican* bindery and composition-rooms, and the fourth and fifth floors were devoted to the *Republican* book and job office. The building, which was a very handsome and imposing edifice, was designed by Brewster & Hart, architects, and the contractor was Lloyd Jeter. After its removal into the new building the paper continued to flourish, and from time to time additional enlargements were rendered necessary. In January, 1854, the size of the sheet was thirty-three by fifty-six inches. The paper remained in the hands of Chambers & Knapp until the latter part of May, 1854, when the partnership was dissolved by the death of Col. Chambers.

A. B. Chambers was born in Mercer County, Pa., on the 9th of January, 1808, and settled at Bowling Green, Pike Co., Mo., in 1829, with but seventy-five cents in his pocket. He had studied law, and in order to obtain a license it was necessary that he should attend court at Fayette. One friend loaned him a horse and another the money needed to defray the expenses of his journey. He was admitted to the bar, and very soon took rank as a lawyer, both in civil and criminal cases. His success was very rapid, and while still a young man he contributed largely to the growth of the town in which he had located, "building good houses, encouraging schools, aiding worthy young mechanics, counseling students, etc." He also devoted much of his time to agricultural pursuits, especially the rearing of good stock. In 1832 he volunteered as a member of the company from Pike for the Black Hawk war, and served during the expedition to the Des Moines as quartermaster. On returning home he was elected to the Legislature, and soon afterward was appointed prosecuting attorney for the county, retaining the position until 1836, when he was again elected a member of the State Legislature. In 1833, in conjunction with Oliver Harris, he had established the *Journal* newspaper at Bowling Green, and conducted it successfully until 1837, when he removed to St. Louis, and with Mr. Harris and George Knapp assumed the management of the *Republican*. As an editor, Col. Chambers displayed qualities of a high order. He was a man of deep and strong convictions, and fearless in the expression of them; but his impulses were kindly and generous, and in all the various relations of public and private life he steadily maintained the character of a pure and thoroughly honorable man. He was untiring in the discharge of his journalistic duties, and in the trying crises of pestilence, fire, and flood with which St. Louis was visited during the period of his editorial management he exhibited conspicuous courage and lofty devotion to duty. During the cholera epidemic he served as a member of the St. Louis Board of Health, and was unremitting in his labors throughout that frightful period. As part proprietor of the *Republican*, he was closely and prominently identified with all the projects which arose from time to time for the improvement of St. Louis in commerce and manufactures, and everything calculated to add to her wealth and population and the intelligence and refinement of her inhabitants. He died on the 22d of May, 1854.

The interest of Mr. Chambers in the *Republican* became after his death the property of his widow, who with the surviving partner, George Knapp, conducted it until the 19th of May, 1855, when she sold her interest to George Knapp, who assumed all the liabilities of the establishment under the firm-name of George Knapp. On the 7th of August following George Knapp announced that he had admitted his brother, John Knapp, and Nathaniel Paschall "as partners in the publication of the *Missouri Republican*," and that thenceforth the business would be conducted under the style of George Knapp & Co.

Col. John Knapp, who thus became a member of the firm, and is now one of the principal owners as

John Knapp

the active business manager of the *Republican*, has been in charge of the business department of the paper for nearly twenty-nine years, covering the period within which the greatest development of the paper and of the city of St. Louis has occurred. Although not a native of St. Louis, he is among the oldest residents, not more than a dozen others having lived in St. Louis for a longer period.

Born in the city of New York, June 20, 1816, he arrived in St. Louis early in 1820, his father and mother removing to the city in that year, when it was little more than a country village. Within the sixty-three years of Col. Knapp's residence, St. Louis has increased its population fully a hundredfold, and during this period, which comprises the entire history of St. Louis as a city, the name of John Knapp has been intimately associated with nearly every enterprise that has contributed to its development. For fully half a century he has borne an influential and busy part in all the projects which have combined to make the city what it is. His father dying in 1823, Col. Knapp was at an early age thrust single-handed into the battle of life, and in 1825, when he was only nine years old, went to a farm near Bluffdale, Ill., to do what a boy could to earn his living. Remaining there nearly six years, he returned to St. Louis in March, 1831, and was apprenticed to Samuel Willi to learn the tailoring business, in which he continued until May 17, 1849, eighteen years in all. During the year 1837 he traveled through Illinois, Indiana, Kentucky, and Tennessee, teaching an improved system of cutting. Stopping at Jackson, Tenn., in January, 1838, he purchased a tailoring establishment in that place, and remained there until February, 1839, when he returned to St. Louis, and formed a partnership with James Shea, which lasted until the great fire of 1849, which destroyed the greater portion of the business district of St. Louis, including the establishment of Knapp & Shea. Col. Knapp then sold his interest to Mr. Shea, and soon after established himself in the wholesale grocery business in partnership with William Low. In December, 1852, he purchased the interest of Mr. Low, and continued the business until October, 1854, when he purchased an interest in the *Republican* newspaper, to the business of which he has given his exclusive attention since that date.

Col. Knapp owes his military title to long and active service in the militia of Missouri, in the course of which he has had a great deal that has been more than mere holiday duty to perform. Starting as a private in 1840, he remained in the military service of the State for more than a quarter of a century, passing through every grade up to that of regimental commander, to which he was twice commissioned. His connection with the service did not terminate until the disbanding of the volunteer militia during the war. He was among the volunteers who formed the St. Louis Legion at the breaking out of the Mexican war, and went to Mexico as captain of Company C of the First Regiment of Missouri Volunteers, leaving St. Louis May 23, 1846. He was also in command of the First Regiment of Missouri Militia, which formed the bulk of the battalion sent to the southwest frontier of Missouri in the fall of 1860, at the time of the Kansas "Jay-hawk" troubles, and again in 1861 had command of the same regiment as lieutenant-colonel at Camp Jackson, Col. A. R. Easton, the colonel of the regiment, not being present at the camp. Col. Knapp was among the prisoners taken when the camp was seized by Capt. Lyon, and after the disbanding of the old volunteer militia, which resulted from this seizure, he was appointed colonel of the Eighth Regiment of Enrolled Missouri Militia by Governor Gamble, and later colonel of the Thirteenth Provisional Regiment by Governor Hall. Still later he was appointed aid on the staff of Governor Hall, whom he accompanied, with the brigade of enrolled Missouri militia, in pursuit of Gen. Sterling Price, at the time of the famous raid through Missouri in 1864.

Col. Knapp married Miss Virginia Wright, a native of St. Louis, April 22, 1844. His wife, three sons, and three daughters are all living.

The year 1856 was the most prosperous the paper had known thus far, the advertising patronage being double that of 1854, and the circulation much larger than ever before. In 1857 the chief editor was Mr. Paschall, who was assisted by nine persons, being the associated editor, one commercial editor, one monetary editor, a river reporter, two local reporters, one stenographer, and two assistants. The paper also employed reporters and correspondents stationed at London, England, New York, Springfield, Ill., Independence, Mo., San Francisco, and other points. The press-room was supplied with two power-presses,—Taylor's double cylinder and Hoe's single cylinder,—the two being capable of printing at least six thousand copies per hour. On the 12th of July, 1858, the *Republican* recorded the fact that it had completed half a century of existence. During this period it had successively advocated the Republicanism of Jefferson and the Whig doctrines of Henry Clay, but it now floated the Democratic flag, with J. Richard Barret for Congress.

In 1862 the military spirit invaded the *Republican* office, and a company of militia known as the Missouri Republican Guards was formed on the 5th of Sep-

tember of that year. It was composed of the employés of the various departments, and numbered one hundred and ten men. The officers were:

George Knapp, captain; George W. Gilson, first lieutenant; George W. Purnell, second lieutenant. Non-commissioned officers: William H. Wells, first sergeant; Robert E. Craig, second sergeant; Aubert H. Haggerty, third sergeant; Philip F. Coghlan, fourth sergeant; Robert McKenna, fifth sergeant; George Clark, first corporal; Frank Glickert, second corporal; W. H. Woodward, third corporal; John F. Fraser, fourth corporal.

In April, 1864, a new "No. 3 eight-cylinder rotary fast printing machine," manufactured by R. Hoe & Co., and capable of printing twenty thousand copies an hour, was placed in the *Republican* press-room. It was thought at the time to be the climax of printing machinery, but in 1872 it was found inadequate to the demands of the *Republican's* vast circulation, and an improved Bullock and a Walter press, the latter then recently invented, were purchased and used for the first time on the 27th of October. Their capacity together was about twenty-seven thousand copies an hour. In May, 1879, a new machine, manufactured by R. Hoe & Co., and capable of printing, folding, pasting the backs, and cutting the ends of thirty thousand eight-page papers in one hour, was set up in the press-room.[1]

Mr. Paschall, who had so long been the guiding head of the editorial department, died, as previously stated, on the 12th of December, 1866, and William Hyde, who had joined the staff as a reporter, was promoted to the chief editorship.

Previous to the death of Mr. Paschall, the owners of the *Republican*—George Knapp, Nathaniel Paschall, and John Knapp—had formed a joint-stock company for convenience in the transaction of business. After Mr. Paschall's death his son, Henry G. Paschall, took his place as director, and soon afterwards Mr. Hyde, the chief editor, was admitted to an interest in the company. On the 19th of January, 1869, William Homes, of the editorial staff, died in New Haven, Conn.[2]

On the evening of May 24, 1870, the *Republican* office on Chestnut Street, between Main and Second, was again destroyed by fire, the loss being estimated at one hundred and eighty thousand dollars, of which one hundred and six thousand five hundred dollars was covered by insurance. For the second time the files of the paper from 1808 were saved. The eight-cylinder Hoe press was destroyed, together with the type and fixtures, but a four-cylinder Hoe press was protected in a fire-proof vault and saved, so that the paper was only forced to suspend publication for a single day. A temporary two-story brick building was erected on the site of the burned structure, and on the 30th of May an office was opened at 319 Chestnut Street, between Third and Fourth. The size of the paper was curtailed for some days, but on the 1st of June it reappeared in its old shape, being printed on the four-cylinder press on the site of the old building.

About the same time the proprietors effected the purchase from James Archer, through Messrs. Belt & Priest, of a lot on the southeast corner of Chestnut and Third Streets, upon which they determined to erect a fire-proof building.[3]

On the 9th of December, 1872, the *Republican* announced the removal of its business office to the new building, which had not then been completed, nor were the arrangements of the establishment "fully made in any department." The paper, however, had been issued from the new structure for about six weeks previous, the first publication having been made on the 27th of October. The appearance of this

[1] In its issue of May 7, 1879, announcing the arrival of the new Hoe press, the *Republican* gives an extended account of the presses used at different periods in printing the paper from its foundation. Its description of the earlier presses may be summarized as follows: The press used in printing the old *Missouri Gazette* from 1808 to 1822 was the first press built west of the Mississippi River, and was one of the kind then known as the Ramage press. It was hard work for two men to print seventy-five copies on one side in an hour. The next press was the Stansberry patent lever, with a capacity for printing two hundred and forty papers an hour on one side. It was followed by the Washington press, with which a good workman could print three hundred sheets in an hour, and in 1837 by an Adams power press, capable of printing eight hundred sheets, one side, an hour. To this succeeded in 1843 a single-cylinder Hoe, in 1853 a double-cylinder Hoe, and in 1858 a four-cylinder Hoe. In 1864 an eight-cylinder Hoe was purchased, as stated above.

[2] Mr. Homes was born in Boston on the 6th of February, 1820, and removed in 1843 to St. Louis, where he labored for several years as a Presbyterian minister. In 1856 he joined the editorial staff of the *Republican*, remaining about a year and a half, when he resigned to accept the position of attorney for the Ohio and Mississippi Railroad Company, having in the mean time studied law. In 1864 he went to California, Arizona, and Mexico on mining business, and supplied the *Republican* with letters descriptive of the customs, life, and resources of those regions. After an absence of two years he returned to St. Louis and resumed his editorial connection with the *Republican*. In 1868, however, failing health compelled him to withdraw from journalistic labor, and his death resulted in January of the following year. He was a graceful, scholarly, and forcible writer, and one of the ablest of the many brilliant journalists who have been employed by the *Republican*.

[3] On the 27th of July, 1870, occurred the death of William Fowler, who had been connected with the paper for twenty-three years as foreman of the composing-room. He was a native of Staffordshire, England, fifty-seven years of age, and had worked at the "case" with Horace Greeley.

number was signalized by a change from the folio or blanket sheet to the quarto form. The quarto sheet then had six columns to a page, but in 1874 its size was increased by the addition of one column to the page, making an eight-page paper with seven columns to the page. The new building was completed and regularly occupied for the first time on the 8th of January, 1873.

The new building thus "inaugurated" is one of the largest and finest newspaper establishments in the United States, and, in fact, in the world. It stands on a lot fronting eighty feet on Third Street, and extending back one hundred and ten feet on Chestnut Street. It is five stories high above the pavement, the distance from the sidewalk to the crest of the dome being one hundred and twenty-five feet, and is in the Renaissance style of architecture. Both fronts are of Missouri iron manufactured in St. Louis, and the sides are of hydraulic-pressed brick, the walls being of great thickness. The basement walls are of heavy stone, and the lathing used for the ceilings and inside finish of the walls and partitions is of iron. The main stairway ascending from Third Street to the fifth story is also of iron, and the floors are of hard pine laid on fire-proof cement, thus making the whole structure as nearly as possible fire-proof. The building is lighted by handsome windows of plate-glass, and the interior finish and fittings of the establishment are of a superior character. The basement, which covers the entire lot, is twenty feet in height, and is roofed with brick arches sustained by iron girders. It is occupied by the engine and presses used in printing the *Republican*, the paper store-rooms, and the mail department. The first floor is used for offices and for the counting-room and private apartments of the proprietors, George Knapp & Co. The second, third, and fourth floors are rented for offices, with the exception of one room on the fourth floor, which contains a large and carefully selected library for the use of the editorial staff of the paper. The fifth floor is monopolized by the various departments of the paper, including the editors' rooms, composition-room, proof-room, etc., and the communication between this portion of the building and the ground-floor and basement is by means of both stairways and elevators. Notwithstanding the fact that the building is regarded as fire-proof, an iron tank, capable of holding twenty-six thousand gallons of water, has been placed on the roof, and is kept constantly full in case of sudden emergency, the supply being obtained from a spring in the basement by means of pumps. The water thus obtained is conducted by pipes to every story in the building. The interior finish is all of hard wood, nearly all of black-walnut and white-ash, and the building is complete in all its appointments. The architects were Walsh, Smith & Jungenfeld.

In addition to this magnificent edifice, the *Republican* has an office on the grounds of the St. Louis Agricultural and Mechanical Association, where it keeps open house every year during the fair season. Perched upon the top of the flag-staff is the armorial emblem "which the *Republican* was assigned by the universal voice of the Whig party in the existing Presidential election of 1840," a coon *couchant*, which since the days of "Tippecanoe and Tyler too" has been the central figure of the *Republican's* escutcheon. The figure was wont to adorn the top of the lofty smoke-stack that towered above the old *Republican* building, destroyed by the fire of 1870. Though temporarily cast down by that event, it was not long before the "old coon" occupied the accustomed place on the smoke-stack at the temporary building which was speedily raised above the old.

After a career of more than seventy years the *Republican* is as lusty and vigorous as when in its early youth it was guided by the keen eye and steady arm of Joseph Charless, the pioneer of American journalism west of the Mississippi, while its circulation, prosperity, and influence have increased to enormous proportions. It is now one of the leading journals of the country, and in the intelligent treatment of contemporaneous topics, in the collection and handling of news, and in the advocacy of great enterprises affecting the growth and well-being of the United States, especially those which immediately concern St. Louis, it is always to be found in the foremost rank, but always controlled by that spirit of conservatism and prudence, united with great energy and lofty courage, which has been the guiding star of its course from the very beginning, on the turbulent currents and over the dangerous rapids of its infancy as well as on the smoother waters of its green old age.

In politics the *Republican* has always been a recognized power, not only in St. Louis and Missouri, but throughout the West. In its earlier days it was the consistent and fearless exponent of the principles of Thomas Jefferson, but when the Whig party became prominent before the country it transferred its allegiance to Henry Clay, and was the pronounced and unequivocal antagonist of Thomas H. Benton and his following. From 1830 to 1855 it ranked among the most influential organs of the Whig party, but repudiated Locofocoism and Know-Nothingism, and in the disintegration of parties caused by the slavery agitation the *Republican* gravitated towards Democracy. In 1856 its vast political influence in the

West was given to Buchanan, but during the Presidential struggle of 1860 it espoused the cause of Stephen A. Douglas, and notwithstanding the opposing influence of the Buchanan administration and the efforts of Senator Green, Missouri, largely through the untiring exertions of the *Republican*, was carried for the "Little Giant of the West." During the civil war, while opposing all secession tendencies, the *Republican* consistently antagonized all measures of doubtful constitutionality on the part of the Lincoln administration, and it was owing chiefly to its utterances and influence, steadily and persistently exerted, that the "bolt" in the Republican party which led to the election of B. Gratz Brown as Governor was organized and consummated. In 1872, the year made memorable in political annals by the Greeley fiasco, it advocated a passive policy on the part of the Democratic party, and since that disastrous campaign, while adhering to the principles of the national Democracy, it has practiced entire independence of party control, approaching more nearly to the ideal of a liberal and honest party journal than almost any other newspaper in the country. Its identification with the development of St. Louis and Missouri has from its earliest days been so thorough and so complete that many years ago the *Gazette* and *Republican* came to be household words, and its own prosperity and growth represent step by step the prosperity and growth of the great city whose interests it cherishes and promotes to the fullest extent of its influence and power. The publishers are still the venerable firm of George Knapp & Co., with Henry G. Paschall, son of Nathaniel Paschall, so long the editor and part proprietor of the *Republican*, as cashier, and William Hyde as editor-in-chief.

Mr. Hyde's full name is William Elisha Hyde, but thirty years ago, preferring a single patronymic, he dropped the middle name, and has since been known as William Hyde. He was born at Lima, near Rochester, N. Y., Aug. 27, 1836. His father was Elisha Hyde, at that time a teacher in Genesee College or Seminary, a native of Connecticut, and a lineal descendant of William Hyde, of Norwich. His mother's maiden name was Amanda N. Gregory, of Ithaca, N. Y., where she was born. She is now Mrs. Edward W. West, and resides at Belleville, Ill. William Hyde was the eldest son. Two of his brothers are dead and one living, and his elder sister is the wife of William H. Barnum, one of the judges of the Chicago Circuit bench. The other sister is single. He has also a half-brother and a half-sister, the latter married.

Mr. Hyde's father was an educator by profession, and never followed any other pursuit. He was a classical scholar, and very proficient in the higher branches of mathematics. His mother was also for a long time a teacher, a woman of extraordinary mental vigor and acquirements. His education, therefore, was largely obtained from his parents. His father, always of a restless nature, caught the California fever of 1849, and soon after his mother resumed teaching in Belleville, where the family then resided. William, though a mere youth, undertook to learn the drug business, in which he remained for a year or more, when he obtained a situation as teacher of a country district school. Afterwards he attended McKendree College, where he remained two years. Subsequently, in 1853–54, he attended law lectures at Transylvania University, Lexington, Ky., under Marshall, Robertson, and Wickliffe, noted jurists of those days, his license to practice being granted by Judge Marshall. He never practiced law, however, or established an office for that purpose. The Kansas-Nebraska excitement arising, Mr. Hyde, who was an ardent admirer of Stephen A. Douglas, wrote editorial articles for the *Belleville Tribune*, and finally took a partnership in the concern. During the Presidential campaign of 1856 he conducted the *Sterling* (Ill.) *Times*, and in November of that year cast his first vote for the Democratic nominee, James Buchanan. Leaving the *Times* he went to the State capital, with the view of becoming a candidate for clerk of the House of Representatives, the Democrats being in the majority, but instead accepted the offer of the *St. Louis Republican* to make him its Springfield correspondent during the session. He also enjoyed the emoluments of a committee clerkship. This was in 1857. In the fall of that year he was employed by Mr. Paschall to conduct the city department of the *Republican*. Having a strong liking for political writing, and the *Republican* being then an enthusiastic supporter of Stephen A. Douglas, he frequently contributed editorial articles, in addition to his duties as local reporter. It was in this way that in 1860 he became an assistant editor, taking charge of the exchanges, doing the clippings, and writing editorial paragraphs. The war revolutionized the newspaper business; more help was needed. Mr. Paschall, who had led a very active life from boyhood, was gradually declining in health. He liked Mr. Hyde, who was devoted to him and to the interests of the paper, and who studied his methods and tried to become the practical editor that he was. From about 1865 the details of the editorial management have been under Mr. Hyde's supervision, subject to the directions of Col. George Knapp, and on

the death of Mr. Paschall, in 1866, Mr. Hyde succeeded to the chief editorship.

On the 4th of June, 1866, Mr. Hyde married Miss Hallie Benson, then residing with her family in Toronto, Canada. She is a native of Missouri, born in 1847, and with the exception of a few years, when she was a child, and a few months when she lived in Canada, St. Louis has always been her home. Her father is James L. Benson, who has for many years been engaged in the official inspection of flour in St. Louis. Her mother is the daughter of Col. Blakey, formerly a prominent Democratic politician of northern Missouri.

Mr. Hyde is a Master Mason and a member of "the Elks," the only two secret societies he ever belonged to, and is connected with several social clubs. He has never been a candidate for any political office, and never desired to hold one. He has served as delegate at large from Missouri to two National Democratic Conventions and as a member of several State Democratic Conventions. He took a prominent part in what is known as the Missouri passive policy, by which the State was restored to the Democracy, was a pronounced Tilden man in the canvass preceding the nomination in 1876, and as the champion of Tilden for 1880, received one hundred more votes in the State Convention for delegate at large than Senator Vest, one of the most popular men in Missouri.

Perhaps the most romantic incident of Mr. Hyde's life was the balloon voyage with Professors Wise and Lamountain and O. A. Gager, on the 1st and 2d of July, 1859, from St. Louis to Henderson, Jefferson Co., N. Y., which voyage was made between seven o'clock in the evening and two o'clock next day, the balloon passing over the whole length of Lake Erie and Lake Ontario.

Mr. Hyde is still in the full vigor of his powers, and is justly regarded as one of the ablest journalists in the country. Added to a ripe experience in the service of the *Republican*, he possesses a clear analytical judgment, a rich store of general information, exhaustless energy, and intense devotion to the interests of the paper. Under his able management the *Republican* continues to enjoy undiminished the respect and confidence of the community, and its columns daily bear witness to the fact that Nathaniel Paschall has found a worthy successor in William Hyde.

The Western Journal was the second newspaper established in St. Louis, and had its origin in a movement headed by Maj. William Christy, William C. Carr, and others who were dissatisfied with the political course of the *Missouri Gazette*, then edited by its founder, Joseph Charless. A fund of one thousand dollars was raised for the purpose by these gentlemen, and the publication of the *Journal* was commenced in 1815, with Joshua Norvell as editor. In 1816 its name was changed to the *Emigrant*, and Sergeant Hall became the editor. In 1818 the *Emigrant* was purchased by Isaac N. Henry, Evarist Maury, and Col. Thomas H. Benton, the firm being Isaac N. Henry & Co., and the name was changed to the *St. Louis Enquirer*. For some years Col. Benton was the chief editor. In 1820, William Henry died and Mr. Maury withdrew, whereupon Patrick H. Ford took possession of the office for Col. Benton, the surviving proprietor. Mr. Ford retired in October, 1824, and died in January, 1826. He was succeeded by Gen. Duff Green, afterwards editor of the *United States Telegraph*, who purchased the establishment. In 1825, Gen. Green retired, and the paper was transferred to Charles Keemle and S. W. Foreman, the latter of whom had removed a small printing-office from St. Charles to St. Louis. In February, 1826, Mr. Keemle withdrew, and Mr. Foreman then associated James E. Birch with himself in the management of the *Enquirer*. During the same year the material of the *Enquirer* was sold under a deed of trust from Duff Green to Col. Benton, and was purchased by L. E. Lawless. Mr. Lawless then became the editor, and Charles Keemle the printer of the paper. In 1827 the establishment again became the property of Charles Keemle, who, with Charles Orr, transformed the paper into the *Beacon*, which expired in 1832.

Col. Charles Keemle, for many years a prominent journalist of St. Louis, was born in October, 1800, in the city of Philadelphia. His grandfather was a physician, who had emigrated from Amsterdam and settled in Pennsylvania. His father was a skillful mechanic, yet devoted only a small portion of his life to that pursuit, but as a commander of trading vessels spent most of his time upon the rivers and the ocean. His mother died in the city of Norfolk, Va., when he was but six years of age, and he was placed in charge of an uncle until he was nine years of age, and then was put to learn the printing business in the office of the *Norfolk Herald*, where he remained until 1816.

On leaving the office of the *Norfolk Herald*, at the suggestion of Dr. Jennings, of Norfolk, who had a brother residing in Indiana, he determined to go to Vincennes, Ind., and there establish a paper. Accompanied by a fellow-printer, he started for his future destination, where he arrived March, 1817, having performed that portion of the journey between Baltimore and Pittsburgh on foot. On March 14th the first number of the *Indiana Sentinel* was issued by Dillworth & Keemle.

Subsequently young Keemle removed to St. Louis, and entered the office of the *Emigrant*, afterwards merged into the *St. Louis Enquirer*. The continued confinement beginning to tell on his constitution, he gave up the printing business in August, 1820, and engaged as clerk to the American Fur Company. The company started from St. Louis, September, 1820, and spent the winter in trading successfully with the Kansas tribe of Indians. In 1821, Mr. Keemle was selected by Maj. Joshua Pilcher to make one of a company of fifty-four, carefully picked for the occasion, to penetrate to the Rocky Mountains, to trade with the Indians who inhabited those wilds. The party started from Fort Lisa, in the vicinity of Council Bluff, and after some perilous adventures arrived at the mouth of the Yellowstone. Here they commenced trading with the Crows, who inhabited that country, sending out in all directions experienced hunters and trappers, that they might obtain as large a quantity of beaver-skins as possible. Mr. Keemle acted as agent and clerk of the expedition, and for three years suffered the hardships incident to living and trading in the remote wilderness.

While in these remote regions he narrowly escaped a murderous attack by an overwhelming number of Indians. The two leaders of the expedition, Immell and Jones, fell early in the engagement, and the command devolved upon Mr. Keemle, who ordered the men to fight while retreating from ravine to ravine. After a conflict of eight hours, they succeeded in driving off their enemies with considerable loss. The little party suffered severely, having had ten killed, nine wounded, and one missing. They afterwards reached a Crow village, and having constructed boats, arrived safely at the mouth of the Yellowstone.

Col. Keemle remained connected with the company until 1825, when he returned to St. Louis, and again engaged in the printing business. He was associated with five or six newspaper enterprises, none of which had a permanent existence, but during their time were the organs of the Democratic party.

In 1839, Col. Keemle was married to the only daughter of Thomas P. Oliver, and had a family of three children. He possessed in a high degree the esteem of his fellow-citizens, and was offered several honorable positions. In 1839 he was nominated for mayor, but declined running, and when Gen. Harrison became President he received the first appointment made by him in Missouri, that of superintendent of Indian affairs for Missouri. In 1840 he received the appointment of Secretary of the Interior, and under Gen. Taylor's administration that of Indian agent for the entire Platte River district, both of which he declined.

His last newspaper connection was with the *Reveille*, which at one time was a bright and flourishing journal. Col. Keemle was elected recorder of deeds for St. Louis County in 1855, and retained that position for six years. The last years of his life were spent in the quiet of his home on Compton Hill, St. Louis, where he died on the 28th of September, 1865, mourned by a host of friends as a man of rare and genial qualities, and by the community at large as a useful and public-spirited citizen.

St. Louis Herald.—A paper called the *Herald* was established in 1820, but had a brief existence, and in 1834 another paper of the same name—the first daily issued in St. Louis—was published by Treadway & Holbrook, but soon suspended.[1] Another *Herald* was established by Warren Woodson in 1840, and still another by Russell S. Higgins and Philip G. Ferguson in 1852. Mr. Higgins had already become well known as the editor of the *People's Organ*, but had sold his interest in that journal to Anderson & Staley. Subsequently Staley disposed of his interest to Edmund Flagg, and the firm became known as Anderson & Flagg. The latter finally retired, and the paper was managed by Anderson alone, who merged it into the *Price Current*. The first number of the new *St. Louis Herald* made its appearance on the morning of Dec. 20, 1852. It was sixteen and one-half by twenty-three inches in size, was conducted with ability and spirit, and was published at five cents per week. On the 4th of July, 1854, it was enlarged to a sheet of twenty by twenty-seven inches, and the price of subscription was increased to ten cents per week. Among the regular contributors to the paper were Mr. Allen, the well-known financial editor of the *St. Louis Republican*, and Thomas Gales Forster, a spiritualist, and afterwards editor of the *Boston Banner of Light*. On the 18th of November, 1853, James L. Faucett joined the staff of the *Herald*, and some nine months later purchased the interest of Mr. Higgins. The paper was now published by Ferguson & Faucett. The change of proprietorship was signalized by another enlargement of the sheet, which was increased to twenty-one and one-half by thirty inches. The publication of a Sunday edition of the *Herald* was also commenced. On the 11th of April, 1855, the fifth volume was [illegible] and on this occasion the

[1] Richard M. Treadway, one of the firm had been foreman of the *Republican* composing-room. After the suspension of the *Herald* he went to Alton, Ill., where he published the *Alton Telegraph*. He died in Alton in 1837, at the age of thirty-three years.

paper appeared for the third time in an enlarged form. It continued to grow until on the 31st of March, 1857, its size was increased to twenty-four by thirty-six inches. On the 3d of July of this year, Mr. Faucett purchased Mr. Ferguson's interest, and thus became the sole proprietor and editor. In 1858 the *Herald* was printed at No. 24 Market Street, between Main and Second Streets. Attached to the regular publishing establishment was a job office under the charge of E. H. A. Habicht.

The St. Louis Leader was a daily, tri-weekly, and weekly Democratic journal, which was published at No. 48 Third Street, corner of Pine. It had its origin in a religious paper of the same name published in the interest of the Catholic Church, and which had been established early in 1855. The founders of this journal had made proposals to Dr. J. V. Huntington, then editor of the *Baltimore Metropolitan Magazine*, who was visiting St. Louis by invitation of the Catholic Institute as a lecturer, to aid them in establishing a Catholic journal. Satisfactory arrangements having been effected, subscriptions were raised and paid over to Dr. Huntington, who was recognized as both proprietor and editor of the new journal. The first number of the *Leader* appeared on the 10th of March, 1855, and the publication was continued regularly until the summer of 1856, when Dr. Huntington determined to take part in the political campaign of that year. In order to do this more effectively he established, on the 1st of July, 1856, the *Daily Evening Leader*, which warmly espoused the Democratic cause. The weekly was also continued in its original form. At that time the *Evening Pilot*, established June 25, 1854, was the recognized Democratic organ of the city; but such was the success of the *Leader* that early in the fall Charles L. Hunt entered into an arrangement with the proprietors of the *Leader* and *Pilot*, which resulted in the purchase of the *Pilot*, the consolidation of the two interests, and the establishment of a new daily morning paper, which retained the name of the *Leader*, John V. Huntington and Charles L. Hunt becoming its joint proprietors. The first number of the new daily was issued on the 13th of October, 1856. It was recognized at once as the regular organ of the Democratic party. The editors were Dr. Huntington and William Seay. The *Sunday Leader*, a literary edition of the paper, was established in the spring of 1857, under the editorial charge of Donald McLeod. In the fall of this year, Mr. Hunt having purchased the interest of his partner, Dr. Huntington, became sole proprietor, and in February, 1858, placed the *Leader* under the charge of Edward W. Johnston; Mr. Seay retaining his post as political editor. Mr. Johnston had previously been connected with the *National Intelligencer*, the *Richmond Whig*, and the *New Orleans Crescent*. The paper, which had been a quarto, was transformed into a folio, and in its new shape enjoyed a greatly increased prosperity. Four editions were published,—daily, Sunday, tri-weekly, and weekly. In 1858, Mr. Johnston bought the paper, and Messrs. Hunt and Seay withdrew. The *Leader* then became independent in politics, and about two months after its purchase by Mr. Johnston suspended publication. Johnston was one of the most brilliant and effective writers ever employed on the St. Louis press, and for some years was prominently connected with the Mercantile Library. He was highly educated, and died in 1867, deeply regretted.

The St. Louis Times.—There have been four newspapers established in St. Louis with the name of *Times*. The earliest of these was founded in June, 1829, by Stine & Miller. While Democratic in tone, the paper was violently opposed to Senator Thomas H. Benton, then the acknowledged leader of the Missouri Democracy. S. W. Foreman was the editor. In 1830, Mr. Stine retired, and the paper passed into the hands of T. J. Miller & Co., the "company" being Rev. E. P. Lovejoy, better known as "the Alton martyr," who withdrew from the paper in February, 1831. Mr. Lovejoy's interest was purchased by J. L. Murray and R. K. Richards. Finally, in 1832, the paper was sold under legal process. Charles Keemle purchased the plant, but allowed the paper to expire.

The Rev. E. P. Lovejoy, owing to his extreme abolition principles, passed through a stormy career, ending in death at the hands of the Alton mob. During his connection with the *Times* he gave the paper a strong abolition bias. He was of the Presbyterian faith, and in 1833 or 1834 started a religious paper in St. Louis, called the *St. Louis Observer*. This journal was so strongly tinctured with the editor's political views that both he and his paper became exceedingly obnoxious to the people, and in June, 1836, a small mob visited the office of the *Observer*, upset the press, and threw the type into the street. Subsequently Rev. Mr. Lovejoy took his press and type and went to Alton, Ill., but his character as an agitator having preceded him, a party of Alton citizens on his arrival cast both press and type into the Mississippi. On giving a pledge that he would confine his journalistic work exclusively to religion, Mr. Lovejoy was permitted to revive his paper and publish it there under the title of the *Alton Observer*. For a while he kept his pledge, but finally disregarded it and renewed the publication of aboli-

tionist arguments. Again his office was raided, and the press and type thrown into the Mississippi. A new press was ordered, and on the citizens of Alton declaring it could not be landed, some of Mr. Lovejoy's political friends armed themselves and attempted to guard it. A riot ensued, in which a citizen and Lovejoy were killed and others wounded.

Another paper appeared April 3, 1850, under the title of the *St. Louis Times*. It was Democratic, and was published daily, weekly, and tri-weekly. Judge Walker, formerly of the *New Orleans Delta*, was editor, and Mr. McFarland, also a journalist, was associated with him. During the first month of its existence A. H. Buckner became the editor. In a few months, however, the paper became embarrassed, and was purchased by W. B. Foster, and John Loughborough became editor, *vice* Buckner, retired. In January, 1852, Mr. Foster associated with him William R. Price. In October of the same year the *Union* was absorbed, and the two were published as the *St. Louis Times*, by Philips, Price & Norris. Mr. Foster having previously sold his interest to Mr. Price. This is the last account we find of it.

In September, 1858, still another *St. Louis Times* was started, but seems to have had a very brief existence.

The fourth and last *St. Louis Times* was established in July, 1866, and its career affords one of the most interesting chapters in the history of St. Louis journalism. Its founders were D. H. Mahoney, Stilson Hutchins, and John Hodnett, all of Iowa, where Hutchins had made a notable record as a State-rights Democratic editor. The design was to establish a paper more aggressively Democratic than the *Republican* was supposed to be. The paper was intensely Southern in tone. Under the management of Hutchins, who was the editor, it soon became an influence, and was recognized as one of the most sprightly papers St. Louis had ever had. Still it suffered from the lack of sufficient funds (the original capital was only six thousand dollars), and the early files show a good deal of crudeness. In December, 1867, Mahoney withdrew and returned to Iowa, and in 1869 Maj. Henry Ewing, of Tennessee, bought a third interest. His money put the paper fairly on its feet, and it prospered to such an extent that in July, 1872, Hutchins sold Ewing his interest for the handsome sum of one hundred thousand dollars. Ewing died in 1873, and a new management succeeded, with C. A. Mantz as president. Prominent in the combination was also John Hodnett and the Hon. G. B. Clark, who, however, soon retired. Maj. C. C. Rainwater then went into the company. In June, 1874, Frank J. Bowman and the Hon. Celsus Price obtained a controlling interest, and put Col. E. H. E. Jamieson in charge. Col. Jameson was soon afterwards succeeded by Mr. Hutchins.

On the 5th of June, 1875, Senator Celsus Price entered the *Times* office and took possession of its entire management, conferred upon him by a vote of the directory, Charles A. Mantz and Estill McHenry having voted to remove Mr. Hutchins and place Mr. Price in control. The finances of the paper went on from bad to worse, and ultimately, in July, 1875, D. C. Stone sold out the concern on a deed of trust for one hundred and thirty-one thousand two hundred and fifty dollars to Col. John T. Crisp, a well-known politician, who reinstated Hutchins, under whose management affairs revived. Among those associated with him were R. H. Sylvester, a forcible writer; Maj. John N. Edwards, now of the *Sedalia* (Mo.) *Democrat*; and Walter B. Stevens, now the capable city editor of the *Globe-Democrat*. J. H. Lambert, formerly of the *New York Sun*, was also a writer on the paper. The *Times* was distinguished for its clear and forcible utterances, and it performed especially able work during the Presidential campaign of 1876; but various circumstances conspired to prevent a repetition of the early financial success. The concern was continually embarrassed, and in May, 1877, B. M. Chambers, a banker, having purchased the property at public sale for fifty thousand dollars, assumed control, and displaced Mr. Hutchins, who announced his intention of commencing the practice of law.

Mr. Chambers appointed R. H. Sylvester managing editor, Edward Willet political editor, W. B. Stevens city editor, J. H. Carlin assistant city editor, and C. S. Fisher business manager. Chambers' money kept the paper afloat until November, 1878, when a partnership was formed with Walcott & Hume, who were then conducting the *Journal*, and from Nov. 16, 1878, to Oct. 23, 1879, the paper appeared as the *Times-Journal*. Hume became the editor of the combination, and Walcott the business manager.

The *Journal* originated with the *Handles-Zeitung* (progenitor of the *Age of Steel*, as mentioned in the history of that paper), which was established in 1858. It became the property of Walcott & Hume, who called it the *Journal of Commerce*, and projected a daily evening edition. The *Daily Journal*, thus established, was under the management of Mr. Hume, a forcible writer.

In 1879 the *Journal* was sold, subject to a first mortgage of fifteen thousand six hundred dollars, which was given June 1, 1877, bearing interest at the rate of nine per cent., with H. L. Sutton as trustee

to John E. Lawton, representing Williamson, Stewart & Co., wholesale paper dealers. Previous to this transaction the *Journal* had been published in connection with the *Dispatch*, and subsequently it was incorporated with the *Times*, and the paper was known as the *Times-Journal*, as stated above. In politics it was independent.

In July, 1879, Chambers, who owned three-fifths of the stock (then rated at one hundred thousand dollars), placed A. S. Mitchell, formerly of the *News* and *Intelligencer*, etc., in charge of the *Times-Journal*, and advertised the paper for sale. Walcott & Hume took legal steps against Chambers' proceedings.

In August, 1879, Chambers sold the paper to Dr. James P. Beck, of St. Louis, who assumed the indebtedness and mortgages, some fifty thousand dollars in all, and continued Mitchell as manager and editor, but Walcott & Hume's vigorous opposition disheartened him, and he threw the paper back on Chambers' hands. The *Times-Journal* was then in debt to the extent of fifty thousand dollars.

Finally, in October, 1879, Chambers disposed of the paper to J. H. R. Cundiff, then a resident of St. Joseph, Mo., but now of the editorial staff of the *St. Louis Republican*, who dropped *Journal* from the title and made the paper unequivocally Democratic, and so conducted it through the Presidential campaign of 1880, when, becoming persuaded that he could not longer sustain the paper, he made arrangements with the *Republican* to print it, his intention being to fulfill his contracts and discontinue the enterprise.

John Hampton Roads Cundiff was born in Hampshire County, Va., Nov. 20, 1832. His parents, Layton S. and Hannah Cundiff, emigrated west, and settled in Buchanan County, Mo., in 1840. When James was fourteen years of age his father returned on a business trip to the East, where he died. His paternal grandfather was a descendant of a French Huguenot family, and his grandfathers on both sides served in the Revolutionary army. His early educational advantages were limited, owing to the lack of proper facilities in the neighborhood, and at the age of fifteen he apprenticed himself to the printing business. On reaching his majority he began the publication of a country newspaper at Parkville, Mo. He was moderately successful, but disposed of the property in 1854. During the same year, in conjunction with P. S. Pfouts, he purchased the *St. Joseph Gazette*, which was then a weekly paper. In 1857 they began the publication of a daily journal, the first in St. Joseph and the first in Northwestern Missouri. In June, 1861, he joined the Confederate army under Gen. Sterling Price, and served throughout the war, beginning as a private and advancing by successive promotions to the rank of colonel, and taking part in a number of battles in Louisiana, Mississippi, Tennessee, Arkansas, and Missouri. In 1865 he went to Mexico, and was occupied some time in farming in the State of San Luis Potosi. In 1866 he obtained a position with the Imperial Railway Company, operating a road between the cities of Mexico and Vera Cruz. He remained in this capacity until August, 1867. In June of the following year he returned to St. Joseph, and revived the *St. Joseph Gazette* where it had been left in 1861. Although the enterprise was undertaken without capital, it proved so successful as to make the paper worth twenty-five thousand dollars, for which it was sold in 1873. Mr. Cundiff was elected clerk of Buchanan County Circuit Court in 1874, and served a number of times on the Democratic State Central Committee. On the 11th of October, 1855, he married Miss Cecilia E. Keedy, daughter of Dr. Daniel G. Keedy. He is now one of the valued members of the *Republican's* staff, and is widely recognized as a vigorous and brilliant writer.

Under the agreement made between Mr. Cundiff and the proprietors of the *Republican* in 1879, the *Times* was printed with the *Republican's* forms, and was in fact the *Republican*, except in name. Chambers objected to this proceeding and sought to enjoin, but the application was refused by the court, and Frank J. Bowman, the lawyer, who owned twenty-eight thousand dollars of Chambers' notes, secured by mortgage on the paper, placed a trustee in possession of the concern, had a receiver appointed (Charles Green), and procured an order for a sale of the paper under foreclosure. The sale took place Feb. 8, 1881, and the paper was struck off to Mr. Bowman for twenty-four thousand five hundred and fifty dollars. The check for the purchase-money was given by George Knapp & Co., proprietors of the *Republican*, for which paper the sale was a decided victory, as it removed effectually from competition the only important Democratic rival it ever had.

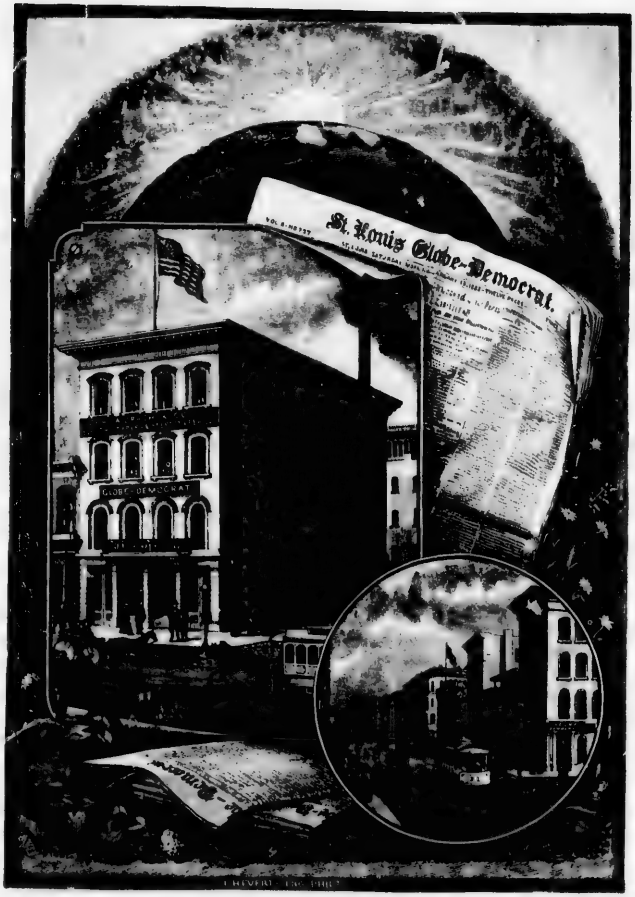
Thus ended the checkered career of the *Times*. The amount of money lost in conducting it has never been definitely ascertained, but it must have been a very large sum. Stilson Hutchins was practically the creator of the *Times*. He was born in New Hampshire in 1838, was partially educated at Boston, and attended Harvard University for a season, but did not complete the course. When but sixteen years of age he contributed to the *Boston Post*, *Boston Herald*, and other journals. In 1855 he went West, and conducted the *North Iowan* with such ability that in

1859 he was induced to take charge of the *Journal* at Des Moines, but public sentiment induced by the war rendered his State-rights views unpopular, and he was forced to dispose of his interest in that paper. Soon afterwards he assumed the control of the *Dubuque Herald*, the oldest and most influential Democratic paper in the State, and his vigilance and courage during the crucial years of the war made him nationally famous. In 1865 he retired from this paper, and the next year assisted in establishing the *St. Louis Times*. The paper, as already stated, had not much money, but Hutchins' energy and ability made up for the lack of it. For months his labors were of the most exhausting character, for much of the time he was editor, business manager, pressman, solicitor, and reporter, but his ability and untiring energy soon met with proper appreciation, and the *Times* made money very fast. In 1872 he was elected to represent the Sixth District of St. Louis in the Legislature, and was prominent as a debater in that body. In January, 1873, he bought a controlling interest in the *St. Louis Dispatch*, but it was not a paying investment. In the winter of 1875 he resumed control of the *Times* again, and for some months managed both the papers personally. Finally he sold the *Dispatch*, and concentrated his efforts on the *Times*. In 1874 he was again elected to the Legislature. In 1877 he left St. Louis to assume the editorship of the *Washington Post*, which position he now occupies.

As a writer, Mr. Hutchins is clear, humorous, and incisive, with a tendency to irony and sarcasm of the keenest sort. He is rapid and fecund in composition, and his energy and versatility are shown in his labors during the early years of the *Times*. He possesses social qualities of a high order, and he has many devoted friends in St. Louis, but his aggressiveness made him many enemies, and to this fact must probably be attributed much of his want of success during the later years of his residence in that city.

Maj. Henry Ewing, proprietor of the *Times* after the first withdrawal of Stilson Hutchins from the management, died on the 13th of June, 1873. He was born in Nashville, Tenn., in 1841, and was the son of Orville Ewing. The family was one of the most influential in Tennessee. In 1863 he was married to Emma, daughter of E. T. Burr, of Batesville, Ark. When the war broke out Maj. Ewing espoused the side of the South, and served with gallantry and distinction during the war. He was a member of Gen. Zollicoffer's staff, and was by the side of that officer when he was killed at the battle of Mill Springs. He also took part in the battles of Shiloh and Corinth, and was afterwards assigned to duty on the staff of Gen. John S. Marmaduke, and participated in all the important engagements in the Trans-Mississippi department until the close of the war.

After the capture of Gen. Marmaduke he became Gen. Fagin's chief of staff, which was the last position he held in the army. At the close of the war he returned to Nashville and established the wholesale grocery-house of Ewing & Co., which is now one of the most extensive in the South. In the fall of 1869 he removed to St. Louis and bought a third interest in the *Times*, Stilson Hutchins and John Hodnett owning the other two-thirds. In August, 1872, he bought Mr. Hutchins' interest, and subsequently held the controlling interest in that paper.



The Globe-Democrat originated with the *Democrat*, which, in turn, was the descendant of the old *Argus* and the *Signal*, both of which were conducted by William McKee. The *Argus* was originally the *Workingman's Advocate*, a Democratic paper established in 1831 and afterwards sold to Bowlin & Mayfield, who transformed it into the *Argus*.

Mr. Bowlin was for a long time judge of the Criminal Court of St. Louis County, and was also minister to Paraguay. Early in 1838 the *Argus* became a daily, having passed through the hands of Messrs. Mayfield, Lawhead & Corbin. It was now the property of the Messrs. Watson, who were compelled to suspend in November, 1839. On the next day Andrew Jackson Davis became the proprietor, and made William Gilpin editor. In June, 1840, Mr. Davis was killed in a street encounter with W. P. Darnes. An article reflecting on young Darnes had appeared in the *Argus*. It was written by Gilpin, the editor, and Darnes informed Davis that he would hold him personally responsible in the future for like publications. He was also severe in his strictures on Gilpin, and the latter wrote an even more bitter article, which was published; whereupon Darnes, having purchased a small iron cane, hunted up Davis, and assaulted him in such a manner that he died a day or two later. Darnes was tried, convicted of manslaughter, and fined five hundred dollars. A. R. Corbin succeeded Davis as proprietor, and associated with him R. S. Higgins, John Quigley, and William Corse. In December, 1841, Mr. Corbin announced the failure of the *Argus*, which passed into the hands of Shadrach Penn,[1] a prominent Louis-

[1] Shadrach Penn, Jr., was born in Maryland, near Frederi[ck]. While he was quite young his parents removed to a farm i[n] the interior of Kentucky. ville journalist, who revived it as the *Missouri Reporter*, which soon became an influential journal. Samuel Treat, afterwards the well-known jurist, was one of its editors.

Mr. Penn died June 16, 1846, and the paper was then sold to L. Pickering, who changed its name to the *Union*. It finally drifted into the hands of Richard Phillips and then into those of William McKee, then publishing the *Signal*, a Free-Soil paper, who merged both papers into the *Missouri Democrat*, one of the progenitors of the *Globe-Democrat*.

The *Signal* was the successor of the *Barnburner*, the first Free-Soil paper in Missouri, which was established in 1849 by William McKee, Hudson E. Bridge, O. D. Filley, John How, John M. Krum, Alfred Vinton, Edward Walsh, and others who were opposed to the extension of slavery. Its editor was Francis P. Blair. In less than three months its publication was discontinued, but in 1850 it was succeeded by the *Signal*, published by William McKee and William Hill, which advocated the same views. In 1853, Messrs. McKee & Hill, having purchased the *Union*, merged the two papers, as stated above, into the *Missouri Democrat*. The *Democrat* had been established in the interest of Col. Thomas H. Benton and the Free-Soil wing of the Democratic party. It was published from August, 1852, up to March 12, 1853, when it was incorporated with the *Union* and *Signal*, retaining its own name. Francis P. Blair was the chief editor, as well as one of the proprietors, and his principal associates and successors were B. Gratz Brown, afterwards Governor of Missouri, Peter L. Foy, and W. S. McKee, a cousin of William McKee.[1]

Published in a slave State, and antagonized by a powerful and energetic political element, the *Democrat* passed through a long and arduous struggle for existence, but William McKee, to whom the general management of the paper was intrusted, succeeded in keeping it alive and in paying off, in 1859, the last installment of the indebtedness to Richard Phillips, incurred in the purchase of the *Union*. In 1860 the paper was completely out of debt and enjoying a fair measure of prosperity. The *Democrat*, which had been an enthusiastic advocate of Col. Thomas H. Benton for Congress, and had also supported the administration of President Buchanan, gradually drifted into the ranks of Republicanism, and during the campaign of 1860, and throughout the agitated period which succeeded it, up to the breaking out of the civil war, preserved a bold and consistent attitude in opposition to secession and in defense of the Union. Associated with Mr. McKee in the management of the *Democrat* was George W. Fishback, originally its commercial editor and afterwards a general contributor to the editorial columns, who had purchased an interest in the establishment in January, 1857. About the same time B. Gratz Brown became part proprietor, but his interest was subsequently transferred to Mr. Fishback. Mr. Blair and Mr. Brown both severed their connection with the paper in 1865, and Daniel M. Houser purchased a one-sixth interest, the firm becoming McKee, Fishback & Co. During the civil war the *Democrat* was the steady and unequivocal supporter of the administration at Washington, and of its war measures in Missouri and elsewhere.[2]

The *Democrat* had to face not only the rigid surveillance of the military authorities and the hostility

frequently left to manage the editorial department of the paper with which he was connected as an apprentice before he was twenty-one years of age. The Hon. John J. Crittenden and other gentlemen of the legal profession gave him the use of their libraries, from which he stored his mind with useful knowledge, being especially devoted to such as related to the science of government. At last he undertook the editorial management of a political paper in Georgetown, Ky., and soon became celebrated as a political journalist. After the slaughter of the gallant Kentuckians at the river Raisin, he volunteered as a private in common with many of his friends, and was with Governor Shelby during the campaign on the Northwestern frontier, which was terminated by the victory at the river Thames. He was at that battle, being then, however, under the immediate command of Col. Simrall.

At the close of the war he engaged for a short time in mercantile affairs, but soon returned to his favorite pursuit, the management of a Democratic journal. He was the first editor who predicted that Gen. Jackson would be elevated to the Presidency, and as early as 1819 wrote an elaborate article on the subject, urging the claims of the hero of New Orleans. Although there were only a few in Kentucky who were prepared at that time to support Gen. Jackson in preference to Mr. Clay, yet Mr. Penn hesitated not to endanger his private interests and the popularity of his journal by declaring boldly for him and persevering in his support until the close of his administration.

During the violent struggles in Kentucky on the relief questions Mr. Penn opposed the relief party, assailing with great vigor the new court, stay laws, two-thirds laws, replevin laws, the Commonwealth Bank, etc. Eventually he saw the principles for which he contended triumph over his frequently victorious opponents.

During Gen. Jackson's administration, at the earnest solicitation of the then President, he remained at Washington during the famous panic sessions, contributing greatly by his able articles, published in several Democratic papers, to the success of the administration. He was a zealous supporter of President Van Buren's measures of public policy, and labored assiduously for the election of President Polk. Subsequently he removed to St. Louis, established the *Missouri Reporter*, and died while editing it.

[1] William S. McKee died Oct. 13, 1854.

[2] At the beginning of the war one of the principal editors of the *Democrat* was A. H. Lewis, who died Sept. 25, 1862.

of the Southern sympathizers of St. Louis and Missouri, but also the aggressive rivalry of an opposition journal, conducted by persons, some of whom had formerly been members of its own staff. In 1862 the *Union*, a loyal conservative paper, which had its origin in the Blair-Fremont difficulty, was established in opposition to the *Democrat*. Gen. Francis P. Blair having procured the removal of Fremont from the command of the Missouri Department, the anger of the *Democrat* was aroused, and that paper commenced a war on Gen. Blair, who was at the time an owner of some of its stock. The breach that occurred resulted in the establishment of the "Union Newspaper Company," embracing such names as those of Francis P. Blair, O. D. Filley, John How, Barton Able, and other prominent Union men. P. L. Foy was the editor-in-chief, A. W. Alexander was a leading editorial writer, and Col. William Cuddy was managing editor. It subsequently became what was then locally known in Missouri politics as the organ of the "Claybank" party, while the opposition were stigmatized as "Charcoals." The *Union* made an energetic fight against the Fremont Republicans, and was the first paper in the West to advocate Mr. Lincoln for the second term to the Presidency. The *Democrat* kept at its masthead John C. Fremont for the Presidency, in opposition to Lincoln, and affiliated with the Germans in sending delegates to the Cleveland Convention, where Fremont was put in nomination; but subsequently the *Democrat* transferred its allegiance to Lincoln, and was recognized as the leading Lincoln organ, while the *Union* appeared to be ignored. After one or two changes in its struggle for existence, the *Union* was purchased by a company composed of Mr. Colburn, Charles P. Johnson, James Peckham, E. B. Thomas, and others. The name was changed to that of the *Dispatch*, and the time of issuing from morning to the afternoon. After many vicissitudes the paper was absorbed into the present *Post-Dispatch*.

In 1872, Mr. Fishback, having become dissatisfied with the management of the *Democrat*, endeavored to purchase the interest of the other partners, McKee and Houser. At that time one-half of the stock was owned by Mr. McKee, one-third by Mr. Fishback, and one-sixth by Mr. Houser. McKee and Houser refused to sell to Mr. Fishback, nor would they purchase his interest at the price demanded. Thereupon Mr. Fishback, in order to procure a settlement of the matter, took the necessary steps for the appointment of a receiver and the dissolution of the partnership by the Circuit Court. A notice was then served upon McKee and Houser, in which Mr. Fishback declared that the partnership was dissolved. On the 22d of March, 1872, the *Democrat* was sold by order of the court, and a newspaper of the 23d gives the following account of the transaction:

"In compliance with the order of Judge Madill, of the Circuit Court, the *Missouri Democrat* newspaper, together with all its appurtenances, presses, subscription-lists, engine, type, cases, leases of office building, good will, etc., was sold yesterday to George W. Fishback, one of the proprietors, for the sum of $456,100. By the terms of the court's order the bidding was restricted to the partners themselves, viz.: William McKee, owning one-half; George W. Fishback, owning one-third; and D. M. Houser, owning one-sixth. The sale was simply an equitable transaction to adjust and close up a partnership which the partners had failed to settle by their own efforts. The terms of the sale were one-half cash, one-fourth in three months, and one-fourth in six months. The sale took place at the office of Irwin L. Smith, one of the counsel of McKee and Houser. The partners were attended by their counsel,—S. T. Glover and H. N. Hitchcock for Fishback, and Samuel Knox and Irwin L. Smith for McKee and Houser,—together with William E. Burr, president of the St. Louis National Bank; A. G. Edwards, United States assistant treasurer, and Gen. J. S. Fullerton, as friends of Fishback; James Richardson, W. H. Benton, and Henry T. Blow, friends of McKee; and Constantine Maguire, Thomas Walsh, and ex-Collector Harris, friends of Houser. Theophile Papin acted as auctioneer. The first bid was made by Mr. Fishback at $100,000, to which Mr. McKee responded with one for $150,000. The third bid was $175,000, and the fourth $200,000, and then the bids were an increase of $5000 up to $330,000, when they dropped first to $1000, then to $500, and at last to $100. Seventy-five were made at the latter figures, Mr. McKee's last bid being $456,000, and Mr. Fishback's the purchasing price. The sale will be formally completed on Monday, and Mr. Fishback will then take possession of the office and property. This is the first direct public sale of a large and established newspaper that has taken place in this country for many years, and the price paid affords some information of the cash value of such a journal. It has been held a difficult matter to accurately estimate the worth of such an institution, on account of the varied properties that make it up. The actual material in the *Democrat* establishment would be valued at a comparatively small proportion of the price which the journal has just sold for; but this material comprises only a small proportion of the real value of the establishment. The attributes of age, established character, political views, advertising patronage, public influence, and subscription-lists all grouped usually under the head of 'good will,' constitute the substantial elements of value in an established journal. They are of a moral nature, and to a certain extent indestructible. The *Democrat* has its own share of the valuable elements, and they represent a large proportion of the handsome price for which the paper was sold. Notwithstanding rumors to the contrary, we understand that the political complexion of the *Democrat* will remain unchanged, and that it will continue to give a cordial support to the administration of President Grant. Mr. Fishback is an experienced and accomplished journalist, who has had a connection with the *Democrat* for nearly eighteen years; he will therefore be perfectly at home in his position as sole proprietor. Mr. McKee and Mr. Houser, in retiring from the profession, will bear with them the cordial good will and esteem not only of journalists, but of all citizens who have had personal acquaintance with them."

George W. Fishback, who thus became sole proprietor of the *Democrat*, was born at Batavia, Clermont

Co., Ohio, on the 3d of December, 1828. His father emigrated from Virginia to the southern portion of Ohio when it was almost a wilderness, and commenced the practice of the law, which he pursued with success for thirty-five years, being at one time a judge of the Court of Common Pleas. George W. Fishback was educated with a view to becoming a lawyer at College Hill, Ohio, and graduated at that institution. He then removed to St. Louis, where he became successively commercial editor, editor, and joint proprietor, and finally sole proprietor of the *Missouri Democrat*. As a writer, Mr. Fishback was both trenchant and witty, and in the early days of the *Democrat* contributed largely to its success.

After the purchase of the *Democrat* by Mr. Fishback, a stock company, with a capital of five hundred thousand dollars, was formed, Mr. Fishback retaining a controlling interest. The remainder of the stock was distributed among W. P. Fishback and Otto H. Hasselman, previously of the *Indianapolis Journal*, R. Holmes, J. B. McCullagh, and other persons connected with the editorial and business departments of the paper.

Messrs. McKee and Houser, unwilling to remain inactive, determined to establish another daily newspaper in St. Louis, and on the 18th of July, 1872, appeared the first number of the *Globe*, which soon became a formidable rival of the *Democrat*. The publication office of the new paper was on Third Street, between Pine and Chestnut Streets. The political convictions of the *Globe* were expressed in the declaration "that in the prevalence or overthrow of Republican principles is wrapped up the thrift and glory or the ruin and disgrace of the American people."

The paper was conducted with marked ability, and was successful from the start. Its editor was Charles R. Davis, who died on the 20th of July, 1873. Mr. Davis was born Dec. 24, 1826, in New London, Conn. By persistent endeavor he was enabled in 1849 to enter Marietta College, Ohio, and graduated at that institution in 1854. He removed to St. Louis in 1857, and commenced his journalistic career as a reporter on the *Democrat*. Several years later he became one of the editorial writers, and subsequently managing editor of that paper, with which he remained until the *Globe* called him to its editorial chair.

In the fall of 1873, J. B. McCullagh, one of the principal writers for the *Democrat*, left that paper to become the managing editor of the *Globe*, and the competition, which had been close and eager from the outset, was now intensified. In January, 1874, the *Globe* purchased the *Staats-Zeitung* from Joseph Pulitzer, and thus secured valuable press franchises.

It soon became apparent that one of the two papers must succumb unless their interests were united. The latter course was decided upon, and on the 18th of May, 1875, negotiations for their consolidation, which had been pending for some time, were consummated by the purchase of the *Democrat* by McKee & Houser, for three hundred and twenty-five thousand dollars. The *Globe* and *Democrat* were then merged into one paper with the name of the *Globe-Democrat*, which was issued in the form of a quarto. The *Globe* had already supplanted the *Democrat* in the favor of the Republicans of Missouri, and had taken a leading position among the journals of the Mississippi Valley. The consolidation, however, greatly strengthened its resources and extended its influence, and the new paper soon acquired a vast circulation. At that time more than one-half the people of Missouri and nearly one-half the people of Illinois differed from it in political sentiment, and its conspicuous success from the beginning and the extensive circulation which it speedily secured in both States are therefore all the more remarkable. Among Mr. McCullagh's early associates in the editorial management of the paper were John A. Dillon (who subsequently established the *Evening Post*), George W. Gilson, Henry McKee, Philip G. Furguson, Capt. John H. Bowen, and others.

William McKee continued to be the chief proprietor and guiding spirit of the *Globe-Democrat* until his death on the 20th of December, 1879. Mr. Kee was born in the city of New York, on the 24th of September, 1815. He was of Irish descent, and his father, after emigrating to the United States, engaged in the lumber business as master of a vessel which plied between Maine and the West Indies. In 1820, Capt. McKee removed to St. Clair County, Ill., and settled with his family about fourteen miles from Kaskaskia, but four years later returned to New York, where William McKee received the rudiments of education at the free schools. He was afterwards sent to the Lafayette Academy, but his father having met with reverses, he obtained employment as a clerk in the office of Maj. M. M. Noah, then publishing the old *Enquirer*. From the *Enquirer* he passed into the office of the *Courier and Enquirer*, under James Watson Webb, and remained with him until 1833. He then went back to the office of Maj. Noah, who at that time was publishing the *Evening Star*, and remained there until the cessation of that journal. Among the employés of the *Evening Star* who were associates of Mr. McKee were Messrs. Simmons and Abell, who afterwards started the *Ledger* in Philadelphia, and subsequently the *Baltimore Sun*.

In the mean time his father and the family had again come West, but he, occupying a fair position and saving money, had remained in New York. At the stoppage of the paper on which he was employed he went out to his grandfather's, in Sullivan County, N. Y., and began to lay plans for the future. He had worked hard and had saved his money, and he finally determined to go West and invest his little capital in some newspaper property. Leaving New York in July, 1841, he made his way to St. Louis, where he spent some time at his father's house, and then entered the employ of Charles G. Ramsey, who was publishing a daily paper called the *New Era*. In 1842, in conjunction with William Ruth, he purchased the *Gazette*. Two years later Mr. Ruth sold his interest, and the entire establishment passed into Mr. McKee's hands. This business prospered very well for a time, but Mr. McKee had made an unfortunate selection of a book-keeper and confidential man, who left without his knowledge, and as he was considerably in debt to his former partner, the half-interest he had purchased of Mr. Ruth became the property of Edmund Flagg. The publication was carried on by McKee & Flagg until Mr. Flagg sold his interest to a Mr. Lord, who had been a professor in Bowdoin College, Maine.

In 1849 some eight or ten prominent and wealthy citizens, opposed to the further extension of slavery, conceived the idea of establishing a daily journal for the promulgation of their views. They selected Mr. McKee as the publisher, and under his immediate control the *Barnburner* was started. The paper created quite a sensation in the political world, and the boldness of its editorials attracted universal attention. It was not a financial success, and in a short time its publication was discontinued. After this, Mr. McKee having saved a little out of the crash of the paper, established a job-office on Second Street, which he continued up to 1850. In the latter year he effected a consolidation with William Hill, who also had a job-office.

In 1850, Messrs. McKee and Hill commenced the publication of the *Signal*, which advocated the same political principles as the *Barnburner*, and in 1852 propositions were made to take hold of a paper called the *Democrat*, which had been started in the interest of Benton and what was called the Free-Soil wing of the Democratic party. This was a crisis in the political career of Benton, and a momentous period in the history of the State. Absolute success was impossible to the Free-Soilers, but they succeeded in organizing a minority, which formed the nucleus around which Union men rallied to save the State from secession in 1861. Messrs. McKee and Hill accepted the proposition to take charge of the *Democrat*, and that paper and its managers, with Mr. McKee at the head, entered earnestly upon the work of freeing the State from slavery. The *Democrat*, after leading a doubtful and precarious existence for some years, was finally established on a permanent basis, and at the beginning of the civil war was a prosperous and influential journal. Mr. McKee had always been a firm and consistent opponent of slavery, and he now took radical ground against secession. The *Democrat* yielded an ardent support to the Lincoln administration, and claimed and received a large share of the credit for having saved Missouri from secession. Subsequently Mr. McKee had the gratification of hearing from Mr. Lincoln these words of commendation: "You have been of more service in saving Missouri from secession than would have been twenty regiments of troops." The expression of the Union soldiers was unanimous and hearty. Every passing regiment made a point of halting in front of the office and giving three cheers.

William McKee was a man of great physical and moral courage, without being in the least ostentatious in the display of this quality. When personal danger threatened him he never shrank. He never sought a quarrel, and never quailed when one was forced upon him. At the beginning of the war, when his office was surrounded by a mob threatening his life and the destruction of his property, he stood manfully at his post, ready to sacrifice all rather than yield to the demands of the multitude. His courage and determination made him a hero in the eyes of even his enemies, and no man in the city was more respected personally by the masses than Mr. McKee. In many other trying political crises he preserved the same calm courage of demeanor, and throughout his career as a journalist invariably "hewed close to the line." While his labors were directed mainly to the advocacy of political principles and ideas, he did not neglect the material interests of the community in which he lived, but was always among the foremost with his influence and personal example, in securing their advancement.

He never sought office, either elective or appointive. When struggling with poverty and all manner of discouragements, he preferred to depend upon his own individual labor and efforts rather than seek the emoluments of office. Freely and cheerfully he gave his influence to secure positions for others, but asked none for himself.

In the management of his journal, he always instructed his subordinates to adhere strictly to the truth

and never garble the facts; and if by chance any one had just cause of complaint against anything that appeared in the paper, he was ever ready to make a satisfactory correction. He fully comprehended the immense power of the engine he controlled, and was careful in wielding its force in such a manner that no charge of willful abuse could be brought against him. He took no pleasure in wounding the feelings of even an enemy, and never did so, except in upholding the truth and vindicating the right.

As a journalist, he thoroughly comprehended the responsibilities of his position and the requirements of the public. He endeavored to keep pace with the progress of events and the spirit of the age, and sought to direct great enterprises by pointing out the advantages. His whole life was passed in the midst of scenes of activity, and his time was constantly occupied. His life would, no doubt, have been considerably prolonged if he had been less assiduous in attending to his business; but he could not endure idleness, and was never more happy than when immersed in the complicated affairs of his journal.

Mr. McKee was not generally known as a writer. His business was to plan and direct, leaving the execution to others. Yet he was well qualified to wield the editorial pen, if he had chosen to do so, for he possessed a ready command of language, a fund of information on all subjects, and a general knowledge of men and measures equaled by few. He had a keen sense of the humorous, and an exhaustless fund of anecdote and reminiscences. He was personally acquainted with a majority of the leading public men of the Union, and knew their strong and weak points as if by intuition. In business matters his judgment was almost infallible. He seldom made a mistake in the direction of his own affairs, and his advice to those who sought it rarely proved erroneous. But it is upon his career as a leader of the Free-Soil movement in Missouri that his reputation chiefly rests. When he came to the State, a young man of slender means, unpretentious and unknown, he warmly espoused the cause, then supported by a mere handful. He resolved to labor for its success, although for a time the undertaking appeared utterly hopless and Utopian. Still he did not despair, but persevered in the face of inconceivable difficulties, and lived to see his most sanguine hopes crowned with success. Missouri became a free State, and slavery was abolished throughout the Union. In achieving this victory many fell in the fight, many grew faint-hearted and discouraged, many deserted to the enemy; but William McKee never faltered for a moment, never doubted the ultimate result. In the course of the long and bitter controversy he made enemies, and dealt and received hard blows, but no one could ever accuse him of malice or personal hatred towards any one. He was always ready to forgive a wrong, and to confer a favor when asked. Personally, Mr. McKee was very popular. Genial and kind-hearted, with a pleasant word for all in whose company he was thrown, he drew around him many warm friends of all political parties. In his manners and habits he was extremely unostentatious, shunning everything that had the appearance of vanity and pride, and avoiding rather than courting the notice of men in high official position. He had an aversion to taking part in public meetings and demonstrations of all kinds, regarding such displays as more pretentious than sincere. He did not seek popularity in any way, but depended upon the merit of his course to commend him to the public. Only once was he known to actively participate in a political convention, and that was in 1870, when the Republican State Convention met at Jefferson City and gave birth to the Liberal movement which resulted in the election of B. Gratz Brown as Governor. He was the ruling spirit of that convention, and to him more than to any one else were the disfranchised Democrats indebted for the early restoration of their political rights. Having accomplished his purpose in that movement, he continued the advocacy of the doctrines of the National Republican party, from which he had never departed in the local schism, and remained until his death a steadfast adherent of Gen. Grant and in favor of the third term.

As previously stated, Mr. McKee's interest in the *Democrat* was purchased by George W. Fishback in 1872, and in July of that year, in conjunction with D. M. Houser, he established the *Globe*. On the consolidation of the two journals in 1875 he became the senior proprietor of the *Globe-Democrat*. For more than a year prior to his death Mr. McKee was afflicted with heart-disease, and his demise was sudden and unexpected. He had been at the office of the *Globe-Democrat* on the morning of Dec. 19, 1879, in his usual health, and went home early in the afternoon. Late that night he rose from bed, complaining to his wife of not being able to sleep, and drawing an easy-chair to the fire, sat down. Soon afterwards he became insensible, and at 12.45 A.M., December 20th, expired. His wife (who was Miss Eliza Hill, daughter of Samuel Hill, of New York, and to whom he was married in July, 1855) and daughter survived him.[1]

[1] In connection with its notice of Mr. McKee's death, the *Globe-Democrat* printed the following reminiscences of personal friends:

The death of Mr. McKee did not in any way affect the publication of the *Globe-Democrat* as a newspaper. The company was a corporation, entirely free from debt, and the stock was owned by a few individuals. Its paid-up capital was $500,000, of which Mr. McKee owned $300,000; D. M. Houser, $160,000; J. B. McCullagh, $20,000; Henry McKee, $10,000; and S. Ray, $10,000. The net revenue in 1878 was $120,000. Besides this stock, Mr. McKee owned real estate worth $150,000, and bonds and other securities to a larger amount, his estate being estimated at $750,000.

The *Globe-Democrat* is now published by the Globe-Democrat Printing Company, of which D. M. Houser is president; Henry McKee, vice-president; and S. Ray, secretary.

Daniel M. Houser was born in Washington County, Md., Dec. 23, 1834, and in 1839 was taken by his parents to Clark County, Mo., where he enjoyed the somewhat limited advantages of the country schools of the period. In 1846 the family removed to St. Louis, and from 1847 to 1850 he attended the public schools of the city. In 1851 he entered the *Union* newspaper establishment as office-boy, and continued with the concern when it was merged into the *Missouri Democrat*, then owned by Messrs. Hill & McKee. His industry and aptness for the business attracted the attention of his employers, and he rose gradually, until in 1855 Hon. Francis P. Blair purchased Mr. Hill's interest, and Mr. Houser assumed the general management of the office, performing also the duties of book-keeper. Subsequently he purchased Gen. Blair's interest, and became a member of the firm of McKee, Fishback & Co., and for ten years conducted the financial department of the establishment, with what success may appear from the fact that, as previously stated, the retirement of Messrs. McKee and Houser having been agreed upon, G. W. Fishback bought the paper for four hundred and fifty-six thousand one hundred dollars.

Messrs. McKee and Houser, as we have seen, afterwards established the *St. Louis Globe*, with Mr. Houser as business manager. They had the hearty indorsement of their friends, who offered to subscribe liberally to the enterprise, but they declined the proffered aid, preferring to take the risk alone. Upon the *Globe* Mr. Houser expended some of the best work of his life, and the new paper immediately sprang into a vigorous existence, assuming a leading position among the journals of the West. Finally, as heretofore stated, Messrs. McKee and Houser repurchased the stock of the *Democrat*, and produced the *Globe-Democrat*, the leading Republican paper of the Southwest.

Upon the death of Mr. McKee in 1879, Mr. Houser became president of the corporation and head of the management, a position which he still occupies. Under his capable direction the business of the paper has grown enormously, its circulation and influence have been widely extended, and its outfit has been greatly enlarged and improved. It is a very valuable property, and is conceded to occupy a foremost position among the newspapers of the United States. The great success which attended the St. Louis *Globe* and that which has marked the career of the *Globe-Democrat* is one of the marvels of modern journalism. Much of it is undoubtedly due to the practiced management of Mr. Houser. To make a newspaper successful requires more than ordinary sagacity, demanding as it does the exercise of keen and ready judgment, great enterprise, and indomitable energy and perseverance.

Although Mr. Houser's business has brought him closely into contact with politics and politicians, he has never sought office, but has contented himself with attending strictly to the duties of his exacting position. He takes, however, a great interest in public affairs, and is interested in several of the most prosperous institutions of the city. As a newspaper manager, he is conceded to be one of the most competent in the country, and his upright and straightforward course in St. Louis (which has been the city

"Mr. Charles G. Ramsey, government appraiser at this port, was publisher of the *New Era* when Mr. McKee came to St. Louis as a journeyman printer in search of employment. He had known Mr. McKee's father in New York, and says he worked under him as a 'sub.' He gave Mr. McKee employment, and the intimacy then established continued unbroken.

"Ex-Judge John M. Krum was a warm personal friend of Mr. McKee, and had been so for over thirty years. He was one of the contributors to the *Barnburner*, and looks back upon that paper as the cradle of the Republican party in Missouri. Mr. Krum was mayor of the city about that time, having previously held the same position at Alton, and passed through the baptism of blood at the killing of Lovejoy. . . . 'William McKee,' he said, 'was a good man, a much better man than nine-tenths of those who maligned him. No one ever asked him for a favor without receiving a courteous reply. He was true to his friends and magnanimous to his enemies. He worked his way up by industry and economy, and he did not become inflated by prosperity, but was the same genial, kind-hearted gentleman all the time. I knew him intimately, and loved and honored him as a friend and associate. His character and his services to the city and State, in fact, to the whole Union and the world, will be better appreciated now that he is gone. The scars of old conflicts will be covered by the wrinkles of time, and he will be remembered as a man who played an important part in the affairs of Missouri, as a man of integrity and sterling worth. He led an active life, and his career was a success, so far as success can be achieved in the brief space allotted to man on earth.'"

of his business career) has earned for him the confidence and esteem of the entire community.

In 1862, Mr. Houser was married to Miss Maggie Ingram, of St. Louis, who died in February, 1880, and has two sons and a daughter.

Mr. McCullagh is still the managing editor of the *Globe-Democrat*, and under his able guidance the paper enjoys an undiminished prosperity and influence.

Joseph Burbridge McCullagh was born at Dublin, Ireland, in November, 1842. At the age of eleven he emigrated to America, arriving in New York in 1853. In the latter city he was apprenticed to learn the trade of printer in the office of the *Freeman's Journal*, and five years later (1858) removed to St. Louis, where he entered the office of the *Christian Advocate* in a similar capacity. Having learned the art of short-hand writing, he procured a position (in 1859) as reporter on the *Democrat*, and developed so much aptitude and talent for his calling that he was selected to represent that paper at Jefferson City during the eventful session of the Legislature in 1859–60. He discharged the duties of this position with an industry, ability, and tact which won him the approval of his employers; but on returning to St. Louis he severed his connection with the *Democrat* and went to Cincinnati, where he speedily secured employment as a writer for the *Gazette*. On the breaking out of the civil war young McCullagh entered the army as lieutenant in the Benton Cadets, Gen. Fremont's body-guard, with whom he served until Fremont was suspended. He was then appointed army correspondent of the *Cincinnati Commercial*, and participated in the battle of Fort Donelson, being one of the few who volunteered to go on board the ironclad "St. Louis," the first gunboat that succeeded in passing the fire of the fort. On the following day he participated in the land fight, and then and subsequently, at Shiloh and Vicksburg, proved himself as fearless on the actual field of battle as in the arena of enterprising and aggressive journalism. Upon leaving the army after the surrender of Vicksburg, Mr. McCullagh was tendered and accepted the post of Washington correspondent of the *Cincinnati Commercial*. He continued to fill this responsible and delicate position from December, 1863, until 1868, when he resigned it to become the editor of the *Cincinnati Enquirer*. As war correspondent Mr. McCullagh had especially distinguished himself, his letters rivaling those of the famous "Bull Run" Russell of the *London Times* in brilliancy, picturesqueness, and graphic power; and as Washington correspondent of the *Cincinnati Commercial* he attained a national celebrity. Among the journalists with whom he was brought into active competition at Washington were Carl Schurz, since then United States senator and Secretary of the Interior, and now one of the principal editors of the *New York Evening Post;* George Alfred Townsend, familiarly known to the newspaper world under the *nom de plume* of "Gath," and Whitelaw Reid, for some years past editor of the *New York Tribune*. Mr. McCullagh at once took a leading rank among the Washington correspondents, and his letters over the signature of "Mack" attracted wide-spread attention. He soon established friendly and even intimate relations with leading public men, and by his skillful manipulation of the art of "interviewing" succeeded in procuring most valuable information for his paper. Mr. McCullagh may, in fact, be said to have introduced the practice of "interviewing," and to have demonstrated its great value and utility from a journalistic point of view. In the spring of 1867 he printed a memorable interview with the late Alexander H. Stephens, in which the latter criticised the conduct of Jefferson Davis, holding him personally responsible for the disastrous downfall of the Confederacy. The interview created a sensation throughout the country, and brought Mr. McCullagh's personality as an enterprising and able journalist into special prominence. An interview with Andrew Johnson on the subject of his impeachment trial was another noteworthy triumph of Mr. McCullagh's skill, and added greatly to his reputation.

In 1870, Mr. McCullagh retired from the editorial management of the *Cincinnati Enquirer* in order to found the *Republican* of Chicago, but in the great fire which devastated that city in the fall of 1871 the establishment was destroyed, and the fruits of the arduous labor of years on the part of Mr. McCullagh, including a valuable library, were swept away. He at once returned to St. Louis, and obtained a position as editor of the *Democrat*, but subsequently assumed editorial charge of the *Globe*, and finally of the *Globe-Democrat*.

There are few members of the journalistic profession who equal or even approach Mr. McCullagh in versatility of talent and capacity for discharging the manifold duties of his laborious and responsible position. The marvelous success of the *Globe-Democrat* has been very largely due to his skillful management of its editorial departments, his untiring industry, and his swift and nearly always unerring judgment. No journalist in the country possesses a keener or juster appreciation of the value of news, or a maturer, more discriminating taste in deciding the mode of its presentation to the public. As an editor he has proven even more successful (if that were possible) than as a

correspondent. His paragraphs have long been famous for their vigor, pungency, and wit, and the editorial columns of the *Globe-Democrat* afford continued and constantly multiplying evidences of his superior ability as a writer. Without having enjoyed the benefits of college training, he possesses nevertheless a ripe acquaintance with the English classics, obtained by close and arduous study. His language is choice and vigorous, and few men know how to employ it in controversial writing with greater skill or to better advantage. In personal journalism he is a master, and there are very few of his fellow-journalists who care to cope with him. Studious and temperate in his habits, Mr. McCullagh is nevertheless a valued acquisition at all social gatherings, his inimitable wit being highly prized on all such occasions. He is still a young man, in the full possession of his remarkable faculties and attainments as one of the leading thinkers and writers of the day.

The Western Examiner.—One of the earliest magazines published in St. Louis (if not the very earliest) was the *Western Examiner*. A specimen number was issued Nov. 19, 1833, and the publication was regularly launched Jan. 1, 1834. Its motto was, "It is error only, and not truth, that shuns investigation;" and its objects were declared to be "the free discussion of subjects connected with morals and the happiness of society, and to oppose the productions of sectarian partisans." It was an eight-page pamphlet, and appeared twice a month. John Robb was its publisher, and it was edited by an association, none of whose names were given; the articles were signed "Veritas," "Plato," "Celsus," "Alpha," "Prometheus," etc. William C. Barrows was traveling agent, and the only other name of a St. Louisian interested in the publication that a search through the first volume discloses was Dr. Joseph R. De Prefontaine.

The *Western Examiner* abounded in the freest of free thinking, and gave much space to the alleged escapades of clergymen. It engaged in frequent warfare with *The Advocate*, the *Shepherd of the Valley*, a Catholic publication, and the *St. Louis Observer*, a Presbyterian paper, edited by the Rev. E. P. Lovejoy, which subsequently, on account of its pronounced abolitionism, fell a victim to mob law. The first volume of the *Western Examiner* is in the Mercantile Library. How long the publication flourished is not known.

Anzeiger des Westens.—On the 31st of October, 1835, appeared the first number of the *Anzeiger des Westens*. Christian Bimpage, a Mecklenburger, who had been managing an "intelligence and commission house" in St. Louis, was the founder; and associated with him as publisher was B. J. Von Festen, who, however, withdrew in less than a month. Bimpage was a cultivated man, but seemed unsuited for journalism. This paper was not generally acceptable, and he soon retired, engaged in land surveying, and died a few years later in South Missouri.

On the 22d of February, 1836, William Weber became editor. He was born in Altenburg, Germany, in 1808, studied law at Jena, and when in 1830 the Polish rebellion broke out started for the front, intending to engage in the conflict. The police, however, would not permit him to cross the frontier, but sent him home. He then made several attempts to resume his studies, but the turn-place and the fencing-school had greater attractions for him than the lecture hall. Accomplished in all the sports of the student, his intellectual gifts were also considerable, and in spite of many extravagances he was popular with his fellows, especially because of his liberty-loving utterances, which led to his imprisonment at Leipsic on a charge of demagogery and talking seditiously. He escaped, came to this country, and finally settled in St. Louis, where he became librarian of the collection of books which was the nucleus of the Mercantile Library.

The *Anzeiger* assumed new life under his management. Owing to his denunciation of the burning of a negro, his office was threatened by a mob, but was not attacked. He protested vigorously against the Native Americanism that broke out periodically in St. Louis from 1835 to 1850, and was equally pronounced in his opposition to slavery. A year or so after taking editorial charge of the *Anzeiger* he became the proprietor of that paper. Among the contributors to his journal were Dr. Engelmann, Frederick Muench, and Gustav Koerner, who subsequently became Lieutenant-Governor of Illinois. From 1842 to 1846 the paper was issued three times a week. In October, 1842, Wilhelm Palm became assistant editor. Palm was educated at the Berlin University, his specialty being the languages and mathematics. When still a very young man he removed to St. Louis, found employment in the bureau of the land survey, and finally established the firm of Palm & Robertson, which conducted a foundry and machine-shop, and built the first locomotive in the West. He supplied the Ohio and Mississippi Railroad with its first ten locomotives. He acquired a fortune, and in 1866 retired from business, and spent many years abroad for his health. He hoped to return to America, but died in 1877 at Dresden. He bequeathed much of his estate to

Washington University. In 1844, Arthur Olshausen became a partner, and freed Weber from many business cares. The publication of a German paper in those days was attended with great financial difficulties, and at the best no great amount of success was attainable. Olshausen's money and labor kept the paper afloat. Mr. Olshausen still lives, and is one of the prominent German citizens of St. Louis. For some years he was a large owner in the *Westliche Post*.

Meanwhile the *Tribune* had been established, and being a daily, became a formidable rival of the *Anzeiger*. In 1846 the *Anzeiger* also appeared as a daily. In 1847, Olshausen became sole owner of the paper. The difficulties attending the publication continued, and in 1850 Weber severed his connection with the paper and was elected justice of the peace, serving with ability until his sudden death in 1852.

Under Weber's management the paper was known throughout the land as scarcely second to any of the German-American press. Weber's style was clear and familiar, yet always strong and dignified, and marked by great originality. He paid great attention to the current German literature, and was a stanch apostle of "Young Germany."

Weber's successor was Henry Boernstein, who was born in Hamburg in 1805, and was reared at Lemberg, Austrian Poland, where he studied medicine. After leaving school he entered the Austrian army, and served five years. He then resigned his commission and went to Vienna, where he became connected with the leading journals. He also wrote several popular plays, and was appointed secretary of the two great theatres of Vienna, under Carl, the celebrated stage manager of Germany. He then became stage manager in several of the leading cities of Germany and Italy, and in 1841, with his wife, entered upon a star engagement in the leading German cities, meeting with great success. In 1842 he was manager of the German opera at Paris, and then of the Italian opera. During all this period he corresponded with the leading journals of the day, but finally directed his attention exclusively to literature. He was an enthusiastic advocate of political freedom, and while in Paris hailed with joy the dethronement of Louis Philippe and the establishment of the French republic; but when the return of a Bonaparte to power as dictator was assured he left for America, and early in 1849 settled at Highland, Ill. His literary abilities becoming known, he was offered the editorship of the *Anzeiger*. He began briskly, and indulged so freely his tendency to sensationalism, assailing people without much judgment, that Olshausen, then the proprietor, was very glad to withdraw from the paper. Boernstein gave the paper a strong "free-soil" bias and in 1854–56 declared himself unequivocally in favor of "free soil" and the Republican party. Meanwhile he had become owner of the paper, and was making it pay handsomely. In addition to his journalistic labors he conducted a theatre, a hotel, and a brewery, together with several saloons.[1]

Mr. Boernstein's influence with his countrymen at one time was very great, and when the war broke out he did much to consolidate the German sentiment of St. Louis in favor of the Union. The *Anzeiger* more than once narrowly escaped being mobbed. He was prominent in organizing the German troops for the defense of the United States arsenal, and went into the field with a colonel's commission. President Lincoln subsequently appointed him consul to Bremen, and he went abroad but at the invitation of Hon. Francis P. Blair returned in 1864 to take part in Mr. Lincoln's second campaign for the Presidency. He then left permanently for Europe, and now lives at Vienna, where he corresponds for several American papers. His "Europaeische Plaudereien" (European Tittle Tattle) is an interesting feature of the *Westliche Post*.

The war seriously deranged the prosperity of the *Anzeiger*, and in February, 1863, its publication was suspended.

One of the most prominent persons connected with the *Anzeiger* was Col. Charles L. Bernays, who for a long time was its editor-in-chief.

Charles Louis Bernays was born at Mentz, in Hesse-Darmstadt, Germany, in 1815. His early education was received at Oggersheim, near Mannheim, and at the Gymnasiums of Frankfort and Speyer, and he afterwards studied at the Universities of Munich, Göttingen, and Heidelberg. He adopted the profession of the law, but soon drifted into journalism, and after a

[1] A prominent associate of Boernstein in his business enterprises was Frederick Schaefer. He was born in the kingdom of Würtemberg, Germany, in 1812, and previous to his removal to the United States held a position as chief of the mounted police. On reaching this country he settled in St. Louis, and entered into partnership with Boernstein in the brewing business. During the Mexican war he served as a captain in the St. Louis Legion, and after his return to St. Louis continued to manifest an active interest in the welfare of the local militia organizations. He accompanied the expedition sent by Governor Stewart under Gen. Frost to repel the Jennison and Montgomery raids, and on the breaking out of the civil war aided materially in recruiting the Second Regiment of Missouri Volunteers. Henry Boernstein was appointed colonel, and Frederick Schaefer lieutenant-colonel. The latter was present at the battle of Boonville, and when the term of enlistment expired reorganized the regiment and became its colonel. At the fight at Pea Ridge Col. Schaefer was slightly wounded. At the battle of Murfreesboro' he was among the killed.

varied experience as a newspaper writer and editor in Germany and in Paris, where he became acquainted with Karl Marx, Heinrich Heine, and other eminent men, and was associated with Henry Boernstein in the publication of the *Vorwaerts*, he determined to emigrate to America. In the mean time the republic had been declared in France, and Mr. Bernays was sent as *attaché* to the French embassy to Vienna, but on his return to Paris he and Mr. Boernstein decided to carry out their original project of emigrating to the United States. He accordingly sailed from Havre on the 11th of December, 1848, the understanding being that Boernstein should follow him in the spring. Mr. Bernays settled at Highland, Ill., and engaged in trade, at which he prospered for several years, after which he removed to St. Louis to join Boernstein in the publication of the *Anzeiger*. During the administration of President Lincoln, Mr. Bernays was sent as consul, first to Zurich, and afterwards to Helsingor, and on his return to St. Louis assumed the chief editorship of the *Anzeiger*. His services in the cause of the Union, and more especially in behalf of the administration, then meditating the removal of Fremont, were warmly commended in a letter from Montgomery Blair, a member of Lincoln's cabinet. Mr. Bernays entered the Federal army with the rank of paymaster, and at the close of the war received the brevet of colonel. He then became a member of the editorial staff of the *Republican*, and also contributed articles to the *Anzeiger*. After failing health made it necessary for him to relinquish active editorial work, he occupied himself by writing weekly letters for newspapers in Europe and America, especially for the *Staats-Zeitung* of Chicago. He died on the 22d of June, 1879.

On May 31, 1851, Dr. Henry William Gempp, editor of the *German-American*, and co-proprietor of the *Anzeiger*, died in St. Louis, aged fifty-three years.

Dr. H. Meinersshagen, at one time associate editor of the *Anzeiger* (now dead), was born in Bremen, was highly connected, and was a judge of the Lubeck court. After coming to the United States he occupied the position of managing editor of a German daily paper in Pittsburgh, and subsequently removed to St. Louis.

On the 19th of July, 1863, the *Anzeiger* was revived under the title of *Der Neue Anzeiger des Westens*. It was published by the "Independent Press Association," and Carl Daenzer was editor and manager. Eventually the word "new" was dropped from the title, and the paper regarded itself as the successor of the old *Anzeiger*. In a few years the "Independent Press Association" was succeeded by the "Anzeiger Association," comprising essentially the same membership of leading Democratic citizens, who yet own the concern. Carl Daenzer is president of the company, which is managed by a directory composed of Carl Daenzer, the Hon. E. C. Kehr, and Judge Charles Speck. Carl Daenzer is editor-in-chief, and E. D. Kargau city editor.

Carl Daenzer was born in the Grand Duchy of Baden, Germany, and having participated in the revolution of 1848–49, found it desirable to leave his country. He consequently came to America, and soon afterwards settled in St. Louis, which has since been the theatre of his activity. He is distinguished for the clearness and vigor of his style, and the extent and variety of his general information. In these respects he is thought to have no superior on the German press of America. His special strength lies in the discussion of constitutional questions.

St. Louis Tribune.—The first of quite a succession of *Tribunes* appeared July 11, 1838. The Whigs, wanting a campaign paper, sent for Frederick Kretschmar, a capable journalist, and promised him money and support for a journal in their interest. Neither money nor support, however, was forthcoming, and after the election, when publication of the paper ceased, Kretschmar was compelled to pay the bills. The *Tribune* was printed in German and English, and Kretschmar and his wife sat up night after night translating from one language to the other. Kretschmar was the first German justice of the peace in St. Louis, and for several terms was clerk of the Criminal Court, holding that position when he died in 1861. His widow and sons still reside in St. Louis. The latter are interested in a large printing-house, which bears their father's name.

On the 15th of July, 1844, appeared the *Deutsche Tribune*, published by N. R. Cormany, and printed entirely in German. The editor was Charles Jucksh, and the paper was issued every day in the week except Monday, the publication office being on Vine Street, between Main and Second. In March, 1845, Oswald Benckendorf became the editor.[1]

The *Tribune* continued under the management of

[1] Oswald Benckendorf was born near Stettin, Germany, was educated at the Gymnasium at Halle, studied law in Berlin and Breslau, and in 1841 came to America and settled at Warrenton, Mo. He drifted to St. Louis, was a carrier on the *Tribune* for a time, and, his worth becoming known, was offered the editorship. He was honest and industrious, besides being finely gifted, and under his management the *Tribune*, being a daily, soon outstripped the *Anzeiger* (then a tri-weekly). Between him and Mr. Weber, of the *Anzeiger*, there was an earnest rivalry as to which should present the public with the most thoughtful paper.

Cormany and Benckendorf until it was merged into the *Democratic Tribune*, under the management of J. G. Woerner, afterwards judge of the Probate Court of St. Louis. In September, 1851, the office was attacked by a mob, which broke the windows, but was prevented by the police from gaining an entrance to the composing-room. The cause of the attack is said to have been the severity of some remarks in the *Tribune* as to certain conduct on the part of some of the persons implicated. In 1852 the *Tribune* passed into the hands of C. Kribben, and afterwards suspended.

On the 6th of September, 1880, the present *St. Louis Tribune* was established. Its proprietors were William Kaufmann, of the *Anzeiger*, of Cleveland, Ohio, Emil Paetow, assistant editor of the same paper, and Otto Hilpert, traveling agent of the *Westliche Post*. Hilpert was selected as business manager, and has filled that position ever since.

The first editor was Ferdinand Harrsler, previously local editor of the *Amerika*, but Fritz Gloganer succeeded him in March, 1881, and is still editor. Herr Gloganer was born in Silesia in 1857. He received a college education, and when nineteen years of age became associate editor of a daily paper in Breslau, the Silesian capital. He came to America in 1877, and after three years spent in business and in studying the language and institutions of the country, resumed his old profession and became editor of the Cleveland *Anzeiger*, the proprietor of which paper transferred him to St. Louis.

The local editor is William Katzeler, a Prussian, born in 1850, who was a lieutenant in the Prussian army. He immigrated to this country in 1873, and for some time was a reporter on the *Amerika*. He has been on the *Tribune* from the start.

The new paper met with success from the beginning, and has now a large daily circulation, including Sunday. In politics it is independent, favoring, however, the Republican party on national questions, and advocating political, judicial, and economical reforms.

Mr. Paetow, mentioned as one of the founders, is now owner of the *Cincinnati Anzeiger*, the *Tribune* being controlled at present by Messrs. Kaufmann and Hilpert.

The Post-Dispatch enjoys the distinction of being the first really successful venture in afternoon journalism in St. Louis. Previous to its establishment success had attended but two papers of the kind, but even in those cases good fortune was transitory and uncertain, and the history of evening journalism in St. Louis had been a long record of failure and loss.

The *Post-Dispatch* can trace its lineage back to the 3d of July, 1838, when the *St. Louis Evening Gazette* made its appearance, under the management of Holbrook & Allen (David B. Holbrook and G. S. Allen), with W. S. Allen, a brother of one of the proprietors, as editor. In August, 1841, G. S. Allen sold his interest to P. A. Gould, editor of the *Missouri Farmer*, and the paper was continued by the firm of Holbrook & Gould, the editor being Mr. Gould. In the following year Holbrook & Gould sold the *Gazette* to Henry Singleton, who in turn disposed of it one year later to McKee & Ruth,

POST-DISPATCH BUILDING.
515 & 517 Market St., St. Louis.

during whose proprietorship it was edited by Edmund Flagg. In 1847 it was sold to Mr. Lord, who in less than half a year disposed of the plant and good will to a Mr. Ruggles, who established the *Evening Mirror*. The *Mirror* was not successful, and in 1848 it was sold to Paschall & Ramsey, who established the *New Era*, which in turn was sold in 1849 to Thomas Yeatman and J. B. Crockett. The name of the paper was changed to the *Intelligencer*, which a few months later was purchased by George K. Budd, who conducted it

successfully for nearly three years. In the mean time A. S. Mitchell & Co. had established the *Evening News*, which soon became so successful that the *Intelligencer* was forced to succumb, and in 1857 the two papers were consolidated under the name of the *Evening News and Intelligencer*.

In 1867 the *News*, which had dropped the *Intelligencer* from its name, was sold to the *Dispatch*, which had been established in 1864 by Messrs. Coburn, Johnson & Peckham; the Johnson of the firm being the well-known Governor Charles P. Johnson. The *Dispatch* combination was formed for the purchase of the *Union*, then owned by O. D. Filley, Giles F. Filley, John How, and Peter L. Foy. After the transaction had been consummated the name of the paper, at the suggestion of Governor Johnson, was changed to the *Dispatch*, and a stock company was formed with the name of the "St. Louis Dispatch Printing and Publishing Company," the directors being Josiah Fogg, John S. Cavender, Richard T. Coburn, James Peckham, and C. P. Johnson. Mr. Coburn was the editor, Mr. Johnson assistant editor, and Mr. Peckham was in charge of the business management. After a checkered career of six months the paper reverted to the former proprietors of the *Union*. In April, 1868, it was purchased by Peter L. Foy and William H. McHenry, who conducted it as a Democratic journal. Mr. Foy sold his interest to Mr. Fishback, of the *Democrat*, and in December, 1871, the firm of Foy & McHenry was succeeded by that of William H. McHenry & Co. D. Robert Barclay, who had already bought the interest of Mr. Fishback, then purchased the other two-thirds ownership from McHenry & Co., William H. and Estill McHenry retiring. The *Dispatch* was never very profitable, and Mr. Barclay is said to have lost a fortune in it. In 1873 he sold it to Stilson Hutchins on a valuation of one hundred and twenty thousand dollars. Maj. John N. Edwards, now of the *Sedalia* (Mo.) *Democrat*, was editor. In 1875, Mr. Hutchins took charge of the *St. Louis Times*, and for a season ran the two papers together. Later in that year he sold the *Dispatch* to Mr. Allison, of Steubenville, Ohio, at a sacrifice. Allison lost all he cared to lose and then sold to Wolcott & Hume, who were publishers of the *Journal*. The next scene of this "strange, eventful history" was the passage of the paper into the hands of a receiver, and its sale on the 10th of December, 1878, to Joseph Pulitzer for two thousand five hundred dollars. It was then in a moribund condition. After its purchase the *Dispatch* was published for two days, and on the 12th it was announced that a consolidation had been effected with the *Evening Post*. The latter journal had been established nearly one year before by John A. Dillon, the first number appearing on the 10th of January. Mr. Dillon had been an editor on the *St. Louis Globe-Democrat*, and was one of the brightest journalists of the city. He had published the best evening paper St. Louis had had, but despite its able management it had not met with the financial success it deserved. The new journal appeared as the *St. Louis Post and Dispatch* for about two weeks, and the name was then changed to the *Post-Dispatch*. Serious difficulties continued to face the management after the consolidation. The *Post* had been printed on the *Globe-Democrat's* presses, but the proprietors of the *Post-Dispatch* not being satisfied with this arrangement, leased a building on Fifth Street, and the paper was printed on its own press and issued from its own office. In May, 1879, the rival *Evening Star* was purchased at sheriff's sale by the *Post-Dispatch*, and in the fall of that year John A. Dillon retired from the management of the latter paper. His interest was purchased by Mr. Pulitzer, who thus became the sole proprietor of the paper.

Joseph Pulitzer was born near Vienna, Austria, and received a good classical education in that city. When quite young he served as a soldier in the Schleswig-Holstein war, and contracted a keen thirst for a military life. When that contest was over he came to the United States, then (1864) in the throes of the civil war. On the very day of his arrival at New York he enlisted in the First New York (Lincoln) Cavalry, and was with his regiment at Cedar Creek, Five Forks, etc. After the war he removed to St. Louis, and for lack of better employment, obtained work as a hostler at Benton Barracks, and was successively fireman on a ferry-boat, laborer on the Levee, driver of a carriage, and "the *quasi*-sexton of the cholera cemetery on Arsenal Island." The great obstacle he found was his ignorance of the language; hence he was assiduous in learning it. His first substantial start was made when he accepted a difficult and somewhat dangerous commission to visit western regions to get the land-grant deeds of the Atlantic and Pacific Railroad recorded. On returning to St. Louis he began the study of the law, but having attracted the attention of Carl Schurz, was offered a position on the *Westliche Post*, which he accepted. He proved to be an excellent writer, and in six years was editor and part proprietor of that paper. In 1872, owing to differences relative to the political management of the paper, he retired from the editorship, and in 1875 sold his interest. Mr. Pulitzer's course while editor of the *Westliche Post* brought him into special promi-

nence before the country, on account of his aggressive advocacy of Liberal Republican principles. He labored with all his strength, both in the columns of his newspaper and on the stump, to array the German vote in opposition to the "regular" organization of the Republican party. His success was very marked, and his name at once became conspicuous in the political literature of the day. Out of the campaign of 1870, in which he bore such a prominent part, sprang the Greeley movement of 1872, and it was Mr. Pulitzer who, with another gentleman, framed a call for a national convention of Liberal Republicans. In that convention his influence was promptly felt and recognized, and he was among the most active and energetic of its members. Mr. Pulitzer was elected to the State Legislature from the Fifth District in 1869, and in 1870 was appointed by Governor Brown, and unanimously confirmed by the State Senate, a member of the Board of Police Commissioners of St. Louis. In December, 1874, he was elected to the State Constitutional Convention. During the same year he purchased the *Staats-Zeitung*, a German paper that had worn itself out in the endeavor to break down the *Westliche Post*, and two days later he sold the *Zeitung* press franchise to the *Globe*, which was then greatly in need of such a stimulus. In the Constitutional Convention of 1875 he was an indefatigable worker, and was once more brought prominently before the public in connection with his scheme for the union of the city and county governments, which in substance was unanimously adopted by the convention.

Mr. Pulitzer is not only an able journalist and writer, but also a graceful and forcible speaker, both writing and speaking fluently in English as well as in German.

Mr. Pulitzer's next venture in journalism after the *Staats-Zeitung* episode was the purchase of the *Dispatch*, which, as we have seen, was speedily followed by its consolidation with the *Post*.

Besides being one of the most brilliant and versatile journalists of the day, Mr. Pulitzer is one of the most successful, as the wonderful growth of the *Post-Dispatch* sufficiently attests,—courageous, energetic, fertile in resources, keen in the realization of opportunities as they present themselves, and quick to grasp and hold them.

Up to the time that Mr. Pulitzer assumed the whole burden of managing the *Post-Dispatch* its growth had been slow, its daily circulation being only about five thousand copies. He at once set to work with characteristic energy to strengthen all the departments and to infuse new life and vigor throughout the establishment. "Push and independence" were the mottoes of both the editorial and business management, and such was the vigor with which the affairs of the paper were conducted that it soon began to assume a prominence in the community which no evening paper had ever before been able to attain. The following figures, showing the *Post-Dispatch's* circulation at different periods, afford some idea of the results that have been achieved under Mr. Pulitzer's management:

Dec. 30, 1878, circulation, 3160; in 1879, 4984; in 1880, 8740; in 1881, 20,320; in June, 1882, 23,000.

In addition to its extensive circulation the *Post-Dispatch* enjoys a valuable advertising patronage, and its proprietors have already been enabled to make many important improvements, and to supply themselves with new machinery and all the appointments of a first-class newspaper. The old *Dispatch* had little machinery, and that very poor; the *Evening Post* had none whatever. The *Post-Dispatch* now owns and occupies a double building, three stories high, 515 and 517 Market Street, specially constructed to serve its requirements, and is now printed on two large "Hoe perfecting presses," each costing twenty-five thousand dollars, and each with a capacity of fifteen thousand cut, pasted, and folded quarto (eight-page) papers an hour. With a new building, new presses, new engine and general machinery, new stereotyping outfit, etc., the *Post-Dispatch* possesses undoubtedly one of the most complete and most conveniently arranged newspaper establishments in the United States.

Fronting on Market Street, the building occupies a lot fifty-three by one hundred and twenty feet, and is centrally located, being one hundred and fifty feet from the court-house and opposite the Opera-House.

The front is of red brick, lined with black galvanized iron and stone trimmings, three stories high, well lit up, and handsome, though entirely unpretentious. The fittings are black and gold, and the whole effect is pleasing as well as impressive. On the first floor are the counting-room, press-room, boiler-room, salesrooms, carriers' rooms, and other offices. The counting-room is fitted up with elegant ash counters upon Eastlake models.

In the rear of the counting-room is the salesroom, where the newsboys get their papers, and the system of selling these papers has to be perfect to be at all effective. The quick issue to the boys necessitates the employment of a number of clerks, and the Arabs get their papers entirely by check. The large and spacious press-room, containing the engines and the

boiler-room, is across the courtyard at the rear. Upstairs the front rooms are devoted to the editorial and local staff and to the telegraphic office of the *Post-Dispatch*. The rear portion of the second story is devoted to the printers and stereotypers, the composing-room being one of the best lighted and best arranged in the West. The architect of the building was James McGrath.

To Mr. Pulitzer, of course, this splendid success is mainly attributable. It is a success wrenched from disastrous defeat by industrious effort backed by intelligence and ability. But he has had able assistants, especially in the managing editor, Col. John A. Cockerill, one of the most versatile men ever connected with the press of St. Louis. Col. Cockerill was born in Adams County, Ohio, Dec. 5, 1846. His father, J. R. Cockerill, a native of Loudon County, Va., was a member of Congress from Ohio, and colonel of the Seventieth Ohio Regiment during the late civil war. John A. Cockerill received a common-school education, and in June, 1861, when less than fifteen years old, enlisted in the Twenty-fourth Ohio Regiment as a drummer. He served in the Army of West Virginia, and afterwards with the Army of the Ohio campaigns of Buell and Rosecrans, and was mustered out in 1863. From 1865 to 1868 he edited a weekly paper at Hamilton, Ohio, and was afterwards associated with C. L. Vallandigham in the ownership and editorship of the *Dayton* (Ohio) *Ledger*. In the spring of 1870 he obtained a position on the *Cincinnati Enquirer* as reporter, was promoted to be city editor six months afterwards, and was made managing editor a year later, serving as such until 1876, when he went to Europe as correspondent with the Turkish army in the war with Russia. Returning, he assisted in establishing the *Washington Post*, and subsequently assumed the position of managing editor of the *Baltimore Gazette*, which he retained for one and a half years. Finally, in 1879, he removed to St. Louis and joined the *Post-Dispatch*.

Mr Cockerill is a trenchant and brilliant writer, and has the reputation of being one of the wittiest "paragraphers" on the American press. His editorials are always crisp and vigorous, and permeated by a spontaneous, natural humor which greatly enhances the effectiveness of his journalistic work. Col. Cockerill is president of the Elk Club, and a member of the Tally-Ho Club and St. Louis Cavalry. At the reunion of the Army of the Tennessee at St. Louis, in 1882, he responded to the toast, "The Press," and was very highly complimented by Generals Sherman and Sheridan, and other distinguished officers of the United States army who were present.

On the 22d of January, 1880, the press- and newsrooms of the *Post-Dispatch* were damaged by fire, the total loss being about five thousand dollars. The injury was speedily repaired, and the establishment is now one of the best-equipped printing-offices in the country. The *Post-Dispatch* is a marvel of journalistic success, and may be justly regarded as one of the best evening papers in the country. It is always brimful of news and attractive miscellany, and its editorials are frank, aggressive, and able. Politically it is Democratic, but thoroughly independent and outspoken, criticising honestly and fearlessly the acts of leading men in its own as well as in the opposite party. From its inception it has been financially as well as politically independent, and at no time has it been compelled to seek extraneous aid. To quote its own language, "No bank, banker, or broker was ever asked for loans, discounts, or credits in any shape. Everything the *Post-Dispatch* purchased it bought for cash. It neither needed nor asked favors from the moneyed corporations. The proprietor owned it solely and completely and without encumbrance, and thus it had neither to crouch nor cringe. Financially completely independent, it was equally so editorially. No party, ring, corporation, or clique has ever paid it a dollar for illegitimate purposes, or ever been called on for assistance."

Being thus free to speak and to strike wherever it listed, the *Post-Dispatch* has steadily and consistently assailed all abuses, and has labored unremittingly in behalf of political and social reforms in St. Louis. Its fearlessness is best illustrated by the fact that during three years seventeen libel suits were instituted against it, aggregating two hundred and fifty thousand dollars in the damages claimed. Of these seventeen suits only one was lost by the *Post-Dispatch*, which was mulcted in the sum of fifty dollars,—a fact which in itself affords the completest vindication of the paper's general fairness and honesty. The *Post-Dispatch* continues to grow and to flourish, and is now, as it has been from the start, one of the brightest and ablest exponents of Western journalism.

Missouri Demokrat.—Edward Warren, a young lawyer of St. Louis, achieved considerable reputation as the "poet" of the *Anzeiger*. In 1843 he started the *Demokrat*, because the *Anzeiger* was not radical enough in its support of the Van Buren administration. He was an active and capable man, but the Germans regarded him as being more of a politician than a journalist, and withheld their confidence. His paper consequently survived only two years. In 1845 he obtained a consulate abroad (at Trieste), and never returned to America. He also became the editor of

the Austrian *Lloyd's*. For some time L. F. Volland was publisher of the *Demokrat*, which must not be confounded with the English *Democrat*, established some years later.

Antipfaff.—In 1842 there appeared a sheet with this title ("Antipriest"). It was edited by Heinrich Koch, a born agitator, who was the first in St. Louis to preach communism. He left St. Louis and settled in a communist colony, and in 1845 his paper was merged into the *Vorwaerts*, which managed to live only about one year.

Die Waage.—In 1844, Paul Follemins was invited to come to St. Louis and assume the editorial management of the *Anzeiger des Westens*, but the arrangement was not perfected, and Follemins established *Die Waage* ("The Venture"). It was conducted with ability and spirit, but those were not the times, and the slave-holding city of St. Louis certainly was not the place, for a journal that indulged in Follemins' radical method of dealing with the question of slavery *vs.* abolition. Follemins was a brother of Charles Follemins, for several years Professor of German Literature at Harvard University, and the friend of Channing, Theodore Parker, and John Quincy Adams, and was himself a remarkable character. In 1814 and 1815 he fought against Napoleon. In those days his love for the *Vaterland* was almost fanatical; in later years it settled down into a resolute and practical liberalism. Despairing of the situation at home he came to America, intending to establish somewhere in the far West a German free State, for many besides himself dreamed of founding a commonwealth composed exclusively of Germans. But when he arrived at St. Louis the association had dissolved, and he betook himself to farming in Warren County, where he labored patiently until called to St. Louis to take a position on the *Anzeiger*. Solidity of judgment, wit, penetration, and a good style characterized his writings, but they were unsuited either to the period or the place. He had few readers, and after issuing only three numbers he abandoned the publication, returned to his farm, and in October of that year succumbed to a fatal fever.

Der Reformer was a weekly paper established in 1847 as the organ of a communist union. It did not survive very long.

Der Freisinnige.—In November, 1846, L. F. Balland established a weekly for *freisinnige*, or free-minded folks; G. Scho was the editor. It was nationalistic in tone, and died young.

St. Louis Zeitung.—In 1848, Anton Eickhoff established *Die St. Louis Zeitung*, a semi-weekly; but the cholera and hard times of the next year caused its suspension. Eickhoff has had a remarkable career. At the age of sixteen he composed prose and verse, and published fruits of his talents in the papers of his province (Lippstadt, Westphalia). These were so strongly colored that a judicial proceeding was lodged against him, which he evaded only by leaving the country. He arrived at New Orleans in January, 1847, where he shipped as a common steamboat hand, and as such navigated all the Western rivers, the Mississippi to the falls and the Missouri far beyond the borders of civilization. Arriving in St. Louis in January, 1848, he is next known as a teacher in the St. Louis University. From St. Louis he went to Dubuque, where he started a paper; and after an adventurous career of some years, during which he wandered from Iowa to Louisiana, he went to New York, and in 1854–56 was connected with the *Staats-Zeitung*, and then with other papers, became a prominent Democratic politician and speaker, and in 1877–79 was a member of Congress. He now enjoys a fixed reputation as a *littérateur* and as a busy and useful man.

Tages-Chronik.—In 1851, Franz Saler established *Tages-Chronik* ("Daily Chronicle"), a two-cent morning paper, with a bias in favor of Catholicism. Among its early editors was Anton Boeckling; later (in 1858) the name of Adelbert Lochr appeared as editor. *Tages-Chronik* lasted some twelve years, when Mr. Saler sold the advertising patronage to Carl Daenzer, of the new *Anzeiger des Westens*, and also disposed of his type. Saler was for twenty-three years owner of the *Herold des Glaubens*, the German Catholic paper. He still lives in St. Louis, at the age of seventy-five, and retains a clear recollection of matters connected with his journalistic career.

Westland.—Here may very properly be mentioned *Westland*, a periodical which, although printed at Heidelberg, Germany, was edited in St. Louis. Dr. George Engelmann and Capt. Karl Neyfeldt were the publishers, and their editorial colleagues were Frederick Muench, William Weber, Theodore Hilgard, Jr., Dr. Von Koenige, and Gustav Koerner. The object was to afford accurate and trusty information to intending immigrants concerning the soil, climate, etc., of Missouri and the neighboring States. Three well-filled numbers were issued, when the difficulties of communication between the editors and the printers compelled a suspension of the publication. Dr. George Engelmann was the soul of the enterprise.

The St. Louis Price-Current was established by Josiah Anderson, in the fall of 1848, as an adjunct to the *People's Organ*. During 1848, and up to 1850, it was issued semi-weekly in letter-sheet form.

In 1849 a semi-weekly edition of the *Organ* was commenced in connection with the letter-sheet, but in 1852 both editions, the *Organ* and the *Price-Current*, became weeklies, and were thus continued by Mr. Anderson until the 1st of February, 1856. At this time Charles G. Gonter purchased an interest in the establishment, and the publication of the *Daily Price-Current*, a letter-sheet, with a weekly edition, in regular newspaper form was begun. The office was at No. 8 Olive Street. In 1862 the publication of the *Price-Current* was suspended, owing to the derangement of the mails, but was resumed in January, 1864.

Mr. Anderson, the senior partner, came to St. Louis in 1842. Before his connection with the *Organ* he had been river and commercial reporter of the *Republican*. He died in September, 1878, and the business was managed by C. G. Gonter & Co. In 1880, Mr. Gonter sold his interest to Joseph C. Pritchard, and the firm became Harker & Pritchard, the senior member (George M. Harker) having had a large interest in the firm for many years. The *Price-Current* is exclusively devoted to mercantile quotations, and is the representative organ of the leading produce, commission, and grocery houses of the city.

Western Journal—Western Journal and Civilian.—In January, 1848, was established the *Western Journal*, a monthly publication devoted to agriculture, manufactures, the mechanic arts, etc. The names of Micajah Tarver and T. F. Risk appeared as editors, and among the early contributors were H. A. Prout, M.D., Judge John M. Krum, Thomas Allen, and Professor John H. Tice. Alfred S. Waugh contributed an interesting series of papers on fine arts. After a while, and without any notice, the name was changed to the *Western Journal and Civilian*. In 1851, Risk withdrew, and became the publisher of the *Western Review*, a monthly devoted to education, general literature, temperance, internal improvements, etc., Ebbert & Risk being the publishers. In January, 1853, he is heard of as editor of the *Miscellany and Review*, the *Western Review* having apparently been absorbed.

The *Western Journal and Civilian* was published at least until May, 1855, the date of the last number in the public libraries. M. Tarver and H. Cobb were editors and proprietors. Mr. Cobb was a lawyer by profession, and among the contributors were Bernard Pratte, Dr. H. A. Prout, and Edward Stagg.

The magazine was a curious *mélange* of commerce, fine arts, agriculture, literature, transportation, translations from French and German, politics, etc., and rather deserved the fun that was sometimes poked at it. The *Republican* once, acknowledging the receipt of a copy "with four poetical *bon-bons* from the junior editor," remarked, "We do not know that Hunt or DeBow or any other commercial statistician ever ventured on poetry. It is highly improbable that a man whose cranium is rented out as a store-house for fish, lard, molasses, and tobacco, lead, hemp, tallow, cheese, and pig-iron can possibly keep his imagination in nimble order and his acquaintance with the Muse on the best of terms. The Pegasus of the junior is a tame and sorry nag,—hog-backed, no doubt, by commercial drudgery."

Mr. Tarver died in St. Louis, May 17, 1856.

The Evening News, a two-cent Democratic journal, was established April 17, 1852, by Charles G. Ramsey and Abram S. Mitchell. It was edited with ability, and soon attained a considerable popularity. In 1860 its circulation had increased to four thousand copies daily, seven thousand weekly, and five hundred tri-weekly. The editor was Abram S. Mitchell, and the associate editor Daniel N. Grisson, now a member of the *Republican* staff. Its competition proving too keen for the *Intelligencer*, a daily journal which had enjoyed a fair measure of success, the latter paper was sold in 1853 to A. S. Mitchell & Co., who for four years managed the two papers separately and independently. But in the hard times of 1857 the *Intelligencer* was merged in the *News*, and for some time the consolidated paper was known as the *Daily News and Intelligencer*.

Some time after its incorporation by the latter with the *News* the words *and Intelligencer* were dropped from the title, and the paper became once more the *Evening News*. The *News* survived until 1867, when Mr. Ramsey sold it to the *Dispatch*. Before the war the *News* was a fairly enterprising journal, and was prosperous; but during and after the war a more vigilant style of journalism was demanded, and the paper found itself outstripped in the race.

Abram S. Mitchell, one of the founders of the *News*, was born Dec. 1, 1820, near Nashville, Tenn. His parents were both natives of Virginia. His grandfather, Thomas Mitchell, was a merchant in Lynchburg, Va., during the Revolution, and was a man of education, but his store was plundered by the British and he was reduced to poverty. He resorted to teaching, but died soon after. The family being quite destitute and helpless, emigrated to Tennessee. There were two sons, Thomas and Robert J., and several daughters. After struggling in various ways to support himself as he grew up, among others working at the shoe business, Robert J. Mitchell, the father of Abram S., joined the standard of Gen-

Jackson, who was raising volunteers for the Indian wars, and served under that leader in a campaign against the Creeks, and also in one against the Seminoles. Returning to Tennessee he married, commenced farming, and in 1827 removed to the Hatchess River, in West Tennessee.

Abram S. Mitchell was sent by his father to the schools of the neighborhood, but soon exhausted the little that they could impart. He was fortunate enough, however, to meet with an excellent teacher in the person of the Rev. James Holmes. During intermissions of school he sought work to aid in his own support. He applied at a brick-yard, but was rejected for want of strength, and was afterward employed in tending a bark-mill in a tannery. In 1837, just as he was preparing to finish his education by a collegiate course, his father became bankrupt by having become security for a sheriff, and all of his property was sold to meet his bond. However, a few years later, Robert W. Sanford, a friend of the family, feeling an interest in young Mitchell, and appreciating his desire for an education, aided him in going to college at Danville, Ky., where he remained only eighteen months, and graduated with full honors, having accomplished in that time what usually required a much longer period to perform. He taught school until he relieved himself of the debt he incurred in his education (about seven hundred dollars), and then studied law in Danville, and established a newspaper called the *Weekly Kentucky Tribune*, in connection with James S. Hall. That year he supported the Whig candidate for Governor, who, after election, before making any other appointment, bestowed upon him the office of Assistant Secretary of State.

About this time Mr. Mitchell married Miss Bodley, of Lexington, Ky. After serving the term of his appointment, he and his father-in-law, H. I. Bodley, determined on removing to St. Louis, which they did in 1849, the season of the dreadful visitation by the cholera, by which he lost his wife and child. This domestic affliction induced him to return to Kentucky, where in a short time he received an invitation to become assistant editor of the *St. Louis Intelligencer*. He accepted the invitation, but did not long remain connected with the paper. He also received an invitation to become editor of the *Republican Banner* at Nashville, Tenn., which he declined. He then became land agent and afterwards secretary of the Pacific Railroad Company. Some time after leaving this appointment, at the suggestion of some of the most prominent citizens of Missouri, Mr. Mitchell, as previously stated, in connection with Charles G. Ramsey, established the *Evening News*. He was half owner and chief editor of the journal.

Mr. Mitchell was married the second time in September, 1851, to Mary Brent Talbot, granddaughter of Governor William Owsley, of Kentucky.

C. G. Ramsey, his partner, continued with the *News* until its decease in 1867, and then had an interest in the *Dispatch*. Upon the absorption of that paper by the *Post* he went out of journalism, and was until February, 1883, inspector of customs at St. Louis.

The Westliche Post (German daily) was established Sept. 27, 1857. The first publishers were Carl Daenzer, at present of the *Anzeiger des Westens*, and Dr. F. Wenzel (who had edited a newspaper at Belleville, Ill.), under the firm-name of Daenzer & Wenzel, who were succeeded by Messrs. Wenzel and D. Hertle. The latter wrote an interesting history of the Germans in Missouri, especially dealing with the war period, when political and military affairs were conspicuously shaped by German voters and soldiers. In April, 1864, Theodore Plate became publisher, and at the same time Dr. Emil Preetorius acquired an interest in the paper, and became editor-in-chief. Dr. Preetorius has remained in that position continuously until the present time. In 1867, Arthur Olshausen[1] (publisher of the old *Anzeiger des Westens*) acquired an interest, and in May of the same year Carl Schurz became a partner and Dr. Preetorius' associate in the editorial management. The publishing firm was then Plate, Preetorius, Olshausen & Schurz. Messrs. Plate and Olshausen have gradually disposed of much of their interest, and Messrs. Preetorius and Schurz are the principal owners of the paper, which is now published by the Westliche Post Association, Emil Preetorius, president; Felix Coste, secretary and treasurer.

In April, 1874, the paper was first issued from its present commodious and convenient building, at the corner of Fifth and Market Streets, the property having been purchased May 27, 1871, for about ninety thousand dollars cash.

[1] Mr. Olshausen's brother, Theodore Olshausen, at one time a member of the editorial staff of the *Westliche Post*, died at Hamburg, Germany, March 31, 1869. Mr. Olshausen played a prominent part in the struggle of Schleswig-Holstein against Denmark, and took refuge in the United States after the failure of the cause which he had espoused. During the civil war he was chief editor of the *Westliche Post*, and became one of the most earnest partisans of that epoch. At the end of the war he sold his interest in the *Westliche Post* and returned to Europe on account of ill health, establishing his residence at Zurich, Switzerland. His private character was unimpeachable, and he enjoyed and deserved the respect of a large circle of friends. He was never married.

The *Westliche Post* is Republican in politics, and during the war exerted a powerful influence in behalf of the Union among the Germans. It has been edited with marked ability, and is one of the most prosperous German papers in the country.[1]

Dr. Emil Preetorius, who as editor-in-chief has guided the *Westliche Post* with consummate ability and skill, was born in Rhenish Hesse (Rheinplatz) in 1827, was educated first at the Gymnasiums at Mainz and Darmstadt, and then at the University of Giessen and the celebrated University of Heidelberg, and was graduated at the latter institution as Doctor of Laws in 1848. He began the practice of law with considerable success, but in consequence of having participated in the revolutionary movements of 1848–50, he was in the latter year obliged to leave Germany. He arrived in St. Louis in 1854, engaged for a while in mercantile pursuits, and then, the war coming on, devoted his time and means to organizing German regiments and sending them to the field. In 1862 he was elected to the State Legislature on the radical emancipation ticket, and in that body took an advanced position as an "immediate emancipationist." In 1864 he resumed business pursuits, but took an active part in the Presidential campaign of that year. During the same year, as already stated, he became the editor of the *Westliche Post*. In 1872 he identified himself with the Independent Republican movement, and contributed much to its success. Dr. Preetorius is a crisp, clear writer, and a logical and convincing speaker. His lectures on æsthetical, philosophical, and historical themes have attracted much attention not only among Germans, but among the English-speaking people of the West, and his sagacious direction has placed the *Westliche Post* in the front rank of American journalism.

Hon. Carl Schurz, whose assistance proved of great value to Dr. Preetorius in solidifying and extending the influence of the *Westliche Post*, was born in Liblar, near Cologne, March 2, 1829. He passed through the Gymnasium at Cologne, and spent two years at the famous University of Bonn, taking a course of history, philosophy, etc. He was an energetic actor in the revolution of 1848, and participated in the defense of Rastadt. He became a prisoner when the place capitulated, but escaped to Switzerland. He next distinguished himself by the brilliant rescue of a friend named Kinkel from the fortress of Spandau, after which he went to London (in 1851), and spent a year there teaching music and the languages. In 1852 he emigrated to America, spent three years in Philadelphia, and then removed to Wisconsin. He soon became noted throughout the country as an eloquent and effective speaker, not only in German but in English. President Lincoln appointed him minister to Spain in 1861, but desiring to engage in the war, he returned in December of that year, and as brigadier-general served creditably throughout the war. In March, 1862, he delivered a speech in favor of abolishing slavery in order to restore the national unity, and during the campaign of 1864 made several powerful speeches in favor of Lincoln's re-election. In 1865, President Johnson sent him South to investigate the condition of the Southern people. In 1866 he was for several months editor of the *Detroit* (Mich.) *Post*, and in 1867 purchased an interest in the *Westliche Post*, and became one of its editors. In 1869 he was elected to the United States Senate from Missouri, and served with distinction, occupying a foremost rank as a scholarly and eloquent debater. His senatorial career was marked by great independence, and in 1870–72 he led the revolt in the Republican party against the administration of Gen. Grant, which culminated in the nomination of Horace Greeley. In 1870 he pronounced in favor of the removal of the disabilities of those whom the Missouri Constitution had disfranchised. In 1875 he retired from the Senate and resumed his editorial duties on the *Westliche Post*, but in 1877 President Hayes appointed him Secretary of the Interior, and his four years' administration was marked by many reforms. In 1881 he withdrew from the *Westliche Post*, retaining, however, his interest in the paper, and became editor and part owner of the New York *Evening Post*, whose editor for many years was the poet, William Cullen Bryant.

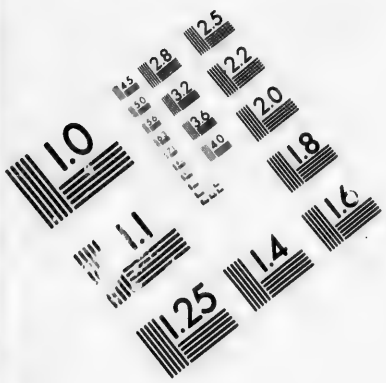
Edward Leyh, now one of the principal members of the editorial staff of the *Westliche Post*, was for many years connected with the *German Correspondent* of Baltimore, first as an editorial writer and afterward

[1] Among the many talented men who have contributed to the columns of the *Westliche Post* was William Stengel, who died Oct. 29, 1880. He was born in Germany in 1830, and studied law at the University of Tübingen. In consequence of the active part he played in the revolution of 1848 he was compelled to leave his native country, and came to America, making his home in New York. In 1856 he emigrated West, and at Cincinnati entered the profession of journalism. In 1861, when the war opened, he was one of the first to go to the front, entering the Ninth Ohio Regiment as chaplain. The position was not active enough for him, and he was made captain. In that capacity he led his company in many a hard-fought conflict, taking part in the battles of the Wilderness, Lookout Mountain, and other noted engagements. At the close of the war he settled in St. Louis, and became assistant editor of the *Westliche Post*, a position he filled until his death. He left a wife and six children. Mr. Stengel was a well-known political writer, and had many friends.

as managing editor. Mr. Leyh's earliest newspaper experience in Baltimore was on the editorial staff of the *Baltimore Wecker*, and he subsequently established the *New Correspondent*. He left Baltimore in May, 1881, to accept an editorial position on the *Westliche Post*. As a terse, brilliant, and logical writer, Mr. Leyh has no superior on the German-American press. His information on political, historical, and scientific subjects is thorough and accurate. He has corresponded with several of the leading papers of Berlin, including *Die Gartenlaube*, and has done much literary work, among it a translation into German of Joaquin Miller's poems that possesses all the fire and spirit of the original. The translation was published in Berlin and has been greatly admired, and had an extensive sale in Germany.

The Hornet.—In January, 1874, A. B. Cunningham, a native of Louisiana, who had for some time been connected with the press of New Orleans, removed to St. Louis and obtained a position as reporter on the *Globe-Democrat*. Subsequently he became managing editor of the *Post*, but left it in December, 1878, when, in connection with Messrs. McGuffin and John Hodnett, well-known newspaper men, he established the *Evening Star*, which after a troubled career of about seven months was absorbed by the present *Post-Dispatch*. He was then for a short period city editor of the *Post-Dispatch*. On Sept. 11, 1879, he established *The Hornet*, a humorous weekly illustrated by the chromo-lithograph process. In March, 1880, a stock company with twenty thousand dollars capital was organized, with Mr. Cunningham as president and W. H. Nave as secretary. In August, 1882, the publication suspended. Mr. Cunningham is now connected with the *Globe-Democrat*.

Volks-Zeitung—Die Neue Welt—Staats-Zeitung—Courier.— In 1866–67 the *Volks-Zeitung*, a German evening paper, was established by —— Heeman. In November, 1868, it was merged in *Die Neue Welt*, a morning paper, started by a stock company composed mainly of stockholders of the German Bank. The first editors of *Die Neue Welt* were Heinrich Binder, now of the *Abend Post*, Detroit, and Carl Roesser, now of Washington, D. C. A. Willhartilz, at present a well-known teacher of music, was business manager for a season; and among others who acted in that capacity was Louis Soldan, at present principal of the Normal School, St. Louis. Finally, after losing a large amount of money for its stockholders (some authorities say eighty thousand dollars), it was absorbed in the *Staats-Zeitung*, a paper established by Gustav Bruere, now business manager of the *Anzeiger*. Ernest Schierenberg, now of the *Anzeiger* but then of St. Charles, Mo., became editor of the *Staats-Zeitung*, and remained such during its existence. Among others connected with the paper was Dr. Makk, now of Colorado. The property was a losing one for a long time, and finally it was sold at public auction to Joseph Pulitzer, who published it one day and sold the telegraphic franchise to the *Globe*.



In the following week the *Courier* was established, an evening paper, with Dr. Makk as editor. In about a year he left it to establish an opposition paper, the *Volksblatt*, and was succeeded by Herr Harssen, now of the *Westliche Post*. The *Volksblatt* succeeded in killing the *Courier*, but in the struggle it killed itself. In 1875 Dr. Makk was the editor and proprietor of the *St. Louis Volksblatt*, a weekly and Sunday journal.

Amerika.—In 1872 an association known as the German Literary Society was organized for the purpose of establishing a German Democratic paper. It numbered several hundred members, and the first officers were: President, Henry J. Spaunhorst; Vice-President, John H. Grefenkamp; Secretary, Anthony Roeslein.

The paper *Amerika* first appeared Oct. 17, 1872. William Reinert was the business manager; Anthony Hellmich, editor; Dr. Edward Preuss, assistant editor; Charles H. Elker, commercial editor. In 1878, Hellmich retired, and Dr. Preuss became editor, and still occupies that position. He was formerly editor of the *Abend Schule*, a German weekly. *Amerika* publishes morning, Sunday, and weekly editions, and has a large circulation. In politics it is Democratic. The present officers of the publishing society are: President, William Druhe; Vice-President, Joseph Gummersbach; Secretary, Edward Preuss; Business Manager, John Peitzmeier.

St. Louiser Laterne.—In 1876, L. Suessmann established *Die Laterne* ("The Lantern"), a humorous and satirical illustrated paper. It was printed in the German language, and published weekly. In 1879 it passed into the hands of the Laterne Publishing Company, Louis Willichs, president; G. Brueckner, secretary. In April, 1882, G. Brueckner & Co. became proprietors. In July, 1882, an edition in English was commenced, but after two numbers was discontinued. The *Laterne* was suspended in the summer of 1882, but in December its publication was resumed by Louis Willichs. Its sprightly humor is appreciated by German readers.[1]

[1] Another paper called *The Lantern* was published in St. Louis in 1851 and 1852.

Volkstimme des Westens was started in 1877 by a literary association of the Socialist Labor party, Germans. Dr. Otto Walster was editor-in-chief, and it was the recognized organ of the Socialists in the West. It lived two or three years.

The Spectator.—On the 18th of September, 1880, John R. Reavis founded *The Spectator*, a weekly paper, twenty pages in size, devoted to art, society, the drama, literature, and matters of general social interest. Upon the second issue George I. Jones became associated with Mr. Reavis as publisher, and in April, 1882, a company was incorporated with thirty thousand dollars capital, George I. Jones being chosen president, and John R. Reavis secretary. Journals of this class had not previously been successful in St. Louis; in fact, *The Spectator* is the only weekly that ever attained any permanent footing. It is believed that, with the exception of the *San Francisco Argonaut*, *The Spectator* is the most successful weekly paper of this kind in America, its circulation being large, and its advertising patronage handsome.

Mr. Reavis, who is still its editor, was born in Cooper County, Mo., in 1848; was educated at the Kentucky University; became part owner of the *Lexington* (Mo.) *Caucasian* in 1873; removed to St. Louis in 1875, and joined the staff of the *Times*, then under the charge of Stilson Hutchins, as a canvasser, and in 1878 was engaged on the *Evening Post* as a reporter, under John A. Dillon. He remained in that capacity until he founded *The Spectator*, in the management of which he has exhibited signal ability and tact. Mr. Reavis is a graceful and polished writer, and a frequent and valued contributor to the press of St. Louis.

Mr. Jones, the publisher, is a graduate of Harvard College, and while he devotes himself mainly to the business interests of the paper, often writes for its columns, and always in a logical and effective manner. Mr. Jones is also one of the largest and most enterprising book publishers in St. Louis, and the history of the St. Louis bridge, published by him, is the finest work that has ever issued from a St. Louis press. The success of *The Spectator* is largely due to his conservative judgment and excellent taste.

The Spectator's corps of writers is large, and its literary character is of a high order. The art department has from the first been conducted by W. R. Hodges, one of the regular contributors to the late *American Art Review;* while the dramatic department has also from the first been conducted by Henry W. Moore, a recognized authority in dramatic criticism throughout the country. In February, 1883, *The Spectator* absorbed *The Criterion*.

The Evening Chronicle was established July 31, 1880, by the Chronicle Publishing Company, which was controlled by J. E. Scripps, of Detroit, who was successfully managing papers of a similar character at Detroit, Cleveland, and Buffalo. *The Chronicle* was a six-column, two-cent paper, and its leading features were the treatment of subjects in a crisp and unconventional way. It at once achieved great popularity, and is now one of the recognized newspaper institutions of the city. Stanley Waterloo[1] was the first managing editor, and in November, 1882, he was succeeded by Dr. John B. Wood, a well-known journalist of New York, where he was for many years connected with the *Sun*, *Herald*, etc. Dr. Wood is known to the profession as "The Great American Condenser," and was once president of the New York Press Club.

In 1880–81, C. M. Howell (who was also for a season city editor of the *Republican*) was city editor of the *Chronicle*. In 1882, W. V. Byars, a very capable writer of the *Times* and other newspaper staffs, was city editor. In August, 1882, he was succeeded by F. H. Burgess, formerly connected with several Michigan papers, and for some years associate editor of the *Detroit Evening News*.

Early in 1883 the *Chronicle* moved into a well-arranged newspaper building of its own on Sixth Street near Market.

St. Louis Daily News.—A morning paper with this title appeared Nov. 6, 1881. It was a seven-column quarto, was modeled upon the *New York*

[1] Stanley Waterloo was born in St. Clair County, Mich., in 1846, and is a graduate of Michigan University (class of 1868). After a short experience at school-teaching, he went, in 1869, to Chicago and became a reporter on the *Tribune*, *Times*, and *Post;* was assistant editor of the *Insurance Spectator*, now published in New York, and was with Goodsell Brothers, who now publish the *Daily Graphic*. He became editor of the *American Builder*, a monthly now published in New York, and while in charge of this publication organized the "Waterloo Printing Company," which the great fire swept out of existence. He then removed to St. Louis, where he published the *Builder* for circulation in Chicago, but finally left that paper and joined the staff of Wallcott & Hume's *Daily Journal* (established about that time) as editorial writer and part owner. In 1874 he became news editor and editorial writer on the *Republican*, and afterwards city editor of the same paper, a position which he filled with distinction for four years. He then organized a stock company for the publication of a two-cent daily paper, and subsequently effected a union with Mr. Scripps' company, which was preparing to occupy the same field. Soon after forming the connection with the *Republican* he became a regular correspondent of the *Cincinnati Gazette*. He subsequently relinquished this position to become correspondent and general representative in St. Louis of the *New York Sun*, *Chicago Tribune*, and *Cincinnati Enquirer*, but on establishing the *Chronicle* he abandoned this connection.

Sun, and sold for two cents a copy. It was Democratic in politics, and among its stockholders were several capitalists of that political complexion. Edwin Harrison was president of the publishing company, George Mills was vice-president and secretary, and Thomas Smith was treasurer and business manager. George Mills was managing editor; R. A. Dyer, telegraph and sporting editor; E. A. Skeel, news editor; George Kelly, commercial editor; George Eddy, city editor; John Hodnett, advertising and circulation agent. The paper was well edited, but the financial management was unsuccessful, and in March, 1882, it ceased to exist, having sunk from twenty-five thousand to thirty thousand dollars in its short but animated career.

George Mills, formerly editor of the *News*, is a leading journalist of St. Louis, and is best known for his writings on art, on which subject he is an acknowledged authority. His judgment is excellent, his taste cultivated and refined, and his style clear, nervous, and graceful.

The Criterion.—In May, 1882, was established *The Criterion*, a weekly, published by a company of that name; F. Weber Benton, editor and manager; John J. Roche, secretary. Mr. Benton had been editor of a country paper in Missouri. *The Criterion* was mainly devoted to the discussion of literary and social matters. It soon engaged the pens of the finest writers in the city, among them that of Dr. M. W. Willis, a scholarly contributor to some of the most prominent periodicals of America. It speedily obtained great popularity, but in February, 1883, was absorbed by *The Spectator*.

Shepherd of the Valley.—In 1834 or 1835 the *Shepherd of the Valley* was established as the organ of the Catholic Church. In 1839, Thomas Mullen started the *Catholic Banner*. Its career, like that of the *Shepherd*, is shrouded in oblivion. In 1851, R. A. Bakewell re-established the *Shepherd of the Valley*. It existed until 1854, and became the property of Rev. Dr. J. H. High and J. Gilman, LL.D., who made it a "Know-Nothing" organ under the title of *The True Shepherd of the Valley and St. Louis Know-Nothing*.

In 1859, B. D. Killian began the publication of the *Western Banner*. How long it lasted is unknown.

The Herold des Glaubens ("Herald of Faith") was established in 1850 by Franz Saler. In 1875 increasing years induced Mr. Saler to sell the paper, which then fell under the control of the German Printing and Publishing Association, G. H. Timmerman, president; John J. Ganahl, vice-president; Joseph Gummersbach, secretary; Very Rev. Dr. Muehlsiepen and Francis Cornet, directors. Joseph Wegmann is the editor, and L. Blankemeier is the business manager.

The *Herold des Glaubens* is a Catholic German weekly journal, has over thirteen thousand circulation, and is the official organ of several dioceses, besides having the indorsement of numerous dignitaries of the church, many of whom have written for it editorially and otherwise.

The Western Watchman was established in 1865 by Rev. D. S. Phelan, a priest of the Catholic Church, at Medina, Mo. The "Drake Constitution," then in force, prescribed a "test oath" for clergymen, and Mr. Phelan, refusing to take the oath, was imprisoned. The *Western Watchman* was started to agitate for a repeal of the obnoxious law. In 1867 the paper was removed to St. Louis, Mr. Phelan having been transferred to the parish of "Our Lady of Mount Carmel," in Baden, North St. Louis. He is still the editor, and W. H. Phelan has been for ten years business manager. It is published weekly, and is the organ of the English-speaking Catholics of the diocese.

Baptist Publications.—The first Baptist newspaper in Missouri was issued in 1842, under the auspices of the General Association, and was called the *Missouri Baptist*, the organ of the denomination in Missouri and neighboring States. It lasted only until 1844.

In 1848 the *Western Watchman* was established, with Rev. T. W. Lynd editor. It survived until the early years of the war. Another *Missouri Baptist* was established in 1860 by the Missouri Baptist Publication Society; Rev. S. H. Ford editor. This also died during the war.

In 1865, John Hill Luther began the publication, at Palmyra, Mo., of the *Missouri Baptist Journal*, which next year was recognized as the State paper by the General Association. About a year later the *Baptist Record* made its appearance at St. Louis, under the editorial conduct of Rev. A. Kendrick, D.D. In 1868 the two papers were consolidated at St. Louis, and the name of *Central Baptist* was given to the new journal, whose aim was to unite the Baptists of Missouri on a common platform. Luther & Kendrick were the publishers. In 1874, Dr. W. Pope Yeaman bought an interest in the paper and then became sole proprietor, and in 1877, Rev. Wm. Ferguson became owner and editor; but in July, 1882, the latter sold it to Rev. William H. Williams, a well-known Baptist clergyman of Charlottesville, Va. The paper circulates widely, and is a fine property. It is published weekly.

The American Baptist Flag, a forty-eight-column quarto, was established in January, 1875, by the Rev. D. B. Ray, who has been its editor and proprietor ever since. The original title was *The Baptist Battle-Flag*, but in 1880 the name was changed to the present one. The *Baptist Flag* claims the largest circulation of any paper of its denomination west of the Mississippi. Its peculiar feature is polemic theology and church history. Mr. Ray, the editor, was once connected with the *Baptist Sentinel*, a Kentucky paper, and is the author of "Baptist Succession," a hand-book of Baptist history, and an exhaustive and authoritative treatise. He is also the author of a "Text-Book on Campbellism."

The Regular Baptist Magazine was established in 1875 by E. H. Burnam, and has been continuously owned and edited by him. It is published by J. T. Smith & Co., and is issued monthly. It comprises forty pages, and is the organ of the "primitive" (or regular) Baptists, in contradistinction to the "missionary" Baptists, who are strongly represented in Missouri.

St. Louis Christian Advocate.—This paper, a weekly, was published first in 1850 by "a committee of the St. Louis and Missouri Annual Conference for the Methodist Church South," consisting of Rev. J. Boyle, editor *pro tem.;* J. Mitchell, associate editor *pro tem.;* Rev. F. A. Morris, A.M., Rev. Richard Bond, M.D., corresponding editors. In 1851 the St. Louis and Missouri Conferences unanimously petitioned that the Rev. Dr. R. M. McAnnally be assigned as editor, and in December of that year he assumed that position, having been transferred from Holston Conference. This relation continued until 1868, when, at his own request, he was relieved. For four years the Rev. T. M. Finney conducted the paper, assisted by Rev. Dr. Thomas E. Bond, of Boston, and in 1872, at the general solicitation of leading members of the denomination, Dr. McAnnally resumed the editorial management, and has been the editor without interruption ever since. The paper has always been the organ of the Methodist Church South.

Dr. McAnnally was born in Tennessee in 1810, and was the son of a well-known Methodist minister. He commenced to study law, but abandoned it for the ministry, and at the age of nineteen was ordained with full powers for the ministry, and soon became conspicuous as an eloquent and effective preacher of the Methodist Church. He preached in Tennessee, North Carolina, Virginia, and other States until 1843, when he became president of the female college at Knoxville, a position he held for eight years. Under his management the school became permanently famous. In 1851, as stated above, he took charge of the *Christian Advocate*.

In addition to his editorial duties, which have been performed with singular acceptability, Dr. McAnnally has written several important works. Beside several theological treatises of minor interest, he has published "Methodism and Slavery," discussing the official connection of that church with slavery; "Life and Labors of Bishop E. M. Marvin," and the lives of the Rev. Dr. S. Patton, the Rev. William Patton, and others. His most ambitious work is a "History of Methodism in Missouri." One crown octavo volume has already appeared, and the work will embrace another volume, perhaps two.

Dr. McAnnally is a fearless, lucid, and forcible writer, and in the exciting controversies which have agitated the church and the country since his connection with the *Advocate* has never hesitated to utter his convictions regardless of consequences. All his work bears the impress of a strong, healthy, and original mind.

Central Christian Advocate.—Some time in 1852 or 1853 the Rev. W. D. R. Trotter began the publication of the *Central Christian Advocate*, a Methodist journal. It never commended itself to the General Methodist Conference, and lasted only two or three years. In 1856 the Conference authorized the founding of a new paper and gave it the name of the *Central Christian Advocate*, and in 1857 elected Joseph Brooks as the first Conference editor, J. L. Conklin having been the first editor provisionally. Mr. Brooks served four years, and was succeeded by the Rev. Charles Elliott, who served four years. B. F. Crany then served eight years, and in 1872 the Rev. Dr. B. St. James Fry was elected to the position, which he has continuously held up to the present time, the paper constantly remaining the property of the General Conference. It is published by the Western Methodist Book Concern, and is the organ of the Methodist Episcopal Church for Missouri and the neighboring States. It is issued weekly.

Joseph Brooks, the first editor, assumed the editorial chair at a critical period. The Methodist Church had divided on the subject of slavery, and the coming war was already foreshadowed. He placed his paper on the anti-slavery side of the contest, and when the war broke out enlisted as chaplain in the First Missouri Artillery, and was transferred to the Eleventh Missouri Infantry. He very early advocated the enlistment of colored troops, and in order to show his faith in the experiment, he permitted himself to be transferred to one of the colored regiments. After the war he settled in Arkansas, was elected to the Legislature,

and in 1872 claimed to have been elected Governor, but was kept out of his seat until 1874, when upon being installed, President Grant interfered and deposed him. This controversy, known as the Brooks-Baxter war, created a great sensation all over the country. He died in 1877.

Dr. Charles Elliott, his editorial successor, had been for many years an editor of church papers. He wrote a work entitled "Delineation of Roman Catholicism," and the principal mission of his life was opposition to Catholicism. He died at Mount Pleasant, Iowa, in 1869.

Dr. Fry, the present editor, is a native of East Tennessee, but his boyhood was passed in Cincinnati. For four years he was president of Worthington Female College, for three years was chaplain in the army, and in 1865 was appointed to the charge of the Methodist Book Concern at St. Louis. He is the author of several Sunday-school books, of a prize essay on "Property Consecrated," and of the lives of Bishops Whatcoat, McKendree, and Roberts.

German Evangelical Publications.—A. Wiebusch & Sons are printers for several publications issued by the Evangelical Synod of North America (German).

Der Friedensbote was established in 1849 by the Church Society of the West, representing the United Evangelicals, a German Protestant denomination. Subsequently the United Evangelicals developed, and organized the Evangelical Synod, which continued the publication for some years. It has a large circulation, and is issued semi-monthly. Rev. C. A. Witte is editor of *Der Friedensbote* ("Messenger of Peace").

Christliche Kinder-Zeitung, a semi-monthly illustrated paper for the young, was established in 1866 by the Evangelical Synod of North America.

The Theologische Zeitschrift was founded in 1872. It is a monthly periodical, designed for the ministers of the Evangelical Synod.

The Evangelischer Gemeindeblatt is a monthly, started in 1878 as the organ of the Evangelical Pastors' Union of St. Louis.

Christlicher Bunder-Bote.—This periodical, the organ of the General Conference of the Mennonites of North America, is also published by A. Wiebusch & Sons. It was established Jan. 1, 1882, and appears semi-monthly. The Rev. David Goerz, Halstead, Kan., is the editor.

Protestantische Familien-Blatt.—Some six years ago there flourished a paper of this name, but it was merged in *Der Protestantischen Zeitblaetter* of Cincinnati, which in turn was merged into *Die Union*, and then died. On the 1st of July, 1882, the publication of *Protestantische Familien-Blatt* was resumed by the Rev. J. G. Eberhard and the Rev. J. F. Jonas, Evangelical Protestant clergymen of St. Louis. It is devoted to bringing about a union between the Evangelical Protestant congregations of North America and those of kindred ways of thinking. Rev. Mr. Eberhard is editor; Rev. Mr. Jonas, business manager.

The St. Louis Presbyterian was edited by Rev. E. Thompson Baird, who in 1854 transferred to Rev. N. L. Rice, editor; Keith & Woods, publishers. *The Presbyterian* was then in its eleventh year. In 1862 we find that John H. Schenck, one of the proprietors of *The Presbyterian* newspaper, was placed under arrest on the charge of having been a captain in the Confederate army.

In 1865, R. P. Farris began the publication of the *St. Louis Presbyterian*, a weekly. For a few years it was issued by the Presbyterian Publishing Company, but is now printed by J. T. Smith & Co. Mr. Farris is still editor. It is a six-column quarto, is issued weekly, and circulates generally in the West and South. A special edition is published for Texas.

The St. Louis Observer was established in 1876, at Macon City, Mo., by the Rev. W. Benton Farr, D.D., a Presbyterian clergyman, and J. D. Howe and J. R. Malone, bankers of that place. Subsequently Mr. Farr removed to Alton, Ill., taking the paper with him; Howe and Malone withdrew, and Messrs. Perrin and Smith took an interest. The firm was then known as the St. Louis Observer Publishing Company, the office of the paper being in St. Louis. In April, 1882, Mr. Farr withdrew from the company, remaining, however, as editor, and the Rev. W. C. Logan bought Smith's interest and became associate editor. The *Observer* is the organ of the Cumberland Presbyterians, and circulates very largely among the people of that denomination in the North and West. It is a six-column quarto, published weekly, and is conducted with marked ability.

The Missouri Presbyterian was established in 1865 by Aaron F. Cox, formerly of the *St. Louis Observer*. Mr. Cox died Nov. 5, 1869. Mr. Cox was born in Philadelphia, and his publishing career began in Louisville, Ky., in 1855, on the *Watchman and Evangelist*, which was united with the *Missouri Cumberland Presbyterian* in 1858. The consolidated paper was published in St. Louis under the name of the *St. Louis Observer*. He retired from that paper in 1862, and became the publisher of the *Missouri Presbyterian* in 1865. He was the first superintendent of the Pratte Avenue Mission Sunday-school, which culminated in the organization of a prosper-

ous church. He was among the first who organized the St. Louis Provident Association, and took a leading part in the organization of other equally worthy benevolent operations.

The St. Louis Evangelist was originally a Presbyterian monthly, founded in January, 1875, by the Rev. J. W. Allen. Mr. Allen is a native of Belmont, Ohio. He was born in 1837; graduated at Washington College, Pa., in 1860; pursued theological studies at the Western Theological Seminary at Alleghany City, Pa., and served as pastor of Presbyterian Churches for several years.

In the fall of 1882 the Presbyterian News Company was organized (with twenty thousand dollars capital) to publish *The Evangelist* as a weekly, and in January, 1883, the paper so appeared. Rev. E. Cooper was appointed editorial manager, and the Revs. H. D. Ganse, J. H. Brookes, and S. J. Nicolls were appointed an editorial committee. The board of directors of the Presbyterian Newspaper Company is organized as follows: President, Carlos S. Greeley; Vice-President, John R. Lionberger; Secretary, Edward Cooper; Treasurer, J. W. Allen.

The Christian.—In 1864, E. L. Craig, a prominent preacher in the Disciples (or Campbellite) Church, founded *The Gospel Echo*, a monthly publication, of which he was both editor and proprietor. In 1867 he sold the paper to J. C. Reynolds, a professor in Abingdon College, Illinois, also a preacher in the Christian denomination, and now president of Canton University, Missouri, who a year later associated with himself J. H. Garrison, a brilliant young graduate of Abingdon College. In 1873 *The Gospel Echo* was consolidated with *The Christian*, of Kansas City, and the publication-office was removed to St. Louis. A stock company—The Christian Publishing Company—was formed to publish it and other religious works. *Gospel Echo* was then dropped from the title. James H. Garrison, James B. Goff, and John C. Reynolds were the first directors of the company. The present editors are James H. Garrison and James H. Smart.

The company also publishes a full line of Sunday-school papers, its leading issues being *The Little Sower*, a weekly, formerly of Indianapolis, and the *Gospel Teacher*, a monthly, both edited by W. W. Darling. The Christian Publishing Company also publishes a forty-eight-page ladies' illustrated magazine under the title of the *Christian Monitor*. It was started at Indianapolis in 1861 by Mrs. M. M. B. Goodwin, and was removed successively to Cincinnati and Oskaloosa, Iowa. In 1879 it was bought of Mrs. Goodwin by the present publishers. Mrs. S. E. Smart is editor, and Mrs. Goodwin is associate and corresponding editor.

The Church News was established in 1869, and is published in the interest of the Episcopal diocese of Missouri, being the organ of the bishop. For the past twelve years G. W. Matthews has been the publisher. It appears monthly.

The Jewish Tribune.—In 1876, Godlove, Fredman & Wolfner established the *Jewish Tribune*. Subsequently it became the property of Rev. Dr. Sonneschein and Rev. Mr. Spitz, who were its editors. The *Tribune* was originally devoted to society matters among the Hebrews, but Messrs. Sonneschein & Spitz made it largely a theological paper. Finally it was bought by M. C. Reefer, who is business manager and local editor. The editor is Dr. David Stern, of Wilkesbarre, Pa. It is published weekly, and is the organ of Western and Southwestern Israelites.

Kellogg's St. Louis Record.—This journal, issued weekly, is devoted to the interests of the well-known A. N. Kellogg Company, whose business (that of supplying newspaper publishers with printed or "auxiliary" sheets) may properly claim mention in an article devoted to the press of St. Louis. This system, so widely practiced in America, was invented by Mr. Kellogg, a country editor in Wisconsin during the war, who went into the business on a large scale in Chicago in 1875. The St. Louis house was opened in May, 1872, and has been under the charge of F. C. Wood, manager. It regularly supplies nearly five hundred papers with printed sheets, and also furnishes about one hundred offices with a greater or less quantity of "auxiliary" plates. The house occupies a large building at the corner of Walnut and Third Streets.

St. Louis Newspaper Union.—The object of this concern is also to supply country (and other) publishers with printed sheets. It was established in June, 1878, by the "Kansas City Times Publishing Company," but in July, 1881, the connection with the *Times* was severed, James E. Munford becoming sole owner. The concern supplies about one hundred and thirty papers with sheets. It occupies a four-story building at 513 and 515 Elm Street, and makes its facilities known by means of a publication called the *Printers' Journal*. Charles A. Gitchell is manager.

Mr. Munford, the proprietor, has been for forty years a resident of St. Louis, for thirty years of the period a lawyer, but for the last ten years has been actively engaged in the newspaper business. He is one of the owners of the *Kansas City Times*.

Hackstaff's Monthly.—In January, 1880, appeared the first number of this publication, a handsomely-printed monthly devoted to the graphic arts,

the book and paper trades, and general literature. It was edited by W. P. Wade, then a prominent lawyer, and a well-known *littérateur* and law writer, and now of Denver, Col. It was illustrated to a limited extent. Among the contributors were Harriet Prescott Spofford, and most of its articles were paid for at liberal rates. The contents were varied and interesting, the literary standard was high, and the publication had certain popular features which promised much for success. The second number (February, 1880) confirmed the excellent impression produced by its predecessor, but it proved the last. Owing to certain difficulties in the way of getting the magazine "handled" by the news companies and by the trade, the publishers (George C. Hackstaff & Co.) became discouraged and abandoned the enterprise, having lost two thousand two hundred dollars in the experiment. The project had indisputably many of the elements of success, and deserved a better fate.

The St. Louis Illustrated Magazine was originally *Whittaker's Magazine*, established in October, 1870, by Charles Whittaker, proprietor and editor. In the fall of 1871, F. J. Gilmore, formerly connected with several papers in Iowa, became the owner, and is still its manager and editor. It is a forty to fifty page monthly, with a large circulation and a fine advertising patronage, and is regarded as the first really paying and prosperous magazine ever published in St. Louis. It is devoted to fashions, general literature, etc. Mr. Whittaker, its founder, is now a resident of Chicago, and has become quite famous as an inventor.

Ware's Valley Monthly.—In May, 1875, Charles E. Ware established *Ware's Valley Monthly, a Journal of Western Thought and Life.* W. M. Leftwich, a prominent Methodist clergyman, was the editor. It was never very prosperous, but Mr. Ware thinks it might have been made to pay had he been able to devote more time and attention to it. Other publishing enterprises engrossed his energies, and after two or three years he sold it to Gen. M. J. Wright, in whose hands it died in about a year.

Mr. Leftwich went from St. Louis to Tennessee, and is now instructor in an educational institution at Columbia, Tenn. Gen. Wright is now superintendent of the Historical Archives of the Southern Confederacy at Washington, D. C.

Western Educational Review.—In 1866 or thereabout the *Western Educational Review*, a monthly magazine, was established by Professor O. H. Feathers, a well-known elocutionist of that period, his publishers being Habert & Co. In 1872 the name was changed to *The Western*, E. F. Habert & Co. being the publishers, and Professor Thomas Davidson the editor. Its contents were mainly of an educational, literary, and scientific character. It expired not long after.

In 1875 it was revived by the Western Publishing Association. Professor H. H. Morgan, now principal of the High School, was editor, and among his assistants were Dr. W. T. Harris, D. J. Snider, Z. G. Wilson, F. G. Cook, and B. V. B. Dixon, most of whom were and still are prominently connected with the public schools of St. Louis. In 1878–79 the magazine was published by G. I. Jones & Co., and in 1880–81 by H. W. Jamieson. With the issue for December, 1881, the publication discontinued. The magazine aimed to represent the literary culture of the West, and its editor, Mr. Morgan, gave to it much painstaking and self-sacrificing labor.

The Western was distinguished for its high literary character, and enjoyed an excellent reputation, not only throughout America but in Europe. It did not, however, meet with sufficient appreciation in St. Louis, and in the aggregate some fifteen thousand dollars was lost in the attempt to make it pay, which it was on the point of doing when Mr. Jamieson's other and more pressing business rendered its discontinuance advisable.

Kunkel's Musical Review.—In November, 1877, Kunkel Bros. established a *Musical Review*, a monthly periodical devoted to music and art. It soon took high rank, and is now regarded as one of the best publications of its class in America. For four years it has been edited by I. D. Foulon, A.M., LL.B.

The Universe.—A magazine of this name was established in October, 1882. It was devoted to general reading,—history, biography, travels, education, science, art, poetry, religion, commerce, and politics. J. E. Diekenga was the editor, H. M. Davis associate editor, and George B. Groff manager.

Atlantis.—In May, 1845, Cormany & Benckendorf established *Atlantis*, a semi-monthly devoted to *belles-lettres.*

The Vanguard.—A paper of this name was established by the Revs. Sherman and Ellis, in July, 1881, somewhere in Illinois, where these gentlemen were conducting a series of "holiness" meetings. For several months it was published in a tent with which they wandered about that State, and in October of 1881 it settled at Quincy, Ill., and in April, 1882, it was removed to St. Louis. In October, 1882, Mr. Ellis retired, and Mr. Sherman became sole proprietor and editor. It is published semi-monthly.

Southern Law Review.—This publication was established in Nashville, Tenn., in 1872, as a quar-

terly. In 1875 it was bought by Soule, Thomas & Wentworth, who removed it to St. Louis. In 1876 it was bought by G. I. Jones & Co., who conducted it until 1880, when they sold it to the Review Publishing Company. In 1877 it appeared as a bi-monthly. Among its editors was Hon. S. D. Thompson, now of the St. Louis Court of Appeals. Lucien Eaton is the present editor. The *Southern Law Review* is regarded as an able and useful publication, and in Europe, where it widely circulates, it is recognized as a representative American journal.

The *Southern Law Review* was conducted as such until January, 1883, when it absorbed the celebrated *American Law Review*, published for many years by Little, Brown & Co., of Boston, Mass., and took its name. It appears bi-monthly, and its contributors are among the most eminent law writers of the country.

The Central Law Journal was established in 1874 by Soule, Thomas & Wentworth, the editors being J. F. Dillon and S. D. Thompson, subsequently well-known judges. The ownership has passed successively to G. I. Jones, Judge Thompson, and W. H. Stevenson, and lastly to Mr. Soule, who is sole owner. J. D. Lawson was the second editor, and W. L. Murfree, Jr., is the present editor. It is published weekly, and the circulation is claimed to be second to that of no law journal in the United States. It contains twenty pages octavo.

American Journal of Education.—In 1867, J. B. Merwin, who had been connected with the *Home and School Journal* of Chicago, established the *American Journal of Education*, and has remained its editor and proprietor ever since. Mr. Merwin was associated with Horace Mann and Henry Barnard in establishing the school systems of Massachusetts and Connecticut. He made the *American Journal of Education* a progressive publication, and under his management it has largely contributed to building up the school system of the Southwest. The *Journal of Education* has a large circulation, and editions are printed for Missouri, Illinois and Wisconsin, Kansas and Colorado, Texas, Mississippi, Arkansas, and Tennessee. A specialty of the *Journal of Education* has been the publication of plans for school-houses, many of which have been adopted in the States mentioned.

The Teacher.—In January, 1853, Professor John H. Tice, superintendent of the public schools of St. Louis, established *The Teacher*, a monthly publication of much ability and interest. At the end of a year or so it was discontinued for want of support.

Masonic Publications.—The first Masonic publication in St. Louis was the *Masonic Signet and Literary Mirror*, established in 1848 by J. W. S. Mitchell, P.G.M., and a very prominent Mason of that period. It was soon after suspended, but revived in January, 1849, as a monthly. In 1854, Mr. Mitchell transferred the magazine to the publishers of a similar journal at Marietta, Ga., with which it was consolidated.

In January, 1867, George Frank Gouley established *The Freemason*, and conducted it until 1874–75, when it was merged in the *Voice of Masonry*. Exceedingly sad recollections cluster about Gouley's name. He was born in Delaware in 1832; studied law in the office of James A. Bayard, United States senator from that State; was for some time private secretary of Senator Stephen A. Douglas, and became well acquainted with the public men and politics of the country; removed to the West in 1861, and was for a short time in business in St. Louis and in Nebraska. In 1864 he became assistant secretary, and in 1866 grand secretary of the Grand Lodge of Masons of Missouri, and was re-elected annually until his death. He was very prominent in the order, filled many of the highest positions in the State, and always with ability, zeal, and fidelity. He was a master of Masonic law, a fluent speaker, a strong writer, and an acknowledged power in the Masonic fraternity of Missouri. As an editor, he won a national reputation. This gifted man was one of the victims of the Southern Hotel fire, which occurred on the 11th of April, 1877. On the following Sunday he was buried with imposing ceremonies.

Knights of Honor Magazine.—In January, 1881, R. H. Robbins established the *Knights of Honor Magazine*, a monthly devoted to the interests of the Knights of Honor, a secret beneficiary society. It expired in May, 1882.

Goldbeck's Musical Instructor.—In April, 1882, Robert Goldbeck, a well-known music-teacher, started the *Musical Instructor*, a monthly. Its leading features are complete graduating courses for the piano, the voice, and harmony, and it at once took a high position among the musical publications of the country.

Fonetic Teacher.—This magazine was established in July, 1879, by Professor T. R. Vickroy, of St. Louis, a prominent member of the American Spelling Reform Association. Four numbers appeared that year, and in 1880 the *Teacher* began to be published regularly as a monthly. In 1882 it appeared as a semi-monthly. It is printed in the transition alphabet of the Spelling Reform Association, and is the organ of that body, whose object is the simplification of English orthog-

raphy. Its appearance marked the real beginning of practical spelling reform.

The St. Louis Philatelist, devoted to stamp and coin collecting, has been published for several years, "as often as practicable," for free distribution to numismatists, etc. E. F. Gambs, a coin and stamp dealer of St. Louis, is the editor and publisher.

The St. Louis Practical Photographer is an illustrated monthly journal devoted to the elevation and improvement of the photographic art. It was established Jan. 1, 1876, by J. H. Fitzgibbon, by whom it has been managed ever since. This is next to the oldest photographic journal in America, and has a high standing in the photographic world.

In the fall of 1882, Mr. Fitzgibbon died, and the publication of the *Photographer* was suspended until Jan. 1, 1883, when it was resumed by Mrs. Fitzgibbon, beginning a new series.

Ladies' Magazines.—In 1872 the *St. Louis Magazine* (a monthly) was established, and soon fell into the possession of Miss Julia M. Purinton (now Mrs. Julia M. Purinton Thompson). It was exclusively a ladies' magazine, being set up, edited, and published by women. It attained quite a circulation, but its career was short, not much exceeding a year.

Early in 1872, Mrs. Charlotte Smith and Miss Mary Nolan founded the *Inland Monthly*. This was exclusively a woman's paper. Not only was the type set up by lady compositors, but Miss Nolan often made up the "forms" herself, work usually done by men. Owing to disagreements in regard to the management, Miss Nolan retired in about four months, and established a magazine of her own. Under Mrs. Smith's conduct the *Inland Monthly* attained considerable celebrity, and was a promising literary experiment. Subsequently she brought out editions simultaneously in St. Louis and Chicago, and finally moved the magazine to the latter place, where it died in 1878–79.

Mrs. Smith was born in Tennessee in 1843, and was reared in limited circumstances, which with delicate health prevented her receiving a thorough education. After residing at Memphis, Mobile, and Philadelphia, she removed to Chicago in 1871, but the great fire caused her to settle at St. Louis, where she determined to attempt the publication of a magazine worthy of the great Mississippi valley, and the result was the *Inland Monthly*, which she edited with great ability. It was admittedly one of the best publications of its kind in the West.

Mrs. Smith was noted as a philanthropist, and derived the greatest pleasure from relieving the wants of the distressed. She was a frequent and helpful visitor in the prisons, poor-houses, and hospitals of the city. For some years Mrs. Smith has resided in Washington, D. C.

Among those associated with her on the *Inland Monthly* at one time was L. U. Reavis, author of several publications concerning St. Louis.

The Central Magazine was the title of Miss Mary Nolan's magazine above mentioned. It was published five years, and appeared to be flourishing, when domestic reasons induced its discontinuance. Miss Nolan was a graceful and accomplished editor, and the *Central Magazine* was one of the most versatile and generally interesting periodicals ever published in St. Louis. Miss Nolan still resides in St. Louis, and is busy with her pen contributing to the Eastern and local papers.

Colman's Rural World.—In 1848, Ephraim Abbott established the *Valley Farmer*, a small monthly pamphlet. Five years later it was bought by Norman J. Colman, who changed the name to *Colman's Rural World*, and soon after made it a weekly. Mr. Colman has been its publisher ever since; it is now a six-column quarto, with a large circulation. Its specialty is the advocacy of sorghum culture and the manufacture of sugar from that plant, and it is the only publication in the United States devoted to this industry. It is the organ of many of the State associations. Col. Colman has long been prominent in public matters. In 1866–68 he was a member of the lower house of the General Assembly, and in 1874 was elected Lieutenant-Governor on the Democratic ticket with Governor Hardin. For ten years he was one of the board of curators of the State University. He has been president of the State Horticultural Society, and is now president of the Mississippi Valley Cane-Growers' Association and of the National Association of Nurserymen, Seedsmen, and Florists.

The Journal of Agriculture and Farmer was established in 1860 by W. V. Wolcott and J. S. Marmaduke as a monthly, under the title of *The Illustrated Journal of Agriculture*. After about a year, Vincent and J. S. Marmaduke succeeded as publishers, and about a year later Marmaduke, Chew & Co. became publishers. It was next published by the "Journal of Agriculture Company," consisting of J. S. Marmaduke (president), Leslie Marmaduke, T. T. Turner, Charles H. Turner (secretary), W. B. Collier, Philip Chew, and L. H. Baker. Eventually Philip Chew bought all the stock, and with it was consolidated the *Weekly Missouri Farmer*, published at Boonville, Mo., which was moved to St. Louis. The new publication took the name of *The Journal of Agriculture and Farmer*, as at present, and appeared

weekly, with Chew, Cordell & Co. as publishers. After a year Mr. Cordell (who was a farmer) retired, and for two years Chew & Harness conducted the paper, but in 1878 Mr. Chew bought Harness out, and has been sole publisher ever since. During most of the time of Mr. Chew's connection with the paper he has had the absolute management. Mr. Chew was born in Mississippi, and came to St. Louis to seek his fortune. He had but thirteen dollars in his pocket when he landed in the town. His subsequent career has been creditable in the highest degree.

The St. Louis Midland Farmer was founded in 1872 by G. W. Matthews & Co. (G. W. Matthews, P. C. Wood), and has been edited and published by them ever since. It is a general agricultural and family paper, and appears weekly.

The Overseer was established in 1879 by W. F. Bohn, and edited by F. H. Bacon; it is published monthly, and is the organ of the Ancient Order of United Workmen. In 1880 it absorbed the *Missouri Workman*, devoted to the same secret society, and published by the Missouri Workman Publishing Company, which had then been in existence about a year.

The Western Live-Stock Journal, established in 1874, after an unimportant career was bought by S. H. Burt in July, 1881, and subsequently by him consolidated with the *St. Louis Spirit*. In June, 1882, its publication was begun as a daily, and it was the first daily paper west of the Mississippi exclusively devoted to live-stock interests.

South and West.—In August, 1880, Alfred Avery, who had become well known as the founder and successful manager of *Home and Farm*, at Louisville, Ky., settled in St. Louis and established *South and West*, himself being editor, and Alfred Avery & Co. publishers. The partners were A. Mansur, a leading dealer in farm implements in St. Louis, and C. S. Wheeler, of Kansas City. *South and West* is an agricultural and family paper, and appears semi-monthly.

Western Sporting Life.—The first attempt to establish an exclusively sporting journal in St. Louis was made in July, 1881, when the *St. Louis Sportsman*, edited by Capt. C. W. Bellairs, appeared. It collapsed in the following October, and was succeeded on the last day of that year by the *Western Sporting Life*, founded by B. W. Alexander, a wealthy gentleman of St. Louis, greatly interested in sporting matters, Capt. Bellairs being editor, and Gwynne Price field editor. In April, 1882, Mr. Alexander sold his interest, and the paper was conducted by Messrs. Bellairs and Price, but suspended publication in the following autumn.

Capt. Bellairs was formerly an officer in the Royal Horse Artillery of the British army, having graduated from the Royal Military Academy at Woolwich in 1858. He obtained his captaincy in 1871. He has traveled much, picking up sporting knowledge all over the world; has for many years been a regular contributor and correspondent of leading English and East Indian sporting papers and periodicals, and for the *American Field* in this country.

Gwynne Price was born in the west of England, in a thoroughly sporting district, and early manifested a great fondness for all kinds of country amusements, taking part in many public events in that region. He is a crack shot, and an enthusiastic sportsman. He removed to Missouri some six years ago, and for some time was engaged in hunting. Since then he has shot several important matches. He is the author of a very successful little work entitled "The Gun, and How to use It."

The St. Louis Spirit was established about 1876, by Steele & Burt, as a weekly secret society paper. In about a year Steele retired, and Burt continued the publication until October, 1881, when the paper was consolidated with the *Western Live-Stock Journal*, which he had previously published.

El Commercio del Valle.—This paper (a monthly) was established in 1876 by John F. Cahill. It is published in Spanish and English, and is the only paper of the kind in the Mississippi valley. It is devoted exclusively to the development of the valley trade with Mexico, South and Central America, the West Indies, and other Spanish-speaking countries. It circulates largely in all the great commercial centres of Spanish America, and is claimed to have done much towards developing trade between St. Louis and those lands.

J. F. Cahill, the editor and publisher, is a native of Virginia. From 1864 to 1872 he lived in Cuba, conducting a wholesale drug business, and for some time acting as agent of the New York Associated Press. His residence in Cuba enabled him to acquire a good knowledge of Spanish. When the Cuban rebellion broke out his business was confiscated, and he came home. After recovering his health he removed to St. Louis and engaged in the drug business until he was able to carry out a plan he had long entertained of starting *El Commercio del Valle*, which translated means "Commerce of the Valley." He is thoroughly conversant with Spanish, writing and speaking it with facility, and since 1878 has been Mexican consul at St. Louis. He has been urged for the position of United States minister to Mexico, and no doubt would have been so appointed but for President Garfield's assassination.

Le Patriote.—A weekly paper with the above name, the organ of the French-American people of the Western States, was established in October, 1877, by L. C. Lavat, and one and a half years later was bought by L. Seguenot and E. Boudinot. M. Seguenot is editor. It is a political, literary, scientific, and commercial journal, and is the only French paper in Missouri.

Revue de l'Ouest, a French weekly paper, was started in 1854, and had a large circulation. J. Wolf was proprietor, and Louis Cortambert, a gentleman of fine attainments, was its editor.

Hlas.—In 1873 the "Bohemian Literary Society" established *Hlas* ("The Voice"), edited by the Rev. Joseph Heson. It is the organ of the Bohemian Catholics, and is the only paper of that character in America. It is published weekly, and is a six-column quarto.

American Trade Journal and Grain Review.—In September, 1881, McClelland, Winter & McClelland established the *Grain Review*. The senior member of the firm was T. L. McClelland, formerly of the *Pittsburgh Evening Chronicle*. This is believed to be the only paper in the country exclusively devoted to the grain and elevator interests, and its specialty is the publication of statistics on the subject from the great grain centres of the country. It is issued monthly.

In February, 1883, the journal appeared as the *American Trade Journal and Grain Review*, the former title not being regarded as sufficiently expressing the comprehensive character of the publication.

St. Louis Commercial Gazette.—This paper was founded in 1869, by Sheffield & Stone, as the *Western Commercial Gazette*. About the same time the same firm also started the *St. Louis Home Journal*, a paper of the *New York Ledger* style, and which was really a credit to its founders. It numbered among its most prominent contributors Marian Harland, John Esten Cooke, and most of the leading local writers of essays, poetry, and stories. The *Home Journal* was not sustained, and in 1872 the two papers were merged into one as the *Home Journal and Commercial Gazette*, "devoted to literature and the commercial and manufacturing interests of the Mississippi Valley." Finally the paper took a purely commercial character as the *St. Louis Commercial Gazette*, and was well sustained. In 1873, K. H. Stone retired, and Mr. Sheffield became sole owner. At that time Mr. Sheffield conducted the largest advertising agency in the West, but in July, 1874, he became bankrupt, and the paper (a most valuable asset) was sold by order of the court to Francis Ricker. Eventually W. L. Thomas, who had been its editor, purchased it from Ricker, and in 1878 sold a half-interest to K. H. Stone, since which time the paper has been published by Thomas & Stone. It is a weekly paper of large size, and is devoted to the commercial and manufacturing interests of St. Louis and the Mississippi valley, and is conducted with conspicuous energy, ability, and tact.

St. Louis Miller.—In December, 1878, Thomas & Stone, by request of several of the leading millers and mill-furnishing houses of St. Louis, began publishing the *St. Louis Miller*. The paper was successful from the first number.

The proprietors of these papers are both young men. Mr. Thomas is a native of St. Louis; Mr. Stone was born near Cleveland, Ohio. Both papers are under the editorial management of William L. and P. H. Thomas, and Mr. Stone has charge of the advertising and soliciting department. The *Commercial Gazette* is the only distinctively commercial paper in St. Louis, and the *St. Louis Miller* is also alone in its field, its nearest competitor being at Chicago.

Age of Steel.—In 1857, Robert M. Widmar started the *Mississippi Handels Zeitung* ("Journal of Commerce"), a German paper, published weekly. It was under the editorial charge of Robert M. Widmar, Dr. Koch, and Joseph Bauer. In 1861 it was changed to an English paper, *The Journal of Commerce*.

Robert M. Widmar was born in Dresden, kingdom of Saxony, Germany, where after the completion of his education, including a thorough commercial training, he entered upon a course of medical studies, which he completed with honor and credit at an extremely early age. He soon after removed to this country and settled at Galveston, Texas, where he commenced the practice of his profession and was appointed quarantine physician. Subsequently he removed to St. Louis, gave up the practice of his profession, and became connected with the newspaper press of St. Louis. Believing that the German element of the city and State would sustain a first-class German paper, he commenced the publication of the *Mississippi Handels Zeitung*, which he conducted with marked ability until 1861, when his office was destroyed by fire. His losses were heavy, and with a war already commenced that promised to be long and exhaustive, his business propects were far from being bright; but within a few months he commenced the publication of the *St. Louis Journal of Commerce*, as successor to the *Handels Zeitung*. Mr. Widmar died in June, 1866, and after his death the *Journal of Commerce* was bought by Wolcott & Hume, and under their management flourished for

several years, until they started a daily paper, *The St. Louis Journal*, in connection with it and suffered the weekly to run down. In 1878 it was bought by the Journal of Commerce Company, of which C. K. Reifsnider is secretary and business manager, and Merrill Watson is treasurer and editor. The company has a paid-up capital of twenty thousand dollars, and is paying liberal dividends on that amount.

Mr. Watson began newspaper work in 1873 on the *Columbus* (Ohio) *Journal*, and subsequently for two years was connected with the *Cleveland Herald* as city editor. In 1878 he removed to St. Louis and took charge of the *Journal of Commerce*, in company with Mr. Reifsnider, who had been for five years business solicitor for the *Cleveland Herald*, since which year the two gentlemen have conducted the paper. In August, 1880, the name was changed to *The Age of Steel*, under which title it rivals the best of the industrial journals west of New York. Its reviews of the iron, steel, and kindred markets are accepted as authoritative in the West.

Mines, Metals, and Arts was the name of an eight-page quarto weekly established early in 1874 by Charles E. Ware & Co. Joseph E. Ware, a mining engineer of fine attainments, was the editor. The publication possessed many excellencies and came to be regarded as a promising property, but after about three and a half years' existence the proprietors, finding themselves hampered by other business, suspended its publication. Many leading ironmen have urged the publishers to resume the work, but they have not as yet signified their intention of doing so.

The Merchants' Manifest was established in 1876 by the Merchants' Manifest Company. It is published every forenoon, giving the receipts by rail and river for the twenty-four hours preceding. M. J. Lee is manager.

The Weekly Hotel News, founded in November, 1881, by A. J. Pierce, editor and proprietor, is an eight-page journal.

The same gentleman publishes the *Visitors' Guide*, for daily distribution on in-coming trains.

The Daily Hotel Register, established Nov. 10, 1882, by Fulerwider Bros. & Co., is a six-column folio, which publishes the hotel arrivals and other matters of kindred interest.

The St. Louis Union.—In the latter part of 1880 an association of workingmen known as the Co-operative Printing Company established *The Union*, a weekly journal devoted to trades-unionism and the elevation of the laboring classes. It was a five-column quarto, and attained a respectable circulation, but did not pay, and near the end of 1881 was sold under a mortgage. The new owners soon afterwards sold it to A. R. Brown, who eventually transferred it to his brother, W. H. Brown, who is the present editor and proprietor.

The Missouri Immigrant was established Jan. 1, 1880, under the auspices of the State Board of Immigration. In 1881, Samuel Archer became proprietor and editor. The paper, an eight-page monthly, is devoted to immigration, agriculture, stock-raising, wool-growing, and mining, and has done much to advertise Missouri abroad. It is judiciously edited, and its articles, both original and contributed, are of a high order of merit.

The Imperial State, a monthly paper, was established in August, 1881, as an auxiliary to the State Board of Immigration, but not accomplishing the good that was expected, was discontinued with the fifth number. M. S. Fife was editor.

Western Insurance Review.—This publication, now a forty-page monthly, was established in 1867 by H. L. Aldrich, who has remained its editor and proprietor ever since. He is a native of Northern New York, and served in a New York regiment during the war, obtaining a commission as captain. After the war he removed to St. Louis, and founded the Riverside Printing Company. This enterprise, however, he subsequently abandoned in order to establish the *Review*, which has been a very successful venture. It is published exclusively in the interest of life, fire, and marine insurance, embracing all topics relative to the system, and is a journal of acknowledged standing and influence.

The Western Trade Journal was started in 1867 by William Bell as editor and proprietor. After an existence of one and a half years it passed into the hands of the present publishers, the Chamber Publishing Company, and G. W. Briggs became and has been the editor ever since. It is a commercial and agricultural paper, published weekly, and claims a large circulation in the southwest.

Real Estate Bulletin.—This paper was founded in 1879 by Pierce Brothers (Parker H. Pierce and William G. Pierce). It is the official organ of the Real Estate Exchange, and is the first paper exclusively devoted to real estate in St. Louis. It is published weekly.

St. Louis Railway Register.—This publication was established in 1875 by Willard H. Smith, a lawyer of St. Louis. It was continued three years and then expired. Subsequently it was revived by D. McArthur (formerly connected with the *Tra... Journal*), who is its present publisher; F. H. Ba...

is editor. The *Railway Register* is published weekly, and is devoted to railway, manufacturing, and kindred interests. There had been previous attempts at railway journalism (one the *Illustrated Railway News*, published by Wm. Conkling, which lasted two or three years), but the *Railway Register* is the only successful experiment of the kind. Willard H. Smith, the founder of this paper, is now publishing the *Railway Review* at Chicago.

The St. Louis Stove and Hardware Reporter, established in 1875 as the "house organ" of the Excelsior Manufacturing Company, was purchased in 1879 by Frederick Hower. It is published semi-monthly, and is devoted to the interests of the stove and hardware trades.

The St. Louis Daily Market Reporter was established in March, 1866, by O'Connor & Co. It is a small "broadside," published every afternoon, under the patronage of the grain and commission men, etc., giving prices of the day and other matters of special interest.

The St. Louis Weekly Dry-Goods and Grocery Reporter was established in 1872 by H. F. Zider, ever since its editor and publisher. It is issued weekly, and is a publication of one hundred and twenty-eight pages. Its peculiarity is the quoting of actual market values (jobbers' prices) of dry goods and groceries. It is claimed by Mr. Zider to be in a very flourishing condition. There are only two other similar publications in the country, one at New York and one at Chicago.

The St. Louis Furniture Manufacturer, established Jan. 1, 1879, by C. F. Anderson, formerly of Cincinnati, is devoted exclusively to the furniture interests of St. Louis. It circulates generally in the region tributary to St. Louis, and is the organ of the St. Louis Furniture Exchange.

The Western Commercial Traveler was established in February, 1880, by S. H. Soyster, proprietor and editor, as a monthly commercial travelers' paper. In July, 1882, it appeared as a weekly, with a list of contributors comprising some of the best known and most popular writers in the country. Besides being the organ of the commercial travelers, it has a decided literary and humorous complexion.

The St. Louis Grocer was started in January, 1878, by Greeley, Burnham & Co., publishers, A. D. Cunningham, editor. In February, 1881, it was bought by the Grocer Publishing Company, which has continued to conduct it. It is devoted to the interests of the wholesale and retail grocers of the city, is the largest paper of its class west of New York, and is generally considered to have no superior in its field in the country. Its editor is P. H. Felker, an able writer on commercial subjects. The officers of the Grocer Publishing Company are W. F. Coulter, president and manager; P. H. Felker, vice-president and editor; Manning Treadway, secretary and treasurer.

The Mississippi Valley Grocer, a weekly price-current, was established in May, 1880, by Brookmire & Ranken; S. H. Jackson, editor.

St. Louis Druggist.—On the 1st of September, 1882, appeared the *St. Louis Druggist*, a weekly journal devoted to the interests of retail pharmacists, and published by the Druggist Publishing Company, of which the president and manager is W. F. Coulter; Vice-President, W. A. Fritsche; Secretary and Treasurer, George S. Weare; Editor, J. A. Peters.

The National Tribune, an eight-page weekly, was founded May 3, 1876, by J. W. Wilson, by whom it has since been conducted. A large circulation is claimed in the Southwestern States. The editor, Mr. Wilson, is a colored man of influence. In July, 1882, he was appointed deputy collector of city and State taxes.

Gath-Rimmon was founded in October, 1880, by Charles O. Wilson, editor and manager. The name means "The Exalted Press," and the publication (a sixteen-page pamphlet monthly) is "devoted to religious reform and the restoration of primitive Christianity." It especially advocates the prohibition of the liquor traffic and the suppression of all secret societies.

Journal of Speculative Philosophy.—This journal (now published in New York) was established in St. Louis in 1866 by Professor W. T. Harris, LL.D., first as a quarterly and then as a monthly. It enjoyed and still retains a high celebrity as one of the ablest journals of its class in existence.

The Platonist.—This is the title of a monthly published in St. Louis in 1881, the editor being Thomas M. Johnson, a lawyer of Osceola, Mo., a gentleman well known to students of speculative philosophy. *The Platonist* was devoted to the dissemination of the Platonic philosophy.

The National American is a weekly Native American newspaper, established in 1879 by Augustus C. Appler. It was soon suspended, but in January, 1881, was revived. Its platform is as follows: "Native Americans for all offices of honor, profit, or trust within the gift of the American people; an English education of the people at public expense, free from all sectarian bias or control; no union of church and State; all allowed to worship God according to their own conscience." It is also strongly in favor of the temperance cause. Benjamin Walter is the editor.

Mr. Appler, a native of Baltimore, Md., is a publisher of large and varied experience, having been connected with papers in Pennsylvania, Maryland, Illinois, Iowa, and Missouri. He was publisher of the *Hannibal* (Mo.) *Democrat*, a daily, when it was suppressed by Col. Smith in 1861,—the first paper in the country to be suppressed,—and subsequently for five years he conducted the *Osceola* (Mo.) *Democrat*, now the *Osceola Daily Sun*. In St. Louis he was connected in 1871 with *The Continent*, a weekly that was soon merged into *The Daily Sun*, conducted by himself, Joseph Ketterer, and A. J. Quigley,—a Democratic paper, devoted to the "Order of 1876." In about three months *The Sun* was absorbed by Stilson Hutchins, of *The Times*.

The Communist.—A small monthly paper was established in January, 1868, by Alexander Longley (one of a somewhat noted family of reformers) as the organ of the "Reunion Community," a social experiment soon after started near Carthage, Mo., but which after three years of struggling existence failed. Part of the time *The Communist* was published at the community. It advocates "liberal communism," in contradistinction to "religious communism," and is also devoted to the interests of phonography, phonetic reform, etc. It is now the organ of a movement to establish a community near St. Louis. In 1878, Mr. Longley established a monthly, the *Phonetic Educator*, himself being the publisher, and Elias Longley, the phonographic author of Cincinnati, the editor. This publication, however, soon removed to Cincinnati.

American Nationalist.—In July, 1882, a paper with this title was established by R. H. Robbins, who had been publisher of several papers in Carondelet and other places. It is devoted to the order of "National Americans," and also advocates the prohibition of the liquor traffic. For the remainder of 1882 it appeared monthly, after which it was transformed into a weekly publication.

Personal Rights Advocate.—On Aug. 20, 1882, appeared the first number of the *Personal Rights Advocate*, a Sunday morning weekly, established to oppose prohibition. It was issued by the "Eureka Publishing Company," and among the contributors were James E. Munford, a prominent lawyer, Walter King, and others. It is a six-column quarto.

Greenback Papers.—The *St. Louis Echo* was started in 1878, and continued a year or two. Westbrook & Keller were the publishers, and John Samuel, a well-known labor agitator, was the editor. In 1880, J. B. Follet published a campaign Greenback paper with the title of the *Lightning Express*. In 1881, P. P. Ingalls, of Iowa, established the *St. Louis Express*, but after a six or eight months' career he consolidated it with a paper previously owned by him, the *Iowa State Tribune*.

In the spring of 1881, H. A. Post removed a paper called the *Post* from Quincy, Ill., to St. Louis, where, under the title of the *Missouri Post*, it was edited by H. Martin Williams. Early in 1882, Post sold the paper to parties who removed it to Kansas City. The *Post* was immediately succeeded by the *People's Advocate*, established in March, 1882. J. F. Crews and E. F. Henderson are publishers, and H. Martin Williams is the editor. The *Advocate* is a five-column quarto, published weekly.

The Humorist, a four-page, seven-column weekly, was established Nov. 16, 1879, by Wolf & Co., the firm comprising Mr. Wolf, a practical newspaper man from New York, and Henry Hermanns, who had been connected in various capacities with the German press of St. Louis. In 1881, Mr. Hermann purchased Mr. Wolf's interest and became sole proprietor. The specialty of this paper is light, laughable, and romantic reading.

The Truth.—For some years Edward Bredell, a rich and benevolent member of the Presbyterian Church, has maintained "The Truth, Bible, Book, and Gospel Tract Depository" for the dissemination of religious instruction. Among the publications is *The Truth*, issued monthly. James H. Brooks, a retired Presbyterian minister, is editor, and C. B. Cox is publisher.

The Drug World.—In January, 1881, Lawrence & Son established *The Drug World*, devoted to the drug, paint, oil, and glass interests. It is published monthly.

The Medical Gleaner.—Lawrence & Son also established, Jan. 1, 1882, *The Medical Gleaner*, quarterly, containing the choicest gleanings from foreign and American medical journals.

The Homœopathic News, published bi-monthly by the Luyties Homœopathic Pharmacy Company, was established in 1870 by Dr. H. C. G. Luyties, who is still the editor and proprietor. The same parties publish the *Populaere Homœopathische Zeitung*, an eight-page monthly, now in its eighth year.

The St. Louis Clinical Record is a thirty-two page monthly, founded in 1873 by Drs. Hardaway and Shaw. About a year later it became the property of Dr. W. B. Hazard, the present editor. It is devoted to medicine and surgery, and is in the interest of the regular school of practice.

The St. Louis Clinical Review, founded in 18[illegible] by Dr. P. G. Valentine, a homœopathic physician, a

still its proprietor and editor, circulates widely in homœopathic circles, and is claimed to be a representative journal of that school of medicine. It is published monthly.

The St. Louis Eclectic Medical Journal was established Jan. 1, 1873, by George H. Field, M.D., a prominent eclectic physician, and has been conducted by him up to the present time. It is issued monthly, and contains about fifty pages. It is the organ of the Eclectic school of medicine.

American Medical Journal.—This publication was established in 1873 as the organ of the eclectic school of practice. It is a monthly, and is edited by George C. Pitzer, M.D., Professor of the Theory and Practice of Medicine in the American Medical College of St. Louis.

Art and Music.—In October, 1881, H. A. Rothermel established *Art and Music*, a finely-illustrated monthly, to which many of the local artists contributed sketches. It was indifferently sustained, however, and in the summer of 1882 was removed to Chicago.

Peters' Musical.—From 1868 to 1876, J. L. Peters, a music dealer, published *Peters' Musical*, a monthly, and in January, 1882, the publication was resumed. It is devoted exclusively to music.

Shattinger's Musical Review.—In May, 1882, A. Shattinger, a music dealer, established *Shattinger's Musical Review*, a monthly magazine devoted to music and literature; A. Shattinger, editor and publisher.

American Prohibitionist.—There have been several attempts at publishing temperance papers in St. Louis. Of these the most promising perhaps was the *American Prohibitionist*, conducted by Frank M. Bemis, in 1877–79. It was radically in favor of prohibition. Mr. Bemis, attending a meeting of friends of the liquor traffic, was attacked and injured to such an extent as to be confined to his room for a long period. Meanwhile the paper died.

The Cimeter.—In January, 1883, the Rev. Geo. W. Hughey, a Methodist clergyman, established *The Cimeter*, a monthly temperance magazine, twenty-four pages octavo.

The American Celt.—Irish-American papers have from time to time appeared in St. Louis, the latest being *The American Celt*, conducted by Charles O'Brien & Co. It is an eight-page illustrated weekly.

The Dramatic Critic was established Dec. 21, 1882, by the Dramatic Critic Company, composed of E. G. Webb, John T. Smith, and F. B. Rotrock. It is a sixteen-page weekly, devoted exclusively to the drama and music, and is the only dramatic publication west of the Mississippi, and the only five-cent dramatic paper in the country. The editor is Alexander R. Webb, who was city editor of the old *Journal* and *Dispatch*, assistant city editor of the *Times*, and in 1882 assistant city editor of the *Republican*. He has also been manager or advance agent of several leading dramatic combinations.

American Tribune.—On the 8th of March, 1883, appeared the first copy of the *American Tribune*, a four-column, twelve-page weekly, edited by L. U. Reavis, and devoted to the "commercial, industrial, social, educational, and moral advancement of St. Louis, Missouri, and the Mississippi valley." Among the objects which it specially advocates are the removal of the national capital from Washington to some central location in the Mississippi valley, and the extension of the rule of the American Constitution over North America and the adjacent islands of the sea from Panama to the north pole. Mr. Reavis, the proprietor, is well known as the indefatigable author of a number of treatises on St. Louis and its future, which afford abundant evidence of great industry and special ability in the grouping of important facts relating to the trade, advancement, and prosperity of the city.

Miscellaneous Newspapers.—In addition to the foregoing, the following ventures in journalism have been made from time to time in St. Louis:

The St. Louis Courier was issued Dec. 8, 1828, and was discontinued during the same month. The *Missouri Observer* was published during the same year, but afterwards suspended.

The Commercial Bulletin was established in 1834, by Charles Keemle, William Preston Clark, and Samuel B. Churchill, as a standard Democratic journal. In 1857 it became the property of Samuel B. Churchill and Charles G. Ramsey, who made it a Whig organ. Subsequently Oliver Harris owned an interest in it, and V. P. Ellis then bought it and made it an organ of the "Native American party," under the title of *The Native American Bulletin*. It was published a short time, and was finally suspended. Mr. Ellis, in 1842, published the *Old School Democrat*, but abandoned it to accept the office of *charge d'affaires* to Venezuela.

The Saturday News, a purely literary journal, was established in 1837, by Charles Keemle and Maj. Alphonso Wetmore, and although excellent in all of its departments, failed to receive the support it merited, and died on Maj. Wetmore's hands after a brief existence, during which Col. Keemle withdrew.

The Western Mirror and Ladies' Literary Gazette was published early in 1837. Late in the same year James Ruggles published it as *The Western Mirror, Literary and Political Gazette*.

The Translator, a literary weekly, was published in 1838.

The prospectus of a *Morning Chronicle* was issued on the 4th of June, 1839, and in 1860 the *St. Louis Daily Chronicle* was owned by Francis Saler and Adelbert Loehr, who also published a weekly edition.

On the 20th of August, 1838, the announcement was made that, under the name of the *Locomotive and Missouri and Illinois Gazette*, the proprietors of the *St. Louis Evening Gazette* proposed to issue from their office every Thursday a paper devoted to internal improvements, political, commercial, and agri-

cultural information, manufactures, science and the arts, literature, education, and the news of the day.

In October, 1839, Messrs. Watson & Nichols established an evening paper under the name of the *Daily Pennant*, devoted to "literature, foreign and domestic intelligence." It ultimately espoused the Native American cause.

The Independent Democrat was started in 1842 by W. T. Yeomans, of *The Boonville Register*.

The Herald of Religious Liberty appeared in 1844 as a weekly; H. Chamberlain, editor; I. M. Julian, publisher.

The Catholic News-Letter, a Catholic weekly, was published in 1845.

The St. Louis Sun was started in St. Louis in 1845 by A. W. Scharitt. It appears to have had a brief existence, for a year later we find that *The St. Louis Sun* had been started to advertise the owner's "sugar-coated pills." In 1871, *The Daily Sun* was established as "a Democratic journal," but did not long survive.

In 1845, Col. Keemle, Matthew Field, and Joseph M. Field established *The Reveille*. In 1850 the paper was sold to Anderson & Co., who merged it with *The People's Organ*. *The Reveille* was one of the best papers published up to that time in St. Louis. Joseph M. Field was then one of the most popular writers in the country. For a long time he was connected with the *New Orleans Picayune*, and his sketches under the *nom de plume* of "Straws" were widely reprinted. He was the author of several plays, and was the first manager of the "Varieties Theatre."

The Native American had a brief but partially successful existence. It was established in 1846 by V. P. Ellis.

The Washington Temperance Paper, edited by V. P. Ellis, existed for a short time in 1842.

The Liberty Banner was published in 1844.

The Catholic Cabinet, a magazine, was established in May, 1843, by Charles N. Holcomb, for the "exposition, illustration, and vindication of the Catholic principles."

The St. Louis Magnet was published by T. J. McNair in 1846.

The Liberia Advocate, a monthly devoted to African colonization, flourished in 1847. Rev. Mr. Finley was editor.

The Bible Advocate, a monthly publication devoted to primitive Christianity, was conducted by S. B. Aden, Rev. J. R. Howard, T. R. Creath, and T. M. Allen in 1848.

The St. Louis Post and Mystic Family was published in 1848, by W. F. Chase and Edmund Flagg, as a representative of various secret orders.

The Daily and Weekly Fountain was established in July, 1848, to be "chiefly devoted to the cause of temperance, and the advocacy of the societies and clubs formed to promote this object and the cause of temperance reform." In July, 1849, Mr. Hayes, the proprietor, announced his inability to continue it for want of support, and sold it to Rev. Hiram P. Goodrich.

Le Courrier de St. Louis, published twice a week, was established in June, 1850, and published entirely in French. E. Ferrene was the editor, Ch. Fr. Blattau printer.

The St. Louis Daily Ledger was the name of a paper founded in 1851 by T. H. Cavanaugh.

The St. Louis Insurance Reporter and General Advertiser was published in 1851 by J. E. Courtney.

The Spirit of the West was published weekly in 1851 by Smith & McKee.

The Guardian was established in 1865 by James Clemens. It was a literary Catholic weekly.

The Temperance Battery was started in January, 1852.

The Irish Advocate existed in 1852, as did also the *Miscellany and Review*, published monthly by J. F. Risk, of St. Louis, and I. Ebbert, of Memphis.

The Missouri Staats-Zeitung was established by Louis Didier, formerly assistant editor of the *Anzeiger des Westens* in 1854. It was the fourth German paper in the city at that time.

The Union Banner, a temperance journal, was published at 112 Main Street in 1849 and 1850.

Le Moniteur de l'Ouest, a French paper, was established in St. Louis in April, 1856, by E. De Lane Maryat, a New Orleans journalist.

The St. Louis American, H. H. Holton, publisher, was started as an "American Republican organ" in 1844. In 1856, *The St. Louis Evening American* was established by Mallett, Willis & Covert, and supported the American party also.

The St. Louis Bank-Note Reporter, Counterfeit Detector, and Wholesale Prices Current was established by J. P. M. Howard & Brothers in 1857.

The Evening Bulletin, a daily, made its appearance July 18, 1859, under the management of Col. James Peckham and John L. Bittinger. In October of the same year it passed into the possession of E. Longuemare, and into that of Thomas Snead in 1861.[1]

The St. Louis Daily Express was established in 1858 by William Cuddy. Its first issue was in miniature form, which continued for some months, until an increase of size was justified by the growth of its patronage. In 1860 it was a large and flourishing sheet. A weekly edition of the *Express* was also published.

In 1860, Richard Edwards published the *People's Press*, a daily journal, independent in politics and religion; the *People's Weekly Press*, a family newspaper; *Edwards' Monthly*, "an organ of the progressive in art, literature, science, agriculture, banking, internal improvements, etc., and *Edwards' Western Almanac*. At the beginning of 1860, R. V. Kennedy, T. M. Halpin, and James Peckham established the *Home Press*, a family and literary paper.

The Daily Journal, published on Pine Street, between Fourth and Fifth, was suppressed on the 13th of July, 1861, by the United States military authorities.

The Gazette, published in English and German, was started Dec. 28, 1861.

The Metropolitan Record existed in 1864, and was suppressed by the Federal government.

---

[1] Col. James Peckham died July 2, 1869, at Hot Springs, Ark. Col. Peckham was a native of New York, and removed to St. Louis about ten years before his death, where he formed a connection with the press, and was afterwards one of the publishers and editors of *The Evening Bulletin*. When the war broke out he enlisted in the Union army. His appointment as lieutenant-colonel of the Eighth Missouri bore the date of the 26th December, 1861, to rank from the 4th of July previous. He afterwards resigned, but was recommissioned on the 4th of March, 1862. He remained with the regiment but a few months, however, resigning on the 1st of the following June to assist in recruiting the Twenty-ninth Regiment, of which he was commissioned lieutenant-colonel Sept. 6, 1862, which position he held until the 20th of February, 1863, when he was promoted colonel. He was attached to Blair's Fifteenth Army Corps, and participated in various expeditions and actions on the Mississippi and Yazoo Rivers, including the sieges of Vicksburg and Corinth. He also took part in the battles of Lookout Mountain and Missionary Ridge. Col. Peckham was a brave and gallant officer, and was wounded several times in action. He was the author of the "Life of Gen. Lyon." He took great interest in political matters, and was a pleasant and effective speaker. Col. Peckham was thirty-nine years of age, and left a wife and two children, who resided in Kirkwood, Mo.

The Missouri Journal, a German daily, and successor to *The Missouri Radical*, suspended publication in February, 1865.

The Weekly Hesperian was started January, 1867, by J. W. Allen.

The Repudiator, an independent Democratic paper, having for its object "the repudiation of the national debt, except that portion represented by legal-tender notes," was started as a weekly by Burrell B. Taylor, Samuel Hager, and John Bourne in February, 1868, and was discontinued two months later.

The Jewish Sentinel was removed from Louisville to St. Louis in 1868.

The St. Louis Evening Mail, an offspring of *The Weekly Mail*, made its appearance in 1870, under the management of A. C. George & Co.

Early in January, 1869, it was announced that "Mr. George Negus, who has been connected with the city press for the last eight years, proposes to commence the publication of a new evening paper, to be called the *St. Louis Evening Post*, on or about the 18th of the month." The office was at No. 208 North Third Street.

The Weekly Sales was begun in 1869 by J. C. Kays & Co., and was devoted to cattle-breeding and selling interests and agriculture.

The St. Louis Law Record was established in St. Louis as a daily in 1871, for the purpose of giving a record of the courts.

The St. Louis Courier (German) was established by "The Courier Company" in 1874, of which Henry Gumbs was president, and David Skutch was vice-president and business manager.

"The St. Louis Printers' Union" was established July 5, 1852. Its original officers were: President, Thomas Gales Forster; Vice-President, Charles W. Colburn; Recording Secretary, John N. Straat; Corresponding Secretary, W. A. Thompson; Treasurer, George A. Rowley; Janitor, Henry C. Shea.

"The St. Louis Press Club" was organized in 1866, with P. G. Ferguson as president, and George Negus, secretary. It met originally at Nos. 1 and 2 Chestnut Street, and was purely social in its character, being composed mainly of the active reporters and local editors connected with the daily journals of the city, including, however, among its members many prominent newspaper men, officials, and well-known citizens. The club, although created more particularly for the convenience and social enjoyment of the members of the St. Louis press, was intended to advance the interests of journalism generally, and to afford an agreeable resort to all members of the press from the country and from other cities who may visit St. Louis.

In 1881–82 the Press Club was reorganized, and on Feb. 16, 1882, quarters on Chestnut Street near Eighth were opened. The rooms were elegantly furnished. The officers of the club were: President, P. G. Ferguson; Vice-Presidents, Morrison Renshaw, W. J. Thornton, and John Mueller; General Secretary, Leon F. Witzig; Corresponding Secretary, F. D. White; Treasurer, George D. Kelly; Sergeant-at-Arms, Alfred Spink; Executive Committee, W. B. Stevens, W. F. Coulter, John C. Martin, Stanley Waterloo, Fred. Weber, John F. Cahill, and L. A. Clark. It survived until late in the fall of the same year, when it ceased to exist.

CHAPTER XXIV.

AMUSEMENTS.

"FIDDLING and dancing and the usual amount of gossiping and small talk," we are told, were the standard amusements of the olden days, and one of the curious customs of the time was the "judgment sales" on Sunday afternoons. These sales, ordered by a decree of the Governor, always took place on Sundays, at the church door at the close of the mass, at twelve o'clock noon, that being the only idle afternoon of the week. As all the people of the village were idle on Sunday, there was, of course, a better prospect of obtaining a larger attendance at the sales. With the majority the religious duties of the day were discharged with the close of mass, which all, or nearly all, made it their duty to attend, and there was usually a large and animated assemblage on these occasions. Previous notice of the sale having been given, the property was "cried" for three successive Sundays, and awarded to the highest bidder on the third Sunday. Usually there were no other bidders than the two or three persons who might desire the property, and, strange as it now appears, there was no speculation in town lots at that day in St. Louis. The sales were consequently made with great promptness, and the property was generally "knocked down" at the value of the improvements, "the lot being considered as part of the appurtenances of the improvements."

Theatrical entertainments were introduced at a comparatively late period, and for some years were restricted to amateur performances. The circus made its appearance considerably in advance of the regular drama, and it is related that one of the earliest, if not the first, of the "shows" to exhibit in St. Louis was that of a Mr. Brown, who "did a week's flourishing business near the corner of Main and Green Streets." The orchestra is said to have consisted of two musicians (a fiddler and a clarionet-player) "placed on a narrow, high platform." The entertainment invariably closed with "a fire-cracker act," which was extremely popular with the juvenile portion of the audience. The "Salt-House" (*i.e.*, a warehouse for storing salt), on Second Street, was used as a theatre about this time,

and performances were given by amateur companies. On the 15th of January, 1814, Eugene Leitensdorfer gave an exhibition of his sleight of hand, which appears, if we may judge by the preliminary announcement, to have been quite as wonderful a performance as any modern "magicians" can boast.

A regular dramatic organization of amateurs known as the "Roscian Society" had been formed prior to Dec. 31, 1814, for on that day it was announced that the society would present a comedy called "The School for Authors," followed by the farce "The Budget of Blunders," at the court-house on the 6th of January, 1815. The amateurs would seem to have acquitted themselves to the satisfaction of the public, as the *Gazette*, speaking of their performance, said, "A number of the young gentlemen of St. Louis, having raised a dramatic corps, made their *début* in the performance of the comedy of the 'School for Authors,' with the farce 'Budget of Blunders.' Much curiosity was excited, and a great many attended to witness the blunders, but all were pleased, all were surprised to see tacticians in a parcel of recruits." A month later they repeated the experiment, the *Gazette* of Feb. 4, 1815, announcing that "on Thursday the admired comedy of 'Who wants a Guinea?' was presented to a crowded house, and the lovers of the drama were again gratified in beholding the principal characters well filled, and it was the general opinion that Messrs. B—, S—n, P—e, K—y, B—t, H—ll, B—d, B—y, and P—es would grace a city theatre."

From the fact that the *Gazette* did not venture to print the names in full, but merely indicated them by means of letters and dashes, it is very evident that the "personal journalism" of the present day was then unknown in St. Louis as elsewhere.

On Friday evening, March 31, 1815, the favorite comedy of the "Poor Gentleman," with the afterpiece of "Hit or Miss," was given, presumably by the same company. A year later (Feb. 10, 1816) the society announced through the columns of the *Gazette* that they regretted "to inform the public that, in consequence of the serious indisposition of one of their performers, their next representation is unavoidably postponed until Saturday evening, the 17th inst., when they will present Home's celebrated tragedy in five acts, called 'Douglas,' to which will be added the much-admired farce called 'Darkness Visible.'"

On Saturday, 25th, Tuesday, the 28th, Thursday, the 30th of January, and Saturday, the 1st of February, 1817, "in Mr. Everheart's room," were exhibited wire-dancing and balancing, "with other extra performances."

A building had either been erected or an old one adapted to the purposes of a theatre as early as 1817. It is said to have stood on the square bounded by Third and Fourth, Spruce and Almond Streets, the same block in which the hospital of the Sisters of Charity once stood. A loft over a stable in the rear of, and connected with, the old Green Tree Tavern, on Second Street, is also said to have been used for theatrical entertainments. On the 1st of March, 1817, "a grand concert of music" was "performed at the theatre" by Messrs. Thomas and Louther, "assisted by several amateurs." The inference from the language of the announcement would seem to be that Thomas and Louther were not amateurs but "professionals." Early in 1818, William Turner, with his wife and daughter, arrived in St. Louis, "with the intention of doing what he could in the theatrical way, with the aid of city amateurs." Traditions are conflicting as to the scene of his theatrical venture. One account has it that his performances were given in a frame building constructed for the purpose on Third Street, near Spruce; another that the theatre was not then built, but that "the only place that Turner could procure to give such entertainments as he was enabled to fudge up was the upper loft of a large barn or stable."[1]

Turner succeeded in procuring the co-operation of several young men, presumably members of the Roscian Society, and with the aid of his wife and daughter launched out upon his theatrical career. His experience in St. Louis was not encouraging. The chief attraction presented appears to have been a farce, "The Spoiled Child," in which his daughter, Emma Turner, then about ten years of age, took part, but whether owing to the fact that the "theatre" was difficult of access, or to a want of interest in the public, the company played only a short time. During Mr. Turner's stay, Mr. Martin was given a benefit at the theatre (April 11, 1818), Martin appearing as *Goldfinch* in the "Road to Ruin," and Mrs. Turner as *Sophia*. Master Turner also had a benefit on the 24th of the same month, the entertainment comprising "George Barnwell, the London Apprentice," and a farce, the "Children in the Wood." On the Fourth of July following, in honor of the day, "Tekeli, or the Siege of Mongatz," was performed, together with a patriotic address by Mrs. Turner, a song by Mr. King, and a patriotic farce, "Yankee Chronology." A transparency was placed in front bearing the legend, "The Genius of America." On the 25th of the same month, Shakspeare's "King Henry IV

[1] "Early Theatricals in St. Louis," by N. M. Ludlow.

was presented, the afterpiece—every performance had its afterpiece in those days—being "The Intriguing Valet," and on the following Wednesday evening, July 29th, "Richard III." was given, with the farce "Raising the Wind." The "professionals" engaged in these performances were Mr. and Mrs. Turner, Miss Turner, Master Turner, and Mr. and Mrs. Vos. John H. Vos[1] had come to St. Louis from Kentucky, and is said to have assisted Turner in the production of "Pizarro" and "Bertram," the latter of which was played at the St. Louis Theatre in February, 1818. Turner appears to have left St. Louis some time during the summer of 1818, as there is no mention of him or his family in the theatrical announcements of subsequent years. He is said to have gone East, ultimately settling in New York, where he became a publisher of plays known as "Turner's Edition."

During the "flush times" of 1817–18 a number of responsible names were obtained, and the first installment was paid on stock of a company to erect a handsome theatre. A foundation was laid on the south side of Chestnut Street, midway between Second and Third, but the money needed for completing the structure was not forthcoming and the building stopped. A livery-stable, and later the principal police-station, subsequently occupied the site. Soon afterwards another stock company was formed, and a frame building erected for theatrical purposes. It stood on "city block 30," bound by Olive, Locust, and Main Streets and an alley. It fronted east, and stood about forty feet back from the west side of Main Street, extending to the middle of the block, being about sixty feet wide by one hundred and twenty long. The stage was about thirty feet deep. It was a rough structure, with one tier of what were called boxes, with simply pine benches for seats, without a covering of any kind. These were divided in sections. The pit, which would seat about three hundred people, was furnished with the same kind of benches, and all without any support for the back. In all about six hundred persons could be seated, and notwithstanding the primitive character of the building and its accommodations, we are told that people came "Mondays, Wednesdays, Fridays, and Saturdays, paying their dollar admission, and appearing to enjoy the entertainment as much as those of any theatre of the present day." The auditorium was almost without decoration. The scenery was "good, but limited to six or eight scenes, these having been painted by John Douberman, a very clever artist, then living in St. Louis, and withal an actor of no contemptible abilities."

[1] N. M. Ludlow, in his interesting reminiscences of "Early Theatricals in St. Louis," says, "Vos had occasionally acted on the stage, and played *Richard III.*, *Macbeth*, *Othello*, *Rollo*, and *Pescara* very fairly for those days, but he played 'poker' better than either. He was a thoughtless and erratic fellow, without any stability of character. I heard that with the assistance of some amateurs he performed after a fashion Sheridan's play of 'Pizarro,' his wife attempting the part of *Cora*, but it was said to have been a sorry sight."

After Mr. Turner's departure, Mr. Vos was the theatrical manager of St. Louis, and it was under his direction that the new theatre was opened. On the 27th of January, 1819, the following advertisement appeared:

"The new theatre will be opened on Monday evening, February 1st, when will be presented the comedy of 'She Stoops to Conquer,' to which will be added the much-admired farce, 'The Village Lawyer.'

"The box-books will be opened on Thursday, January 28th, from 10 A.M. until 2 P.M., and continue open every day, excepting the days of performance, when they will positively close at twelve o'clock.

"Gentlemen taking whole boxes will please send servants to keep them.

"Smoking in the theatre prohibited.

"Tickets may be had at the theatre, or at the store of Messrs. Collet & Kennedy.

"The doors will be opened at six, and curtain will rise at seven. Price of admittance, one dollar; children under twelve years, half-price. Nothing but current money will be received.

"Musicians who are inclined to play will call at the theatre, where arrangements will be made with them for the season.

"Four or five steady men, who are willing to assist as supernumeraries, will be well paid for their services."

Dr. Young's tragedy, "The Revenge," was announced on the 3d of February, 1819, as being in rehearsal. On the 9th of July, 1819, the museum of wax figures and large paintings, exhibiting at the Illinois Hotel, opposite the store of C. Wilt, advertised the following attractions:

"Maj.-Gen. Andrew Jackson
Crowned by the Goddess of Liberty and the Orleans Beauty.
Com. O. H. Perry.
Gen. Zebulon M. Pike.
Baron Trenck, etc., etc., etc.
Profiles correctly taken and framed."

In the latter part of the year, E. P. Maury, formerly an editor of Thomas H. Benton's political organ in St. Louis, while passing through Nashville, so far convinced the already popular manager and actor, N. M. Ludlow, of the favorable prospects for theatrical enterprise in St. Louis, that the latter opened a correspondence with Isaac N. Henry, the publisher of Mr. Maury's paper, with the result of consummating a contract in November.

Mr. Ludlow, describing his journey from Nashville to St. Louis, gives a vivid picture of the trials and embarrassments of an actor's life, as well as of the roughness and uncertainties of travel in those days.

"About the 1st of October, 1819," he writes, "I had determined to visit St. Louis, then considered the western extremity of civilization. Many of my Nashville friends, among whom were James and Robert Woods, Thomas Yeatman, John P. Irwin, and Wilkins Tannehill, represented to me that the population of the town was only about three or four thousand, most of whom were French people of Canadian descent, who would probably take little if any interest in English dramas. But remembering what my wife's relative, Mr. Maury, had told me, and knowing that he had just come from there, where he had been editing a Democratic newspaper, the political mouthpiece of Senator Thomas H. Benton, and relying on his observation and unbiased judgment, I decided to make the venture. My wife had an acquaintance in St. Louis, Mr. Isaac N. Henry, who was the publisher of the newspaper that Mr. Maury had been editing. He was a Tennesseean, and reared near her father's residence. Prompted by my wife's suggestions and desires, I wrote to Mr. Henry for information. He promptly replied, and in a friendly way pointed out the probable inconveniences I would have to encounter, particularly those of transporting myself and company to St. Louis. The journey, if undertaken by land, would be uncomfortable, especially for the female portions of the company. It would have to be done in wagons and horseback, through a wild and sparsely-settled portion of Illinois. If undertaken by water it would be still more tedious and not less uncomfortable, the only means of water conveyance at that early day being keel-boats. Steamboats had not yet navigated the waters of the Cumberland, and only one or two very small ones had visited St. Louis from any quarter. These, I think, were the 'Gen. Pike' and the 'Missouri Packet.'

"Against these and other difficulties Mr. Henry presented some encouraging prospects. He said that the inhabitants, both French and American, were hospitable and generous, were generally fond of amusements, and especially those of a theatrical description, and concluded his letter by saying, 'Should you not be deterred from visiting St. Louis by the difficulties of getting there, I think you will not regret being the first to plant the standard of the drama on the west bank of the great Mississippi River.' By the middle of November I had engaged the amateur theatre in St. Louis, and embarked with my company on board a keel-boat bound to that town. On the Cumberland River we stopped somewhere below the Harpeth Shoals to take on board a load of hollow castings, pots, kettles, etc., as our freight. Our trip down the Cumberland and Ohio was unbearable to an impatient man like myself, but when we had the water of the Mississippi to stem it became an intolerable nuisance. But there was no way of escaping from it: we were in for it and must go ahead. We proceeded at the rate of about two miles an hour up the river, which was done by cordelling,—that is, a half-dozen of men, with a rope over their shoulders, one end of which was attached to the boat, pulled her up against the current by main strength. We proceeded in this way until we reached Cape Girardeau, where myself, wife, and child left the boat. I would have been pleased to have remained if we could have got along a little faster, for Jackson, the captain of the boat, was a jolly, good-hearted Irishman, and used to afford me a deal of amusement by talking to his men. We were two days getting to the cape, forty miles by water. The afternoon of the evening we reached there, the captain was hurrying his men for fear we would not reach the desired point before dark, as it was usual to stop and tie up for the night. Growing impatient, he shouted out to the men, 'Pull, boys! pull away stoutly! for, by jabers, I'll reach the cape before dark, if I have to work all night for it!' and he did it. About seven years afterwards I passed from New Orleans to Louisville with him, when he was captain of the 'Hibernia,' one of the finest steamers then on the Mississippi River.

"At Cape Girardeau I learned that there was a steamer expected hourly from New Orleans, the 'Missouri Packet,' Capt. Read, that would pass up the river to St. Louis, and concluded to let the company proceed on board the keel-boat, and with my wife and child wait the arrival of the steamer. The second day after she did arrive, and I embarked on her. She was moderately fast while under headway, but being small and weak-handed, she could not take on much wood at the time, and it appeared to me we were half the time wooding. Then the captain would not run at night; and, to the best of my recollection, we were four or five days getting to St. Louis, a distance of about one hundred and sixty miles. The boat landed somewhere near the foot of Plum Street, and as I walked up Main towards Market, looking for the newspaper office of my friend, Mr. Henry, and observed the queer-looking buildings, most of them wood or stone, with here and there an old-fashioned French building, such as I had seen two years before in New Orleans, I began to fear I had made a great mistake in coming to St. Louis."

Mr. Ludlow at once engaged Mr. Vos, the former manager of the theatre, and his wife, and set to work to organize a regular theatrical company. He thus describes the different members of his troupe, who, he says, were the first "professional" representatives of the drama in St. Louis and "several other now large cities of the West and South:"

"John H. Vos . . . was a house-painter by trade. He had received a good education, and it was said of him that he was the son of a Scotchman, a resident of South Carolina. . . . He was nearly six feet in height, and when dressed for *Othello* was the very *beau ideal* of the character. This was equally true of his *Rollo*, the Peruvian, both of which, as also *Pescara*, *Iago*, and *Ludovico*, in 'Evadne,' he played very respectably. He died early in life. His wife was a Kentucky lady of good connections in and about Lexington. She had no talent for the stage, and very early withdrew from it. Mr. A. Cargill was a native of one of the Eastern States, was about forty years of age at the time I speak of, was a very respectable actor of heavy tragedy and sedate old gentlemen. He was a printer by trade. This gentleman took a wonderful resemblance to Gilbert Stuart's likeness of Gen. George Washington. Mr. Douberman, who had good taste in such matters, for his benefit got up a tableau of Stuart's picture of the Washington family at breakfast, and it was the most perfect resemblance that could be given. Mr. Cargill as the general, Mrs. Ludlow as Lady Washington, Miss Seymour as Miss Custis (the general's step-daughter), and Douberman as the negro in the rear waiting on the table, were *fac-similes* of the picture. Mr. Hanna was a very fair actor without much genius. He was painstaking, careful, and always reliable. He disappeared from the stage early in life. He was said to be a hatter by trade. Mrs. Hanna, his wife, was older than her husband. She had been some time on the stage, and known as Mrs. Seymour. She played fat, jolly old women very well. Miss Seymour, her daughter, was a clever actress in young ladies' parts. At a very early age she married Mr. Cargill. She remained on the stage many years, marrying a second time. Miss McCaffrey played walking ladies, but early left the stage for the walks of private life. Mr. James O. Lewis was a very fair actor in second comedy and juvenile tragedy. He was also engraver by trade, and a tolerably fair painter of likenesses. A few years after the time I speak of he was employed by Gen.

Cass, of Detroit, to paint the likenesses of the most distinguished Indian chiefs that the general might select from those he had to deal with in his official capacity. Mr. Lewis was a considerable time in the general's employ, and was finally succeeded by Mr. Catlin.

"Mr. King was a very gentlemanly man, and played walking gentleman very respectably. He had little or no histrionic talent, but he sang very well, dressed well, and was a very fair pianoforte performer. He taught music for awhile in St. Louis, where I left him in the spring of 1821, and I know not what became of him.

"George Washington Frethey was the son of a barber who cut my hair and shaved me in Pittsburgh in the summer and fall of 1815. He was the most fearless man I ever met with; he was another Napoleon the First for bravery and calm determination, and this man was only five feet five inches in height, and a tailor at that,—a pigmy in size, but a lion in courage. If his feelings were outraged, he would attack a giant in size and strength. He was a very fair actor in low comedy.

"John Finlay was an Englishman; had been a sailor in the British navy; had been wounded and lost his left leg from the middle of his thigh, and walked with the assistance of a wooden one strapped on to the stump. He seldom acted any character, and then only when the wooden leg was admissible, such as *Corporal Foss* in the 'Poor Gentleman,' and like characters. But he had an excellent voice for singing, and could give Dibden's sea songs in a style inferior only to Incledon, the celebrated English vocalist. Then, as to his moral ka-rac-ter, Your Honor (as the old sailor says in the drama of 'Black-Eyed Susan'), he could play the fiddle like an angel, and could sing 'All in the Downs' and 'Ben Block' so as to charm a school of mermaids or porpoises around a ship in a dead calm.

"Sam Jones (the fisherman, as he used to be called), a few years after, was found at the Bowery Theatre, New York, since when I have not heard of him. Pilly, I was told, turned auctioneer and made money in some town in the great Northwest."

Mr. Ludlow opened his theatre about the middle of December, 1819, the play being "The Honeymoon," with the following cast: *Duke Aranza*, Ludlow; *Rolando*, Vos; *Count Montalban*, King; *Balthazer*, Cargill; *Mock Duke*, Hanna; *Lopez*, Douberman; *Lampedo*, Frethey; *Campello*, Flannagan; *Duke's Servant*, Jones; *Juliana*, Mrs. Ludlow; *Volante*, Mrs. Vos; *Zamora*, Miss Seymour; *Hostess*, Mrs. Hanna.

Before the performance began Mr. Ludlow recited an "address," in which he spoke of the introduction of the drama in the then "far town of the West," and prophesied that the town and Territory (Missouri had not then been admitted as a State) would "become in time the centre of civilization on the continent of North America." The play was the first ever given in St. Louis by a regularly constituted company of professional actors, and the performance was, in fact, the founding of the drama in this now great and populous city. Mr. Ludlow feared that the Governor of the Territory, Gen. William Clark, would impose a tax upon him in return for the privilege of giving theatrical performances, but a pleasant interview with the Governor dissipated his apprehensions in this respect.

The performances were given three times a week, Tuesdays, Thursdays, and Saturdays. Four or five musicians composed the orchestra, one of whom was living in St. Louis in 1880.

Besides theatrical entertainments, St. Louis enjoyed about this time the attractions of a lecture course and a cotillion assembly. On the 1st May, 1818, Rev. Mr. Peck invited "the ladies and gentlemen of St. Louis to attend a course of scientific lectures to be delivered . . . in his school-room every Friday at four o'clock P.M.; subject this day, 'Geography.'" The following notice as to the cotillion parties appeared in the *Gazette* of Dec. 8, 1819:

"*Cotillion Parties.*—The subscribers to the cotillion parties are notified that the first ball will be given on Wednesday, the 15th inst. Gentlemen who wish to subscribe will call on Messrs. James Kennerly and James G. Soulard, who have the subscription list.

"Pierre Chouteau, Sr., James Kennerly, James G. Soulard, D. B. Hoffman, Risdon H. Price, William Christy, Wilson P. Hunt, John B. Sarpy, managers."

About the middle of January, 1820, Samuel Drake, Sr., manager of the Kentucky theatres, arrived in St. Louis with his company, and established a theatre in opposition to Mr. Ludlow, the performances being given "in a small ball-room in the City Hotel, of which Mr. Bennet was landlord," then standing on the corner of Third and Vine Streets. This building, somewhat remote from the business portion of the town, stood almost alone on what was then called the Second Bank and Vine Street. The only street leading to it was unpaved, either as to road-bed or footways, but the disadvantages of location were more than counterbalanced by the superiority of Mr. Drake's company, which consisted of himself, his two sons, Samuel Drake, Jr., and Alexander, his daughter Julia, his brother-in-law, Palmer Fisher, and his wife, Henry Lewis, James Douglass, James O. Lewis, and a few others. He commenced his performances late in January, and played in opposition to Mr. Ludlow for about three weeks, when at the suggestion of Isaac N. Henry the two companies were consolidated.

About the 1st of February, 1820, "She Stoops to Conquer" was given by the united companies,—*Sir Charles Marlow*, Mr. Cargill; *Young Marlow*, Mr. Ludlow; *Old Hardcastle*, S. Drake, Sr.; *Hastings*, J. O. Lewis; *Tony Lumpkin*, Alexander Drake; *Miss Hardcastle*, Miss Denny; *Mrs. Hardcastle*, Mrs. Lewis; *Miss Neville*, Mrs. Mongin, with the farce "A Day after the Wedding," *Col. Freelove*, Mr. Ludlow; *Lady Elizabeth*, Miss Julia Drake.

Sheridan's "Rivals" was afterwards played. The managers disagreed later in the year and Mr. Ludlow withdrew, while Mr. Drake, after playing a few weeks longer, left St. Louis, his late partner remaining in that city. The theatre was closed for some time, but Isaac N. Henry induced William Jones, a manager with whom Mr. Ludlow was then playing in Nashville, to engage it, and it was reopened about Dec. 10, 1820, with the comedy of "The Soldier's Daughter," cast as follows: *Governor Heartall*, Mr. Jones; *Frank Heartall*, Mr. Ludlow; *Charles Woodby*, Mr. Lewis; *Young Malfort*, Mr. Vos; *Ferret*, Mr. Cargill; *Timothy Quaint*, Mr. Frethy; *Servant*, Mr. Pilley; *Widow Cheerly*, Mrs. Groshon; *Mrs. Malfort*, Mrs. Ludlow; *Susan*, Mrs. Vos.

Before closing an unprofitable season in February following, Mr. Jones gave benefits to several of his company. Mr. Douberman, the artist, paid the manager a fixed sum on his night, and produced the tableau of "Washington and his Family," which has already been described. On this occasion the house was "packed" with people, and the curtain rose to the tune of "Hail Columbia."

After an experience of three months, Mr. Ludlow came to the conclusion that his Nashville friends were correct in their admonitions as to the difficulties and dangers of theatrical enterprise in St. Louis. "Notwithstanding the people there were kind, hospitable, and generous," he writes, "the population was too limited to sustain a theatre for a continuous season of many weeks." In March, 1820, therefore, he concluded his season and disbanded his troupe, determined to depend for the future upon his own efforts and those of his wife, until a more favorable opportunity arose for entering into management again. "I liked the people of St. Louis," he adds, "and thought I could perceive natural advantages that it had which must in the future make it a large and prosperous city; with this view I rented a house, resolving to remain here and watch coming events."

Amateur theatricals still survived and flourished, and another dramatic organization—the Thespian Society—had been formed. On the 2d of February, 1820, this society presented the comedy "The Jew and the Doctor," with the farce "The Toothache." For several years amateur performances seem to have been the only form of theatrical entertainment in St. Louis. In February, 1823, the Thespian Society produced (for the first time in St. Louis) "The Rivals" and "The Rendezvous," and on Thursday, June 26th, "The Poor Gentleman" and "Monsieur Tonson," and on July 2d, "The Mail-Coach, or Adventures from New York to Charleston," in which a Mr. Dalton took a leading part. About the 8th of August a circus company arrived, and exhibited on a lot in the rear of the old theatre.

In 1825 a large brick house on Church Street, formerly occupied by Scott & Rule, was fitted up as a theatre, and here on Monday evening, October 24th, Cherry's comedy in five acts, "The Soldier's Daughter," was presented by the Thespian Society. Previous to the comedy an address was delivered "by one of the gentlemen," followed by a farce in two acts called "Fortune's Frolic." On the 6th of July, 1826, Mrs. J. W. Green informed

"the ladies and gentlemen of St. Louis that her concert of vocal music, interspersed with recitations, advertised to take place on Monday evening, which was postponed in consequence of the unfavorable state of the weather, will positively take place this evening, Thursday. The concert will commence with the celebrated bravura patriotic song of 'The Genius of Columbia, or Freedom's Fame to Heaven Shall Ring,' accompanied by Master Philipson on the pianoforte, a young amateur of fourteen years of age."

During the summer of 1827, James H. Caldwell, an experienced and successful manager in the West, determined to establish a theatre in St. Louis, and for that purpose leased, with the privilege of purchase, a warehouse, known as "the Old Salt-House," belonging to Scott & Rule, which stood on the west side of Second Street, about one hundred feet north of Olive Street. This building was converted into a theatre by Mr. Caldwell, who added fifty feet to it for a stage, and it was opened on the 30th of June, 1827, with the "Honeymoon" and "Rosina." The season was filled up with light pieces.

On Friday evening, July 13th, was presented the melodramatic opera of "Rob Roy, or Auld Lang Syne,"—*Rob Roy McGregor Campbell*, Mr. Caldwell; *Helen McGregor* (her second appearance), Mrs. Tatnall. At the end of the play Monsieur Tatin and Mrs. Tatnall danced a *pas de deux*, the whole concluding with the farce "The Spectre Bridegroom, or a Ghost in Spite of Himself."

The opera "The Devil's Bridge," *Count Belino*, Mr. Still; *Countess Ronsalvina*, Miss Placide, was presented on Friday evening, July 20th, followed by "The Three and Deuce," Mr. Caldwell personating the three characters of *Pertinax Single*, *Peregrine Single*, and *Percival Single*. On Thursday, July 26th, was given Diamond's "The Foundling of the Forest," with Mr. Caldwell as *De Valmont*, and Mrs. Tatnall as *The Unknown Female*, together with the comic opera "The Poor Soldier," with Mr. Still as *Patrick*. On Thursday, August 19th, was presented "Henry IV., or the Humors of Sir John Falstaff,"—*Falstaff*, Mr. Gray; *Westmoreland*, by

young gentleman of St. Louis, "his first appearance on any stage," after which "The Devil to Pay." On Friday, August 17th, was represented "The Maid and Magpie, or which is the Thief?" and "The Forty Thieves," this being the last night of the season.

Social amusements were not neglected for the stage. One of the salient events of interest to beaux and belles during 1827 was a splendid ball given on the 8th of January by the United States officers at Jefferson Barracks. On the same night a ball was given at Mr. Barbee's mansion-house in St. Louis, which was "numerously attended," a circumstance showing the gayety of social life in the town at that period. On Tuesday, the 8th of January, in the following year (1828), an anniversary ball was given in commemoration of the victory of New Orleans at the City Hotel. This was during the administration of John Quincy Adams, and party feeling ran so high that it is recorded as a notable circumstance that this dance was "attended indiscriminately by persons of both the political parties which now divide the country."

A Mr. Rowe reopened the theatre Saturday, July 19, 1828, with "Town and Country," and a company nearly all strangers to the St. Louis stage. The following Wednesday he produced "The Soldier's Daughter," having in the cast as *Frank Heartall*, L. Smith; *Governor Heartall*, Mr. Anderson; *Timothy Quaint*, S. Smith; *Widow Cheerly*, Mrs. Rowe; *Mrs. Malfort*, L. Smith; and followed it with "The Three Hundred Pound Note," *Billy Black*, Mr. McCafferty; *Miss Arlington*, Mrs. Rowe, with the original "Bavarian Girl's Broom Song."

Mr. Rowe's performances were given four nights in the week,—Monday, Wednesday, Friday, and Saturday. On the 22d of July, 1828, P. Lewis, "professor of music," with his four children, the youngest of whom was only five years of age, gave a concert "at Mr. Rankin's long room, adjoining Mrs. Paddock's." The instruments on which they performed were the piano, harp, violin, and violoncello. On the 6th of August, Coleman's "Heir-at-Law" and an afterpiece "Winning a Husband," in which latter Mrs. Rowe sustained eight characters, were given at the theatre. The "splendid dramatic spectacle," "Zembuca, or the Netmaker and his Wife," was produced, "by particular request," on the 27th of the same month, preceded by "an admirable piece" by John Howard Payne, called "'Twas I, or the Truth a Lie." A Turkish *pas seul* was executed during the first act of "Zembuca" by Mrs. Kenny, and Mrs. Rowe sang the song "Bid Me Discourse," and the air from "Der Freischutz," "When a Lover Kneels before Her." On Wednesday evening, September 3d, the "Gambler's Fate, or a Lapse of Twenty Years," by Charles Thompson, founded on the French play of "La Vie d'un Joueux," was given in St. Louis for the first time, with Messrs. Anderson and Barry in the *rôles* of *Germaine* and *Malcom*, two gamblers, and Mrs. Rowe as *Julia;* preceded by "The Spoiled Child," with Mrs. Rowe as *Little Pickle*. Between the pieces Mrs. Rowe danced a sailor's hornpipe, dressed in character, and Mrs. S. Smith sung the cantata "William Tell." Mr. Anderson had a benefit on September 10th, signalized by the first production in St. Louis of the "Merchant of Venice," with the following cast: *Shylock*, Mr. Anderson; *Gratiano*, L. Smith; *Bassanio*, Mr. Barry; *Portia*, Mrs. Rowe; *Nerissa*, L. Smith; *Jessica*, S. Smith. At the end of the comedy, Mrs. Kenny danced a fancy *pas seul*, the entertainment closing with the farce "The Liar."

Later in the same month "The Will, or the Old Bachelor in the Straw," was produced, and at the end of the comedy Mr. McCafferty sang a new comic song, "A Hit at the Law," and Mrs. Rowe the "popular mermaid song." Mr. Kenny and Mr. McCafferty also gave a comic duet, "The Rival Beauties," which was followed by "The Falls of Clyde," with Mrs. Rowe as *Ellen Enfield*. During the first act Mrs. Kenny executed a Scottish *pas seul*.

About this time (September, 1828) James H. Caldwell, "manager of the New Orleans, Natchez, Nashville, and St. Louis theatres," issued a prospectus announcing the intended construction of a theatre in St. Louis. The proposed building was designed to contain without inconvenience six hundred persons, and was to have a front of fifty-three and a depth of one hundred feet. A saloon or lobby, "forming a place for a promenade during the intervals of the acts," was included among the conveniences of the establishment. The cost of the building was estimated at fifteen thousand dollars, which sum it was proposed to raise by issuing stock of one-hundred-dollar shares. Mr. Caldwell offered to take seven hundred and fifty shares, leaving the other half to be subscribed by the citizens. Part of this amount had already been taken at the time of the announcement (September 16th). It was added that if the required amount was obtained, the theatre would be commenced without delay, "upon the site of the present one," and would be completed "so as to receive a company next fall."

The proposed building was never erected, and Mr. Caldwell continued to use the old "Salt-House" theatre until the expiration of his lease, in 1834. About the 1st of October, 1828, Reynolds' comedy, "The Exile,

or the Russian Daughter," was produced for the first time in St. Louis, with Mr. Anderson as *Duran*, Mrs. L. Smith as *Alexina*, Mrs. Rowe as *Catharine*, Mrs. S. Smith as the *Empress Elizabeth*. During the performance a representation of a snow-storm (evidently a great stage effect in those days) was given, and between the play and afterpiece, Sheridan's "Critic," a fancy *pas seul* was performed by Mrs. Kenny. It is evident from the frequent mention of this lady's name in the theatrical announcements that she was a popular dancer, and a "strong card" at most of the performances. On the 3d of October Moncrieff's "Wanted, a Wife" was played. After the comedy songs were sung by Mr. Kenny and S. Smith, and the inevitable fancy *pas seul* of Mrs. Kenny was executed. "In compliment to the Jockey Club," Holcroft's "Road to Ruin, or the Sports of the Turf," was played on the Thursday evening following. On the 14th of the same month "Guy Mannering" was presented for the first time in St. Louis, with Mrs. Rowe as *Meg Merrilies*. During the performance a number of songs were sung by Mr. and Mrs. Sol Smith, after which Moncrieff's "Somnambulist, or the White Phantom of the Village," was given. On the 1st of June, 1829, Brown's circus arrived in St. Louis, and exhibited on a lot adjoining the Missouri Hotel. J. Purdy Brown was a famous equestrian manager of those days in the South and West, and for a time was associated with the manager and actor, N. M. Ludlow. Mr. Brown's announcement of the attractions of his show reads as follows:

"The ladies and gentlemen of St. Louis are respectfully informed that J. P. Brown's company having arrived from New Orleans, they will present their second performance this evening, and continue for a limited period prior to their departure for Louisville. The amphitheatre is calculated for extensive public accommodation, and will be open every night this week; and in order that a combination of attraction may be brought forward, the proprietor has the pleasure to announce that besides the talents of his extensive and well-organized equestrienne troop and much-admired stud of horses, he has at considerable expense effected an engagement with the juvenile dramatic prodigy, Miss Lane, also with Mr. and Mrs. Kinloch, all from the London and New York theatres.

"The amusements will consist of a splendid routine of horsemanship and feats of agility by the whole equestrian troop of male artists; and the celebrated equestrian heroine, Mrs. Williams, from Broadway Circus, New York, will ride her graceful and intrepid act. In the course of the evening two favorite songs by Mrs. Kinloch."

Mr. Brown combined the attractions of the theatre with those of the circus, and the performance concluded with a scene from the "Heir-at-Law," with Miss Lane as Dr. Pangloss, and the farce "Actress of All Work," the "Manager" being played by Mr. Kinloch, and Maria and five other characters by Miss Lane.

In 1830 a Mr. Huppard opened a museum opposite Messrs. Scott & Rule's establishment, in which he exhibited minerals, fossils, petrifactions, insects, reptiles, paintings, Indian idols, war-clubs, dresses, etc., and some articles made by the mysterious race which preceded the Indians on the American continent. On Wednesday, June 30th, Miss Placide had a benefit at the theatre, appearing as *Theresa* in "The Orphan of Geneva," which was followed by "The One Hundred Pound Note," with Mr. Heringer as *Billy Black* and Miss Placide as *Miss Arlington*, with the "Bavarian Girl's Broom Song." On Wednesday, July 21st, was presented "Masaniello, or The Dumb Girl of Portici," the thrilling sensational effects of which were thus briefly but graphically announced: "Grand eruption of Mount Vesuvius, terrific explosion, forked lightnings rend the sky, the burning lava impetuously flows down the side of the mountain, and the whole country becomes awfully illuminated. *Fenella* plunges into the sea; grand display of fireworks; popular tumult, and death of *Masaniello*."

On Wednesday, July 27th, Mr. Parsons, from the Boston theatre, opened an engagement of three nights with Rev. C. Maturin's "Bertram," followed by "A Village Lawyer." On Wednesday, August 11th, was given "Man and Wife, or More Secrets than One," and "The Lady of the Lake," on which occasion Miss Clark sang "I'd be a Butterfly," "Hurrah for the Bonnets of Blue," "Draw the Sword, Scotland," and "The Light Guitar." On Tuesday, August 24th, the season closed with the production of "Rob Roy" and "The Romp."

Mr. Caldwell's efforts to raise funds for the erection of a theatre having failed, he seems to have sub-let the old "Salt Theatre," for we find that in April, 1831, a Mr. Pearman was manager of the establishment. On the 5th of that month Mr. Holland had a benefit, the entertainment commencing with a piece called "Family Jars," with the song "Wedlock is a Ticklish Thing," by Mr. Holland, after which "Cherry Bounce" and the "Day after the Fair" were given. On the 27th the opera "Rosina, or the Reapers," was produced, and on the Saturday following the opera "Floating Beacon, or the Norwegian Wreckers." About the middle of May, 1831, N. M. Ludlow returned to St. Louis with a company organized for him by J. H. Caldwell, and played for about six weeks at the Salt Theatre. The company opened "with a good comedy and farce," and for a few nights drew fair houses. Subsequently "Paul Jones," a spectacular drama, was produced, and on the 29th of

June and 6th of July the Oriental drama "Cherry and Fair Star," with "gorgeous effects," was given for the benefit of Mr. and Mrs. Ludlow. The character of *Long Tom Coffin* in "Paul Jones" was played by John Gilbert, afterwards and for many years the distinguished actor of old men's parts at Wallack's Theatre, New York. On the 1st of July, Mrs. McClure appeared for her own benefit as the heroine in "Joan of Arc," and as *Katherine* in "The Taming of the Shrew." On the following evening "The Hypocrite" was given, together with an afterpiece and a number of songs, "by Old Sol, Old Marks, and Mrs. Smith."

On the Fourth of July the patriotic drama "She would be a Soldier, or the Plains of Chippewa," written by M. M. Noah, the veteran New York journalist, was presented, with "Sprigs of Laurel" for the afterpiece. Mrs. and Mrs. Sol Smith were members of Mr. Caldwell's company at this time, and played with Mr. Ludlow in St. Louis. The last performance of the season was given on the 6th of July, and on the 9th the company left St. Louis for Nashville.

On the 14th of June of this year the following exhibition was announced in opposition to the theatre:

"For three days only. Unprecedented attraction. Now exhibiting, alive, at the Jefferson Hotel, entrance on Pine Street, an enormous anaconda, or mountain serpent, commonly called 'The Terror of Ceylon'; also the boa constrictor, or great serpent of Java, the real asp of Alexandria, those astonishing reptiles of many hues, the chameleons, and the head of a New Zealand chief, handsomely tattooed and in fine preservation."

About Aug. 15, 1833, J. P. Brown returned to St. Louis and erected an amphitheatre, in which he gave circus performances. In September he opened the Salt Theatre also, and among other pieces produced October 1st "The Honest Thieves." In the course of the evening "Bob" Farrell sang six comic songs, and appeared in the fifth act of "Richard III.," personating *Richard* "in his own peculiar style."

In 1834, N. M. Ludlow, having heard that James H. Caldwell's lease of the Salt Theatre had expired, wrote to a friend in St. Louis, and through his agency rented the building from the 1st of September. On arriving in St. Louis, about the last week in August, he found the theatre "a wretched affair,—dirty, illy contrived, and poorly provided with scenery." He at once had it cleaned and painted, and opened early in September with a comedy and farce. The audiences were only moderately large, the weather was warm, and the building uncomfortable. Leaving his company in St. Louis, Mr. Ludlow started South toward the close of the month, and in November the company left St. Louis and joined Mr. Ludlow at New Orleans.

Early in May, 1835, Mr. Ludlow's company began another season in St. Louis, and Mrs. Pritchard, his first star, appeared about July 1st, and had a benefit July 10th. Her first piece was "The Wandering Boys," *Paul*, Mrs. Pritchard; *Justin*, Mrs. Minnich; *Count de Croissy*, Mr. Ludlow, after which "The Wreck Ashore" was given. During Mrs. Pritchard's engagement, Sol Smith and J. M. Field appeared on alternate nights. Mr. Smith opened Saturday, July 11th, as *Mawworm* in "The Hypocrite," and *Philip Garbus* in "102." On Monday following Mr. Field made his first appearance in St. Louis as *Richard III.* Next night Mr. Smith appeared as *Martin Heywood* in "Rent Day," and *Delph* in "Family Jars." This was followed by Mr. Field in *Reuben Gilroy*, and Mr. Smith as *Kit Corly* in "Town and Country," with the farce "My Aunt," Mr. Field as *Darwell*, and on the following night "Wild Oats," *Rover*, Mr. Field, and "Three and Deuce," the three *Singles*, Mr. Smith. The next night was Mr. Smith's benefit, for which the bill was "Charles II.," *Captain Copp*, Mr. Smith, the *Merry Monarch*, Mr. Field, and "The Illustrious Stranger," *Bonbell*, Mr. Smith. On Monday, July 20th, Mr. Field's benefit occurred, on which occasion the plays were "A New Way to Pay Old Debts," *Sir Giles Overreach*, Mr. Field; *Justice Greedy*, Mr. Smith; *Wellborn*, Mr. Ludlow; *Lord Lovell*, M. C. Field; *Allworth*, Mr. Thompson; *Marall*, Mr. Watson; *Meg Overreach*, Mrs. Watson; *Lady Allworth*, Mrs. Ludlow, and Mr. Field's "Tourists in America." Immediately after their benefits Messrs. Smith and Field started East, but before leaving St. Louis, Mr. Smith had effected a partnership with Mr. Ludlow, under the firm-name of Ludlow & Smith,[1] which continued for eighteen years.

[1] Solomon F. Smith, known to the public as "Sol" Smith, was one of the famous comedians of his generation, and a theatrical manager of large and varied experience in the West and South. He was born at Norwich, Oswego Co., N. Y., in 1801. His father, Levi Smith, when a boy, was a fifer in a volunteer company in the Revolutionary war. After the close of the war he learned the trade of a goldsmith, married, and finally settled on a military tract, where he had located forty acres of land, for which he had received a patent for his military services. This was in Solon, Courtland Co., N. Y., then almost a wilderness. At the age of thirteen Solomon was taken into the store of his brother Silas, in Boston, where, however, he did not remain long. In 1814 he moved to Albany, N. Y., and engaged as a clerk in the store of another brother, where he remained three years. Here he employed his leisure time in reading Shakespeare's plays, with which he became familiar before he had ever seen a play acted. While in Albany he went to the theatre for the first

The new firm engaged Mr. Field to play in their company, beginning at Mobile in the following autumn.

time, and subsequently joined the company, being enrolled as a supernumerary. He next removed to Troy, and then to Saratoga and Schenectady, and finally started for the West. After a toilsome journey he arrived at Cincinnati, whence he proceeded to Louisville, where he engaged as an apprentice in the printing business, both working as a compositor and carrying the newspaper. Becoming dissatisfied with the treatment he received he removed to Vincennes, Ind., and again engaged himself as an apprentice in a printing-office. Here he became so expert that he was promoted to the foremanship of the establishment. At Vincennes he joined a Thespian Society, and played comedy parts with some success as an amateur. At length the printing-office burned down, and he wandered to Nashville, where he engaged as a journeyman printer. After working at the "case" for a short time he left Nashville and traveled on foot to Cincinnati, where he joined his brothers, nearly all of whom had settled in that city. Here he joined another Thespian Club and acted *Young Norval*, which character was his earliest ideal of a hero. In 1820 he returned to Vincennes, and there met a dramatic company, which he joined, and commenced playing on a regular stage at a salary of six dollars per week. After playing eight weeks he returned to Cincinnati and determined to study law. He commenced the study in earnest, but his passion for the stage soon seized him again, and he engaged himself as a prompter in the Cincinnati theatre, season of 1821–22, without relinquishing his idea of studying law, which he continued at intervals for some months. In July, 1822, he commenced printing a paper in Cincinnati called the *Independent Press*. This enterprise he relinquished the next year, and having sold the paper, went to Lexington, Ky., and after playing one night in the theatre commenced the organization of a regular dramatic company. Thereafter for thirty years he followed the occupation of theatrical manager and actor. Before his final adoption of the stage as a profession he had married, and his wife, possessing attractive dramatic talents, probably had much to do with deciding his profession. He traveled with his company, giving dramatic performances and concerts in the Ohio River towns and places of sufficient importance in the interior with varying success. In the winter of 1827–28 he played in New Orleans, Natchez, Memphis, St. Louis, and other cities on the Mississippi River. In St. Louis he was associated with N. M. Ludlow in the management of the Salt-House Theatre on Second Street, between Olive and Locust Streets, and of the new theatre at the corner of Third and Olive Streets, which was opened July 3, 1837. He abandoned theatrical management and all business connection with the theatre in 1853, and soon thereafter turned his attention to the practice of law in St. Louis. During the latter years of his life he occasionally mingled in politics, and in 1861 was elected a member of the Missouri State Convention as an Unconditional Union man.

Sol Smith prepared an epitaph for himself to be engraved upon a plain stone in Bellefontaine Cemetery, St. Louis, as follows:

"Sol Smith, Retired Actor.
1801–18—.

"'Life's but a walking shadow, a poor player,
That struts and frets his hour upon the stage,
And then is heard no more.'

"'All the world's a stage,
And all the men and women merely players.'

"Exit Sol."

He died on the 14th of February, 1869.

In July of this year a young Englishman named Spencer, who had been engaged by Mr. Ludlow as a stock actor, appeared four nights as a "star" at the "Salt" Theatre. On the 21st of July he appeared as *Bertram* in "Guy Mannering," and in a farce; on the second night as *Jocoso*, in the "Maid of Milan," and on the third and fourth nights in "Black-Eyed Susan" and "Rob Roy," a farce being given in addition to the play every night. He is described as having been "no actor and only a tolerable singer, but a high-toned, honorable gentleman, courteous, and brave," and a few years later was killed while fighting by the side of Col. Fannin, in Mexico. The next "stars" at Mr. Ludlow's theatre were Charles K. Mason, tragedian, and Mrs. Hamblin, wife of Thomas Hamblin, manager of the Bowery Theatre, New York.

Their engagement began on the 31st of July, and they played on alternate nights, Mr. Mason appearing in "Hamlet," "The Iron Chest," "Macbeth," "The Robbers," "A New Way to Pay Old Debts," etc., and Mrs. Hamblin in "The Belle's Stratagem," "The Stranger," "The Day After the Wedding," and other plays. Mr. Ludlow subsequently determined to produce "Romeo and Juliet," with both stars in the cast, and accordingly on the 13th of August the play was given, with Mrs. Hamblin as *Juliet* and Mr. Mason as *Romeo*. The "double engagement" continued for six nights, Mr. Mason and Mrs. Hamblin appearing together in Coleman's "Mountaineers," "Taming of the Shrew," "The Merchant of Venice," "The Water Witch," and other pieces. The venture does not appear to have been very profitable, and as the weather was hot, but little was done by Mr. Ludlow's company until the middle of September, when Mrs. Pritchard returned and played six nights. On the 28th of September, Miss Eliza Riddle appeared for the first time in St. Louis, in Knowles' "Hunchback," and at once established herself as a popular favorite. She became Mrs. J. M. Field, and retained her hold on the public until her final return to the East in 1856. On her second night she appeared as *Juliet* in "Romeo and Juliet," with M. C. Field (afterwards her brother-in-law) as *Romeo*, and on her third night as *Miss Dorrillon* in "Wives as They Were and Maids as They Are," and *Colin* in "Nature and Philosophy." During the remainder of her engagement she appeared successively as *Belvidera* in "Venice Preserved," *Bianca* in "Fazio," *Ernestine* in the "Somnambulist," *Walter Arlington* in "The Idiot Witness" (on which occasion Mr. Hernizen, afterwards a favorite low comedian in the West and South, made his first appearance before a St. Louis audience), and, for her

benefit, *Mrs. Beverly* in "The Gamester." Miss Riddle was followed by Mrs. A. Drake, who played *Bianca*, *Mrs. Haller*, *Isabella* in "The Fatal Marriage," *Julia* in "The Hunchback," and other *rôles*. Mrs. Ludlow, wife of the manager, wishing to withdraw from the stage, was given a farewell benefit on the 13th of October. On that occasion Mrs. Cowell (wife of Joseph Cowell) made her first appearance in St. Louis. Mrs. Drake and Miss Riddle, who had volunteered their services, were also in the cast, the play being "Adrian and Orilla." Mrs. Ludlow continued to act until the close of the season, about ten nights later, and subsequently reappeared on the stage at Mobile. Mr. and Mrs. Cowell made their first appearance together in St. Louis on the 15th of October, in "The Belle's Stratagem," which was followed in succession by "The Miller's Maid," "Paul Pry," "The Dead Shot," "Happiest Day of my Life," etc. Miss Riddle next appeared in "The School for Scandal," her brother William taking the part of *Sir Peter;* and on the last night but one of the season Mr. Ludlow had a benefit. The play on this occasion was "The Poor Gentleman," and in the cast as *Lieut. Worthington* was Col. Charles Keemle, a prominent citizen and veteran journalist of St. Louis, who, being a warm personal friend of Mr. Ludlow, consented to appear for "one night only." Writing about this performance, Mr. Ludlow declares that "Col. Keemle conducted himself more like a veteran than a new recruit going through his third drill." After "The Poor Gentleman," the romantic drama "Thalaba" was given. On the following night, the last of the season, "The Wife, or my Father's Grave" was given for the benefit of Miss Riddle, who appeared in the leading *rôle* supported by Mr. Ludlow.

The company which played at Mr. Ludlow's theatre during the season of 1835 embraced the following: N. M. Ludlow, M. C. Field, Joseph Cowell, William Riddle, George Hernizen, J. E. Watson, N. Johnson, Spencer, Thompson, Barclay, Wolfe, Williams, Kelly, Morris, La Rue, Edgerton, occasionally Samuel Cowell, then a small boy, Miss Eliza Riddle, Mrs. Ludlow, Mrs. Cowell, Mrs. Watson, Mrs. Minnich, Miss Stannard, Mrs. Johnson, and Mrs. Milton. Mr. and Mrs. Watson left the company about the middle of the season, and Mr. Johnson and Mrs. Stannard withdrew a little later.

The theatrical season of 1836 in St. Louis was inaugurated on the 9th of June, 1836, under the joint management of Ludlow & Smith, who also conducted a theatre at Mobile. The first night's performance was "The Hunchback," with M. C. Field as *Master Walter*, and Miss E. Riddle as *Julia*, followed by a farce, Sol Smith assuming the leading part in the latter. Miss Riddle continued to be the principal attraction of the company for about two weeks. Mr. and Mrs. Lyons, of the New Orleans theatrical company, next appeared in "Douglas, the Noble Shepherd," and were followed by Mrs. Sol Smith as *Mrs. Haller* in "The Stranger." On the 27th of June, J. M. Field began an engagement as *Benedict* in "Much Ado about Nothing," which was followed by "A New Way to Pay Old Debts," and other plays. On the Fourth of July "The Soldier's Daughter" was given, and for the afterpiece "Tom Thumb," the part of *Tom Thumb* being performed by Marcus Smith, then about eight years old, who, as Mark Smith, afterwards became a famous comedian.[1]

At the close of Miss Riddle's engagement the managers re-engaged her for both the St. Louis and Mobile theatres. On the 7th of July, Miss Nelson began a star engagement, commencing in "Victorine." She also appeared as *Rosalind*, and in a number of other *rôles*. After Miss Nelson's engagement, Mrs. A. Drake, "the Siddons of the West," appeared July 28th as *Julia* in "The Hunchback," and closed an engagement of nine nights with "Tour de Nesle." She was followed by Miss Meadows in a round of juvenile characters, with which the "spring" season closed.

The theatre was reopened on Monday, August 29th, with Mrs. Pritchard as the star performer, the play being "The Italian Brigand," in which she assumed the *rôle* of *Alessandro Massaroni*. During her engagement, N. M. Ludlow appeared in the low comedy part of *Nipperkin* in "Sprigs of Laurel," in which he became very popular in the West. Miss Eliza Petrie, though engaged as a member of the stock company, followed Mrs. Pritchard as the "star," opening September 9th in "Perfection." On the 19th, 21st, and 24th of September, respectively, Mrs. Sol Smith, M. C. Field, and N. M. Ludlow were given benefits. On the evening of September 28th, Mrs. Ludlow made her second "last" appearance, but this time it was really the last, as she never returned to the stage. A number of other benefits followed, among them one

[1] Mark Smith was born at New Orleans, Jan. 7, 1829, and was the son of "Sol" Smith. He appeared at a very early age in children's parts, and sang between the acts. While still a lad he went to sea, but after a trip to Liverpool returned to New Orleans, and was apprenticed to the iron finishing business in St. Louis. He subsequently went to New York, and made his first appearance on the stage at the Bowery Theatre. After playing there for some time he returned to St. Louis, and became a member of Ludlow & Smith's company. He continued to reside in St. Louis until his death in August, 1874, and was an extremely popular and versatile comedian.

for Sol Smith, Sr., which occurred on the 1st of October. On the 3d, Mrs. Henry Lewis commenced an engagement, appearing as *Bianca* in "Fazio." Subsequently she assumed a number of male characters, Richard III., William Tell, Virginius, and others. She was followed by Mrs. Duff, a famous actress in her day, who played four nights, commencing October 13th with the tragedy of "Adelgitha." After Mrs. Duff came Miss Riddle for five nights, and her engagement closed the summer season of 1836.

Old St. Louis Theatre.—In February, 1837, the old Salt-House Theatre, together with such scenery as the company had left behind on its departure for the South, was destroyed by fire. Nearly two years before, however, Mr. Ludlow had set about the erection of a new theatre, and the enterprise was already well advanced. The old structure had always been unsuited to the purposes of a theatre, and had long since become too small to accommodate the theatre-goers of St. Louis. In the summer of 1835 a subscription for the erection of the new theatre was set on foot by Mr. Ludlow, who, assisted by Col. Meriwether Lewis Clark and Col. Charles Keemle, succeeded in obtaining subscriptions to the amount of thirty thousand dollars, Mr. Ludlow agreeing to pay ten per cent. per annum on the entire outlay for building and ground, and to put in the scenery at his own expense. A meeting of the stockholders was held, and a building committee appointed consisting of Col. Joseph C. Laveille, Col. M. L. Clark, and N. M. Ludlow. A lot at the southeast corner of Third and Olive Streets, where the post-office now stands, was selected by Col. Clark, whose choice was approved by the other members of the committee. The question having been raised whether the front on Third Street was sufficiently large, twenty additional feet adjoining the south side of the lot were purchased from Col. John O'Fallon, the dimensions of the whole lot being eighty by one hundred and fifty feet, running back to an alley. Col. Clark then proposed that the stockholders be requested to double their subscriptions, and his suggestion was adopted. In a short time the sum of sixty-five thousand dollars had been secured, Messrs. Ludlow and Smith agreeing to pay a yearly rental of ten per cent. of this amount. The corner-stone was laid May 24, 1836, at five o'clock in the afternoon, and the foundation of the building was laid in the fall of 1836. The walls were built up to an average height of ten or twelve feet before the work was interrupted by cold weather. During the winter the head carpenter, Alexander Crowl, assisted by John Gibson, John Varden, and others, was actively engaged on the "inside work," and the scenic artist, John R. Smith, was preparing the scenery. On the 10th of April, 1837, Mr. Ludlow arrived in St. Louis from Mobile, and found the prospect for the early opening of the theatre very discouraging. The roof had not as yet been placed on the building, but the timbers for the inside work were ready to be adjusted, and Mr. Ludlow came to the conclusion that he might be able to open the house to the public on the Fourth of July. The work was pressed forward with great rapidity, and on the 1st of July the Ludlow and Smith Company arrived from Mobile. In the mean time the St. Louis Theatre Company had been incorporated by the Legislature, and had accepted its charter at a meeting in the town hall on Saturday, the 3d of March, 1837, at three P.M. The first board of directors were M. Lewis Clark, Joseph C. Laveille, William Hempstead, Edward Beebe, Charles Keemle; committee on subscriptions, which were received at the town hall, M. Lewis Clark, Joseph C. Laveille, and William Hempstead. The building committee at this time consisted of M. Lewis Clark, Joseph C. Laveille, William Hempstead, Edward H. Beebe, and Charles Keemle.

Although the Fourth of July had been fixed for the opening of the theatre, Mr. Ludlow subsequently determined to open it on the 3d, which happened to be his birthday and Monday, the first play-day of the week. Ludlow and Smith had offered a premium of one hundred dollars for a poetic address to the public on the opening of the new theatre, and seventeen or eighteen were handed in to the committee of selection, who awarded the prize to Edward Johnson, of Greensburg, Pa. Mr. Johnson happened to be in St. Louis on the opening night, and went to the theatre without being aware of the choice of the committee. He was pleasantly surprised on hearing the address, which was delivered by Joseph M. Field, to find that it was his own composition. The address was followed by Tobin's comedy of "The Honeymoon," with the following cast:

Duke Aranza, J. M. Field; *Count Montallin*, Mr. Barker; *Rolando*, M. C. Field; *Balthazar*, Mr. Hubbard; *Lampedo*, Sol Smith; *Jacques*, Thomas Placide; *Lopez*, Mr. Kelly; *Campello*, Thomas Pearson; *Servants*, Missos West, Chambers, etc.; *Juliana*, Miss E. Riddle; *Volante*, Miss Petrie; *Zamora*, Mrs. Hubbard; *Hostess*, Mrs. Salzman; *Mrs. Lopez*, Mrs. Voght.

After the comedy Mr. and Mrs. Bennie danced a tambour major jig, which was succeeded by the farce of "Simpson & Co.," with Mr. DeCamp as *Mr. Simpson*, M. C. Field as *Mr. Bromley*, Miss E. Riddle as *Mrs. Simpson*, and Miss Petrie as *Mrs. Bromley*.

The company at the time was composed of the following: N. M. Ludlow, Sol Smith, Sr., Joseph M. Field, Matthew C. Field, Vincent DeCamp, Thomas Placide, Messrs. Fremont, Anderson, Hubbard, Riley, Barker, Kelly, Jackson, Pearson, Thorpe, Newton, Sergeant, Jones, West, and Chambers, Miss Eliza Riddle, Miss Eliza Petrie, Mrs. Hubbard, Mrs. Salzman, Mrs. Kutz, Miss Voght, and Miss Henning, to which were added as dancers, Mr. and Mrs. Bennie; leader of the orchestra, Mr. Myers; scenic artist, John R. Smith.

The St. Louis Theatre was designed by George I. Barnett, and in its time was undoubtedly the finest theatre in the valley of the Mississippi, and one of the finest in the United States. Its dimensions were seventy-three by one hundred and sixty feet, and the general architectural style of the exterior was Ionic, that of the interior Corinthian. The front was taken from the temple of the Erectheum at Athens. The portico was supported by six columns, each thirty-five feet in height and about six feet in diameter at the base. In the rear of the columns and fronting the saloon windows was a veranda running the whole length of the portico. The front was surmounted by a figure of Shakespeare, in the act of being crowned by Fame, with the motto below, "He was not for an age, but for all time." The vestibule, in the Corinthian style, was from the octagonal tower of Andronicus Cyrrhestes. There were two saloons, the first, or grand saloon, seventy by twenty-five feet, occupying the whole front of the theatre. On the south side of the building was a lesser, or ladies' saloon, on a level with the first tier of boxes. The auditorium was divided into a parquet and three tiers or galleries of seats. The dress circle would seat about three hundred, the family circle about three hundred and fifty, the gallery about four hundred and fifty, and the parquet about four hundred, in all fifteen hundred seats. The entrance to the first and second tiers and parquet was through a large vestibule, twenty feet in depth by forty in width, thence through three large doors into the lobby of the first tier. Through the centre of the first tier was the passage to the parquet, and on each side of the lobby a flight of stairs leading to the second tier. The entrance to the gallery was from the outside of the building to a flight of winding stairs, having no connection with the other entrances. The house being designed for a summer theatre, had a number of very large windows on each side.

The floor of the parquet was so constructed as to be easily removed, so as to convert the building into an amphitheatre for equestrian purposes. The dome was about fifty feet high from the floor of the parquet, and was richly decorated with paintings of figures representing Apollo and the Muses. The proscenium boxes were very handsome, and decorated in tasteful style. The stage was seventy-three by fifty-five feet in width, and in the rear on a level with the stage were the green-room, manager's room, and star's room. The prices of admission were, boxes and parquet, one dollar; private boxes, one dollar and fifty cents; all other parts of the house, fifty cents. The building continued to be used as a theatre by Ludlow and Smith until the 10th of July, 1851, when it was closed, the property having been purchased by the general government with a view to the erection of a custom-house. The building was demolished as far as the foundation walls, when work was suspended, and the walls were not finally removed until the winter of 1853. "Quite an excitement," we are told by a newspaper writer of the day, "attended the digging up of the old St. Louis Theatre's corner-stone" on the 21st of January, 1853.

The performance on the night following the opening (July 4, 1837), Noah's "Plains of Chippewa," was given with the following cast:

General Scott, Mr. Hubbard; *Lieutenant Lennox*, J. M. Field; *Jerry Mayflower*, T. Placide; *Hon. Captain Pendragon*, M. C. Field; *La Role*, Mr. DeCamp; *Christine*, Miss E. Riddle. During the play Miss Henning danced the "Jackson hornpipe," and the evening concluded with the "Review, or the Wag of Windsor," with Mr. DeCamp as *Caleb Quotem*, Mr. Riley as *Looney McTwalter*, and T. Placide as *John Lump*. Mr. Ludlow made his first appearance in the new theatre on Monday, July 17, as *Dr. Pangloss*. He was supported by J. M. and M. C. Field, Thomas Placide, Miss Riddle, and others. The juvenile Miss Meadows appeared in a round of characters about this time, and drew good houses. On the 12th of August the opera "Der Freischutz" was given, with J. M. Field as *Caspar*, M. C. Field as *Adolph*, and Thomas Placide as *Killian*. The performance was attended by a band of nine Sioux Indians, who were greatly astonished and delighted at what they saw. The opera had quite a run, being repeated many nights, and was followed by Mrs. Drake, and then by the boy actor, Joseph Burke, known to the public as "Master Burke," who played *Romeo* in "Romeo and Juliet," *Terry O'Rourke* in "The Irish Tutor," *Sir Abel Handy* (an old man's part) in "Speed the Plough," and other characters. Besides his wonderful dramatic abilities, Master Burke was a talented musician, and introduced solos on the violin and dances into his plays. On the 27th of August, Charles B. Parsons made his first appearance

as a "star" in the *rôle* of *Damon* in "Damon and Pythias." On the 31st of August, N. H. Bannister's prize tragedy, written for Mr. Parsons, entiled "Caius Silius, the Slave of Carthage," was produced, with Mr. Parsons in the title *rôle*. On Thursday, September 7th, Mr. Parsons appeared for the last time on the stage, and subsequently became a minister of the Methodist Church.

Signor Vivalla, the "wonder of the world," followed Mr. Parsons in tricks of legerdemain, and was succeeded by Mrs. Pritchard, who, from the frequency of her appearance at brief intervals, would seem to have been a great favorite in St. Louis. On the 22d of September, 1837, Sizer's circus began a series of exhibitions on a vacant lot, and on the same date a benefit was given Alexander Crowl, superintendent and master builder of the new theatre. The performers were N. M. Ludlow, Sol Smith, Sr., Miss Riddle, Mr. and Mrs. Bennie, and others. On the 21st of September, Sheridan Knowles' play, "The Wrecker's Daughter," was given for the first time in St. Louis. In the latter part of September, Mr. Plumer, an English vocalist, and Mrs. Bailey (formerly Miss Watson) arrived in St. Louis, and played a brief engagement. In October following the opera "Cinderella" was produced, and on the 18th of October, Mr. Ludlow had his benefit, which was followed by the usual series of benefits for other members of the company.

On the occasion of Miss Petrie's benefit that popular actress was addressed from a private box by James B. Bowlin, who, on behalf of the young men of the city, presented her with a gold watch and chain and a handsome set of diamond and pearl jewelry. On the 1st of November, for J. M. Field's benefit, a tragic play entitled "Aaron Burr, Emperor of Mexico," written by W. H. Smith, of Alabama, was produced but was not successful. The season closed November 4th, and a few days later Miss Eliza L. Riddle, the leading lady, and Joseph M. Field, one of the principal members of the company, were married at the residence of Mr. and Mrs. Charles Keemle.

The season of 1838 began on the 11th of January, and for this the first winter season, Messrs. Ludlow and Smith organized an entirely new company, consisting of the following: Field, acting manager; Messrs. Lyne, Brunton, Rice, Henry, Benden, Rogers, McBride, West, Rose, Miller, Gentsen, etc.; Mesdames Petrie, Henry, Brunton, Muller, Lyne, Foster, etc.; leader of orchestra, Mr. Muller; musicians, Messrs. Foster, Jones, Robyn, Braun, Lothian, Foster, Johnson, Schnell, etc. The house was opened with Sheridan Knowles' play of "William Tell, or the Hero of Switzerland," and the opera of "Cinderella" was repeated. On the 15th of April the famous Ellen Tree made her first appearance in St. Louis as *Julia* in the "Hunchback," and remained for two weeks, personating *Juliet*, *Marianna* in "The Wife," *Lady Teazle*, *Constance* in "The Love Chase," *Ion*, and other *rôles*. She returned to St. Louis in 1839, and played another highly successful engagement. Miss Tree was followed in 1838 by John Sefton, the English comedian, Mrs. Gibbs, an English singer, and the celebrated Ravel family of gymnasts and acrobats, commencing on the 11th of May, 1838. Their engagement closed the spring season of that year.

The fall season commenced early in June, Miss Clifton being the "star." During her engagement Bulwer's "Lady of Lyons" was produced for the first time in America, with Miss Clifton as *Pauline*. She was followed by John R. Scott, the tragedian, after whom came Mr. Hodges and Miss Nelson in "Cinderella," and then Mrs. Shaw in "The Wife, or a Tale of Mantua." The fall season ended with the engagement of Mr. Llewellyn and his trained horse Mazeppa, which commenced on the 9th of August, after which benefits were given for the prominent members of the company.

Madame Celeste was the first "star" for the season of 1839, but her engagement was not as successful as were some of the previous ones. In January of this year it was announced that W. S. McPherson had purchased the Museum, and had fitted it up in a handsome, comfortable style. On the 12th of April "the long-expected giraffe" arrived, and was exhibited for one week near the upper market. Dan Marble followed Madame Celeste, and was followed in turn by Miss Ellen Tree, on the occasion of whose benefit (April 30th) "as high as five dollars premium was offered and refused for boxes." After Miss Tree came C. Mason, who was so much discouraged by the smallness of his audiences that he forfeited his engagement and "took his leave of a St. Louis audience forever." He was followed, May 6th, by Edwin Forrest, who appeared in "Virginius," and on the following night as *Othello*. During his engagement, Mr. Forrest appeared in nearly all his famous characters, and on the occasion of his benefit, May 18th, played the two *rôles* of *Metamora* and *William Tell*. On the following Monday evening Madame Celeste reappeared in "The French Spy," which was succeeded by "The Wizard Skiff," "Wept of Wish Ton Wish," etc. At Madame Celeste's benefit the receipts amounted to one thousand one hundred and forty-nine dollars, an unprecedented sum for St. Louis. On the 3d of June Mr. Love, "the celebrated dramatic polyphonist," made his *début* in St. Louis, and on the 6th an exhi-

bition of the Signers of the Declaration of Independence, "arranged as in Congress in 1776, and at the interesting time when the committee appointed to draft the declaration enters," was opened at 90 Second Street, between Vine and Locust. The figures, as large as life, were dressed in the costume of the period and "as on the occasion referred to, the immortal author, Jefferson, with scarlet waistcoat and breeches." A combination of which the principal attractions were George H. Barrett, John R. Scott, and Master Burke next played at the theatre, and on the 15th and 19th of June respectively Sol Smith and Master Burke were given benefits, and on the 22d the "School for Scandal" was rendered by the combination. Mr. and Mrs. Sloman followed, and the spring season closed on the Fourth of July.

On the 12th of August, the theatre, having been refitted, repainted, and decorated, was reopened. The season was a poor one, and the only incident worthy of note was the production of "The Jewess," founded on "Ivanhoe," with Mrs. Farren as Rebecca. The fall season closed on the 11th of December, in the latter part of which month Concert Hall, a building ninety by forty feet, and finished in plain but elegant style, was opened, with Mr. Wells as lessee. On the 9th of March, 1840, MacKenzie and Jefferson announced that they had fitted up a room in Concert Hall for dramatic representations. They produced that night "The Lady of Lyons," with the following cast: *Claude Melnotte*, Mr. Leicester; *Colonel Damas*, Mr. Jefferson; *Deschapples*, Mr. Sankey; *Madame Deschapples*, Mrs. Jefferson; *Pauline Deschapples*, Mrs. Ingersoll; *Dame Melnotte*, Mrs. MacKenzie. After the play Mr. Germon sang "The Lass of Gowrie," which was followed by a comic song by Master Jefferson, and a sailor's hornpipe by Mr. Burke, concluding with "An Affair of Honor," *Major Mimskey*, Mr. C. L. Green; *Martha*, Mrs. Germon.

The Concert Hall referred to was erected by Edward J. Xaupi. It was located on Market Street, between Second and Third, and was occupied by him as a dancing academy until 1855. It was subsequently used as a Mormon temple, a furniture-store, and again as a ball-room. M. Xaupi was the first dancing-master to introduce the masked ball, and "with such safeguards and restrictions that the first people of the city were regular in their attendance through the season." Every Friday night an assembly was given, at which were frequently present Miss Augustine Chouteau, the Sarpys, Renshaws, Deveaus, Carrs, Prattes, Von Phuls, Christys, Bogys, Bertholds, Berthouds, Pauls, Paschalls, Carr Lanes, Glasgows, Bowlins, Wrights, Cabannés, Papins, and others. In 1848, M. Xaupi was deputed to carry resolutions of congratulation, adopted by the citizens of St. Louis at a meeting held at the court-house, to Lamartine, Ledru Rollin, and Louis Blanc, leaders of the French revolution of that year.

In Paris he was entertained by the American consul, Peter Parley Goodrich, and on his return to St. Louis, in 1849, he introduced the redowa and Berlin galop, and in 1850 the Bavarian schottische, which became extremely popular. In 1851 he brought out the polka quadrille which bears his name, and in 1852 the Cellarius waltz. During the same year he introduced the Danish dance, and in 1853 the polka-mazourka and the polka-redowa. In 1855, Mr. Xaupi removed from the Concert Hall to Veranda (afterwards Armory) Hall, and in 1858 introduced the varsouvienne. A polka, arranged by him and known as Xaupi's polka, appeared in 1860. During the war he retired to a farm, but after the cessation of hostilities returned to St. Louis and resumed the teaching of dancing.

The spring season of 1840 at the theatre commenced on the 25th of March, the leading members of the stock company being Mr. and Mrs. George P. Farren, Thomas Placide, Mrs. W. H. Smith, Mr. and Mrs. Joseph Cowell, Mr. and Mrs. H. L. Bateman. The "stars" were E. S. Connor, Mr. Llewellyn, with his trained horse, Madame La Compte, C. Eaton, Mr. Sinclair, Mr., Mrs., and Miss Barnes, George H. Barrett, A. A. Adams, and Dan Marble. During this season the price of admission was reduced from one dollar to seventy-five cents. The season closed July 4, 1840, and the fall season opened September 1st, with drama on the stage and equestrian performance in the parquet instead of a farce. This season closed about the end of October, and was not a profitable one for the managers.

The spring season of 1841 began on the 26th of April with "The Dramatist," in which Mr. Ludlow and the stock company appeared, Ben De Bar playing the *rôle* of *Dandie Dinmont* in "Guy Mannering" on the second night. After a few nights of good plays the horses were again introduced, and dramatic and equestrian performances given in conjunction. This did not continue for any length of time, and the equestrian troupe departed to act under canvas. Early in May, Hackett, the famous comedian, played a few times as *Falstaff* in "Henry IV.," and the *Falstaff* of the "Merry Wives of Windsor," *Nimrod Wildfire* in the "Lion of the West," *Monsieur Morbleu*, and *Solomon Swap* in Coleman's "Who Wants a Guinea?" Following Mr. Hackett came Mrs. Fitz-

william and J. B. Buckstone, the great English actor, who played for two weeks.

The season closed about the middle of June, and during the vacation the prices of admission were reduced from seventy-five cents to fifty for dress circle and parquet, and from fifty to thirty cents for the family circle. The price of admission to the gallery remained at twenty-five cents. On the 3d of July, 1841, the menagerie and circus of Raymond, Weeks & Co. gave an exhibition, occupying a square of inclosed ground immediately east of the new or North Market. Mr. Hackett returned to St. Louis in October, and commenced his engagement on the 25th with *Falstaff*, following it with "On His Last Legs," "Monsieur Tonson," and other plays. The stockholders of the St. Louis Theatre Company held a meeting Jan. 3, 1841, and elected the following directors for the ensuing year: Joseph C. Laveille, John Ford, Albert G. Edwards, David B. Hill. On the 1st of February following, Mr. Stickney, proprietor of the Planters' House, gave the third of a series of assemblies. The spring season of 1842 at the St. Louis Theatre began early in May, with the engagement of Mrs. William Sefton and E. S. Connor, and closed in the latter part of June. On the 22d of that month ex-President Van Buren and suite visited the theatre. The fall season commenced about September 1st, but did not prove remunerative. It ended about the last of November, at which time Miss Eliza Petrie and James Thorne left the company.

In April, 1843, the St. Louis Theatre was sold, under a deed of trust, for twenty thousand dollars, that sum having been borrowed in 1837. The property, which had cost the stockholders seventy-eight thousand dollars, was purchased by George Collier, who proposed to Ludlow and Smith (who had lost seven thousand dollars by the sale) that a stock company be formed, with twenty thousand dollars capital, with the understanding that the members become personally bound to him for the amount of their subscription, of which they were to pay ten per cent. annually. They were also to keep the property insured, and pay ten per cent. interest on the twenty thousand dollars, and Ludlow and Smith were to pay a rental of three thousand dollars. The scheme fell through, owing to the fact that only three thousand dollars was subscribed, the subscribers being Gen. Bernard Pratte, Sr., James Clemens, Jr., and Ludlow and Smith. The theatre was then rented by Mr. Collier to Ludlow and Smith for three thousand dollars a year.

The spring season of 1843 commenced on the 20th of May with "The Honeymoon" and the "Actress of All Work," Miss Caroline Chapman appearing as the *Actress*. Miss Chapman played as a star for about two weeks, and was followed by Ben De Bar and William Chapman in "Robert Macaire," etc. On the 8th of June, Dr. Lardner commenced a series of lectures on astronomy, and on the 10th Mr. De Bar had a benefit. During the same month Otto Motty gave exhibitions of "chariot racing" and "Olympic games." On the 21st of July, Miss Emma Ince, the *danseuse*, who had been playing a brief engagement, had a benefit, and on the following evening Mrs. Brougham, wife of the famous John Brougham, made her first appearance in St. Louis in the "School for Scandal." She returned in October, and played in "As You Like It." Following Mrs. Brougham the Seguin Opera Troupe commenced an engagement (July 24th) with "La Sonnambula."

The fall season of 1843 commenced on the 2d of September with the melodrama "The Wandering Boys," followed by a farce, and on the 21st of September Joshua Silsbee made his first appearance in St. Louis, and played on alternate nights with Dan Marble, both of them being representatives of Yankee characters. On the 22d of September, during their engagement, Marshal Bertrand, one of the generals of the first Napoleon, attended the theatre. A new drama, "Redwood," was produced on the 25th, with Silsbee and Marble both in the cast, but it was not successful. The fall season closed with the month of October, and no dramatic performances appear to have been given at the St. Louis Theatre until the following spring. On the 22d of February, 1844, William S. Allen, formerly editor of the *Gazette*, lectured before the Lyceum. Sol Smith, together with the other members of the Ludlow & Smith company, arrived from New Orleans on the 3d of April. The "star" was the famous English tragedian Macready, who began his engagement in St. Louis on the 9th. The opening play was "Hamlet," with Mr. Macready in the title *rôle*, supported by Mr. Ryder as the *Ghost*, J. M. Field as *Laertes*, Mr. Eddy as the *King*, Mr. Farren as *Polonius*, Sol Smith as the *Grave-digger*, Mrs. Farren as the *Queen*, and Mrs. J. M. Field as *Ophelia*. In addition to "Hamlet," the farce "Artful Dodger" was given, with J. M. Field and Mrs. Farren in the principal *rôles*. During the remainder of his engagement Mr. Macready appeared as *Richelieu*, *Othello*, *Werner*, *Iago*, and *Macbeth*. About this time Vieuxtemps, the French violinist, and his sister gave a concert at the Planters' House. On the 20th, Hackett, the comedian, began a brief engagement, appearing as *Falstaff*, and in other characters. On the 17th of May a benefit was given to Mr. and Mrs. J. M. Field, who then retired from the stage for several years, Mr. Field

having associated himself with his brother, M. C. Field, and Col. Charles Keemle in establishing the *Reveille*, a daily newspaper, in St. Louis. Edwin Forrest, between whom and Macready there was a pronounced and bitter rivalry, followed the English actor two months later, appearing at the St. Louis Theatre as *Richelieu* on the 10th of June, to which succeeded *Metamora*, *Spartacus*, *Othello*, *Richard III.*, *Jack Cade*, etc. Herr Alexander, a German magician, who had given a series of four entertainments at the theatre immediately after Mr. Hackett's engagement, appears to have remained in St. Louis some weeks, for on the 22d he announced an exhibition at the Concert Hall. On the 24th Henry Placide began an engagement, appearing in his famous character of *Grandfather Whitehead*. On the Fourth of July the first day performance was given, and Mr. Ludlow, in his "Dramatic Life as I Found It," records that, "Matinées being then a new thing in the West, some of the company refused to play on this occasion." The spring season closed with the performance that night, and the fall season began on the 26th of August with "She Stoops to Conquer."

During the summer two benefits for charitable objects were given, one on the 21st of June, in aid of the sufferers by a great fire in New Orleans, and the other July 6th, for the benefit of the sufferers by the flood at St. Louis. Shortly after the opening of the theatre for the fall season, Mr. Ludlow went to Cincinnati to take the place of his partner, Mr. Smith, who was ill, and left the St. Louis Theatre in charge of J. M. Weston, stage manager, George Stanley, prompter, and A. B. Cook, treasurer. In October a new play, "Mary Tudor," translated and adapted from the French by Edmund Flagg, of St. Louis, was produced with success, and was followed by "The Bride of Abydos." On the 31st of October a new lease of the theatre for three years from the proprietor, George Collier, was effected by Messrs. Ludlow and Smith, who agreed to pay him two thousand dollars per annum. On the following evening (November 1st) Miss Sylvia, who afterwards became leading lady at the theatre, made her *début* as *Ernestine* in the "Loan of a Lover." The season closed on the 2d with the benefit of N. M. Ludlow.

The season of 1845 commenced April 26th. It was not a profitable one, owing, perhaps, to the financial condition of the country. The only "stars" which proved attractive were J. R. Anderson and the Seguin Opera Troupe. The theatre was closed from July 4th to September 1st, and the fall season closed in October.

The "Olympic Arena" and New York Circus, conducted by Howes & Mabie, arrived in St. Louis about September 25th, and gave equestrian performances. In the following November, M. Korpony, a dancing-master, appeared in St. Louis, and on the 22d of that month announced that he was prepared to teach the polka, which he claimed to have introduced into this country, and other dances. He added that, "if adequately encouraged," he would make St. Louis his permanent residence, and proposed that if four hundred families or young gentlemen subscribed by the year he would undertake to teach them two lessons a week throughout the year, charging for such instruction to each family or subscriber twelve dollars, and reserving to himself a "brief time in each year to visit the Eastern cities to avail himself of any improvements in his art." He seems to have met with "adequate encouragement," for in October of the following year we find that he had rented Odd-Fellows' Hall for a series of years and fitted it up for dancing assemblies. On the 25th of November (1845) a *soirée musicale* was given at the Planters' House by the Orphean Family, who among other airs sang "The Pilgrim Fathers," as given by them at the Astor House festival of the New England Pilgrim Society. At this time there was another theatre in St. Louis, the Vaudeville Theatre, No. 24 Main Street, between Market and Walnut, where, under the management of Madame Louise Thieleman, Miss Young had a benefit on the 26th of November. On the 10th of December following it was announced that "an enterprising gentleman" had leased the hall of the Mechanics' Institute and Lyceum, at the southeast corner of Third and Pine Streets, for the purpose of giving theatrical exhibitions, and on the 15th the hall was opened under the name of "The National Theatre." Howes & Mabie returned with their circus in March, and on the 26th of that month announced that they would give a day performance on the following Saturday at the Olympic Arms, at the corner of Fourth and Locust Streets.

The summer season of 1846 commenced on the 25th of April, with Mr. and Mrs. Charles Kean in the "Gamester." On the following Monday they appeared in "Much Ado About Nothing," which was succeeded by "Macbeth," the "Merchant of Venice," "As You Like It," "The Stranger," "Hamlet," "The Iron Chest," "Lady of Lyons," "Romeo and Juliet," "Ion," and other plays. Mr. and Mrs. Kean were followed by the Nun Acrobat Company, and on the 18th of May, Miss Mowatt's comedy "Fashion" was presented for the first time in St. Louis, and on the following night a benefit was given

for the fund of the Firemen's Association. On this occasion Mr. Farren delivered a "fireman's address," and N. M. Ludlow appeared as *Nipperken* in the "Rival Soldiers." The Swiss Bell-Ringers gave three concerts on the 1st, 2d, and 3d of June, and James E. Murdoch commenced on the 1st an engagement at the St. Louis Theatre, in the course of which he appeared in "Hamlet," "Venice Preserved," "Othello," "Macbeth," "Lady of Lyons," "School for Scandal," "Pizarro," "Money," "Romeo and Juliet," and a number of other plays. James Silsbee, the delineator of Yankee characters, commenced an engagement on the 13th of June, appearing in "Yankee Land" and the "Forest Rose," and subsequently as the Yankee peddler, *Sam Slick*, and other kindred *rôles*. The famous tragedian, J. B. Booth, played his first engagement in St. Louis in June, 1846, arriving on the evening of the 17th. He appeared on the opening night in "The Iron Chest," and subsequently in "A New Way to Pay Old Debts," "Richard III.," "The Apostate," "Bertram," and for his benefit in John Howard Payne's tragedy of "Brutus, or the Fall of Tarquin." The theatre, contrary to the usual custom, was kept open during August, the performances being given by the stock company until the 27th, when Dan Marble commenced a series of Yankee delineations. He was followed on the 8th of September by a company of Sable Harmonists, who appeared three nights, the entertainment being preceded by a play rendered by the stock company. On the 14th of September, E. S. Connor appeared as *Richelieu*, and subsequently in a number of other *rôles*. He was succeeded, September 30th, by Miss Julia Turnbull, the dancer. On the 8th of October Richard F. Russell had a benefit, and on this occasion J. M. Field, who had retired from the stage, appeared and acted on this and subsequent nights. On the 13th a benefit was given to the new orphan asylum, on which occasion the tragedy of "George Barnwell," and a drama, "The Orphan," were performed. On the following night Mr. Murdoch commenced another engagement, appearing in "Hamlet," and subsequently in a new drama, "Witchcraft," and in other plays. He was followed on the 22d by a company of gymnasts, known as "Bedouin Arabs." Mr. and Mrs. J. W. Wallack opened on the 27th with "Pizarro," to which succeeded "The Hunchback," "Love's Sacrifice," etc. On the 7th of November, the last night of the season, Sol Smith had a benefit, on which occasion "The King of the Commons" and the "Poor Soldier" were produced.

Signor Blitz, the famous magician, arrived in St. Louis in March, 1847, and gave the first of a series of entertainments on the 22d. The summer season of 1847 commenced April 19th. John Collins was the first "star," and began with "The Irish Ambassador" and "Born to Good Luck." The next "star" was the danseuse Madame Augusta, who appeared on Monday, May 3d, in the pantomime "La Geselle," assisted by Monsieur Fredericks, Charles Parsloe, and others. On the 17th of May, Camillo Livori, the great Italian violinist, gave a concert, which was repeated on the second night. Two nights later Mr. Ludlow appeared for the first time that season, playing *Young Wilding* in the "Liar." Dan Marble commenced an engagement of four nights on the 31st, and was followed June 4th by James R. Anderson, who played a number of tragic *rôles*, and on the 14th by Mrs. Anna Cora Mowatt, who appeared as *Pauline* in the "Lady of Lyons," supported by E. L. Davenport as *Claude Melnotte*. Mrs. Mowatt's engagement lasted for twelve nights, during which she played *Juliet*, *Julia* in "The Hunchback," *Beatrice* in "Much Ado About Nothing," *Mrs. Haller*, *Ion*, *Rosalind*, and other standard characters. On the 29th of June, Miss Mary Taylor and W. H. Chippendale appeared in the comedy "Naval Engagements," and subsequently in "London Assurance," "A Roland for an Oliver," and other plays. Miss Julia Dean followed on the 19th of July as *Julia* in "The Hunchback," and played an engagement of ten nights, appearing as *Evadne*, *Ion*, *Margaret Elmore* in "Love's Sacrifice," the *Countess* in "Love," *Mrs. Oakley* in "The Jealous Wife," *Bianca* in "Fazio," *Marianna* in "The Wife," and, on the occasion of her benefit, as *Juliet*. N. B. Clarke, a member of the stock company, had a benefit on the 30th of July, and appeared for the last time on the St. Louis stage. Madame Ciocca, a dancer, assisted by Signor Murra, began an engagement on the 16th of August, and was followed (August 26th) by Mrs. Henry Lewis and her husband and daughter, "La Petite Bertha," who played a brief engagement. During the absence of the regular company in the South the theatre was leased (August 27th) by the owner and manager of the Cincinnati Athenæum, for the purpose of giving equestrian performances. Miss Dean returned to St. Louis in September, appearing on the 3d as *Evadne*, and afterwards in a series of characters with which her name had become identified. Her benefit occurred on the 10th, when she appeared as *Mrs. Haller* in "The Stranger," and as *Widow Cheerly* in "The Soldier's Daughter." Mrs. Louisa Hunt commenced an engagement of thirteen nights on Monday evening, Sept. 13, 1847, appearing as *Constance* in "The Love Chase," and as *Joseph*

in "The Young Scamp." On the subsequent nights she played *Ion*, *Rosalind*, the *Widow Brady*, *Donna Olivia*, *Isabella*, *Fortunio*, and other parts. On her last and benefit night she played *Pauline* in "The Lady of Lyons." Dan Marble followed Mrs. Hunt, and played eleven nights. Among the benefits given to different members of the company about this time was that of Mrs. Russell, Sr. (October 4th), who was then very popular in St. Louis. On the 14th, A. Singer made his *début* as an actor in the *rôle* of *Carwin* in John Howard Payne's "Thérèse, the Orphan of Geneva." A week later (October 20th) Mlle. Dimier, a French dancer, assisted by Mlle. Fanny Mautin, Monsieur Schmidt, Mr. Charles, and Miss Kennerly, began an engagement which lasted eight nights, after which J. H. Hackett returned and appeared in his familiar impersonation of *Falstaff* and in other *rôles*. The most prominent event of the season was the remarkable success of the Viennese children, under the direction of Madame Josephine Weiss. The children, forty-eight in number, were very graceful dancers, and played ten nights in St. Louis to large audiences, commencing November 5th and concluding November 16th, their last performance terminating the summer season at the St. Louis Theatre.

The season of 1848 did not commence until the second week in April, and during the interval the Orphean family (about the 1st of March) gave three concerts. Dan Rice & Co.'s circus exhibited in St. Louis, giving the last performance on the 27th of May, and Madame Anna Bishop arrived on the 6th of June, accompanied by her early tutor, Monsieur Boschea, who was a performer on the harp, and gave a concert at the Planters' House. At the St. Louis Theatre the season was inaugurated early in April by the Viennese children, who were followed by Miss Julia Dean, Mrs. Farren, Mr. Winchell, Mrs. Louisa Hunt, George W. Jameson, John R. Scott, George Hill, Charles Dibdin Pitt, J. B. Booth, who played an engagement about the middle of October, and Madame Augusta, whose engagement closed the season November 11th. In the spring of 1849, Dan Marble played his last engagement in St. Louis, and soon after died of cholera in Louisville.

For the season of 1850 the first persons announced as "stars" were C. A. Logan and his daughter Eliza, who were followed by Mr. Hudson, James E. Murdoch, the Manvers Opera Troupe, C. D. Pitt, Ben De Bar, Mrs. Farren, Julia Dean, Charles Burke, and the Bateman children. On the 10th of October, Mrs. Chapman had a benefit. Lectures appear to have been a popular form of entertainment in St. Louis about this time. On the 21st of November the Rev. W. G. Elliot delivered the second of a series of lectures in Wyman's Hall, before the Mercantile Library Association, "Rome" being the subject. A few evenings before the first lecture had been delivered by Col. Benton. The ninth and last lecture was delivered on the 22d of December, at the same place, by Rev. Father Smarius, a professor in the St. Louis University.

Bates' Theatre.—On the 9th of January, 1851, a new theatre, known as Bates' Theatre, situated on Pine Street near Fourth, was opened by John Bates, the play being the "Honeymoon," with the Raymonds, Mr. Fleming, Miss Maywood, and others in the cast. Before the play Mr. Fleming delivered the opening address, which was written by Edmund Flagg, of St. Louis. The movement for the erection of the theatre began about May, 1848, and was prosecuted vigorously by Mr. Bates, who already owned a theatre in Cincinnati. The building, which was eighty-four by one hundred and thirty-one feet, was erected on the north side of Pine Street, about midway between Third and Fourth Streets. The manager was Mr. Bates' son, James W. Bates, and the stage manager, R. Malone Raymond. J. W. Bates continued to manage the theatre until his death on the 11th of February, 1853, from the effects of an accidental fall on the pavement. Mr. Bates, who was about thirty-five years of age, was his father's only son, and had assisted his father in the management of theatres at Cincinnati and Louisville. Shortly after his death his father relinquished the management of the theatre in St. Louis, which he finally sold. Among the actors who appeared at the theatre were Charlotte Cushman, J. Wilkes Booth, Maggie Mitchell, who made her first appearance as *Fanchon* there; J. K. Emmet, Thomas Connor, Ristori, James Anderson, the English tragedian; Charles Matthews, Edwin Adams, James E. Murdoch, Charles Kean and Ellen Tree, Madame Celeste, James Wallack, Rogers and Shelly, G. V. Brooks and his wife, Avonia Jones, daughter of the eccentric Count Johannes; James Wallack, Jr., E. L. Davenport, the Raven family, and many others.

Among the vocalists who sang at the theatre were Madame Nilsson, Pauline Lucca, Parepa Rosa, and Louisa Pyne. Miss Blanche De Bar made her *début* there as *Miss Hardcastle* in "She Stoops to Conquer," and Ben De Bar and Mark Smith often appeared on the stage together. It was on the same stage that William J. Florence and Barney Williams secured their first successes in the West, and Lotta her first "hit" east of the Pacific Slope. What came very nea

being a terrible catastrophe occurred in Bates' Theatre in 1853, while the famous Ravel family were playing an engagement. After the theatre was closed and locked up the ceiling fell with a terrible crash. Had there been an audience present many lives would have been lost.

Ben De Bar became manager of the theatre in 1856, having purchased it from Mr. Bates for fifty-six thousand dollars, and its name was changed to the St. Louis Theatre, and in 1860 to "De Bar's Theatre." Adah Isaacs Menken made her last appearance in *Mazeppa* in St. Louis at De Bar's. The theatre was the scene of two murders,—the killing of Mabel Hall, a ballet-dancer, by Edgar Moore, and the murder committed by William Wieners. About 1874 the property was leased to William Mitchell, who changed the name to "Theatre Comique." Ben De Bar died in the summer of 1877, leaving the property as a part of his estate, and appointed John G. Priest as executor of his will. Some time prior to his death Mr. De Bar gave a deed of trust on the property, and under this deed of trust it was sold to George Fales and Alfred G. Baker, of Philadelphia.

Mr. Mitchell leased the theatre for six years, and during the latter portion of that period the manager was William H. Smith. The building was destroyed by fire on the 9th of December, 1880.

On the 2d of March, 1851, a number of gentlemen signed a letter to P. T. Barnum, requesting him to deliver a temperance lecture. Following are the names of the signers: L. M. Kennett, Louis A. Labeaume, Alexander J. P. Garesche, J. B. Colt, N. J. Eaton, W. M. McPherson, George Maguire, Thomas Harney, F. A. Dick, Benjamin Farrar, R. J. Adams, Samuel Copp, Jr., John Hogan, J. B. Crockett, Charles A. Drake, J. H. Alexander, Wayman Crow, John Simonds, H. D. Bacon, Robert K. Woods, J. E. Woodruff, and R. M. Henning. Mr. Barnum accepted the invitation, and Messrs. Ludlow & Smith having tendered him the use of their theatre for the occasion, the lecture was delivered there. An admission fee of ten cents was charged, and the proceeds given to the orphan asylum.

Mr. Barnum was the agent for the famous singer, Jenny Lind, who arrived in St. Louis in March, 1851, and gave her first concert at Wyman's Hall on the 18th of that month. The conductor was Julius Benedict, and the orchestra was led by Joseph Burke.

The price of admission was fixed at five dollars to all parts of the hall, and the seats were sold at auction. Ten cents for admission to the auction-rooms being charged, the sum realized from auction-room admissions was handed to the mayor to be applied to charitable purposes. The second concert took place March 20th, and "Casta Diva," gems from "Norma," and the "Bird Song" were among the selections rendered. She was assisted by Signor Belletti, baritone. On the following day P. T. Barnum delivered another temperance lecture at the theatre, and on the 22d, Mlle. Jenny Lind gave a third concert.

The streets in the vicinity of the hall were thronged with people, and many persons gathered at open windows and even on the roofs of houses to catch the dulcet strains of the singer's voice. Miss Lind was presented on the 24th of March with a certificate of membership in the Polyhymnian Society. Mr. Haven, president of the society, presented the certificate, which was enveloped in two small and beautiful satin flags, the one American and the other Swedish. Miss Lind thanked them for their serenade of the previous evening, and solicited from them a concert in order that she might hear their full orchestra. The society complied with her request, and gave a concert at which Miss Lind was present, accompanied by Messrs. Benedict and Belletti. Two days later Gen. Tom Thumb arrived in St. Louis, and prepared to hold "levees" at Wyman's Hall. On the night of March 26th, Jenny Lind gave her last concert, and on the morning of the 27th, Hon. L. M. Kennett, mayor of the city, received through L. C. Stuart the sum of $2000 from Miss Lind and Mr. Barnum, for the following charitable purposes: Orphans' Home, $250; Protestant Orphan Asylum, $250; Catholic Male Orphan Asylum, $250; German Ladies' Benevolent Association, $250; and for the relief of distressed emigrants of every nationality, $1000.

On the 27th of May, 1851, Elliott R. Graham, who was to have filled an engagement at Bates' Theatre, died at the American Hotel. About this time Miss Charlotte Cushman played at Bates' Theatre, for the first time in St. Louis, and on the 2d of June, Miss Davenport commenced an engagement at the St. Louis Theatre, appearing as *Julia* in the "Hunchback." The summer season of 1851 was the last season under the management of Ludlow & Smith at the St. Louis Theatre. It commenced early in May, and embraced the following attractions: Mlle. Frank ballet troupe, the Bateman children, C. Burke, Mr. Collins, Mrs. Farren, Miss Davenport, and Messrs. Macallister and De Bar. The season terminated in July, and soon after the property was sold by its owner, George Collier, to the United States government, and a custom-house and post-office were erected on the site. On the 10th of July the members of the stock company tendered Messrs. Ludlow

& Smith a complimentary benefit prior to their retirement from the business in St. Louis.

"Female pedestrianism" was not unknown at the West even at this relatively early day, for in October, 1851, we find that a Miss Cushman had undertaken the feat of walking five hundred miles in five hundred consecutive hours. She was described as being "a graceful as well as a rapid walker," and while on duty was dressed in full "Bloomer" costume, consisting of pink silk dress, pink trousers, and bonnet trimmed with cherry-colored ribbon. Large crowds, we are told, were attracted "by this novel spectacle."

Grand Opera-House.—On the 15th of September, 1851, the old St. Louis Theatre was reopened for a brief period by J. M. Field, with a company from the Varieties Theatre, New Orleans, then under the management of Thomas Placide, which included W. H. Chippendale, George Holland, Mr. and Mrs. J. M. Field, and others. As the St. Louis Theatre was about to be torn down, Mr. Field had already determined to procure the erection of another theatre, and on the 2d of May, 1851, had published an announcement of his scheme, in which he proposed that the theatre be built by subscription, and that certain privileges be extended to the stockholders, among them being a free admission to the theatre, "the accommodation of a reserved portion of the front of the house, box, or parquet," the use of "an elegant saloon or club-room," and the right to sell their stock should they desire to do so. Mr. Field also proposed to repay the amount of the capital stock to the holders in ten annual installments, with the understanding that the annual payments should constitute a fund with interest accumulating for ten years, which fund should stand as an insurance upon the building, to be drawn upon in case of fire, in which event a renewal of the ten years' contract was to be permitted.

At the end of the ten years the capital stock, with the accumulated interest, was to be divided among the subscribers, and the property was to belong to Mr. Field. It was proposed, also, to so construct the theatre as to permit its conversion, by raising the flooring of the parquet to a level with the stage, into a ball-room, the stockholders to have the right to avail themselves of its use for dancing assemblies once in every month. The project was taken up by the Varieties Dramatic Association, an organization that had its beginning in a social club. The first formal meeting of the Varieties Dramatic Association was held June 10, 1851, at the Planters' House. There were present Messrs. C. P. Chouteau, Sanford J. Smith, B. W. Alexander, Peter Brooks, and J. M. Field. Mr. Chouteau was elected president of the association, Mr. Smith vice-president, and Mr. Anderson secretary and treasurer. The erection of the theatre having previously been agreed upon, a building committee was appointed, to consist of Messrs. Chouteau, Field, and Alexander, and resolutions were adopted appointing George I. Barnett the architect of the new theatre and calling for the payment of subscriptions as follows: Twenty per cent. on August 15th of that year, twenty per cent. on September 15th, twenty per cent. on October 15th, twenty per cent. on Jan. 1, 1852, and twenty per cent. on March 1, 1852. C. P. Chouteau was chairman of the Planters' House meeting, and J. M. Field secretary. Treasurer Anderson at once issued orders for the payment of one hundred dollars on each subscription on the dates designated, which showed that the amount of a single subscription was five hundred dollars. The articles of the association adopted by these gentlemen set forth that the stock of the association was to be twenty-five thousand dollars, in shares of five hundred dollars each.

A lot on the south side of Market Street, between Fifth and Sixth Streets, was leased from T. S. Rutherford for thirty years, as the site of the new theatre, which was to be known as the "Varieties Theatre." The lot had a frontage of seventy-two and a half feet, and a depth of one hundred and thirty-eight feet, and on it was erected a handsome building, "with many novel and important improvements adopted from the designs of Barthelemy's Theatre, lately erected in Paris and now attracting wide attention in Europe." The corner-stone was laid on the 18th of August, 1851, by Sol Smith, "the oldest man of the theatrical profession in St. Louis," the orator of the occasion being Uriel Wright. The following articles were deposited in the corner-stone:

A copy of several morning city papers, both English and German.

A full account, from the *Missouri Republican*, of the Pacific Railroad celebration.

A memoir of the association concerned in the theatre enterprise, with the names of the subscribers, officers, and architect, and the city officers.

Daguerreotype likenesses of Uriel Wright, orator of the day, and J. M. Field, manager.

Lithograph of the St. Charles Theatre, New Orleans, with portraits of its managers, Sol Smith and N. M. Ludlow.

A proof copy of Mr. Wright's speech, and the various American coins of the year 1851.

The theatre, which was known as the Varieties Theatre, opened with a performance by a good stock company, under the management of J. M. Field, on the 10th of May, 1852. The first piece on this occasion was a prelude entitled "You Can't Open," written by Edward W. Shands, of St. Louis, which was followed by the comedy "When There's a Will

There's a Way," in which Mr. and Mrs. J. M. Field played the leading parts, assisted by C. L. Stone and Miss M. A. Hill. After the comedy Madame Ciocca, Mlle. Baron, Mons. Espinosa, and others executed a number of dances, and the entertainment concluded with the farce "The Good for Nothing," with Annie Lonsdale (her first appearance in St. Louis) as *Nan the Good for Nothing*, supported by W. H. Chippendale. Mr. Field offered seventy-five dollars for the first and fifty dollars for the second best poem to be delivered as the opening address, which "must be written by a citizen of St. Louis and presented by the 30th instant;" but whether a prize was awarded to any other competitor than Mr. Shands does not appear. The new theatre was a handsome building, finely decorated and furnished, but Mr. Ludlow tells us[1] "not so large and comfortable for a summer theatre as the St. Louis Theatre." The season, which terminated on the 13th of June, 1852, was not remunerative to Mr. Field, who retired a year later.

The theatre remained closed for two years, after which Dr. Henry Boernstein, a prominent journalist of St. Louis, opened it with a German theatre company. He failed after a brief season, and it was again closed.[2]

For a time the building was used as a club-house, and in 1865, Messrs. George Deagle and George D. Martin took the house and restored its name, Varieties Theatre. After several successful seasons under their management, it fell into the hands of A. B. Wakefield and Stilson Hutchins. The name was then changed to Wakefield's Opera-House. The theatre was remodeled, and the opening performance was given in the fall of 1872. A year later Ben De Bar took possession, and it was thereafter known as De Bar's Opera-House.[3]

In 1875, John W. Norton became business manager for De Bar, and since the comedian's death has been the sole manager. The new Grand Opera-House was built by Pierre Chouteau. The last per-

[1] "Dramatic Life as I Found It," by N. M. Ludlow, p. 717.

[2] Alexander Pfeiffer, the German tragedian, died in St. Louis on the 13th of September, 1866, at the age of sixty-one years. He was an actor of extensive reputation and high rank in Germany, but a difference with the manager of the theatre at Mannheim, Baden, growing out of the expression of liberal political views by Mr. Pfeiffer, determined him to emigrate to this country, which he did in 1851. At Cincinnati, Chicago, and St. Louis he played very successful engagements, appearing as *Hamlet*, *William Tell*, *Don Carlos*, *Charles de Moor*, *Narcisse*, *Faust*, *King Lear*, and other characters. He made St. Louis his home, and during the remainder of his life was a prominent and useful member of the community.

[3] Benedict, or, as he was generally known, Ben De Bar, was born in Chancery Lane, London, on the 5th of November, 1812, and died on the 28th of August, 1877. His father was at that time a book-keeper in the Bank of England, but afterwards became business manager and agent for an Irish nobleman, whose estates lay in County Down, Ireland. The family removed to a little town named Hillsboro', in that county, where, in 1826, the elder De Bar died, leaving the family, consisting of the widow and two children, ill provided for. Ben remained at school until his twelfth year, a few months after his father's death, when he was placed in a grocery-store in order to learn the business. The occupation proved very distasteful to him, and he soon after ran away and joined a theatrical company. He subsequently entered an attorney's office, with the view of becoming a lawyer, but finally, his mother realizing that his inclination for the stage was as strong as ever, determined to permit him to become an actor. Ben thereupon proceeded to London, and obtained a situation as a ballet-dancer in a minor theatre, where he made the acquaintance of Mr. Corri, who became noted in after-years as a ballet-master, and was treasurer for Mr. De Bar at Bates', then known as the St. Louis Theatre.

In 1832, Ben De Bar made his first appearance as a player at the Theatre Royal, Margate, Kent, England, under the management of Faucet Saville, taking the part of the page in the farce of "The Page and the Purse." His first engagement was as "general utility," and afterwards "walking gentleman." A year later he was called on unexpectedly to take the part of leading man, and acquitted himself so satisfactorily that his salary was increased from $3.25 to $3.75 a week. From the Theatre Royal he went to the Victoria Theatre, then managed by Henry Wallack, where he remained until the spring of 1835. In that year James H. Caldwell had finished building the St. Charles Theatre in New Orleans, and accompanied his agent, Kennet, to England to secure actors for the opening on November 30th of that year. Among those he engaged was Ben De Bar, who was to receive a salary of fifteen dollars per week, which was a large advance on what he was then getting. Ben accordingly came to America, bringing with him his mother and his sister, who afterwards married Junius Brutus Booth, Jr., and became the mother of Blanche De Bar Booth, but who is known on the stage as Blanche De Bar.

On board the vessel in which Caldwell and De Bar crossed the ocean were a number of theatrical celebrities, among them Miss Charlotte Cushman, Mrs. Cowell, Mrs. Maeder (formerly Miss Clara Fisher), the Madeira prodigy, who was the first to play protean parts; Mr. Latham, the celebrated singer, and Mr. Finn.

On the opening night of the St. Charles Theatre, Ben De Bar appeared as *Sir Benjamin Backbite* in the "School for Scandal." As his agreement with Mr. Caldwell was that he should play anything that he was cast for, he had fitted himself for a great variety of *rôles*. At that time he was a good-looking young man "with a healthy English face," slim and lithe, and expert at broadsword exercise. As *Strapado*, a drunken corporal, in "The Dumb Girl of Genoa," he made a great hit, the principal feature of the *rôle* being a sword combat with two antagonists. In 1837 he appeared in New York, at the old National Theatre, on Leonard and Church Streets, as *Frank Frisky*. Here he made the acquaintance of Mrs. Maria Conduit, an English opera-singer, who was then a widow, and in a short time was married to her. During the following year (1838) he played at the old St. Louis Theatre, being "second comedy man" in the company of Ludlow & Smith. From St. Louis he went to Louisville, Cincinnati, and Nashville. At the end of his Nashville engagement he procured a flat-boat for the transportation of himself and company, which was propelled by rowing down the Cumberland River, a distance of several

formance was given at the old opera-house on the night of April 11, 1881, when the Rankins closed with the "Danites." During the last performance the workmen began tearing down the house, and when the audience came out they found the entire front torn away, and within twenty-four hours every vestige of the theatre, excepting the four walls, had been removed. The house was remodeled and refurnished, and is in every respect a magnificent theatre. The building was reopened to the public on the 29th of August, 1881, on which occasion Mayor William L. Ewing delivered the dedicatory address. At the close of the mayor's remarks the curtain fell for a moment, and rose upon a drop with the figures of the Muses painted on it. Miss Emma Stockman then appeared, attired in Greek costume, and recited a prologue entitled "The Mask of the Muses."

The curtain then rose on "Fritz in Ireland," with J. K. Emmett in the title *rôle*. The first audience was a brilliant and fashionable one, and ever since the opening the opera-house has enjoyed undiminished popularity. It is one of the most complete and best-equipped theatres in the country, and the manager spares no pains to secure the leading attractions of the day.

St. Louis seems to have been a rather doubtful city for theatrical enterprises about 1852. "The new theatre on Pine Street," we are told by a writer in the *St. Louis Republican*, "now the Comique, continued to grow in the favor of the people. The company, in nearly all positions and business, was immeasurably superior to the old company of Ludlow & Smith, while the scenery, by Leslie, and the wardrobe and properties were such as had never been seen here.

---

hundred miles, to a point where they were enabled to take the steamer for New Orleans. In the latter city Mrs. De Bar died shortly after their arrival, leaving an infant daughter, who afterwards became Mrs. Dexter. In 1840 he went to London, introducing his specialty of *Mose* at the Standard Theatre, but returned to New York during the same year and obtained an engagement with Hamblin at the old Bowery Theatre. Up to this time he had acted only tragic or serio-comic characters, but the low comedian of the Bowery dying suddenly, he was cast for a low comedy *rôle*, much to his disgust. It turned out, however, that it was a fortunate thing for him, as that line of characters proved to be his forte.

His next engagement was at the Olympic, New York, of which Mr. Mitchell was the proprietor. He remained in New York several years, and in 1843 married his second wife, Miss Henrietta Emma Adelaide Vallee, a ballet-dancer, who was born in Philadelphia in 1828. She made her *début* as a danseuse at the Walnut Street Theatre in that city in 1839, traveled afterwards with Fanny Ellsler, and in 1848 made a hit in the *French Spy*. She retired from the stage in New Orleans in 1857.

Mr. De Bar became proprietor of the Chatham Theatre, Chatham Square, New York, in 1849, and frequently appeared as an actor. He retained the theatre for three years, and then commenced a starring tour which lasted for four years, appearing in the principal cities of the United States. He then revisited England, where he remained one year, appearing as *Mose* to large houses in London. On his return to New York he started on another starring tour, and in 1850 became stage manager at the St. Charles Theatre, New Orleans, then under the control of Ludlow & Smith. In 1853 the latter firm offered to sell him for ten thousand dollars their franchises, wardrobe, books, scenery, and properties. The building had been erected by Ludlow & Smith, but they had sold it to the Gas Bank, taking a lease for five years, of which two years were unexpired. Mr. De Bar had but two thousand five hundred dollars at the time, and five thousand dollars was required to be paid down, and the balance in one year. But Mr. De Bar being the especial favorite of a host of the prominent young men of the place, they came to his assistance and bought enough season tickets at fifty dollars each to make up the amount of the first payment. The purchase was made and the season proved so profitable that Mr. De Bar realized a profit of thirty thousand dollars. He afterwards purchased the building and owned it until his death. In 1855 he purchased the St. Louis Theatre, which had been built on Pine Street by John Bates, of Cincinnati, and conducted this theatre successfully until 1873, when he leased it to Mr. Mitchell, having purchased a commanding interest in the Wakefield or Grand Opera-House, which he continued to manage until his death. As an actor, Mr. De Bar was extremely popular, his favorite and most successful characters being the *Drunken Corporal* in the "Dumb Girl of Genoa," *Tom Tape, Dick Swiveller*, the *Artful Dodger, Roaring Ralph Stackpole, Blueskin, Robert Macaire, Toodles*, the *Mock Duke, Tony Lumpkin, Mark Meddle*, the *Stage-Struck Tailor*, and the Shakesperian *rôles* of *Falstaff, Touchstone*, and the *Grave-Digger* in "Hamlet." His *Falstaff* was one of the famous characterizations of his day, and in it he rivaled Hackett. During the later years of his life he starred in *Falstaff*, and everywhere received the commendations of the public and the critics. Mr. De Bar cherished the hope of appearing in the character in his native country, in the same theatre at which he appeared as a ballet-dancer, but died before carrying this project into execution.

His humor was unctuous and genuine, and his personal character was that of a genial, warm-hearted man. As a manager, he introduced to the St. Louis boards at various times the most distinguished operatic and dramatic talent, with a few exceptions, to be procured in the United States or England. When "stars" appeared at his theatre he frequently assumed the comedy *rôles*, thus greatly enhancing the value of the entertainment. He was particularly kind to Lotta, who was a favorite with him, and when he appeared with her the contrast of his size and build with her diminutive proportions never failed to produce a ludicrous effect. Mr. De Bar was identified with the St. Louis stage as actor and manager for a period of thirty years, and made a deep and permanent impression upon the community, not only by his worth as an actor and tact and enterprise as a manager, but also by the joviality of his temperament and his activity in furthering laudable enterprises. The immediate cause of his death was softening of the brain, supervening on paralysis. Mr. De Bar was a Mason, and a member for nearly twenty-one years of Missouri Lodge, No. 1. His remains were conveyed to Masonic Hall, and lay in state for twenty hours, after which the funeral took place from his residence, No. 1111 Chestnut Street, according to the ritual of the Protestant Episcopal Church, of which he was a member. The body was interred at Bellefontaine Cemetery.

Still, unless the management put out strong attractions, a beggarly account of empty boxes was the inevitable result. At that time St. Louis was notoriously a bad theatrical town."

Madame Bishop, the singer, returned to St. Louis in January, 1852, and gave a series of "lyric entertainments." About this time a museum in the second and third stories of the post-office building was opened to the public. The exhibition comprised "a forest of animals, a large variety of birds, in which every clime is represented by several specimens, almost every species of reptiles and insects, and nearly four hundred ancient coins." The exhibition occupied some six or seven large rooms. Among the historical objects were numbers of the *Boston News-Letter*, "published by authority," from Monday, April 18th, to Thursday, April 21, 1720, a money-chest said to have belonged to William Penn, and the hilt and part of a sword said to have been dropped by an officer at Braddock's defeat at Fort Du Quesne. In addition to these were shown "two of the largest mosaic specimens in the country," a number of paintings, cosmoramic views, specimens of Chinese handicraft, minerals, etc.

The American Hippodrome announced, Aug. 7, 1852, that it would exhibit on the "floating palace" at the foot of Market Street. The "floating palace" had seven thousand five hundred square feet of space in the dress circle, and nearly four thousand feet in the gallery.

Ole Bull, the violinist, appeared in St. Louis early in December, 1852, and gave several concerts.

People's Theatre.—In the fall of 1852, Dr. George T. Collins determined to erect a new theatre, to be known as the People's Theatre, and on the 21st of August it was announced that the site of Stokes' Amphitheatre on the south side of Olive Street, between Third and Fourth, had been secured, and that a building, sixty-seven by one hundred and twenty-eight feet, with a capacity for seating from two thousand to two thousand five hundred persons, would be erected. The rates of admission were to be reduced from those previously charged in St. Louis to thirty-five, twenty-five, and fifteen cents to the various parts of the house. The architect was George I. Barnett, and the builders, Joseph Hodgman and William B. Mawzy, who, in connection with Otis Haven, were the proprietors.

The ornamental work and decorations were executed by J. B. Laidlaw and Thomas Noxon. The theatre was opened on the 9th of December, 1852, by Hodgman, Mawzy & Haven, under the management of G. T. Collins, who wrote the opening address, which was recited by Mr. Perry. The address was followed by the comedy "Wild Oats," and a number of songs and dances, the entertainment closing with a farce. Dr. John R. Atkinson subsequently became the manager, and among the actors in the company were Brooke, in low comedy; Huntley, in old men's parts; Perry, in genteel comedy and tragedy; Mrs. Reeves, in "singing" *rôles;* Allen, in general work; and Mlle. Oceana, in dances. The orchestra was under the direction of J. Bernard. Dr. Atkinson did not retain the management long, and was succeeded by Miss Julia Bennett. About this time Sir William Don, the English actor, played an engagement at the People's. On the 6th of March, 1854, George Wood became manager, opening with a stock company which included Mr. and Mrs. Brunton, Sallie St. Clair, and others. Mr. Wood leased a store on Fourth Street, adjoining the building, and constructed a new entrance to the theatre, which was reopened by the Kellers, who played to large houses. Subsequently J. H. McVicker, of Chicago, became Mr. Wood's stage manager, and played in "Yankee" pieces. The scenic artist of the theatre was a Mr. Laidlaw, who was afterwards murdered. Among the actors who appeared at the People's Theatre from time to time were Peter Richings, Henry I. Bateman, Henry Perry, John Mortimer, James Wallack, Sr., and Edwin Booth. The sensational plays "Pirates of the Mississippi" and "Wizard of the Wave" were produced during Mr. McVicker's management, and in 1857 or 1858 William E. Burton played an engagement of several weeks' duration. The People's Theatre was afterwards transformed into a large bowling saloon conducted by Mr. Lupe.

The new People's Theatre, situated on the southwest corner of Sixth and Walnut Streets, was erected by Mitchell & Robertson, the present owners, in 1881, and was opened to the public September 10th of the same year, under the management of W. H. Smith. The building is three stories high, well constructed, and is a first-class theatre in every particular. Since the opening none but the best attractions have been engaged. The building cost nearly one hundred and twenty-five thousand dollars.

Mr. and Mrs. Barney Williams played an engagement in St. Louis in March, 1853, during which Barney Williams appeared in the character of *Mose*. Spalding & Rogers' Circus and Great European and American Show exhibited in St. Louis during the same year. On the 24th of March, 1853, James P. Bailey, who had been treasurer for Ludlow & Smith for a number of years, died in St. Louis.

Early in December, 1853, the Ravel family commenced an engagement at Bates' Theatre, and in the

latter part of December, 1853, Miss Stone delivered a series of lectures at the Mercantile Library Hall, the subject of her lecture on the 21st being "The Legal and Political Disabilities of Women."

The German Theatrical Association commenced a series of performances for charitable objects at the Varieties Theatre on the 17th of January, 1853.

Matilda Heron first appeared in the *rôle* of *Camille*, in which she afterwards acquired such an extensive reputation, before a St. Louis audience early in January, 1856. The engagement was originally for six nights, but such was her success that Miss Heron prolonged her stay in St. Louis to four weeks, during which she nightly "crowded the theatre with the most enthusiastic and discriminating audiences." At a benefit given to Miss Heron the house is said to have been the largest that had ever assembled at any theatre in St. Louis. On this occasion Miss Heron delivered an "address."

On the 19th of January, 1857, Edwin Booth, the famous tragedian, made his first appearance in St. Louis, personating *Richard III.*

In the latter part of April, 1862, J. Wilkes Booth, who afterwards assassinated President Lincoln, appeared at the St. Louis Theatre, playing *Charles De Moor* in "The Robbers" on the opening night of his engagement.

Academy of Music.—During the winter of 1863 the Legislature of Missouri incorporated the "Academy of Music Association," with Truman Woodruff, William McKee, O. H. Platt, Edwin Ticknor, and James D. Leonard as incorporators. These gentlemen were empowered to form an association, whose object should be "to erect a spacious hall and other buildings to accommodate public assemblies for different objects, and to furnish an adequate number of rooms to accommodate private as well as public assemblies." The capital, in shares of one hundred dollars, was to be one hundred thousand dollars, with the privilege of increasing it to two hundred thousand dollars. At a meeting held on the 24th of June, 1864, the Philharmonic Society was invited to co-operate in the enterprise, and the following persons were appointed a committee to solicit subscriptions: J. H. Lucas, Francis Whittaker, D. A. January, J. M. Krum, S. H. Laflin, George I. Barnett, Charles Balmer, H. C. Marston, George W. Parker, C. B. Lord, Benjamin Stickney, G. B. Allen, O. D. Filley, John Whittaker, L. C. Garnier, John How, Henry L. Patterson, Charles Taussig, William D'Oench, Edward Chase, W. A. Hargadine, George Knapp, Dabney Carr, G. L. Stansberry, W. L. Ewing, B. M. Runyan, J. T. Swearingen, W. H. Benton.

The project seems to have lain dormant until the winter of 1865, when another charter was granted by the Legislature, with the following as incorporators: Adolphus Meier, E. A. Fellerer, James H. Lucas, Charles Speck, Edgar Ames, John M. Krum, M. L. Linton, Charles Balmer, Edward Chase, Charles Taussig, William H. Benton, Nicholas Schaeffer, Charles B. Lord, Benjamin Stickney, William Robyn, Gerard B. Allen, William D'Oench, George W. Parker, Charles F. Meyer, George P. Plant, Henry A. Homyer, Henry Shaw, Felix Coste, John R. Shepley, and John H. Fisse. The capital stock was fixed at one hundred thousand dollars, with the privilege of increasing it to three hundred thousand dollars, each holder of at least five shares of stock to be allotted one reserved seat for all dramatic and operatic performances; but no stockholder to have more than five such seats, and the directors to have the option of canceling such allotment, after paying the owner the price of the stock. The holders of the seats, moreover, were to have no share in the profits or income of the corporation. Charles Balmer, Edward Chase, and George W. Parker were appointed commissioners to open books for the subscription to the capital stock.

On the 5th of October, 1865, the building known as the Bowery Theatre, situated on Broadway, between Cherry and Wash Streets, was destroyed by fire, the only property saved being about one thousand dollars' worth of jewelry "which was in a drawer in the bar-room" and a few boxes of cigars. Mr. Esher, the manager, estimated his loss at ten thousand dollars, for half of which amount he was insured. The building belonged to the Rankin estate, and was valued at fifteen thousand dollars.

Another structure, subsequently known as the Broadway Museum, was erected on the site, and this too was damaged by fire in September, 1867. At that time "the long hall in the upper story" was occupied by a Mr. Hutchins, who conducted a waxworks exhibition.

Olympic Theatre.—During the autumn of 1865, Moses Flannigan, of St. Louis, and G. H. Metcalfe, of the "Champs Elysées Circus" in New York, determined to erect a "Hippotheatron" for circus performances, and on the 6th of December it was announced that plans had been prepared by George I. Barnett, architect, for a building to be situated on a lot sixty by one hundred and twenty feet, on Fifth Street opposite the Southern Hotel. The building was to be constructed after the pattern of a regular theatre, with a capacity for seating fifteen hundred people, and was to be adapted to both theatrical and circus performances, with a "complete ring and stage;"

the entrance to the stage representing a "palace with a gateway in the centre." The estimated cost of the building and its appointments was seventy-five thousand dollars. Associated with Messrs. Flannigan and Metcalfe were Charles Ellers, Charles Maurice, and Col. Klopper. The building was completed and opened under the management of Edwin Dean on the 23d of April, 1866, on which occasion the address was delivered by L. M. Shreve. The performance, given by Levi & North's company, was such as is usually seen in the ring of a circus, beginning with a "grand equestrian *entrée*," and embracing "single acts of equitation, fancy and comic," etc. It continued under this management for a short time, when Mr. Flannigan became involved, and borrowed thirty thousand dollars on the property from Dr. Gilbert R. Spaulding and David Bidwell, who were then managing theatres in Memphis, New Orleans, and Mobile. At the close of the season in 1867, Messrs. Spaulding and Bidwell found themselves in possession of the Olympic. The building was remodeled by Mr. Charles Spaulding, who in 1867 opened it under the management of Spaulding & Bidwell as a variety theatre. At the close of the season they entered into a contract with John W. Albaugh, who assumed the management during the season of 1868–69. In the spring of 1869 they purchased Albaugh's interest, and abolished the variety business. On the first Monday in September, 1869, the Olympic opened its doors for the first time as a legitimate theatre, under the management of Spaulding, Bidwell, and Charles B. McDonough. The actor who appeared on the following night was Dominick Murray.

OLYMPIC THEATRE,
Fifth Street, St. Louis, Mo.

At the opening of the season of 1871 the management changed to Spaulding & Pope, Messrs. Bidwell and McDonough disposing of their interest to Charles R. Pope, the actor. It continued under the management of Spaulding & Pope for five seasons, when Mr. Pope sold out his interest to Mr. Spaulding, who has continued the management alone ever since. The old Olympic was demolished on the 1st of April, 1882, and the present building, which is one of the most complete and magnificent theatres in the West, was erected on the old site, on Fifth Street near Walnut. The structure was completed Aug. 12, 1882. It is of Indiana cut stone, elaborately carved and ornamented, with galvanized iron cornice, and has a frontage of one hundred and fifteen feet on Fifth Street, with a handsome entrance twenty-eight feet wide.

St. Louis Opera-House.—Early in 1866 it was determined to erect a theatre, to be known as the "St. Louis Opera-House," on Fifth Street, on "the site of the old Gothic Church" of the Christian denomination, afterwards converted into a livery-stable, between Franklin Avenue and Wash Streets, and on the 25th of February the names of the following persons were announced as stockholders:

D. A. January, S. C. Sharpe, Lamb & Quinlin, S. G. Sears, Dr. J. R. Washington, R. B. Lee, Porter & Wolf, C. O. Dutcher, B. F. Hitchcock, Fogg, Miles & Co., J. E. Blythe, John Edwards, Erastus Wells, Froube & Co., A. H. Smith, W. P. Shryock, John O. Mellin, James Spore, A. B. Morean, James Gormley, H. C. Yeager, O. Hart, Weston Bascome, T. A. Buckland, James O. Broadhead, J. A. Moodie, John J. Outley, John O. Codding, O. W. Heyer, W. H. Collins, D. Miller, S. Withington, Faulknor & Lamb, Gustave Hohenthal, E. Sternberg, James H. Blood, C. A. Montross, and others.

The building was completed during the year, and in the latter part of September an informal gathering of the stockholders and their friends was held for the inspection of the new structure. The officers of the corporation at that time were R. F. Lamb, president; George F. Parker, vice-president; B. F. Hitchcock, secretary and treasurer; and H. Dunstor, director of amusements. The structure was opened to the public on the 1st of October, the stage manager, Mr. Fenno, delivering the opening address, after which the drama "Crime in the Metropolis" was presented. At first the building was used as a theatre and museum combined, but failing to prove remunerative was sold, the principal purchasers being A. K. Northrup, Mr. Lamb, of the firm of Lamb & Guinian, and others. In the spring of 1867 it was leased by J. & C. Esher, who reopened it as a theatre. Early in July the "Naiad Queen" was produced, but on the 12th the theatre was destroyed by fire. The loss was estimated to be two hundred thousand dollars.

Deagle's Varieties, subsequently known as the Adelphi Theatre, was originally a school-house, situated on the east side of Sixth Street, between Locust and St. Charles, but was leased from the school board by George Deagle, and transformed into a variety theatre. Its name was afterwards changed to the Adelphi, and Mrs. Deagle became the manager, but did not conduct it as a theatre longer than a few weeks. Early in 1877 the building was leased to George E. Finch & Co. for a livery-stable.

Pope's Theatre occupies the site and contains part of the four walls which inclosed the old Unitarian Church on the northwest corner of Olive and Ninth Streets. The church property was purchased by Charles R. Pope, who transformed the edifice into a handsome theatre. The church was built in 1851, and occupied as a place of worship regularly until 1879. The valedictory sermon was preached by Rev. Dr. John Snyder, Rev. Dr. W. G. Elliot assisting

POPE'S THEATRE.

in the services, July 8, 1879, only a few days before the work of demolishing the church was begun. In just seventy-two days after the workmen began, a magnificent theatre was completed. The building is of brick, with four-feet walls all round the outside, and will seat two thousand and eighty-seven persons. The cost of the theatre with an additional improvement in the summer of 1881, was one hundred and ten thousand dollars.

The theatre was opened Sept. 22, 1879. The usual address and prologue were delivered, after which a fine dramatic performance was given, with Lawrence Barrett, the tragedian, as *Hamlet*. The theatre is still managed by Mr. Pope, whose liberality and enterprise have made it one of the most attractive and popular places of amusement that St. Louis has ever known, and one of the most successful theatres in the country. When the theatre was erected an

opinion prevailed among superstitious people to a great extent that the transformation of a church into a place of amusement would be attended by failure, but in this case the enterprise has been favored, and Pope's Theatre continues to be one of the most flourishing institutions of St. Louis. Mr. Pope's aim from the beginning has been to maintain the highest standard of dramatic art, and to provide the most superior attractions to be obtained. In this respect he has met with very gratifying success. The Union Square Theatre Company of New York has frequently appeared at his house, where also the Madison Square Theatre plays are regularly domiciled. All the attractions from the Boston Theatre and the spectacular plays of Kiralfy Brothers have been produced at Pope's, besides the performances of many other first-rate companies. Its advantageous location opposite the custom-house has much to do with the popularity of the theatre, which is being continually extended and strengthened by the energy and business tact of the manager.

Charles R. Pope was born in 1832 at Orlishausen, a small village near Weimar, Saxony, celebrated as the home of Goethe and Schiller. His father's name was Roehr, and his mother's was Papst, or Pope, and on entering upon his career as an actor he decided upon taking the latter's family name (Pope) as being more euphonic. His father was an architect, and a gentleman of fine literary attainments. He enjoyed the friendship of Goethe, and was closely associated with all the men of prominence in Thuringia, a land well known to literature and art as the "Saxon Switzerland." He was an advanced thinker, and his republican impulses led him, in 1840, to emigrate to America. He settled at Rochester, N. Y., where may yet be seen many monuments of his taste and skill in the churches and public buildings of that beautiful city.

The son enjoyed superior educational advantages, and for nearly two years was under the tutelage of a Jesuit priest, from whom he obtained a knowledge of several languages. At the age of fourteen he entered a printing-office in Rochester, where he remained for three years, and soon learned to contribute to the columns of the paper he was serving as an apprentice-boy. During the last year of this engagement he visited a theatre, and from that moment he resolved to go on the stage. The actor who so greatly impressed him was A. A. Adams, a contemporary of Forrest, and a dangerous rival of that great actor, but who died before his genius had reached its full fruition. Young Pope became a member of the stock theatre where Adams was acting, and took the humblest parts, but he had a good voice, and was a careful student; consequently he made rapid progress. In a few months he left Rochester for Washington, and thence removed to New York, where for years he was connected with the Bowery Theatre as utility actor. He quickly advanced to the leading position in that now historic theatre, playing such parts as *Mercutio*, *Sir Thomas Clifford*, *Ludovico*, *Matthew Elmore*, etc. He played two great engagements as support to Edwin Forrest.

In 1854 he engaged with Ben De Bar as leading actor and stock star for the St. Charles Theatre, New Orleans. He first appeared as *Rolla*, and his impersonation was highly praised by both press and public. In the spring of the next year (1855) he arrived in St. Louis with Mr. De Bar, and played *Charles De Moor*, making a decidedly favorable impression. At the close of the season he returned to New Orleans, but came back to St. Louis in the following spring. He went on a tour to California with the well-known actress Julia Dean-Hayne, whose schoolmate he had been in Rochester. When not playing with her he starred as *Claude Melnotte*, *Othello*, *Hamlet*, *Ingomar*, etc., and was well received. This trip consumed about a year, at the end of which he returned to "the States" by steamer, and settled, with his widowed mother, at Buffalo, N. Y., where he spent several prosperous years. In 1858 he returned to St. Louis and engaged with Mr. De Bar as a stock star, playing up and down the river until the war, and performing acceptably all the leading *rôles* of the legitimate drama.

In 1861 he again visited California, and spent three years on the Pacific slope, starring in California, Washington Territory, Nevada, etc. In 1862 he essayed in San Francisco for the first time the part of *Charles De Moor* in German, and made a brilliant success. In 1863 he became interested in mining in Nevada, and for several months retired from his profession in the hope of becoming a millionaire, but the expectation was not realized.

In the fall of 1864 he returned to New York and played a star engagement at Niblo's Theatre, after which he made a tour of the country in legitimate characters.

In the spring of 1865 he appeared at the Stadt Theatre in the character of *Othello* in German, meeting with his usual success, and subsequently played the *rôle* in all the towns where there was a leading German theatre.

In 1867 he was married to Miss Margaret E. Macaulay, sister of the well-known actor B. Macaulay, of John T. Macaulay, the present manager of Macaulay's Theatre, Louisville, Ky., and of Gen. Daniel Macaulay, then the mayor of Indianapolis.

Charles R. Porter

In 1868, Mr. Pope, yielding to domestic considerations, became manager of the theatre at Indianapolis, and in 1869–70 associated himself with Ben De Bar, and for two years managed the St. Charles Theatre, New Orleans. In 1870–71 he managed the new Opera-House, Kansas City, and from thence removed to St. Louis at the solicitation of Dr. Gilbert R. Spaulding, and entered into partnership with him, becoming manager of the Olympic Theatre. As a manager, Mr. Pope was as successful as he had been as an actor. He always made money, even where others failed. His administration of the Olympic's affairs was efficient and prosperous, and owing to his exertions the people of St. Louis had the pleasure of seeing such stars as Sothern, Miss Neilson, the Florences, etc.

In 1874, having seen Salvini in "Samson," "The Gladiator," etc., and being strongly impressed with the wonderful genius of that great actor, Mr. Pope conceived the idea of appearing in some of his *rôles;* and Salvini, having been informed of Mr. Pope's abilities as an actor, and his physical fitness for the character of *Samson*, presented him with a copy of that play, which he was himself acting at the time with marked success. Mr. Pope engaged W. D. Howells, the novelist, to make a translation, and then played the leading *rôle* in all the prominent cities of the United States and Canada. He was everywhere received with signal expressions of approval. In 1874 he paid another visit to California, which was succeeded by a starring tour, in the course of which he played in the leading cities, meeting with great success as *Samson*, *Macbeth*, *Richelieu*, *Hamlet*, and other legitimate characters. In 1876 he severed his connection with the Olympic Theatre, and became manager of the Varieties Theatre, New Orleans, where he also played the usual legitimate *répertoire*.

In 1877 he visited Australia, and opened at the Theatre Royal, Melbourne, with *Richard III.*, giving a strong and vigorous interpretation of the character, which resulted in a long and interesting newspaper discussion, in which Mr. Pope's conception of the crook-backed tyrant was perfectly justified and his merits as an actor fully conceded. A round of "heavy" characters followed, and were thought to be the finest produced in that country since the tragic death of the great and justly-esteemed favorite Gustavus Brooke. He visited Sydney, Tasmania, etc., playing before the leading public men of the country, whose friendship he enjoyed. In 1878 he returned to the United States *via* the Sandwich Islands, stopping there a month, and playing before King Kalakaua, whom he had met during that monarch's visit to St. Louis some years before. Thence he proceeded to San Francisco, playing at the California Theatre, and then to Indianapolis.

A starring engagement throughout the country followed, and in the spring of 1879, having a family growing up which it was desirable to settle, he came to St. Louis, and reaching the conclusion that the city was in need of a first-class theatre, he determined to build one. The result is seen in the elegant "Pope's Theatre," at Ninth and Olive Streets, the success of which has been one of the theatrical marvels of the country. It at once secured the favor of the public and the profession, and among the attractions which have appeared there may be mentioned Salvini, Rossi, the Florences, John T. Raymond, Her Majesty's Italian Opera Company, Ideal Opera Company, Madison Square Theatre Company, Union Square Theatre Company, Daly's Company, Geistinger, Gallmeyer, Carlotta and Adelina Patti, etc. That its erection gave an impetus to theatre-building in St. Louis cannot be denied, as is evidenced by the beautiful structures that have since been constructed.

Among Mr. Pope's characteristics as an actor are a fine stage presence and an elegant carriage. Tall, muscular, and sinewy, he was chosen by Salvini as a fit representative of *Samson*, the Bible hero of superhuman strength. He possesses a rich, well-trained voice, and as a reader combines both melody and strength. A man of research and culture, he forms an intelligent and scholarly comprehension of the part to be studied, and presents it with superior grace and dignity. Of late years his talents as an actor have been subordinated to the cares and duties of management. In the latter capacity, as in the former, his efforts have been strenuously directed towards the elevation of the stage and of the theatrical profession. His position in the dramatic firmament is fixed, and his friends do not fear a comparison with the foremost actors of the American stage.

The Pickwick Theatre, on the northwest corner of Washington and Jefferson Avenues, was built in 1879–80, by J. R. Jennings, who first contemplated erecting a music-hall on the ground, but afterwards resolved to build a theatre, with a large hall on the first floor, and a summer-garden attached. The enterprise was completed May 13, 1880, when the theatre was opened with Nathal's English Opera Company. The theatre, including the garden, has a frontage of one hundred and eighty-three feet on Washington Avenue. It is built in the Renaissance style, of brick and stone, a spacious balcony extending along the east side capable of seating several hundred persons. A. A. Phillips supervised the construction of the building, and became the manager. In the spring of

1882 the garden attached was fitted up as an *al fresco* theatre, where entertainments are given during the summer season. This is beautifully illuminated during the performance, and presents a very attractive appearance. The seating capacity of the theatre proper is one thousand. During the summer season the *al fresco* theatre is leased to managers who furnish first-class attractions. The spacious hall is used for dancing, lectures, and other entertainments during the winter season the theatre is the hea ters for amateur theatricals.
